

Sticker Name

Love, Belief, Integrity, Knowledge

OUR VALUES

BE WHO GOD MEANT YOU TO BE AND YOU WILL SET THE WORLD ON FIRE.

LOVE

As we know we are loved by God, we will learn to love ourselves and care for our own body mind and soul.

We will show love to one another by being patient and kind, not by being rude, boastful or proud.

As one body in Christ, we will ensure that no member of our community is left out or left behind

BELIEF

We will encourage one another and build each other up.

We will let our light shine, making the world a better place for all.

KNOWLEDGE

We will value knowledge: intelligent hearts acquire knowledge, the ears of the wise seek knowledge.

AT SAINT BENEDICT WE DEVELOP THE CHARACTER OF OUR COMMUNITY THROUGH OUR CURRICULUM AND CULTURE.

INTEGRITY

We will always strive to make the right choice even when this is the harder path to take.

We will live and work sustainably.

MY EQUIPMENT PLEDGE

To succeed you must be prepared. Every night before school, you need to check your school bag to ensure that you have all the correct equipment.

Here is the list of equipment you need for every lesson:

- Black or blue pens
- Red pens (one or two)
- A ruler
- A pencil
- A scientific calculator (CASIO)
- A rubber
- A protractor
- Colouring pencils
- A sharpener
- Glue stick
- □ Your KNOWLEDGE BOOK

I pledge that I will always bring the correct equipment to class so that I can effectively learn.

Your signature:

Parent/carer's signature: Form tutor's signature:

BE WHO GOD MEANT YOU TO BE AND YOU WILL SET THE WORLD ON FIRE

ST CATHERINE OF SIENA

Respect

What is Respect?

Showing respect is an important part of life, and how you maintain relationships.

Three types of respect:

- 1. Respect Yourself
- 2. Respect Others
- 3. Respect the Planet

Why is respect important?

Receiving respect from others is important because it helps us to feel safe and to express ourselves. Respecting others helps maintain a peaceful world and encourages others to be better people. Showing respect to our planet allows us to maintain it for future generations.

Key words	Definitions
Respect	Due regard for the feelings, wishes and rights of others
Honour	The quality of knowing and doing what is morally right
Dignity	Sense of pride and self respect
Relationships	The way two or more people or groups connect and behave towards each other
Worthiness	The quality of being good enough

Rules and Sanctions

Key word	
Conduct	The way in which a person behaves.
Unacceptable	Something that is not suitable or appropriate.
Boundaries	The limits of something.
Sanction	A penalty or action taken when a rule or law has been broken.
Consistent	Acting in the same way overtime to be fair.

Build up a loving community

Behaviour

Rules and sanctions are things which guide our behaviour. We follow rules and regulations to be fair and consistent. Sanctions occur if we do not follow rules or deliberately break them.

Preparation for life

All aspects of life require us to follow rules. There are rules in school; rules in your family and home; rules to follow when crossing the road and using the bus and so on. Structure and rules allow us all to know what is acceptable and how to conduct ourselves. Rules reassure us

The law

We are all bound by the rules of the law. If we break the law, we face a raft of different sanctions. Ultimately, having rules in schools is about a lifelong understanding about what is right and what is wrong.

Kindness

Key word	
Empathy	Understand and share feelings of others
Compassion	Concern for misfortune of others
Compliment	Praise or congratulate others
Considerate	Thoughtfulness and sensitivity to others
Generous	Being liberal with things

Treat others how you would want to be treated yourself.

What is Kindness?

The quality of being friendly, generous and considerate

What does it mean to be kind?

To have empathy/sympathy, be compassionate, looking for good in people.

Why is it important to be kind?

Makes you feel happy, feel good about yourself Builds strong relationships Inspires others

How can we show kindness? Smile Hold the door open for somebody Say something nice (compliment) Invite somebody sat on their own to join you Manners Listen to somebody

Emotions

Key Words	
Feelings	An emotional state or reaction.
Relationships	The state of being connected with someone else.
Instinct	A fixed pattern of behaviour.
Intuitive	Using what you feel to be true even without conscious reasoning.
Reaction	Something done, felt or thought in response to a situation or event.
Identification	The act or process of identifying someone or something.

Work and play in harmony

What are emotions?

Emotions are biological states associated with the nervous system.

Thoughts, feelings, behavioural responses, and relationships all generate emotions.

An instinct or, intuitive reaction or feeling can create emotions

Identifying feelings

Making sense of what and how you feel is not always easy. To do this, we need to regularly check in with ourselves, making time to think about the feelings we are having and naming them. To do this, we need to think about our daily lives which may help us to see patterns of behaviour.

Not all feelings or emotions are bad or negative!

It is important to recognise when you feel happy; relaxed and good about yourself. Knowing what has led to these feelings can help us identify things we do not like which may cause us negative feelings.

3

Verbal Communication Treat each other with dignity and justice

Key Words	
Clarity	Vocal clarity means you do not speak too fast or too slowly. You consider carefully the words you mean and whether your listener can understand you.
Honesty	Honesty is speaking the truth.
Respect	Respect means that you accept somebody for who they are, even when they are different from you or you do not agree with them.
Appropriate	fitting the practical or social requirements of the situation.
Tone	a quality in the voice that expresses your feelings or thou ghts, often towards the person being spoken to or the subject being spoken about
Courtesy	politeness, good manners, or consideration for other people.

What is verbal communication?

Verbal communication is the use of words to share information with other people.

What does it mean to communicate effectively?

Every time you verbally interact with someone you are aiming to develop your understanding of the world; you may be wishing to obtain information, respond to a request or offer support or guidance to another. In every one of these exchanges you are representing your tutor, your family and most importantly yourself.

Why is it important to communicate effectively?

All young people need to develop good speech, language and communication skills to reach their full potential.

Speech, language and communication underpin the basic skills of literacy and numeracy and are essential for you to understand and achieve in all subjects.

How can we communicate effectively?

Make eye contact Speak honestly Consider your role within the school Consider the role of the person you are speaking to Think carefully why you need to speak to the person you are addressing Where necessary adapt as your conversation develops

Manners

Key Words	
Manners	A person's words or way of behaving towards others.
Respect	A regard for the feelings, wishes, or rights of others.
Listen	To take in what you hear.
Harmony	A time of behaving in one way to produce a pleasing effect.
Vocabulary	The range of words that we know and use.
Gratitude	The quality of being thankful; readiness to show appreciation for and to return kindness.

Loving...harmony...dignity

Treat your neighbour as yourself

The way in which we behave and speak towards others, reflects in their actions and words towards us.

Show the best side of yourself

When you speak to others, always show respect; be polite and thankful. Use the words 'please, thank you, sorry and pardon' when communicating with others.

Manners are for every situation

Every interaction has space for the use of manners: speech, emails, messages. Often when we get upset or angry we don't use manners. However it does calm a situation if you do.

Change

Key Words	Definition
Change	Make or become different
Organised	Make arrangements or preparations for an event or activity
Opportunity	A time set of circumstances that make it possible to do something
Coping	To deal effectively with something difficult
Embrace	Accept (a belief, theory or change) willing and enthusiastically
Strategies	A plan of action designed to achieve a long term or overall aim

Develop potential to the full

Find the positive

Don't allow yourself to become negative about the changes in your life. Change is good, keep repeating it.

Feeling vulnerable

Facing change can be very overwhelming, leaving you feeling very emotional. Make it your mission to be proactive and respond to it positively.

Talk about it

It's good to talk about change in your life. Focus on problems, solutions and the positives that change will bring. Try to avoid focussing on the negatives and letting emotions take over. 7

Study Skills – Ways to learn and remember

Self quizzing (look, cover, write)

Read through the information in the knowledge book that you want to learn

Cover the information up

Write down as much as you can remember

Use the knowledge book to;

a) Correct any mistakesb) Add any informationthat you forgot

1

Study Skills – Ways to learn and remember

Spacing

Complete a self quiz of the information you want to learn

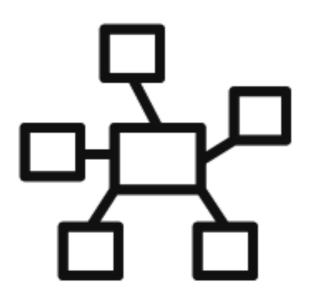

Wait for a day or 2 (depending on the deadline)

Repeat the self quiz.

The more times you can repeat this process, the more you will be able to remember without the book

Study Skills – Ways to learn and remember

Elaboration

Think about the topic that you are studying

Ask questions such as who, what , why , where , when how. Try to find the answers

See how these ideas connect - a mind map will be useful for this

Study Skills – Ways to learn and remember

Concrete Examples

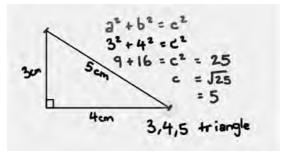

A concrete example is an clear example of an abstract idea

Pythagoras theorem example

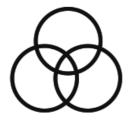

If you tried to explain Pythagoras's theorem to someone verbally, it would be quite hard to understand.

By using a concrete example that shows exactly how to use Pythagoras theorem, it is much easier to remember, understand and use

Study Skills – Ways to learn and remember

Interleaving

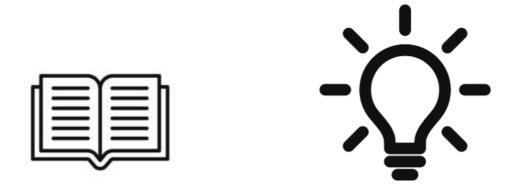

Research says we will actually learn more effectively if we mix our study skills up rather than using the same techniques all the time 1. Try to use different study skills rather than just one technique.

2. When revising for exams, prepare a revision timetable and try to revise more than one subject during a session

Study Skills – Ways to learn and remember

Dual Coding

As well as **writing** information down, **create an icon/ drawing** too for individual facts. This helps your brain to remember the information

5

Topic; Friendship - what makes a good friend?

Key Vocabulary	
Friend	A person with whom one has a bond of mutual affection, typically one exclusive of sexual or family relations
Positive	Happy or hopeful, or giving cause for happiness or hope
Respect	The feeling you show when you accept that different customs or cultures are different from your own and behave towards them in a way that would not cause offence
Help	To make it possible or easier for someone to do something, by doing part of the work yourself or by providing advice, money, support etc.
Qualities	A characteristic or feature of someone or something
Peer pressure	The strong influence of a group, especially of children, on members of that group to behave as everyone else does

Key Knowledge

The fundamentals of a good friendship are;

Acceptance (be yourself) Respect (value your opinions) Listening (care about what is being said and not talking over someone) Trust (being able to confide in someone) Honesty (but be mindful of someone's feelings)

Friendships change and evolve over time

5 ways to make your friendships last;

Be flexible. Be open to the fact that your friendships will change and grow over time.

Stay committed. Commit to staying connected with your friends even when you are far apart.

Be patient with your friends.

Communicate with your friends.

Maintain balance.

Year 9 Personal Development Curriculum

Topic; Health and well being Relationship between habit and dependence

Key Vocabulary	
Habit	A regular activity that is repeated and is hard to give up
Dependence	The state of being reliant or influence by something
Addiction	A condition of being addicted to a particular substance or activity
Symptoms	A feature of a medical and physical condition
Side -effects	An effect form drug or medical treatment
Reliance	Dependant on someone of something

Key Knowledge

How do you know if you have developed an unhealthy habit or if you are actually suffering from addiction? Determining the difference between the two can be difficult, since both grow out of repeated behaviours.

One notable difference between habit and the disease of addiction is the amount of time and effort required to change the behaviour. Altering habits requires minimal effort, time, and attention.

Addiction is more complex. The disease of substance abuse manifests symptoms of intense craving, loss of impulse control, and behavioural flexibility. Addictions are physiologically developed and reinforced in the brain each time we use drugs or alcohol.

Energy Drinks

An energy addiction involves drinking excessive amounts of these beverages without being able to moderate your intake. It may be characterized by addictive symptoms similar to those of a drug addiction, and it's linked to various health issues.

Topic: Being assertive in friendships

Key Vocabulary	
Assertive	Having and/or showing a confident and somewhat forceful personality.
Passive - aggressive	Denoting a type of behaviour or personality characterized by indirect resistance to the demands of others and an avoidance of direct confrontation.
Confidence	Having faith and belief in someone / something.
Self - assured	Having faith in your own abilities and character.
Communication	Being able to speak confidently and exchange information through speaking, writing and any other medium.
Aggressive	Not being an approachable individual and reacting to situations often through violent behaviours or confrontation.
Friendships	Friendly relation, or attachment, to a person, or between persons; affection arising from mutual esteem and good will; friendliness; amity; good will.

Key Knowledge

What Is Assertive Communication?

Assertive communication is defined as "the ability to speak and interact in a manner that considers and respects the rights and opinions of others while also standing up for your rights, needs, and personal boundaries"

Assertiveness is an effective and non-confrontational way of expressing one's disagreement with a particular situation or concept.

Know how to stand up for yourself and others in relevant situations:

- justify and make relevant decisions
- understand two view points

- make your point known without being rude or dismissive.

The 3 C's when it comes to being assertive: confidence clear controlled.

Create distance from unhealthy friendships and be a good listener.

Year 9 Personal Development Curriculum

Topic: The influence of peers

Key Vocabulary	Definition
Peer	A person of the same age, status, or ability as another specified person.
Pressure	The use of persuasion or intimidation to make someone do something.
Peer pressure	The influence from members of the peer group that cause the individual to feel pressure to behave in a certain way.
Influence	The ability to have an effect on the character, development, or behaviour of someone else.
Consequences	a result or effect, typically one that is unwelcome or unpleasant
Persuasion	Convincing someone to do or believe something.
Intimidation	The action of threatening or scaring someone.

Key Knowledge

It is important to recognise that friendships and peers can have an influence on your behaviour.

You can develop strategies to help cope with peer pressure, managing it in person and online.

Peers can play a role in supporting one another to resist pressure and influence.

It is important to seek supportive friendship groups as peer approval can generate feelings of pressure and lead to increased risk-taking; which is harmful.

Positive effects of peer pressure include:

a sense of belonging and support increased self-confidence introduction to positive hobbies and interests reinforcement of positive habits and attitudes.

Negative effects of peer pressure include:

pressure to use alcohol, cigarettes or drugs pressure to engage in risk taking behaviours distraction from schoolwork distance between family and existing friends drastic changes in behaviour and attitudes. 5

Substance Misuse

Key Vocabulary	Definition
Drugs	A medicine or other substance which has a physiological effect when eaten or otherwise introduced into the body.
Recreational drugs	Chemical substances taken for enjoyment, or leisure purposes, rather than for medical reasons.
Substance misuse	Refers to the use of psychoactive substances in a way that is harmful or hazardous to health.
Legal high	A substance with stimulant or mood- altering properties whose sale or use is not banned by the law.
Possession	The crime of having one or more illegal drugs in one's possession , either for personal use, distribution, sale or otherwise.
Supply	"Knowingly taking part in" a wide range of activities involved in the distribution , provision and/or sale of illegal drugs

Where to get help: Talk to Frank: 0330 123 6600

https://www.talktofrank.com/

Year 9 Personal Development Curriculum

Topic; Medicinal & Recreational Drugs

Key Vocabulary	
Drug	A chemical substance that affects the way that your body works
Medicinal drug	A drug used to cure illness or relieve symptoms.
Recreational drug	A drug used to for pleasure
llegal	Doing something that is forbidden in law
Addictive	A substance or activity that will cause people to become addicted (dependent on it)
Stimulants	A substance that raises levels of physiological or nervous activity in the body.
Sedatives	A drug taken for its calming or sleep- inducing effect.

Key Knowledge

Which are the most commonly used drugs in the UK? Caffeine is the UK's favourite drug- it is contained in tea, coffee, many soft drinks and colas, some confectionery and included in many medicines.

The most commonly used drug is **alcohol**, followed by the **nicotine** in cigarettes and other tobacco based products.

When it comes to illegal drugs, the most commonly tried drug by far is **cannabis.** This is followed by **cocaine** and **ecstasy**.

What to do when you feel pressured to take drugs: Remember that you're not alone.

Work out where you stand on issues like drugs and alcohol.

Think about how you'd like to respond when someone offers you drugs so you know what to say.

Try to understand who's offering you the drugs and why.

Say no firmly but clearly and don't feel like you need to change your mind.

Take a look around- you'll soon see that you're not the only one worrying about what other people think of you.

If you are worried about your friends being pressured, don't keep it to yourself, talk to them, or someone you trust.

If you're finding it hard to be yourself within your group, take a step back, and think about whether it's time to find a new crowd to hang out with.

Key Knowledge

Recreational drugs are chemical substances taken for enjoyment, or leisure purposes, rather than for medical reasons.

Alcohol, tobacco and caffeine can be classed as recreational drugs.

Recreational drugs are usually started to provide pleasure or improve life in some way. However, they can lead to addiction, to health and social problems and to crime.

Most are illegal, so their use comes with all the consequences of breaking the law. If you, or someone you know, have a problem with drugs, there are lots of ways to obtain help

Drugs are very addictive and can have various impacts on the body such as stimulants, depressives & pain relief.

Taking drugs can lead to serious illnesses such as:

Respiratory depression, constricted pupils nausea. slow and shallow breathing, clammy skin, convulsions, coma, possible death. 7

Topic; Risks of tobacco, nicotine and e-cigarettes & alcohol

Key Vocabulary	
Addiction	Means not having control over doing, taking or using something harmful.
Passive smoking	Is also known as second-hand smoke (SHS) or Environmental smoke.
Lung cancer	Uncontrolled cell growth (a tumour) in the lungs
Emphysema	Chronic lung disease also known as lung rot
Heart attack	When a part of the heart muscle dies
Stroke	Blood clot in the brain
Gangrene	When a part of the body becomes starved of oxygen and starts to rot
Unit	An alcoholic unit of measurement
Depressant	The effect alcohol has on your system
Intoxication	When the body is poisoned and the person's physical and mental control is reduced.
Alcohol abuse	Excessive use of alcohol
Binge drinking	Drinking 5 or more alcoholic units in one go

Key Knowledge

Smoking and alcohol are both legal but extremely addictive.

Smoking can cause:

Lung disease Cancer Emphysema Gangrene Stroke Heart disease

Alcohol

Is also very addictive and is a depressant.

Men should drink no more than 3-4 units per day Women should drink no more than 2-3 units per day

The negative impact of alcohol can include:

Anti-social behaviour Throat cancer Cirrhosis of the liver Alcoholism Debt Injuries Family breakdown Stress Underage sex Violence

9

Year 9 Personal Development Curriculum

Gang Exploitation

Key Vocabulary	Definition
Exploitation	The act of selfishly taking advantage of someone or a group of people in order to profit from them
Grooming	When someone builds a relationship, trust and emotional connection with a child or young person so they can manipulate, exploit and abuse them
County lines	Where illegal drugs are transported from one area to another, often across police and local authority boundaries

Where to get help:

NSPCC: https://www.nspcc.org.uk/what-is-childabuse/types-of-abuse/gangs-criminal-exploitation/ Childline – 0800 1111 www.childline.org.uk #knifefree website - <u>www.knifefree.co.uk</u> Fearless (crime stoppers) – <u>www.fearless.org</u> Victim support – <u>www.victimsupport.org.uk</u>

Key Knowledge

What is a gang?

Some gangs take part in criminal activity and might try to get you involved with them. Sometimes you can be forced to commit a crime or do things that are unsafe.

Why do people join gangs?

fitting in with friends and other gang members having the same interests as other people, like sports or music feeling respected and important to be protected from bullying or from other gangs making money from crime or drugs gaining status and feeling powerful

Is it illegal being in a gang?

Being in a gang isn't against the law. But being involved with illegal activities (that some gangs do) could be an offence.

You could go to prison or end up with a criminal record if you're involved with:

gun and knife crime violence or harassment turf wars or postcode wars carrying, using or selling drugs theft or other illegal activities assault of others.

If you have a criminal record you might not be: accepted into a university, college or higher education able to get a job, internship or do work experience allowed to travel to some countries, like the USA.

Setting goals/ what are my goals?

Key Vocabulary	Definition
Talent	A good or beneficial quality or attribute of a person or thing."
Quality	Advantage, asset, talent, gift, skill, specialty.
Strength	The ability to be able to do something well
Motivation	A reason or reasons for acting or behaving in a particular way.
Attitude	A settled way of thinking or feeling about something

Key Knowledge

Personal goals are the expressions of the things you want to achieve for yourself in life, whether those are business goals, family goals, or lifestyle goals. When you think about what you want to achieve in life and set goals towards achieving them, you will become more selfmotivated and positive.

List of strengths;

Able to handle conflict Able to make decisions Adaptable and willing to change Using IT Creative Writer Artistic Committed Competitive Organised Creative Determined Enthusiastic Able to use initiative Clear judgement Quick thinking Confident Sensitive to other people and situations Has strength of will Manage money Athletic Punctual Speak another language

Year 9 Personal Development Curriculum

Topic: Goal Setting for GCSEs

Key Vocabulary	
GCSE	The General Certificate of Secondary Education (GCSE) is an academic qualification in a particular subject, taken in
Goal	England, Wales, and Northern Ireland. the object of a person's ambition or effort; an aim or desired result.
Attainable	achievable.
Relevant	closely connected or appropriate to what is being done or considered.
Prepared	to be ready.
Ambition	desire and determination to achieve success.
Organisation	planning and arranging.
Qualification	a pass of an examination after completing a course.
Obstacle	a barrier that prevents progress.

Key Knowledge

GCSE is an academic grading criteria and it holds a total of 9 grades.

They are classed as Level 2 Qualifications

GCSEs are calculated by a mixture of coursework and exams and the grades have to be specific in order to opt for a better career! (The Parent Point)

There are almost 50 different subjects offered in GCSE courses to choose from.

GCSE was originally introduced back in 1986, as a replacement for the previous O levels and CSE systems by merging both of these together.

Universities and employers will look at look at GCSE grades in Maths, English and, sometimes, Science.

11

Topic: Post 16 opportunities

Key Vocabulary	
Vocation -	A strong feeling of suitability for a particular career or occupation.
Career -	An occupation undertaken for a significant period of a person's life and with opportunities for progress
Job	A paid position, not necessarily part of or leading to a career.
Apprenticeship	An apprenticeship is a real job where you learn, gain experience and get paid. You're an employee with a contract of employment and holiday leave
A-levels	Academic qualifications you can complete at college or 6th form.
Vocational Qualifications	Vocational qualifications are work-related qualifications that can be studies at 6th Form or college in subjects such as Business, Construction, Health and Social care etc.

Key Knowledge

Post 16 opportunities refers to your plans for education or career opportunities after you have left school. The main post 16 options are:

Full time education at a school or college e.g. A Levels or Vocational Qualifications;

A 'T Level'- New two year Level 3 qualifications - equivalent to 3 x A levels, delivered in college and related to a job role

An apprenticeship or traineeship Part time education or training - this must be in addition to employment, self-employment or volunteering for a minimum of 20 hours per week.

Year 9 Personal Development Curriculum

Topic: What is Marriage

Кеу	
Vocabulary	
Marriage	A legal Union between a man and a woman (same sex couples in England / Wales / Scotland / Northern Ireland)
Forced marriage	a marriage where one or both people do not consent to the marriage and pressure abuse is used.
Arranged	A marriage planned or agreed
marriage	by families or guardians of the couple concerned, to which both individuals' consent.
Nullified	Make legally null and void; invalidate

Key Knowledge

Marriage is legally binding

The legal age of marriage is 18

A couple / individual can get married at the age of 16, with parental or legal guardian's consent

Forced marriage is illegal

Arranged marriage is legal

A couple or person in a civil partnership cannot remarry or enter another civil partnership without having it legally nullified.

A marriage should always be entered into freely.

Reasons to get married – love / friendship / to build a family / happiness / share a life together

Reasons not to get married – getting too old / because of unplanned pregnancy / to prove something / to take care of someone / feel self-worth.

A marriage should be entered into freely – with consent, with choice, legally, with trust and your decision.

Different Types of relationships

Importance of marriage in the Catholic Church

Marriage is a sacrament An outward way of showing your love and commitment to another person

For Catholics sex should only occur within a marriage as humans are in God's image it makes the act sacred and essential to the marriage

Vows are taken before God

Allows for a stable environment for children to be brought into the relationship

Same Sex Marriage/Civil Partnership

Civil Partnership

Civil Partnership came into law in England and Wales in 2004

A Civil partnership is a legally recognised union with similar rights to marriage for same sex couples

Same Sex Marriage

Same Sex Marriage came into law in 2013 but the first marriages did not take place until March 2014

It allows Religious Organisations to opt into same sex marriage

It also protects Religious Organisations from legal action if they do not want to perform same sex marriage

It allows those with civil partnerships to change to married status

It allows one married partner to change their legal gender without having to end their marriage

15

Contraception

Key Words	
Conception	The moment that a pregnancy begins The fertilization of an egg.
Contraception	Something used to prevent pregnancy from occurring
Contrary	Totally against an idea or belief
STI	Sexually Transmitted Infection. An infection that is easily passed from one to another through sexual activity

Key Knowledge

Contraception is the name given to any method used to prevent becoming pregnant or 'conceiving' from sexual relationships

Contraception is used to prevent accidental or unwanted pregnancy

Some contraception is used to prevent passing on of STI's Contraception is about reducing the risk of sexual activity to enable its use more for pleasure than for reproduction No method of contraception is 100% effective

Some contraception is designed to prevent any sperm from being able to penetrate and fertilise the egg.

Some contraception is designed to prevent egg production Some contraception is designed to prevent the fertilised egg attaching to the womb.

Most contraception is temporary but some are permanent It is **contrary** to the idea of **conception**

Contraception - Types

Туре	How it works
Abstinence	Not engaging in any sexual activity
Cap / Diaphragm	A circular dome made of thin, soft silicone that's inserted into the vagina before sex.
	Covers the cervix so sperm cannot get into the womb to fertilise an egg.
Combined Pill	Often just called "the pill"
	Contains artificial versions of female hormones oestrogen and progesterone, which are produced
	naturally in the ovaries.
Condoms	The only type of contraception that can both prevent pregnancy and protect against STI's
	There are 2 types:
	external condoms, worn on the penis - sometimes called male condoms
	female condoms, worn inside the vagina - sometimes called female condoms
	Made from very thin latex, designed to stop semen from coming into any contact with the other person.
Contraceptive	A small flexible plastic rod placed under the skin in your upper arm by a doctor or nurse.
Implant	Releases the hormone progestogen into your blood to prevent pregnancy lasts for 3 years
Contraceptive	A small sticky patch that releases hormones into your body through your skin to prevent pregnancy
Patch	
Contraceptive	Releases progestogen into your bloodstream to prevent pregnancy.
implant	Lasts for 8 - 13 weeks depending on type

Contraception - Types

Туре	How it works
Intrauterine device (IUD) "Coil or Copper-coil"	A small T-shaped plastic and copper device that's put into the womb by a doctor or nurse. It releases copper to stop you getting pregnant, and protects against pregnancy. Lasts between 5 and 10 years. It's sometimes called a "coil" or "copper coil".
Intrauterine system (IUS)	A small, T-shaped plastic device that's put into the womb by a doctor or nurse. It releases the hormone progestogen to stop you getting pregnant. It lasts for 3 to 5 years, depending on the brand.
Natural Family Planning	A method of contraception where a woman monitors and records different fertility signals during her menstrual cycle to work out when she's likely to get pregnant.
Progestogen-only pill	Prevents pregnancy by thickening the mucus in the cervix to stop sperm reaching an egg. One brand can also stop ovulation. Needs to be taken every day for it to work.
Vaginal Ring	Inserted in the vagina and releases hormones into the blood stream to prevent pregnancy
Female Sterilisation	An operation to permanently prevent pregnancy. The fallopian tubes are blocked or sealed to prevent the eggs reaching the sperm
Male Sterilisation "Vasectomy"	A surgical procedure to cut or seal the tubes that carry a man's sperm.

STI's - Sexually Transmitted Infections

Keywords	
Common STI's	Types of infections that are caught through sexual contact
Chlamydia	A bacterial infection. The bacteria are usually spread through sex or contact with infected genital fluids
Gonorrhoea	Gonorrhoea is a sexually transmitted infection (STI) caused by bacteria called Neisseria gonorrhoeae or gonococcus.
Genital Warts	Are small fleshy growths, bumps or skin changes that appear on or around the genital or anal area
Genital Herpes	Asexually transmitted infection (STI) passed on through vaginal , anal and oral sex.
Pubic Lice	Pubic lice , also known as crabs , are very small insects that infest your genital area
Scabies	Intense itching, especially at night; a raised rash or spots
Syphilis	The main symptom is a small, painless sore or ulcer called a chancre that you might not notice

Key Knowledge

STI is a Sexually Transmitted Infection

This is an infectious disease that is often spread through sexual activity

What I need to know

Anyone who is sexually active is at risk of STI's The risk of getting an STI can be reduced by:

Limiting sexual partners and activity

Using Barrier contraception e.g condoms

Abstaining from Sexual activity outside of a stable relationship

If you have an STI you need to:

Stop engaging in sexual activity until you are free from infection

Seek medical advice and treatment

Inform previous sexual partners who may have been infected.

19

Contraception – Religious view

The Catholic Church

The Catholic Church **does not** support the use of artificial contraception

The Catholic Church does accept Natural Family

Planning and abstinence as ways to control pregnancy All sexual activity is **naturally driven to procreation** and not towards self satisfaction.

To prevent what is a natural outcome prevents the Will of God.

The Church teaches that any act of sexual activity that is not open to new life is a misuse of love.

Any sexual activity outside of married life is considered by the church as **promiscuous.**

The Church teaches that sexual love is between married persons with the intention to bring new life onto the earth. "When couples turn to contraception ... they manipulate and degrade human sexuality – and with it themselves and their married partner – by altering its value of total self-giving...

...This leads not only to a positive refusal to be open to life but also a falsification of the inner truth of conjugal love, which is called upon to give itself in personal totality."

> Pope John Paul II Familiaris Consortio

Contraception – Religious view

The Church of England

The Church of England and wider Anglican community **do not promote, but do accept** the use of artificial contraception.

This has only been **since the 1930's**, before this they were also against its use.

Although they accept its use, **they uphold the Christian principles** of sexual activity being for the main purpose of life.

The Conference agrees that other methods may be used, provided that this is done in the light of Christian principles.

Lambeth Conference, 1930

Islam

Islam is fundamentally **pro-family**, and regards **children** as a gift from God.

Islamic teaching forbids sexual activity outside of marriage, and should only **understand its** contraception laws within the confines of marriage.

Most Islamic thinking permits the use of contraception within marriage

Islamic Law forbids the permanent types of contraception

Islamic law **forbids the use of early abortion** as a form of contraception

21

Different Types of Relationship

How the media portrays sex

There are many types of media that young people are influenced by today;

TV and Film

Represents sex and sexual encounters in many different ways

However within the film and TV industry there is a huge difference between the way male and female nudity is shown

Social Media

With access to social media anywhere on mobile devices people can post and send items that are not reflective of either the male or female body

This can also lead to misinformation and unrealistic expectations

Legal rites of marriage and long term partnerships Marriage

If one partner dies before making a will some or all of the estate will go to the living partner Responsibly to support each other financially You have the right to stay in the marital home until a court tells you otherwise Items belong to both partners Married couples can claim a marriage allowance

Living Together

If one partner dies before making a will you may have to go to court to claim some of the estate or it may be passed onto other family

No responsibly to look after the other financially

If your partner owns the house and asks you to leave you may have no right to stay

Items usually belong to the person who purchased them

Topic; The family Unit

Key Vocabulary	
Family unit	A group of one or more parents and their children living together as a unit
Single parent family	a parent who lives with a child or children and no husband, wife, or partner.
Civil partnership family	- is a legal relationship which can be registered by two people who aren't related to each other (same or opposite sex) who are bringing up a child or children together
Cohabiting family -	couple would be defined as a couple who aren't married but who are living together and raising a child or children together.
Parental Responsibility	- attempts to focus on the parent's duties towards their child rather than the parent's rights over their child

Key Knowledge

What is the role and responsibility of a parent?

Parental responsibility means the legal rights, duties, powers, responsibilities and authority a parent has for a child and the child's property.

A person who has **parental responsibility** for a child has the right to make decisions about their care and upbringing.

What does successful parenting look like ?

Being a **good parent** means you need to teach your child the moral in what is right and what is wrong. Setting limits and being consistent are the keys to **good** discipline.

Be kind and firm when enforcing those rules. Focus on the reason behind the child's behaviour

Year 9 Personal Development Curriculum

Topic; Homelessness

Key Vocabulary	
Homelessness	Lacks a fixed, regular, and adequate night-time residence
Sofa Surfing	The practice of staying temporarily with various friends and relatives while attempting to find permanent accommodation

Key Knowledge

Kinds of situations why you can become homeless – they don't have to be all negative – a lot of famous people have had periods of their life, to pursue their career. moving in with partner, pursuing a career, moving out to continue education, separation, job loss.

Why might a young person become homeless – or... choose to leave their family home away from parent or guardian. To take on an apprenticeship, live with partner, education, family fall out, separation or divorce and move of house. Cramped living conditions or volatile parent / child relationship.

Benefits of a young person leaving the home – being more independent / apprenticeships / education or scholarships / moving in with a partner

Challenge of a young person leaving the home – financially difficult, who is going to pay for the necessity's food, phone, housing or rent, leaving themselves vulnerable if they have nowhere to stay and being on the streets.

Topic; Conflict

Key Vocabulary	
Conflict	Is a disagreement where there is tension. A disagreement becomes 'conflict' when the two people get tense and take a position. For example, starting to argue.
Disagreement	A dispute, where there is a lack of agreement and a difference of opinion. Not all disagreements lead to conflict.
Inevitable	A situation which is certain to happen, it is unavoidable. Conflict is an inevitable part of our lives.

Key Knowledge

Kinds of situations why you can become

homeless – they don't have to be all negative – a lot of famous people have had periods of their life, to pursue their career. moving in with partner, pursuing a career, moving out to continue education, separation, job loss.

Why might a young person become homeless -

or choose to leave their family home away from parent or guardian. To take on an apprenticeship, live with partner, education, family fall out, separation or divorce and move of house. Cramped living conditions or volatile parent / child relationship.

Benefits of a young person leaving the home -

being more independent / apprenticeships / education or scholarships / moving in with a partner

Challenge of a young person leaving the home -

financially difficult, who is going to pay for the necessity's food, phone, housing or rent, leaving themselves vulnerable if they have nowhere to stay and being on the streets.

25

Year 9 Personal Development Curriculum

Topic - Health and Wellbeing (Mental Health)

Key Vocabulary	
Mental Health	A person's condition with regard to their psychological and emotional well- being.
Emotional Wellbeing	Your ability to understand the value of your emotions and use them to move your life forward in positive directions. It involves identifying, building upon, and operating from your strengths rather than focusing on fixing problems or weaknesses.
Misconceptions	a view or opinion that is incorrect because based on faulty thinking or understanding.
Discrimination	The unjust or prejudicial treatment of different categories of people, especially on the grounds of race, age, sex, or disability.

Key Knowledge

One in four people experience a mental health problem each year.

This shows that mental health problems are more common that you may think.

The same statistic for children is one in eight which is less common, although this figure is growing

Most treatment for people with mental health conditions is community based, including talking therapy, group counselling or medication.

Some mental health conditions require treatment in a specialised treatment centre or hospital, but these are almost always voluntarily chosen by the person involved or their family

Topic – Health and Wellbeing (Diet)

Key Vocabulary	
Health	A person's mental or physical condition
Healthy behaviours	Actions taken by individuals to aid their health
Self-esteem	Your own feelings about your sense of worth, value or ability.
Body image	How you see yourself when you look in the mirror. How you picture yourself in your mind.
Advertising	The activity or profession which produces materials to persuade people to be influenced often to buy products
Social media	Websites and Apps which allow users to create/share content and participate in social networking
Influence(s)	The ability to have an effect on the behaviour of someone or something
Peer Pressure	The influence from people your own age. This can be positive and negative.

Key Knowledge

There are **seven** essential factors for a **balanced diet**. They are carbohydrates, protein, fat, fibre, vitamins, minerals and water

We should eat at least 5 portions of a variety of fruit and vegetables every day

It is harder to make healthy food choices if they are not offered. Often junk food is advertised exclusively. This increases the chance of someone selecting unhealthy options, as people need to actively avoid junk food when it is offered, instead of choosing healthier options.

Advertisers often use the need for peer approval to sell products. Products that are advertised may be more popular and young people can feel pressure to buy these products.

This pressure in itself can be damaging to health. It can also mean we compromise our health in other ways, as we have less income available for the things which support our health.

Money cannot make a person healthy (e.g. overwork to attain more, overindulgent lifestyle). However, lack of funds to ensure good accommodation, food to eat, the ability to engage in health-promoting leisure activities etc. does have an impact. Improved employment prospects, thereby reduce health inequalities.

Hobbies and interests can have a positive or negative impact on body image and mental health. For example, hobbies can provide self-esteem if we do well at them and/or enjoy them with friends. 27

Year 9 Personal Development Curriculum

Topic - Health and Wellbeing (Healthy Choices Community Level)

14	
Key Vocabulary	
Health	A person's mental or physical condition
Healthy behaviours	Actions taken by individuals to aid their health
Health Promotion	An activity that seeks to improve a person's or population's health by providing information about and increasing awareness of at-risk behaviours associated with various diseases, to reduce those behaviours.
Strategies	A plan of action to achieve something
Social Action	Individual or group behaviour that involves interaction with other individuals or groups, especially organised action toward social reform
Social Reform	When individuals and groups seek to change the social and political views of groups who appear to be treated unfairly.

Key Knowledge

Social action and legislation can make a difference to local and national communities.

The Middlesbrough literacy project - high levels of literacy linked to improved communication which increases self-esteem and provides better ability to access opportunities (e.g. better jobs and housing) which in turn promotes better health. http://www.health.org.uk/blog/building-literacybetter-health-middlesbrough

Sugary drinks tax to be paid by soft drinks companies on their products from April 2018.

https://www.gov.uk/guidance/soft-drinks-industrylevy

Topic – Health and Wellbeing (Sleep)

Key Vocabulary	
Health	A person's mental or physical condition
Sleep	A state marked by reduced consciousness and activity of the skeletal muscles, and depressed metabolism. People normally experience sleep in patterns that follow four observable, progressive stages.
Rest	To stop work or movement in order to relax, sleep, or recover strength.
Relax	Rest from work or to engage in an enjoyable activity so as to become less tired or anxious
Routine	A regular sequence of actions that you follow. For example, your school routine, your timetable, lunch sittings. Sleep routine – when you sleep and wake
Bedtime	The usual time you go to bed
Caffeine	Usually a drink which is made from tea/coffee plants. These drinks stimulate (fuel) the nervous system.
Habit	Something you do which is hard to give up

Key Knowledge

Teenagers need approximately 9 hours of sleep per night.

Many are averaging approximately 7 hours. After puberty, the internal clock of an adolescent undergoes a biological shift of up to 2 hours later. The time that teenagers naturally wake up also shifts by up to 2 hours later.

Teenagers will benefit from a regular sleep schedule.

The time before bed (at least 60 minutes) should allow for winding down and must avoid screen use (e.g. TV, phones, tablets etc.).

Teenagers should avoid caffeinated or highsugar products such as fizzy drinks, tea or coffee and sweets.

Spending time outdoors every day (especially in the morning) can be beneficial to sleep.

29

Year 9 Personal Development Curriculum

Topic – Health and Wellbeing

(Lock the phone away)

Key Vocabulary	
Teen Tendonitis	A condition which causes pain in the hands, back and neck
Stress	A state of mental or emotional strain or tension resulting from adverse or very demanding circumstances
Anxiety	A feeling of worry, nervousness, or unease, typically about an imminent event or something with an uncertain outcome
Cyber- bullying	the use of electronic communication to bully a person, typically by sending messages of an intimidating or threatening nature

Key Knowledge

Excess messaging can lead to Teen Tendonitis (TTT). It causes pain in the hands, back, and neck due to poor posture. According to a five-year cohort study, excessive mobile phone usage is known to result in bone disorders

You can spend all day talking or texting instead of doing productive things. Studies have proven that teens who spend too much of their time with their mobile phones are more prone to stress, anxiety, and depression.

Research has also found that excessive use of smartphones may result in an increased risk of mental health problems.

Keeping mobile phones nearby while sleeping to respond to texts and calls and remain reachable around the clock. This may lead to sleep interruption and disruption.

Relying on texting as a primary mode of communication can increase anxiety in teens. Texting is instantly gratifying, but it also produces anxiety. The instant reply by a friend can bring joy and elation. But in case of delayed response or no response, this same pleasure can turn into disappointment.

It can turn into an obsession to check messages and reply immediately. It may also increase anxiety by creating an illusion that they had received a message even when there was no message, making them frequently check their phones

Topic – Health and Wellbeing (First Aid)

Key Vocabulary	
First Aid	Help given to a sick or injured person until full medical treatment is available.
First Aid Kit	A small box containing items such as bandages, plasters, and antiseptic wipes for use in giving help to a sick or injured person until full medical treatment is available
Preserve	To keep something as it is, especially in order to prevent it from decaying or being damaged or destroyed.
Prevent	To stop something from happening or someone from doing something
Protect	To keep someone or something safe from injury, damage or loss
Defibrillator	A defibrillator is a device that gives a high energy electric shock to the heart of someone who is in cardiac arrest

https://www.bhf.org.uk/how-you-canhelp/how-to-save-a-life/defibrillators

Key Knowledge

The three main aims of First Aid are (The Three Ps) to;

Preserve Life,

Prevent the condition getting worse and

Promote Recovery.

The Roles and Responsibilities of the First Aider are;

Manage the incident and ensure the continuing safety of themselves, bystanders and the patient

Assess victims and find out the nature & cause of their injuries

Arrange for further medical help or other emergency services to attend

If trained, prioritise casualties based upon medical need

Provide appropriate first aid treatment as trained

If able, make notes/observations of casualties

Fill out any paperwork as required

Provide a handover when further medical help arrives

Defibrillators can be found in all public buildings (including schools) - you can find locations in here:

https://www.heartsafe.org.uk/aed-locations

Year 9 Personal Development Curriculum

Topic – Relationships and Expectations (Intimate Relationships)

Key Vocabulary	
Relationship	The way in which two or more people or things are connected, or the state of being connected
Intimate Relationship	An intimate relationship is personal relationship that involves physical or emotional intimacy. Although an intimate relationship may be a sexual relationship, it may also be a non-sexual relationship involving family, friends, or people you just know.
Assertive	Someone who is assertive behaves confidently and is not frightened to say what they want or believe.

Key Knowledge

Saying No assertively is ok.

Remember that you always have a right to say 'no'.

You are saying "no" to the request - not rejecting the person

If the request takes you by surprise or you need more information you should ask.

If you are feeling pressured, start your reply with a clear, firm 'no' or something similar e.g. 'I don't want to' or 'whoa, stop'

Reflect the feelings of the other person if you want to (e.g. I can see you're angry/upset/surprised but....)

Do not feel you need to justify your choice. If they argue about your reasons, just say they may disagree but it's your decision.

Don't leave the situation open, change the subject, walk away, continue with what you are doing etc

Remember you can be kind without giving false hope that you'll change your mind.

"I'd love to go out with you but I don't date classmates in case things get complicated."

Or

"Thank you for thinking of me but I don't see us as a good fit together. I hope you find someone else to take to the cinema."

Topic – Relationships and Expectations

(Media Portrayal of Relationships)

Key Vocabulary	
Media	The main means of mass communication (broadcasting, publishing, and the internet) regarded collectively.
Media Portrayal	The way the Media represents particular groups, communities, experiences, ideas, or topics.
Indecent Images	Private images/videos often online without the consent of the individual in the image
Pressure to conform	The direct influence on people by peers, or the effect on an individual who is encouraged and wants to follow their peers by changing their attitudes, values or behaviours to conform to those of the influencing group or individual.

Key Knowledge – Effect of the Media on Relationships

We are ignoring each other in person.

If we don't want these special moments with our partners to disappear, we should be making a conscious effort to put our phones down and engage in conversation with our loved ones.

'Fake' relationships are making us feel inadequate.

The problem with social media is that everybody wants to come across as if they are perfect; they want us to think they have the perfect job, the perfect relationship, and an all-round perfect life. They appear almost too good to be true, leaving many feeling inadequate and unsatisfied with their own reality.

We are stalking each other.

People are becoming obsessed with 'stalking' their love interests, whether in a relationship with them or not. Information about people's whereabouts and when they were last 'active' is so readily available that people are checking up on their partners' every move.

If you don't love yourself, how can you expect someone else to?

Many studies have shown that there has been a correlation between the rise in depression and the increase in social media use. It is affecting our self-esteem and teaching us to constantly compare the way we are to others online.'

Exposure to photo-shopped and filtered photos has left many people questioning their own appearance. Unfortunately, this has impacted on the way that they are in relationships.

33

Year 9 Personal Development Curriculum

Topic – Relationships and Expectations

(Attraction to others)

Key Vocabulary	
Attraction	The action of liking someone/something
Rejection	Turning down someone's affections
Self-Esteem	A person's idea of their own self- worth
Possessive	Demanding someone's total attention and love
Obsessive	Being totally focussed on someone/something

Key Knowledge – Spotting toxic friends and partners

Your partner is possessive

Even if your friend/partner is incredibly nice, they might still be controlling to an unhealthy point. Sometimes, teens who are jealous make demands such as a partner no longer use social media or no longer wear certain types of clothing that might attract attention.

You change your habits

It's never bad to grow as a person or try to eliminate bad habits. However, it's not healthy for a person to change who they are for someone else. If you giving up some of their favourite hobbies, changing the way you dress, or altering your personality, it could be a sign that your partner doesn't appreciate you for who you are. Without appropriate intervention, you might lose your sense of identity.

Unexplained injuries

Never be embarrassed, afraid, or protective of your partner to come forward if he/she is physically or mentally harming you.

Constantly checking in

Technology is changing teen romance and friendship, and not always in a healthy way. Insecurity and jealousy may lead a teen to demand a partner check in all the time. If you don't respond to a text message right away, and your partner calls you incessantly. This is not healthy.

Smartphones make it easy for teen relationships to become unhealthy, as a partner may insist on constant text message contact or frequent social media updates

Topic - Relationships and Expectations (Consent)

Key Vocabulary	
Consent	Is when you give permission or agreement
Choice	The act of choosing, making a decision
Freedom	The condition or right of being able or allowed to say, think what you want to without being controlled or limited.
Capacity to Consent	Whether someone is able to consent to a situation if s/he was under the influence of drink or drugs; s/he suffers from a medical condition which limits their ability to consent or communicate consent; s/he has a mental health problem or learning disabilities; s/he was asleep or unconscious.
Manipulation	Controlling someone to your own advantage, unfairly or dishonestly
Assume	To accept something to be true, without question or proof

Key Knowledge - Consent

Intoxication: Being intoxicated can mean that someone is more vulnerable. However, this in no way excuses someone who takes advantage of another's vulnerability for their own purposes.

Being intoxicated also means someone is less able to recognise the signs of non-consent.

Getting someone drunk (or intoxicated using any substance) for the purpose of sex is illegal.

Taking advantage of another's vulnerability, regardless of the cause, for the purpose of sex is also illegal. Lies and withheld information:

Telling lies which lead to someone else engaging in sexual activity with you is manipulation and can be a very serious criminal offence.

While people may not always share everything about themselves with their partners, withholding information about something which one could reasonably expect would change the other's mind about engaging in a sexual activity is wrong and could be a serious criminal offence.

Bribery and manipulation: It is a serious criminal offence to manipulate a person into engaging in sexual activity through bribery or threats.

35

Year 9 Personal Development Curriculum

Topic – Relationships and Expectations

(Sharing of Sexual Images)

Key Vocabulary	
Sexting	Sexting means sending indecent images (pictures and/or videos) of <u>yourself</u> or <u>others</u> or sending sexually explicit messages.
Intimate Images	Images of female/male genitals, breasts and bottoms
Indecent Images	As above, but mainly in relation to children. These images are downloaded and stored. This is illegal.

Key Knowledge – Sexual Images

In the UK the age of consent for sexual intercourse is 16. However, it is an offence to make, distribute, possess or show any indecent images of anyone aged under 18, even if the content was created with the consent of that young person. The law is contained in <u>section 1 Protection of Children Act 1978</u>.

If you've sent a nude and you're worried about what might happen, there are things you can do:

Ask for the message to be deleted Explain that you're not comfortable with them keeping the picture and ask them to delete it.

Don't reply to threats Don't reply to someone trying to threaten or blackmail you, and don't send more photos. It can be scary, but it can help you to keep in control

Talk to someone you trust

Talking can be scary, especially if you're being threatened. But it can also help you get support and stay in control.

Report what's happened

If you're under 18 and you're worried or being threatened you can <u>make a report to CEOP</u>. Making a report isn't confidential but it does mean that they can help to stop what's happening.

Get help with how you're feeling

Having a nude shared by other people or being threatened isn't your fault. If you're struggling to cope or you don't know what to do talk to a trusted adult.

Topic – Relationships and Expectations (Personal/Emotional Boundaries)

Key Vocabulary	
Emotion	A strong feeling that comes from the situation you are in, your mood and relationships with others.
Boundary	A line which marks the limits of something. A boundary has been crossed for example, when you tell someone "You have crossed the line".
Emotional Boundary	An emotional boundary is a limit we establish to protect ourselves from being hurt, manipulated, or used by others. It is an expression of <u>self-worth</u> that helps people understand who we are, what we think, and how we feel. Boundaries create needed emotional space between us and others.

Key Knowledge – Personal and Emotional Boundaries

Learning how to set and maintain emotional boundaries is an important part of growing up.

It is also a key to developing relationships that are supportive, caring, and respectful.

These kinds of positive relationships create the foundation for lifelong <u>happiness</u>.

Healthy emotional boundaries are essential to healthy relationships. It means we know and understand our limits and those limits are clearly and honestly communicated.

Setting healthy boundaries helps preserve one's integrity and increases <u>resilience</u>.

Communicating a boundary does not mean "I'm right and you are wrong." It simply means, "This is what I need to feel positive about myself and respected by you."

37

Year 9 Personal Development Curriculum

Topic – Employability Skills (Employability & Online Presence)

Key Vocabulary	
Online profile	An individual's online presence is the combined content about them online. This could include their own social media profiles and websites, or references to them in content created by other people.
Personal strengths	Strengths are tasks or actions you can do well. These include knowledge, skills, and talents. People use their traits and abilities to complete work, relate with others, and achieve goals.

Key Knowledge

What someone is comfortable with sharing online will vary from person to person. For example, sharing political opinions can be both positive or harmful depending upon how and where these opinions are expressed, the nature of the opinion and whether it matches with the reader's own views.

It is important to realise that people will often disagree with the opinions of others, that disagreements can be managed respectfully and that there are safe ways to report discriminatory, inappropriate, or upsetting content.

Social media can be used whilst still maintaining an element of privacy.

Be careful with social media accounts to keep control over personal information that is shared with the outside world, including with potential clients or employers.

Making accounts that share personal information private can limit the audience different material reaches, however you should note that this could still be shared to a wider audience by members of groups or people they connect with through these accounts.

Year 9 Personal Development Curriculum

Topic – Employability Skills (Employability & Online Presence)

Key Vocabulary	
Views	A particular way of considering or regarding something; an attitude or opinion
Values	A person's principles or standards of behaviour; one's judgment of what is important in life
Online Reputation	An online reputation, or e- reputation, is the reputation of a company, person, product, service or any other element on the Internet and digital platforms.
Digital Footprint	The information about a particular person that exists on the internet as a result of their online activity

Key Knowledge

A person's views and values expressed through social media can contribute to their online reputation in both a positive and negative manner.

Sharing memes or posts about social issues can create the impression that a person holds a particular value and these values can be reflective of that person's personality or work ethos.

Sharing material now can affect a person in the future, in terms of their career.

Posts and media shared now can still be found online years later.

Once material has been shared, it leaves the person's control and becomes part of their 'digital footprint' which is trackable and contains everything about that person online, including pictures, posts, messages or other content.

Students should bear in mind that this content might be misunderstood or taken out of context, or their views may change, so the old content no longer reflects their values or opinions.

Individuals sharing views on social media can affect how the employer they work for is perceived.

Students should consider how the posts from the candidates may have reflected on their previous employers.

39

Year 9 Personal Development Curriculum

Topic – Employability Skills

(The connection between values and goals)

Key Vocabulary	
Values	A person's principles or standards of behaviour; one's judgment of what is important in life
Intrinsic Values	Values which help us to survive modern life, such as making connections with others and developing knowledge
Extrinsic Values	When you think that something only has value when you compare it to what someone else does/has. Having the best trainers, best phone
Values informing career choice	What you choose to pursue as a career may reflect your values. Love animals, concerned about animal values, become a vet.

Key Knowledge

Values about supporting ourselves and others

These are called **intrinsic values** and they help us to fulfil our needs. For example, connecting with others in a community or healthy relationship, or developing our knowledge and skills.

They support our wellbeing and that of others by helping us to learn and grow or connect with each other and our wider world.

Values about comparing an individual to others

These are called **extrinsic values** and they only have value when compared to something external, such as how much money someone has or what clothes they wear.

They often involve competition, and while a little competition can be healthy, too much focus on this can be less helpful to our wellbeing and even damage the environment.

Sometimes people can hold similar values but can act on these in different ways. They may act on these through their career choice, or through other actions in their daily lives.

Topic - Employability Skills

(The connection between values and goals)

Key Vocabulary	
Values	A person's principles or standards of behaviour; one's judgment of what is important in life
Intrinsic Values	Values which help us to survive modern life, such as making connections with others and developing knowledge
Extrinsic Values	When you think that something only has value when you compare it to what someone else does/has. Having the best trainers, best phone
Values informing career choice	What you choose to pursue as a career may reflect your values. Love animals, concerned about animal values, become a vet.

Key Knowledge

We know that people hold a variety of values as individuals, but communities and organisations can hold **shared values** too.

Sometimes when we share values, we feel more motivated and positive about our work.

When looking for a job, people can consider whether an organisation has values that match with their own.

People might find that they feel more motivated in a career that has values that they agree with.

People might get along well with colleagues that share similar values. They could work well as a team or make lasting friendships at work.

Shared values are one of a number of considerations people have when looking for a job. For example, they will also need to consider:

Whether they have the right skills for the job

If the money they will be paid meets their needs

What values would you expect, or look for, in an organisation you would want to work for?

41

Year 9 Personal Development Curriculum

Topic - Employability Skills (Transition to KS4 Poem)

How do you think the author of the poem is feeling?

What are their key concerns?

What is there to look forward to about starting key stage 4?

I don't know what I expected, But this wasn't it at all. The girls just want to be skinny, The boys, to be fit and tall.

We've only been gone for one summer, But just about *everything's* changed; We're all starting to look a bit different, And everyone's acting so strange.

Mark's going out with Miranda, Annabel fancies my mate, Everything's suddenly harder Than it was in Year 9 or Year 8. The teachers keep giving us homework, And wittering on about grades, My Mum and my Dad are no better, Summer memories rapidly fade.

But there are some things I like a bit more now,

We got to pick subjects to drop, I'm doing more maths (which I love) now.

But art (which I hate) has now stopped.

And I like that we get some more freedom, Time to learn in a way that we choose, But it's all a great big shift from last term, And it's making me slightly confused.

Year 9 Personal Development Curriculum

Topic – Employability Skills (Choosing a Career)

Key Vocabulary	
Career	An occupation undertaken for a significant period of a person's life and with opportunities for progress.
Career Quiz	There are a number of career quizzes you can complete online. These will help you to find a career that will suit your interests, personality and skill set

Key Knowledge

When we ask people about the most meaningful parts of their life, family, health and work often rank as the top three. Choosing the type of work you'll do, therefore, is arguably one of the most important decisions you can make.

You can begin choosing a career by taking the following steps:

Perform a self-assessment.

Identify your must-haves.

Make a list of jobs to explore.

Research jobs and employers.

Get training (if you need it) and update your resume.

Find and apply for jobs.

Continue growing and learning

Page 3 Simple Sentences Compound Sentences Complex Sentences Page 4 Comma Semi-Colon Colon Page 5-7 ISPACED Apostrophes Paragraphs

A simple sentence is a complete piece of information. It contains a subject, a verb and sometimes an object.

A compound sentence contains two main clauses (like two simple sentences). These are joined with a conjunction: *and, but, so, because*.

A complex sentence contains a main clause and a subordinate clause.

The pen fell on the floor.

Miss Kelly was tired, so she bought a large coffee.

Whilst it was raining, Mr Thornhill enjoyed a cup of tea in his office.

3

TERM 2

ഹ	
 √—	
I~—I	
1~-1	
-	

A comma indicates a pause between parts of a sentence or separates items in a list.

A semi-colon can be used between two closely related independent clauses, provided they are not already joined by a coordinating conjunction.

A colon is used to precede a list of items, a quotation, or an expansion or explanation.

I went to Morrisons and bought linguine, king prawns, garlic and chilli flakes.

Miss Kureczko was busy; she wouldn't even answer the phone.

Monday: the worst day of the week.

ISPACE indicates the various ways you can start a sentence. It stands for –ING verbs, Simile, Preposition, Adverb, Connective, -ED verbs.

–ING verb	-ING verb example: Flying proudly in the wind, the flag reigned over the castle
Simile	Simile example: Like a predator, the child caught the escaping balloon.
Preposition	Preposition example: Turning to my right, I saw the corridor I was meant to walk down.
Adverb	Adverb example: Nervously, the cat padded its way across the room.
Connective	Connective example: Finally, she arrived at her front door.
-ED verb	-ED verb example: Withered, the trees stood like ancient guards.

TERM 3

An apostrophe is used to indicate either possession or the omission of letters.

Apostrophes for possession	Using an apostrophe + s ('s) shows that one person/thing owns or is a member of something.	Recce's ballet class Iqra's bike Jake's pen Jess' room
Apostrophes for contractions	When you combine two words to make a contraction, you will always take out some letters. In their place, use an apostrophe.	they + have = they've are + not = aren't they + will = they'll

A paragraph is a distinct section of a piece of writing, usually dealing with a single theme and indicated by a new line.

New paragraphs should start with a topic sentence, and information within the paragraph should stay focused on that topic.

is to learn TiPToP.

Ti - stands for Time, so start a new paragraph for a different time period.

A helpful way to remember when to start a new paragraph

each new place. **To** - stands for **Topic**, so start a new paragraph

P - stands for Place, so start a new paragraph for

for each new topic, idea or subject.

P - stands for **Person**, so start a new paragraph for each new person or change of speaker in a dialogue.

TIER TWO VOCABULARY

WORD	DEFINITION
Aspirational	Having a strong desire to achieve something.
Dependent	Relying on something or someone else.
Destiny	The hidden power believed to control future events; fate.
Disposable	Intended to be thrown away after use.
Ethical	Morally right or acceptable.
Futility	A total lack of purpose or usefulness.
Idealist	A person who is guided more by ideals than by practical considerations.
Innocent	Not guilty of a crime or offence.
Intelligent	The ability to perceive or infer information, and to retain it as knowledge.
Loneliness	Having no friends or company; isolation.
Malicious	Intending to do harm.

WORD	DEFINITION
Marginalised	To make a group feel isolated or unimportant.
Naïve	Showing a lack of experience, wisdom, or judgement.
Ostracised	Exclude from a society or group.
Pragmatic	Dealing with things sensibly and realistically in a way that is based on practical rather than theoretical considerations.
Promiscuous	Having many short-lived sexual relationships.
Pugnacious	Eager or quick to argue, quarrel, or fight.
Racism	Prejudice against a person or people on the basis of their membership of a particular racial or ethnic group, typically one that is a minority or marginalised.
Secluded	Not seen or visited by many people; sheltered and private.
Solitary	Done or existing alone.
Toil	Working very hard doing unpleasant or tiring tasks.

OF MICE AND MEN CHARACTERS AND THEMES

OF MICE AND MEN STRUCTURE AND THEMES

Steinbeck uses a cyclical structure in 'Of Mice and Men' as Lennie and George return to the riverside. Steinbeck could have done this to emphasise:

The fact that all characters can't escape their gloomy and lonely destinies.

That equality will never be achieved.

There is no hope for the working class/minority groups because they are always easily exploited by those in power.

THEMES

Each character in the text has their own dreams that they live and work for: None of the characters achieve their dream, showing the impossibility of the American Dream

Loneliness appears to be part of

human nature - it is something the

All of the characters, in some sense,

characters can't escape.

experience loneliness.

Loneliness

Destiny

Of Mice and Men was set in a time in which the laws favoured white people, and men held far more rights than women.

Characters' fate seem to be doomed from the start of the novel. Throughout the novel, Steinbeck shows how men and women are not in control of their destinies. 19

OF MICE AND MEN CONTEXT 1937

John Steinbeck was an American author, who lived between 1902 and 1968.

His works frequently explore the themes of fate and injustice, as experienced by everyman characters.

Many take place in the Salinas Valley of California.

national ethos of the United States, which declares that freedoms, prosperity, success, and social mobility, can all be achieved through hard work

It implies that society has few barriers preventing anyone from achieving their dreams, should they be willing to put in enough effort.

Life was tough for black people living in America in the 1930s; there were not yet laws ruling against racial discrimination.

White and black people were segregated at the time, and black people were considered 2nd class citizens.

Black people often had to work harder for less money.

The Jim Crow laws of post-1876 strongly reinforced racism.

The Wall Street Crash and The Great Depression :

In the 1920s, the USA had been an enormously prosperous nation. However, in October 1929 millions of dollars were wiped out in an event that became known as the Wall Street Crash.

This triggered the Great Depression:

12 and 15 million (one third of the population at the time) became unemployed,

many people lost their life savings as banks went bust.

There was no social support system, many families were left to face poverty. 20

The American Dream is a

OF MICE AND MEN CHAPTER ONE

The story opens in a wooded area around the Salinas River in California. Two men approach: George and Lennie. It becomes clear that Lennie has some additional needs, and that George looks out for him.

"They had walked in

single file down the

open one stayed

behind the other."

path, and even in the

PLOT

QUOTES

KΕΥ

George catches Lennie petting a dead mouse and takes it off him, angrily. Lennie swears that he didn't kill it, although it becomes clear that Lennie's enormous strength means that he kills things unintentionally.

"You can't keep a job and you lose me ever' job I get." (George to Lennie)

ketchup.

George reminds

Lennie that they are

going to work on a

ranch, and he needs

eat beans for dinner.

with George losing his

temper with Lennie for

persistently asking for

to behave. The two

He states that he would get along much better without Lennie. He then feels guilty about getting angry at Lennie.

"His anger left him suddenly. He looked across the fire at Lennie's anguished face."

George reminds Lennie of their dream: one day, they are going to own their own farm. George instructs Lennie to return to the pool if something bad happens. They then settle for the night.

"I want you to come right here an' hide in the brush."

21

OF MICE AND MEN CHAPTER TWO

The chapter starts with a description of bunkhouse. This is where the men that work at the ranch stay. They have few material possessions.

The two men arrive at the ranch and meet Candy. He warns them that the 'boss' is cross with them. After being scolded by their new boss, are assigned to a picking team led by Slim.

"The boss stepped into the room with the short, quick steps of a fat-legged man."

They also meet Curley, who immediately becomes aggressive towards Lennie. After he leaves, Lennie tells George to stay away from Curley.

"Curley lashed his body around."

Curley's Wife then appears at the bunk, who Lennie finds 'purty' and who flirts with them. George has to tell Lennie to stay away from her.

Slim then enters, who is clearly admired by all. He is friendly with George and Lennie.

"he moved with a majesty achieved only by royalty and master craftsmen."

PLOT

"Inside, the walls were whitewashed and the floor unpainted."

"She had full, rouged lips and wide-spaced eyes, heavily made up. Her fingernails were red."

OF MICE AND MEN CHAPTER THREE

|--|

PLOT

KEY QUOTES

Slim gives one of his new pups to Lennie. George tells Slim of how they got chased out of the last town – Lennie grabbed hold of a girl's red dress and wouldn't let go.

Carlson begs Candy to let him shoot his old, stinking dog, to which Candy reluctantly agrees. After an awkward silence, the gunshot is heard.

"I would of had to drowned most of 'em anyways. No need to thank me about that." (Slim) "Carlson said, "The way I'd shoot him, he wouldn't feel nothing." (Carlson) Q

Curley comes in, asking where his wife is. When he learns that she is not there, and neither is Slim, he storms out. The others follow, hoping to see a fight.

"Curley burst into the room excitedly. "Any you guys seen my wife?" he demanded."

Thinking they are left alone, George discusses the dream again with Lennie. Candy overhears, and swears to devote his life savings to it if he can be in.

"George, how long's it gonna be till we get that little place an' live on the fatta the lan'- an' rabbits?" (Lennie to George) S.

The other men return, Curley apologising to Slim for false accusations. Curley turns his attention on Lennie, beating him. Lennie only fights back when George tells him to, severely crushing Curley's hand.

"The next minute Curley was flopping like a fish on a line, and his closed fist was lost in Lennie's big hand."

23

OF MICE AND MEN CHAPTER FOUR

Crooks sits in his room alone. We learn that Crooks is educated. Lennie soon wanders in, lonely as the other men have gone out to town.

"his bunk in the harness room; a little shed that leaned off the wall of the barn."

Crooks initially tells him to go away, saying that he (as a black man) is not allowed in the others' bunk, and so they should not be allowed in his. Lennie persists; Crooks lets him in.

"'Cause I'm black. They play cards in there, but I can't play because I'm black. They say I stink." (Crooks to Lennie)

Lennie begins to talk about his and George's dream. Crooks speaks of his own loneliness; he taunts Lennie. Candy enters and begins to speak of their dream.

"You guys is just kiddin' yourself. You'll talk about it a hell of a lot, but you won't get no land." (Crooks to Lennie and Candy) Curley's Wife interrupts, and taunts the men about being 'the weak ones' left behind. She speaks of her own loneliness.

"Lennie watched her, fascinated; but Candy and Crooks were scowling down away from her eyes."

Crooks asks her to leave, but she threatens that she could easily have him lynched if he says too much more. The other men then return and Curley's Wife leaves.

"I could get you strung up on a tree so easy it ain't even funny." (Curley's Wife to Crooks)

PLOT

OF MICE AND MEN CHAPTER FIVE

Lennie sits in the barn, stroking his dead puppy, questioning why it died. He decides to try and hide the puppy but then gets angry with it for dying and hurls it across the room.

PLOT

KEY QUOTES "Why do you got to get killed? You ain't so little as mice. I didn't bounce you hard." Curley's Wife enters, reassuring him that it is safe to talk to her. She speaks of her loneliness, and her past dreams. She explains that she doesn't like Curley.

"Why can't I talk to you? I never get to talk to nobody. I get awful lonely."

She asks Lennie to stroke her hair, but he quickly becomes too excited and holds on too tight. When she cries out, he tries to silence her, and accidentally breaks her neck.

"he shook her; and her body flopped like a fish."

He runs away, towards the clearing that he and George were in at the beginning of the story. Candy finds the body and informs George – they immediately know what has happened.

"I done a real bad thing," he said. "I shouldn't of did that. George'II be mad." George asks Candy to pretend that George hasn't seen it, so he can't be implicated. He calls the other guys in. Curley instantly asks for his shotgun, to

track down Lennie.

"I'm gonna shoot the guts outa that big bastard myself, even if I only got one hand."

25

OF MICE AND MEN CHAPTER SIX

Lennie appears by the riverside from the start of the novella. He is anxious, but also proud that he has remembered the place that he should come to if he finds himself in trouble.

"Already the sun had left the valley to go climbing up the slopes of the Gabilan Mountains" He has two visions:

of his Aunt Clara scolding him for getting into trouble, and a giant rabbit telling him that George will leave him.

"She stood in front of Lennie and put her hands on her hips, and she frowned disapprovingly at him."

George appears, seeming unusually quiet. George tells Lennie that he is not made at him, comforting Lennie. Lennie asks him to talk about the dream again, which George does.

"George came quietly out of the brush and the rabbit scuttled back into Lennie's brain "

Lennie sits, listening to the story, looking out over the stream, George pulls Carlson's gun from his jacket and shoots Lennie in the back of the head. Lennie immediately dies.

"The hand shook violently, but his face set and his hand steadied. He pulled the trigger."

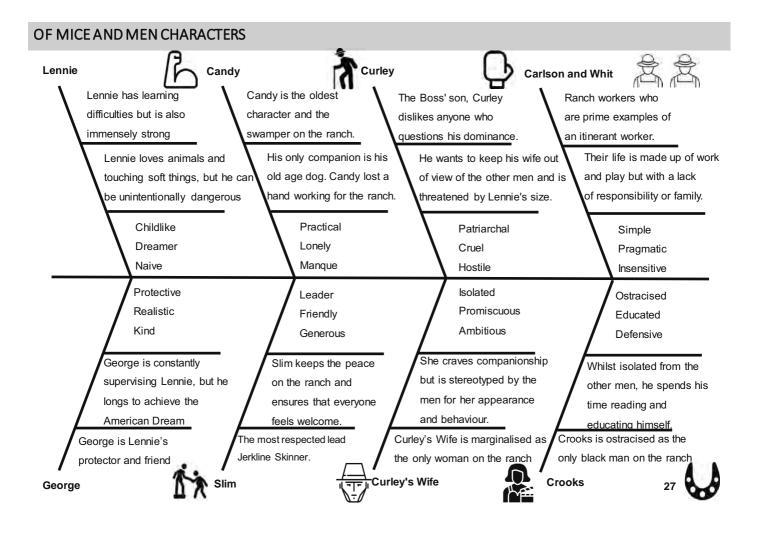

Carlson questions what happens, and George lies that he had to wrestle the gun from Lennie and shoot him with it. Only Slim understands what has truly happened. They walk away.

"Slim came directly to George and sat down beside him, sat very close to him."

KEY QUOTES

PLOT

STEINBECK'S USE OF REPETITION

The death of animals. Aside from Candy's dog, Lennie keeps on killing small, fragile animals. At the start of the novel, he killed a mouse and now he has just killed the puppy.

Light and dark imagery is repeated throughout the novel to symbolise hope and despair. Each chapter begins with a reference to the sun going down.

Steinbeck describes the **horses' halter chains** rattling several times in the novel. This could be to symbolise how all the characters are trapped.

Animal imagery is repeated throughout the novel. In particular when associated with Lennie it suggests his lack of understanding and inability to see the consequences of his behaviour.

GHOST BOYS

Civil Rights

American civil rights movement, **mass protest movement against racial segregation and discrimination in the southern United States** that came to national prominence during the mid-1950s. This movement had its roots in the centuries-long efforts of African slaves and their descendants to resist racial oppression and abolish the institution of slavery.

Racial Inequality

Racial inequality is a disparity in opportunity and treatment that occurs as a result of someone's race. This type of discrimination is clearly the domination of one race over another, which frequently results in favoritism and bias towards people from their race or ethnicity.

Equity and Equality

Equity is what builds an anti-racist future. The concept of racial equity recognises that not all races are starting from the same place. Some people and groups have different circumstances and need different resources and opportunities to succeed. Equity is about providing those particular resources to the groups who need them.

Black Lives Matter

Black Lives Matter (BLM) is a decentralised political and social movement that seeks to highlight racism, Discrimination, and inequality experienced by black people. When its supporters come together, they do so primarily to protest incidents of police brutality and racially motivated violence against black people.

		Submissive	Willing to be obedient without question
Gullible	Easilypersuaded to believe something	Turmoil	A state of great disturbance, confusion, or uncertainty

SHAKESPEAREAN CONTEXT

OTHELLO CONTEXT

The Patriarchal Society

Elizabethan society was patriarchal,

meaning that men were considered the leaders and women their inferiors. Women were regarded as "the weaker sex", not just in terms of physical strength, but emotionally too. Women were expected to be ruled by men. Men saw women as possessions and fathers expected to choose husbands for their daughters. They were believed to be intellectually inferior to men, incapable of rational thought and rarely received an education.

Assertive and argumentative women were seen as a threat to social order and were often punished. Shakespeare included a large number of parts for strong women in his plays. Race in Othello

Racism was widespread in Elizabethan England. Black people were an unusual sight and were viewed with suspicion. Elizabeth 1 issued an order that they be removed from England in 1601. Many believed that they were only fit to be slaves. Elizabethans were against mixed race marriage.

Throughout the play Othello is called 'Moor' and there are also many references to the colour of his skin. The term 'Moor' was derived from the name of the North African country Mauritania or possibly the Greek word 'Mauros' meaning dark. The word Moor not only had connotations of race and ethnicity but also an otherness in terms of religion. Prejudice focussed on this perceived sense of otherness. Despite being honoured for his services to the State, Othello experiences this racism when he marries Desdemona who is white. Venice and historical conflicts

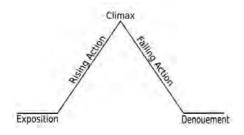

Venice was

an important trading city. It was a cultural meeting point and was considered multicultural as traders from across the world met there. It was a popular setting for plays about intrigue, love affairs and revenge. It had a reputation for sophistication and wealth but was also seen as a city of loose morals.

Othello is set during the wars that happened between Venice and Turkey in the latter part of the sixteenth century. Much of the action takes place in Cyprus which was an important outpost for the Turkish Navy at this time.

OTHELLO STRUCTURE AND THEMES

Othello follows a traditional 5 act structure. The story line follows Freytag's Pyramid.

Exposition: The effects of Othello and Desdemona's marriage are felt.

Rising Action: lago puts his plan to convince Othello that

Desdemona is having an affair into action.

Climax: Othello decides he must kill Desdemona.

Falling Action: The aftermath of Othello's murder of Desdemona.

Denouement: Othello kills himself.

THEMES

The main form of prejudice is **racism**, as several characters treat Othello as an outsider or animalistic as he is black. We also see **misogyny** within the play as women are judged.

Jealously

Jealously is a driving motive- lago and Roderigo's jealously cause their actions. Othello's jealously causes him to act out of character, lose all reason and murder the woman he loves.

Deception drives the plot-Desdemona deceives her father to marry Othello, lago deceives Othello to gain revenge and Othello is deceived by his own emotions.

Deception

Gender

Masculinity is focused strongly on honour- Othello feels emasculated when he believes Desdemona was unfaithful. Women are initially presented as either a Madonna or a whore. We see later in the play that women are more complicated and these are male enforced stereotypes.

37

OTHELLO ACT 1

PLOT

QUOTES

Ř

Othello and Desdemona have secretly married. lago, resentful that he didn't get a promotion, encourages Roderigo to tell Desdemona's father, Brabanzio, about the marriage and cause trouble. Brananzio is furious and seeks out Othello.

> "I follow him to serve my turn upon him" Iago Act 1 i

lago arrives at Othello's house and warns him about Brabanzio. A group of men approach, but it is a summons from the Duke. Brabanzio then arrives and Othello agrees to put the case before the Duke,

" Damn'd as thou

art thou hast

enchanted her"

Brabanzio Act 1 ii

Brabanzio makes his complaint against Othello and accuses him of enchantment. Othello explains Desdemona fell in love with him due to his stories.

TIER TWO VOCABULARY

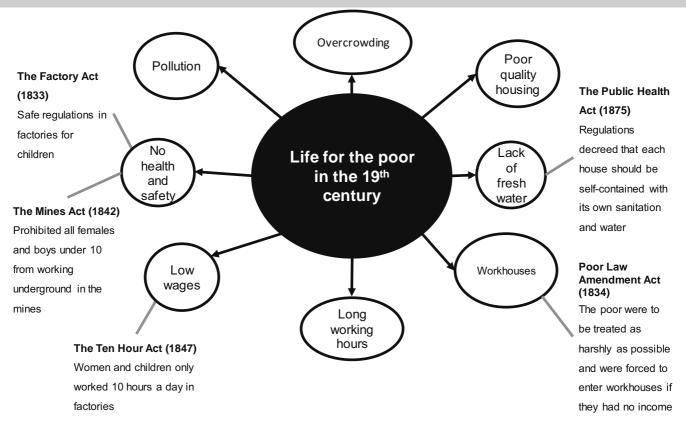

WORD	DEFINITION
Avarice	Extreme greed or material wealth.
Cruelty	Unkind, harsh behaviour or attitudes.
Discrimination	The unjust or prejudicial treatment of different categories of people.
Egalitarian	Believing in the principle that all people are equal and deserve equal rights and opportunities.

WORD	DEFINITION
Legislation	The process of making or
	enacting laws.
Parsimonious	Very unwilling to spend
	money or use resources.
Rural	Relating to the countryside.
Social	A system by which a
stratification	society ranks categories of
	people in a hierarchy.
Urban	Relating to the city.

19TH CENTURY CONTEXT- THE INDUSTRIAL REVOLUTION (1750-1900)

COMMON RHETORICAL DEVICES

a B	Direct address	Referring to the reader directly using the pronouns 'we' or 'you'.	s	Opinion	A belief which cannot be proven to be true.
பில	Alliteration	The repetition of the same sound in a sequence of	20	Rhetorical question	Any question in a piece of writing which does not require an answer.
	D (11)	words beginning with the same letter.	8	Emotive language	Words which elicit a powerful emotional
\rightarrow	Repetition	Where a word or phrase is	3		response.
<u></u> ↓		used more than once across a text		Similes and	A simile directly compares one object to another using
(² * 1 الع	Knowledge	Knowing the topic/subject you are writing or speaking about.		metaphors	'like' or 'as'. A metaphor compares two things by stating one is the other.
الن	Facts	Something which can be proven to be true.	No.	Triplets	Lists of three things in a sentence.

48

ADVANCED RHETORICAL DEVICES

₽	Allusion	A reference to an event, place, literary work or person. Example: "I can't get changed that quickly, I'm not Superman!" The repetition of a word or phrase at the start of successive phrases. Example: "If you prick us, do we not		Hypophora	A figure of speech in which a writer raises a question, and then immediately answers it. Example: ""What should young people do with their lives today? Many things, obviously ."
	Anecdote	bleed? If you tickle us, do we not laugh?" A short amusing or interesting story	Å	Hyperbole	An exaggeration. Example: "I have done this a thousand times"
ĥ		about a real incident or person. Example: "When I was your age, I …"	⇒	Parallelism	The use of words or phrases with a similar structure. Example: "Like father, like son"
→ →	Epistrophe	The repetition of a word or expression at the end of successive phrases, clauses, sentences, or verses especially for rhetorical or poetic effect.	₹	Oxymoron	A combination of contradictory or unsuitable words. Example: "It is a cruel kindness"
		Example: "of the people, by the people, for the people"			10

ARISTOTLE'S THREE PILLARS OR PERSUASION

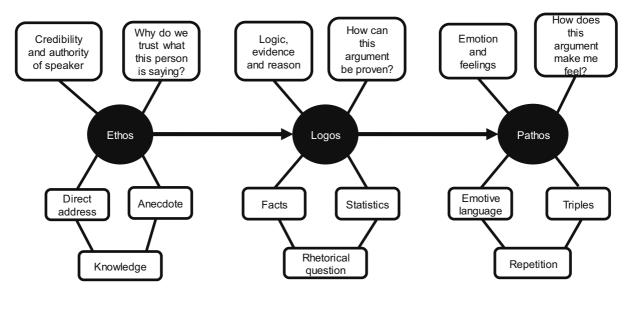

Aristotle

Born in Greece, Aristotle lived from 384 BC to 322 BC.

Instructed on how to best persuade people.

Aristotle was a student of Plato (another Greek philosopher).

HOW TO STRUCTURE AN ARGUMENT

Make your position clear. What is your point of view on how?

Acknowledge the opposing point of view but then challenge it. Why are those critics wrong and you're right?

Introduce the topic you are writing about. Still make your opinion clear.

Offer solutions for the

points you raised:

How can we avoid

are the benefits?

Create a sense of

urgency.

these issues? What

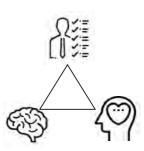

Offer your first point through a topic sentence and identify one issue. Explain your point.

Repeat your position. This is the last message you want your reader/listener to leave with.

Offer your second point through a topic sentence and identify one issue. Explain your point.

Oligarchy	A political system governed by a few people.	Tyrannical	over the people. Wielding absolute power and authority, often unjustly, cruelly
			or oppressively.

GREEK TRAGEDY SUMMARIES

'Oedipus Rex' by Sophocles

Who was Sophocles?

One of Athens' three great tragic playwrights. Born in Colonus in 496 – 406.

Summary

'Oedipus Rex' is a Greek tragedy that tells the story of King Oedipus of Thebes, who is fated to kill his father and marry his mother.

Thebes is struck by a plague that will only be lifted if the man who killed the former king is exiled. The prophet Teiresias claims the murderer is Oedipus.

An oracle told Queen Jocasta that her son would kill her husband, so she left her infant child—Oedipus—to die. Oedipus survived and unknowingly killed his father before marrying Jocasta and becoming king.

When they realize the truth, Jocasta hangs herself, and Oedipus blinds (off stage) himself and goes into exile.

'Medea' by Euripides

Who was Euripides?

One of Athens' three great tragic playwrights. Born in Salamis in 480 - 406 BC

Summary

'Medea' is a Greek tragedy based on the myth of Medea and Jason. Medea has been betrayed by her husband and the play focuses on her revenge.

Jason betrays Medea by abandoning her to marry the daughter of King Creon, Glauce.

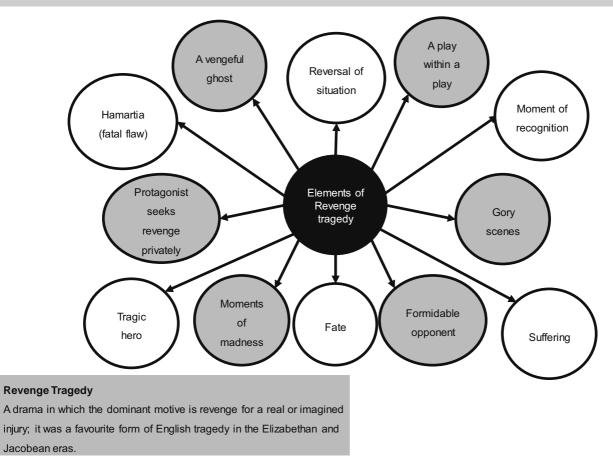

Creon fearing what Medea will do, tries to send her into exile, but she begs to stay, which he allows. Medea begins to plot her revenge: she will kill Creon, Glauce and her own children.

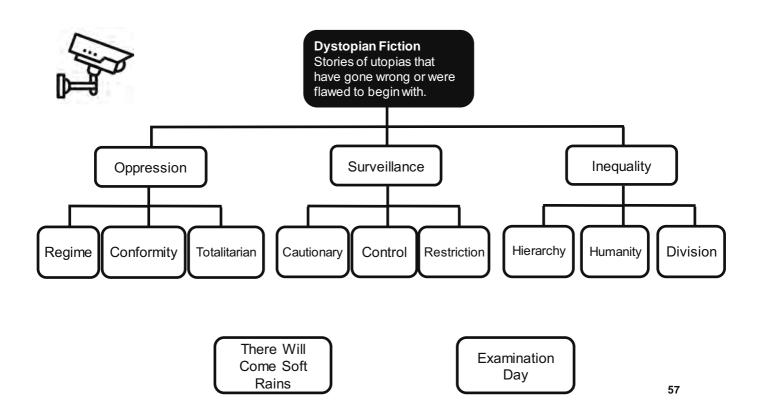

Glauce is killed by a poisoned dress; Creon dies by the same poison as he tries to help his daughter. Medea murders her children (off stage). At the end of the play, Medea faces a distraught Jason. 55

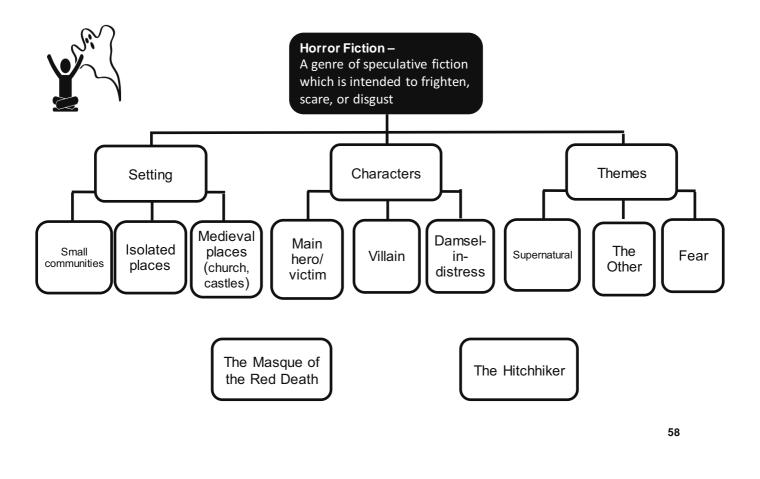

REVENGETRAGEDY

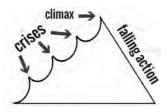

56

DYSTOPIAN FICTION THEMES AND INFLUENCES

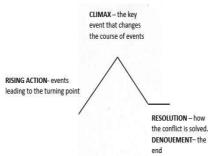

STRUCTURING STORIES

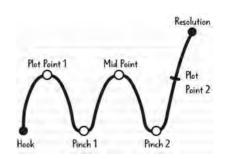

A plot that follows a Fichtean Curve start right in the rising action - embedded with exposition and several crises that include their own rising and falling action. The main points include:

- 1. Rising Action (including multiple crises)
- 2. Climax
- 3. Falling Action

Latin for "into the middle of things," In Media Res is a narrative structure that starts midway through the story. It typically includes the following parts: 1. Middle Crisis

- 2. Rising Action (including exposition,
- often in the form of flashbacks)
- 3. Climax
- 4. Falling Action (including exposition, often in the form of flashbacks)
- 5. Denouement

A less detailed adaptation of The Hero's Journey, the Seven-Point Story Structure focuses specifically on the highs and lows. Writers are encouraged to start by knowing their resolution. The main seven points include:

- The Hook 1.
- 2. Plot Point 1
- 3. Pinch Point 1
- 4. Midpoint

6.

- Pinch Point 2 5. Plot Point 2

59

7. Resolution

	support or allegiance to a person.		Dutifully firm and committed to a cause.
Manipulative	Influencing others through deceptive or underhanded tactics.	Tactical	Relating to actions carefully planned to gain a specific military end.
Naïve	Showing a lack of experience or judgement (Snowball is politically naïve).	Tyrannical	Using power in a cruel way or for your own personal gain.
Opportunistic	Exploiting immediate opportunities.	Unscrupulous	Having or showing no moral principles.
Pessimistic	Tending to see the worst aspect of things.	Usurp	Seize and take control without authority and possibly with force; take as one's

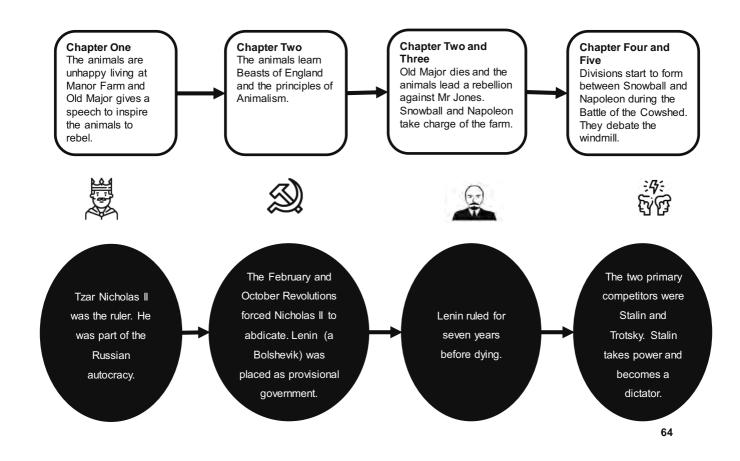

62

right or possession.

ANIMAL FARM KEY EVENTS

ANIMAL FARM CONTEXT AND EVENTS

Chapter 1

The beginning of a revolution!

Famer Jones is introduced as an inadequate leader. He fails to protect the animals and forgets to feed them. The animals hold a secret meeting showing that they are scared of him.

"Mr Jones, of Manor Farm, [...] was too drunk to remember to shut the popholes"

The animals enter in a specific order and Old Major waits to speak to them on a raised platform. The pigs sit at the front. Old Major tells the animals that he has had a dream.

"then the pigs, who settled down in the straw immediately in front of the platform"

In his speech, Old Major first encourages the animals to question their existence and blames man for all their suffering.

"Man is the only real enemy we have."

In his speech, Old Major also addresses different animals and comments on how Jones exploits them. He warns Boxer that he will be sold to the butchers.

"Boxer, the very day that those great muscles of yours lose their power, Jones will sell you to the knackers"

The meeting ends with the singing of 'Beasts of England'. Farmer Jones is awoken by the uproar and shoots at the barn to quieten the animals.

"The pellets buried themselves in the wall of the barn and the meeting broke up hurriedly."

PLOT

KEY QUOTES

Overthrowing the status quo

After the death of Old Major, the animals spend their days secretly planning the rebellion and the pigs are placed in charge of educating the animals about Animalism.

Among the pigs, Snowball and Napoleon are the most important to the revolution. Mollie is concerned about her ribbons and Moses speaks about a place called 'Sugarcandy Mountain'.

The rebellion occurs when Jones again falls into a drunken sleep and neglects to feed the animals. The triumphant animals then destroy all traces of Jones.

Snowball changes the sign reading "Manor Farm" to "Animal Farm" and paints the Seven Commandments of Animalism on the wall of the barn.

The cows need milking. The cows then give five buckets of milk. which disappears.

KEY QUOTES

PLOT

"The work teaching and organising the others fell naturally upon the pigs"

"Comrade," said
Snowball, 'those
ribbons that you are
so devoted to are the
badge of slavery."

"Almost before they knew what was happening, the Rebellion had been successfully carried through"

'All animals are equal"

"When they came back in the evening it was noticed that the milk had disappeared."

66

Chapter 3

Utopia?

The animals cooperate to finish the harvest. Boxer distinguishes himself as a strong, tireless worker, admired by all the animals.

"How they toiled and sweated to get the hay in!"

The pigs become the supervisors and directors of the animal workers. On Sundays, the animals meet in the big barn to listen to Snowball and Napoleon debate a number of topics.

"The pigs did not actually work, but directed and supervised others."

To help the animals understand the general precepts of Animalism, Snowball reduces the Seven Commandments to a single maxim: "Four legs good, two legs bad."

"The birds did not understand Snowball's long words, but they accepted his explanations"

The animals learn that the cows' milk and windfall apples are mixed every day into the pigs' mash.

"these would be shared out equally:[...] all the windfalls were to be collected [...] for the use of the pigs."

When the animals object, Squealer explains that the pigs need the milk and apples to sustain themselves as they work for the benefit of all the other animals.

"Milk and apples (this has been proven by Science, comrades) contain substances absolutely necessary to the well-being of a pig."

KEY QUOTES

PLOT

PLOT

KEY QUOTES

The Battle of the Cowshed

As summer ends. news of the rebellion spreads to other farms. Farmer Jones has spent most of his time at the Red Lion in Willingdon.

"[Farmer Jones was]

anyone who would

monstrous injustice

he had suffered"

complaining to

listen of the

Farmer Frederick and Pilkington reluctantly, but out of fear of rebellion in their own farms, decide to help Farmer Jones and his men.

"both [Pilkinton and

Frederick] were

frightened by the

Farm"

rebellion on Animal

The animals are ready for Farmer Jones to attack. Snowball had studied an old book on Julius Caesar's campaigns. Snowball turns out to be an extraordinary tactician.

"Snowball at the head of them"

During the battle, Napoleon is not mentioned, and Mollie is hiding. Snowball and Boxer are very active in the battle. Snowball is hurt by a bullet and Boxer thinks that he has killed someone.

"I had no intention of doing that. I forgot that I was wearing iron shoes." [Boxer]

A sheep dies and is given the honour of 'Animal Hero, Second Class'. The animals then celebrate their victory in what they call "The Battle of the Cowshed." The animals sing 'Beasts of England'.

"It was decided to set the gun up at the foot of the flagstaff, [...] and to fire it twice a year"

68

Chapter 5

Napoleon seizes power!

Winter comes, and Mollie works less and less, and eventually disappears. The pigeons report seeing her standing outside a pub, sporting one of the ribbons that she always coveted

Mollie again."

"None of the animals ever mentioned

The pigs increase their influence on the farm, deciding all questions of policy and then offering their decisions to the animals, who must ratify them by a majority vote.

"the pigs occupied themselves with the planning out the work of the coming season."

Snowball and Napoleon continue their debates, the greatest of which occurs over the building of a windmill on a knoll. On the Sunday, the plan for the windmill is to be put to a vote.

"they [the animals] always found themselves in agreement with the one who was speaking at the moment"

nine ferocious dogs, who chase Snowball off the farm. The animals are terrified.

"Silent and terrified.

the animals crept

back into the barn.

[...] They were huge

dogs, fierce-looking

as wolves."

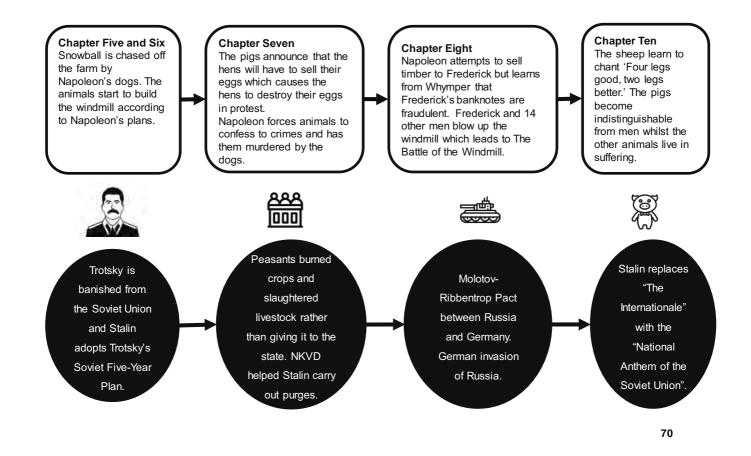

Napoleon then announces that all debates will stop and institutes a number of other new rules for the farm, but surprises everybody by announcing that the windmill will be built.

"but there would be no more debates"

KEY QUOTES

PLOT

Chapter 6

The Windmill

During the following year, the animals work harder than ever before completing farm work and building the windmill.

Napoleon announces that Animal Farm will begin trading with neighbouring farms and hires Mr. Whymper.

> "He [Mr Whymper] was a sly-looking little man [...] The animals watched his coming and going with a kind of dread"

The pigs move into the farmhouse and begin sleeping in beds, which Squealer excuses on the grounds that the pigs need their rest after the daily strain of running the farm.

"It was absolutely necessary, he said, that the pigs, who were the brains of the farm, should have a quiet place to work in."

Boxer works the hardest at ensuring the windmill is built and even works at night time.That November, a storm topples the halffinished windmill.

"A terrible sight had met their eyes. The windmill was in ruins."

Napoleon tells the animals that Snowball is responsible for its ruin and then declares that they will begin rebuilding the windmill that very morning.

"Forward, comrades! Long live the windmill! Long live Animal Farm!"

KEY QUOTES

PLOT

"All that year the animals worked like slaves." PLOT

KEY QUOTES

The Purge

The weather gets worse. The animals are led to believe that Snowball is visiting the farm at night and spitefully subverting their labour. He becomes a constant (and imagined) threat to the animals' security.

"It was a bitter winter.

The stormy weather

was followed by sleet

and snow."

The animals are facing starvation and Squealer announces that the chickens' eggs will have to be sold. The chickens rebel but their rebellion is swiftly supressed.

"When the hens heard this they raised a terrible outcry." **3**

Napoleon calls a meeting of all the animals, during which he forces confessions from all those who had questioned him and then has them murdered by the dogs.

"Immediately the

forward. seized four

pigs by the ear and

squealing with pain

dogs bounded

dragged them,

and terror"

The terrible bloodshed leaves the animals deeply shaken and confused. Boxer says that he would never have believed that such a thing could happen on Animal Farm. He blames himself.

"These scenes of terror and slaughter were not what they had looked forwards to on that night when Old Major first stirred them to rebellion" Eventually, the singing of "Beasts of England" is outlawed and a new song by Minimus, Napoleon's pig-poet, is instituted. It is a nationalist anthem for Animal

"So 'Beasts of England' was heard no more."

Farm.

72

Chapter 8

The Windmill is destroyed (again)

The animals have to work harder than in previous years. Squealer shares with them false figures about the increased production of food on the farm.

Napoleon schemes to sell a pile of timber to Frederick, who tries to pay with a cheque. Napoleon, however, demands cash, which he receives. Whymper then learns that Frederick's banknotes are forgeries.

"The bank-notes were forgeries! Frederick had got the timber for nothing."

Frederick and 14 men arrive at Animal Farm and attempt to take it by force. The humans are initially successful, after they blow up the windmill. The animals are completely enraged and drive the men from the farm.

"they did not heed the cruel pellets that swept over them like hail. It was a savage battle."

Squealer explains to the bleeding animals that they were actually victorious in what will hereafter be called "The Battle of the Windmill." Boxer is severely injured during the battle.

"In the general rejoicing the unfortunate affair of the bank-notes was forgotten."

The pigs find a case of whiskey in Jones' cellar. Napoleon gets ill from it and it is thought he had been poisoned. Napoleon gets better. The pigs change the commandment about drinking.

"No animal shall drink alcohol', but there were two words that they had forgotten [...] 'to excess'"

РГОТ

KEY QUOTES

The sea of the sea of

PLOT

KEY QUOTES

Boxer's end

The animals begin building a new windmill. Their efforts are again led by Boxer who, despite his split hoof, insists on working harder and getting the windmill started before he retires.

"For a horse, it was said, the pension would be five pounds of corn a day [...] possibly an apple on public holiday."

One day, however, he collapses because of a lung ailment. After he is helped back to his stall, Squealer informs them that Napoleon has sent for the veterinarian at Willingdon to treat him.

"His eyes were glazed, his sides matted with sweat."

The van arrives to take Boxer to the hospital; however, Benjamin reads its side and learns that Boxer is actually being taken to a knacker, or butcher.

"'Fools! Fools!' shouted Benjamin [...] 'Do you not see what is written on the side of the van?'"

Clover screams to Boxer to escape, but he is too weak. Boxer is never seen again. Squealer speaks of Boxer's honourable service and devotion to 'Animal Farm' and Napoleon.

"I was ate his beside at the very last.[...] He whispered [...] that his sole sorrow was to have passed on before the windmill was finished."

The chapter ends with a grocer's van delivering a crate of whisky to the pigs, who drink it all and do not arise until after noon the following day.

"the pigs had acquired the money to buy themselves another case of whisky."

74

Chapter 10

The ultimate betrayal

Years pass. Many animals age and die, and few recall the days before the Rebellion. The farm seems to have grown richer, but only the many pigs and dogs live comfortable lives.

PLOT

"They [the animals] were generally hungry, they slept on straw [...] in winter they were troubled by the cold, and in summer by the flies."

Squealer takes the sheep off to a remote spot to teach them a new chant. Squealer walks toward the animals on his hind legs.

"He [Squealer] was teaching them [the sheep] to sing a new song"

Napoleon soon appears walking upright; he carries a whip. Before the other animals have a chance to react to the change, the sheep begin to chant: "Four legs good, two legs better!"

"Napoleon himself, majestically upright [...] He carried a whip in his trotter."

Only the last commandment remains: "all animals are equal." However, it now carries an addition: "but some animals are more equal than others."

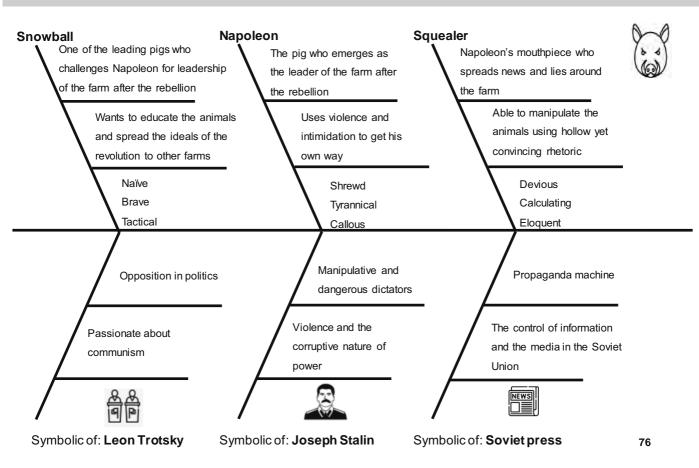

"All animals are equal but some animals are more equal than others."

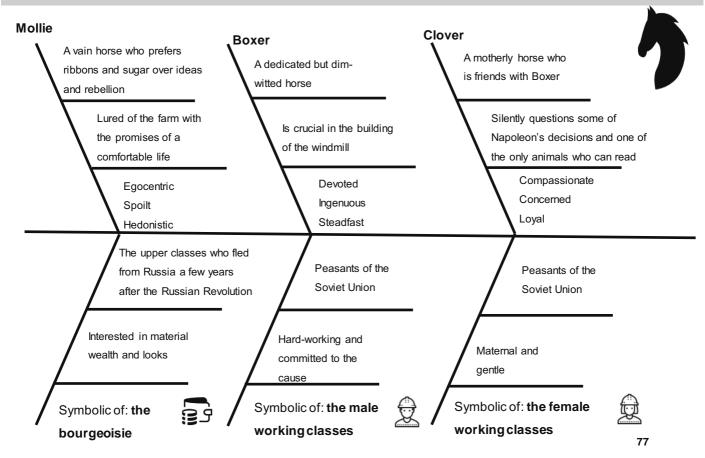

The farmers praise the pigs and express their regret for past "misunderstandings." Napoleon announces the change of the farm's name back to 'Manor Farm'. The pigs and men fall out. The animals look confused.

"The creatures outside looked from pig to man [...] but already it was impossible to say which was which."

Misogyny	A hatred of women.
Monarchy	A form of government with a king or queen at the head.
Patriarchy	A society where men hold more power than women.
Redemption	The action of saving or being saved from sin, error, or evil.
Society's norms	The informal rules that govern behaviour in group.
Supreme	Having great power and influence.

A1: Algebra Notatior	Plot Coordinates	Collect Like terms
----------------------	------------------	--------------------

 Collect Like terms

 Simplify Expressions

 A1.1

 A1.1

 Plot coordinates in four quadrants

 For x, move right for positive values and left for negative.

 For y, move up for positive values and down for negative.

 Plot the origin (0,0)

 Didt the print (2.3)

e.g. Plot the origin (0,0) Plot the point (2,3) Plot the point (-3,1) Plot the point (-3,1) Plot the point (-3,1) (-1.5, -2.5)e.g. e.g.

Divide by the highest common factor of each part of each term. e.g. 4 is the HCF of 4 and 12. y is not common to both terms. 4y - 12 = 4(y - 3) Y is common to both terns. $y^2 + 7y = y(y + 7)$	Replace the letters with the given numbers, then carry out the calculation. Remember BIDMAS and the rules for negative numbers. e.g. $3a - b$ = $3 \times 6 - (-2)$ = $18 + 2$ = 20
A1.5 Factorise into a single bracket. e.g. 4y - 12 y ² + 7y	A1.6 Substitute into an expression. e.g. Find the value of 3a - b when a = 6 and b = -2.
Multiply everything in the bracket by what is outside. 2(x+5) = 2x+5 $2(x-5) = x^2 - 5x$ $x(x-5) = x^2 - 5x$ Expand each bracket and then simplify the expression. Take care with negative numbers.	3(x+2) + 2(x-5) = 3x + 6 + 2x - 10 = 5x - 4 $3(x+2) - 2(x-5) = 3x + 6 - 2x + 10 = 3x + 6 - 2x + 10 = x + 16$
A1.4 Expand a single bracket e.g. Expand 2(x + 5) Expand x(x - 5) Expand and simplify expressions with more than one bracket	e.g. Expand 3(x + 2) + 2(x - 5) 3(x + 2) - 2(x - 5)

٩,

Use a formula by substituting numbers Expand two brackets

Replace the letters with the given numbers, then carry out the calculation. Remember BIDMAS and the rules for negative numbers.	e.g. v = u + at v = 5 + 10 x 6 v = 5 + 10 x 6 v = 5 + 60 v = u + at 32 = 7 + 5a 32 = 7 + 64 1 +
A1.7 Use a formula by substituting numbers	e.g. Use the formula v = u + at to work out v when u = 5, $a = 10$, $t = 6$. Use the formula v = u + at to work out a when v = 32, $u = 7$, $t = 5$. Use the formula v = u + at v = u + at to work out t when v = 5, $u = 17$, $a = -4$.

Use a grid to expand two brackets. Take care with negative numbers. Add together the four terms in the grid. Simplify the two x terms.	e.g. <u>x +3</u> <u>x x² +3x</u> <u>-2 -2x -6</u>	$x^{2} + 3x - 2x - 6$ = x^{2} + x - 6 x - 2x - 3 + 4 + 8x - 12	2x ² - 3x +8x -12 = 2x ² +5x -12
A1.8 Expand two brackets.	e.g. (x + 3)(x – 2)	(2x - 1)(x + 4)	

Notation
lgebra
\triangleleft
<u></u>
Ā

Plot a linear graph from a sequence or formula Use the index rules for multiplication and division Use the index laws for raising to a power

Use the index laws for raising to a power	ues by of x into encil. 1 a ruler a straight	3 3 4 4 1 3 1 1 3
	Draw a table of values by substituting values of x into the formula. Plot the points in pencil. Join the points with a ruler and pencil. They should be in a straight line.	e.g. $\frac{x -1}{y}$
Use the Index I	A1.9 Plot a linear graph from a sequence or formula e.g. Plot the graph of y = 2x + 1	

A2: Formulae, Functions and Expressions Use a formula by substituting numbers

Change the subject of a simple formula Expand two brackets

	Use the same balancing steps as when you steps as when you solve equations to change the subject of the formula. e.g $v = u + at$ (Minus u from both sides of the equation) v - u = at (divide both sides of the equation by a) $\frac{v-u}{a} = t$	Use a grid to expand two brackets. Take care with negative numbers. Add together the four terms in the grid. Simp $x + 3$ e.g $x + 3$ e.g -2 $-2x - 6$	$x^2 + 3x - 2x - 6$ = $x^2 + x - 6$
	A2.2 Change the subject of a simple formula e.g. Make t the subject of the formula v = u + at	A2.3 Expand two brackets. e.g. (x + 3)(x - 2)	
0	Replace the letters with the given numbers, then carry out the calculation. Remember BIDMAS and the rules for negative numbers. e.g. v = u + at v = 0 v = 5 + 60 v = 65	v = u + at 32 = 7 + 5a 25 = 5a a = 5 a = 5 v = u + at 5 = 17 - 4t t = 3 t = 3	
	A2.1 Use a formula by substituting numbers e.g. Use the formula v = u + at to work out v when u = 5, $a = 10$, $t = 6$.	Use the formula v = u + at to work out a when v = 32, $u = 7$, $t = 5$. Use the formula v = u + at v = u + at to work out t when v = 5, $u = 17$, $a = -4$.	

б

A2: Formulae, Functions and Expressions

Substitute into an expression

	us us			
Use a function machine to find input and output	To find the output follow the instructions from left to right. To find the input, reverse the function machine by using inverse functions	and follow it from right to left e.g Input is 4 = 4x4-5 Output =11	e.g Reverse function machine is 	
	A2.5 Use a function machine to find input or output	e.g find the output for the function machine below when the input is 4 - x4 -5	e.g find the input for the function machine below when the output is 7 +5 +	
	Replace the letters with the given numbers, then carry out the calculation. Remember BIDMAS	and the rules for negative numbers. e.g. 3a - b = 3 x 6 -(-2) = 18 + 2 = 20	e.g abc+ 3b = 5x3x7-3x3 = 105-9 =96	
Use a function mach	A2.4 Substitute into an expression.	e.g. Find the value of 3a - b when a = 6 and b = -2.	e.g Find the value of abc+ 3b when a= 5, b=3 and c=7	

A2: Formulae, Functions and Expressions

Evaluate formulae in a calculator including fractions and negative numbers

Rearrange formulae with fractions

	To expand brackets multiply each term in the bracket by the term outside the bracket. Collect like terms together. Take care with negative signs. e.g $\widehat{3(x+2)} + 2(x-5)$	=5x - 4 =5x - 4	e.g 3(x+2) - 2(x-5) =3x+6 - 2x + 10 =x + 16
kets	A2.8 Expand and simplify an expression involving brackets	e.g Expand and simplify $3(x+2) + 2(x-5)$	e.g Expand and simplify $3(x+2) - 2(x-5)$
nd simplify an expression involving brackets	Rewrite the formula, replacing the letters with numbers. When putting into a calculator remember to use the fraction key and put any negative numbers into brackets	Rewrite the formula to be $5 \times \frac{2}{3} - 3 \times (-2)$ Type into calculator so it looks exactly like this $=\frac{28}{3}$ or 9.3	Multiply each term by the denominator then use the same balancing method as when solving equations e.g $y = \frac{x}{5} + k$ (Multiply every term by 5) 5y = x + 5k (Subtract 5k from both sides) 5y - 5k = x
Expand and simplify	A2.6 Evaluate formulae in a calculator including fractions and negative numbers	e.g. Find the value of 5a-3b when $a = \frac{2}{3}$ and $b = -2$.	A2.7 Rearrange formulae with fractions e.g Make x the subject of the formula $y = \frac{x}{5} + k$

11

e, Functions and Expressions	a quadratic expression where a=1
A2: Formulae,	Factorise a

Factorise a quadratic expression where a=1 Use index rules for multiplying and Dividing

	When multiplying the same base number with different indices, ADD the indices When dividing the same base number with different indices subtract the indices	e.g Multiply the coefficients together and add the powers $=15a^9$	e.g Divide the coefficients and subtract the powers =5c ⁵	Rewrite the calculation using the usual rules of indices then use the rules of multiplication to simplify e.g Rewrite as $3y^2 \times 3y^2 \times 3y^2 \times 3y^2$ Multiply the coefficients together and	add the powers =81 <i>y</i> ⁸
	A2.10 Use Index rules for multiplying and dividing	e.g Simplify $3a^2 \times 5a^7$	e.g Simplify 20c ⁸ ÷ 4c ³	A2.11 Use index rules for raising to a power e.g simplify $(3y^2)^4$	
ules for raising to a power	Work out two numbers that: Add to make the number in front of x; Multiply to make the number on its own.	Write each bracket with an x and one of the numbers. Take care with negative numbers.	e.g x ² + 5x + 4 Add to make 5 Multiply to make 4 (x + 4)(x + 1)	e.g x ² - 3x - 4 Add to make -3 Multiply to make -4 (x - 4)(x + 1)	
Use index rules for rai	A2.9 Factorise a quadratic expression where a=1	م ب م	factorise x ² + 5x + 4	e.g Factorise x² - 3x - 4	

A2: Formulae, Functions and Expressions

Rearrange formulae with factorisation

	Start by factorising the numerator and denominator of the fraction. Then look for common factors that can be cancelled, these may be brackets or coefficients of brackets e.g	$\frac{3(2x-5)}{6}$ Cancel the common factor of 3 from the denominator and the multiplier of the brackets on the numerator $\frac{2x-5}{2}$ e.g Factorise the numerator and denominator $\frac{(x+3)(x+4)}{(x+3)(x-5)}$ Cancel the matching brackets $\frac{(x+4)}{(x-5)}$	
	A2.13 Simplify algebraic fractions by factorisation e.d	Simplify $\frac{6x - 15}{9}$ e.g Simplify $\frac{x^2 + 7x + 12}{x^2 - 2x - 15}$	
Simplify algebraic fractions by factorisation	If there is more than one of the variable you're making the subject you will need to factorise. Move all of that variable to one side of the equation then factorise it out to leave you with only one of that variable	e.g Move all the terms with x in them onto the same side ax - cx = by Factorise out the x variable x(a - c) = by Divide both sides by the created brackets $x = \frac{by}{a - c}$	
Simplify algebraic fr	A2.12 Rearrange formulae with factorisation	e.g. Make x the subject of the formula ax = by + cx	

A2: Formulae, Functions and Expressions

Adding/Subtracting Algebraic fractions Multiplying/Dividing algebraic fractions Expand Triple Brackets Substitute into a function using function

	Expand two of the brackets using a grid then multiply the answer by the third bracket in another grid e.q	and the first two brack	x x +3 x x^2 +3 x	+4 +4 <i>x</i> +12	$=x^2 + 7x + 12$ Then put this answer into another	grid and expand with the third	x x +7x +12	x $x^3 +7x^2 +12x$	-2 $-2x^2$ $-14x$ -24	$=x^3 + 5x^2 - 2x - 24$	Replace the letter in the bracket with the number in the bracket and calculate using BIDMAS e.g Replace the x ('s)in the formula with 4 and calculate $= 4^2 - 5$ = 11
	A2.16 Expand triple brackets	0. L	Expand and simplify $(x+3)(x+4)(x-2)$								A2.17 Substitute into a function using function notation e.g If $f(x) = x^2 - 5$ evaluate $f(4)$
into a function using function notation	Form a common denominator by using cross multiplication. Then add/subtract the numerator using the rules of algebra	e.g Form a common denominator in	the usual way $\frac{10x - 20}{+} + \frac{9x + 12}{+}$	15 15 Add the numerators together	$\frac{19x-8}{15}$		Eactorise the	numerator/denominator of all	fractions then follow the usual	rules for multiplying/dividing, remembering to cross cancel	e.g Factorise numerator and denominator and keep change flip $\frac{(x+3)(x-1)}{(x+2)(x+2)} \times \frac{(x+2)(x-8)}{(x+2)(x+3)}$ Cross cancel matching brackets $\frac{(x-1)(x-8)}{(x+2)(x+2)}$
Substitute into	A2.14 Adding/Subtracting Algebraic Fractions		e.a	simplify $\frac{2x-4}{3} + \frac{3x+4}{5}$			AD 15	2.34	Multiplying/Dividing	algeoraic iractions	e.g Simplify $\frac{x^2+2x-3}{x^2+4x+4}$. $\frac{x^2+5x+6}{x^2-6x-16}$

14

A2: Formulae, Functions and Expressions Find the Inverse of a function

	Work from right to left replacing the x's with the stated function.	Working from right to left $g(x)$ needs to be substituted into $f(x)$	$fg(x) = 3(x^2 - 6) + 5$	Expand the brackets and simplify	$fg(x) = 3x^2 - 13$	e.g Working from right to left $f(x)$ needs to be substituted into $g(x)$	$gf(x) = (3x+5)^2 - 6$	Expand the brackets and simplify	$gf(x) = 9x^2 + 30x + 19$	
	A2.19 Find a compound function	e.g Find $fg(x)$ where $f(x) = 2x \pm 5$ and	$g(x) = x^2 - 6$ $g(x) = x^2 - 6$			e.g Find $gf(x)$ where	g(x) = 3x + 3 and $g(x) = x^2 - 6$			
Inction	Replace the $f(x)$ notation with a y then rearrange the formula to make x the subject of the formula.	Finally replace all y's in the formula with x's	<u>6.0</u>	Replace f(x) with y v = 3x + 5	Rearrange the formula to make x the subject	$x = \frac{y-5}{3}$ Replace all y's with x's	$f^{-1}(x) = \frac{3}{3}$	e.g	Replace f(x) with y $y = x^2 - 6$ Rearrange the formula to make x the subject	Replace all y's with x's $f^{-1}(x) = \sqrt{x+6}$
Find a compound function	A2.18 Find the inverse of a function			Find $f^{-1}(x)$ where	c + xc - (x) f				e.g Find $f^{-1}(x)$ where $f(x) = x^2 - 6$

Solving simultaneous equations graphically Solve a quadratic equation by factorising when a=1

A3.7 Solving simultaneous equations graphically

	Write the equation in the form $ax^2 + bx + c = 0$. $x^2 + 7x + 12 = 0$	Factorise the left-hand side. Find two values that add to make b and multiply to make c.	Add to make 7 Multiply to make 12. Factors of 12 (12&1, 6&2, 3&4)	(x + 3)(x + 4) = 0	Equate each factor to 0 and solve for the values of x.	x + 3 = 0 (subtract 3 from both sides) X = -3	x + 4 = 0 (subtract 4 from both sides) X = -4	x = -3 or x = -4	
	A3.8 Solve a quadratic equation by factorising when a =	e.g. Solve	x ² + 7x + 12						
קומטומוני פקטמוטו טע ומכוטואוווע אוופוו מ=ו 	Draw the graphs of the equations. Find out where they cross. The solution is the coordinates of the intersection point.	$\frac{1}{3} \sqrt{y} = 2x + 2$				x = -3 v = -4			

y = 2x + 2 y = x - 1

e.g. Solve 18

A3: Solving Equations and Inequalities Solve a quadratic equation by factorising when a does not equal 1 Solve a quadratic equation using the quadratic formula

	Write the equation in the form $ax^2 + bx + c = 0$.	$x^2 + 4x - 2 = 0$	Write the values for a, b and c (including the sign)	a = 1, b = 4, c = -2	Substitute the values for a, b and c into the formula		x = <u>-4 ± v (4^z - 4 x 1 x - 2)</u> 2 x 1	Simplify to get the two values of x	$x = \frac{-4 \pm \sqrt{24}}{2}$	$x = \frac{-4 + \sqrt{24}}{2} = 0.45 \text{ (2dp)}$	u x = <u>-4 - √ 24</u> = -4.45 (2dp) 2
·	A3.10 Solve a quadratic equation using the	quadratic formula	$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2}$	70	e.g. Solve		x ² + 4x - 2				
Solve a quadratic equation using the quadratic formula	Write the equation in the form $ax^2 + bx + c = 0$.	ZX ⁴ + /X + 3 = 0	Factorise the left-hand side. Find two values that add to make b and multiply to make (c x a).	Add to make 7 Multiply to make 3 x 2	iviuitiply to make o Factors of 6 (6&1, 3&2)	6 + 1 = 7	As a = 2, we must divide 6 by 2 to get 3.	(2x + 1)(x + 3) = 0	Equate each factor to 0 and solve for the values of x.	<pre>2x + 1 = 0 (subtract 1 from both sides) 2x = -1 (divide both sides by 2)</pre>	$x = -\frac{1}{\sqrt{2}}$ x + 3 = 0 (subtract 3 from both sides) X = -3 X = - $\frac{1}{\sqrt{2}}$ or x = -3
Solve a quadrat	A3.9 Solve a quadratic equation by	factorising when a	aces not equal 1 e.g.	7x + 3 = 0							

A3: Solving Equations and Inequalities

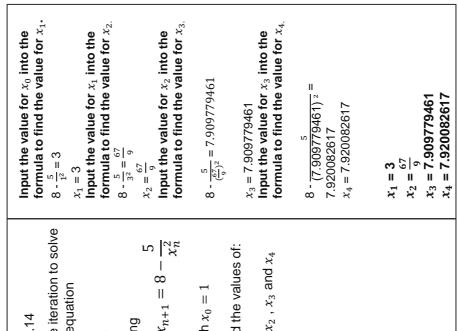

Solve a quadratic equation by completing the square Solve linear /madratic simultaneous equations using substitution

Rearrange the linear equation	x + y = 4 y = 4 - x	Substitute the linear equation into the quadratic.	$x^2 + (4 - x)^2 = 40.$	Expand and simplify.	$(4 - x)^2 = x^2 - 8x + 16$ $x^2 + x^2 - 8x + 16 = 40.$ $2x^2 - 8x + 16 = 40$	Solve the quadratic by an appropriate method. $2x^2 + 46 = 40$	2x ² - 8x - 12 - 40 (2x - 12)(x + 2) = 0 2x = 12 x = 6	or x = -2 Substitute the values found into the linear equation.	When x = 6, y = 4 - 6 = -2 When x = -2, y = 42 = 6	
A3.12 Solve	linear/quadratic simultaneous	equations using substitution	e.g.	Solve	Solve $x + y = 4$ and $x^2 + y^2 = 40$.					
Write the equation in the form ax ² + bx + c = 0.	$x^2 + 8x - 40 = 0$	Write x + half the coefficient of x in brackets then square	$(x + 4)^2 - 40 = 0$	Square and subtract the coefficient of x	4 ² = 16 (x + 4) ² - 16 - 40 = 0 (x + 4) ² - 56 = 0	Now solve by adding the constant to both sides	(x + 4) ² - 56 = 0 (x + 4) ² = 56 Square root both sides	(x + 4) ² = 56 x + 4 = ± √56 Solve to find the two values of x	x = -4 - √56 = -11.48 (2dp) or x = -4 +√56 = 3.48 (2dp)	
A3.11 Solve a quadratic	equation by	square	e.g. Solve	x ² + 8x - 40						

A3: Solving Equations and Inequalities

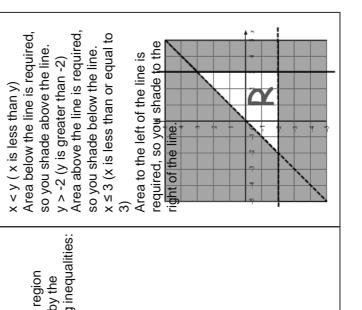

Solve linear/quadratic simultaneous equations graphically Use iteration to solve an equation

	Input the value for x formula to find the x $8 - \frac{5}{1^2} = 3$ $x_1 = 3$ $x_1 = 3$ Input the value for x formula to find the x $8 - \frac{5}{3^2} = \frac{67}{9}$	formula to find the value for $\frac{5}{(\frac{5}{2})^2} = 7.90977946$	$x_3 = 7.909779461$ Input the value for x formula to find the v	$\begin{array}{l} 8 & -\frac{5}{(7.909779461)^2} = \\ 7.920082617 \\ x_4 = 7.920082617 \end{array}$	$x_1 = 3$ $x_2 = \frac{67}{9}$ $x_3 = 7.9009779461$ $x_4 = 7.920082617$
	A3.14 Use iteration to solve an equation e.g. Using $x = R - \frac{5}{5}$	With $x_0 = 1$	Find the values of: x_1, x_2, x_3 and x_4		
Use iteration to solve an equation	Draw the graphs of the equations. Find out where they cross. The solutions are the coordinates of the intersection points.	7 = A	3 2 11 12 3 4 5 X	When x = -1 y = 8 or When x = 3 v = 0	
Use iteration to	A3.13 Solve linear/quadratic simultaneous equations graphically e.g.	$y = x^2 - 4x + 3$ y = -2x + 6			

Represent an inequality graphically A3: Solving Equations and Inequalities

	Decide which side of the line to shade – shade the section you do not want and leave the required region unshaded. x < y (x is less than y) Area below the line is required, so you shade above the line. y > -2 (y is greater than -2) Area above the line is required, so you shade below the line. x ≤ 3 (x is less than or equal to 3) Area to the left of the line is required, so yow shade to the right of the line.
uality	A3.16 Find a region on a graph defined by more than one inequality e.g. e.g. Find the region defined by the following inequalities: x < y y > - 2 x ≤ 3
n a graph defined by more than one inequality	Plot each straight line. Use a broken line for < or >. Use a solid line for < or >. Use a solid line for < or >. Decide which side of the line to shade. Leave the required region unshaded.
Find a region on a	A3.15 Represent an inequality graphically e.g. Represent the following inequalities graphically: x < y y > - 2 x ≤ 3

.

A3: Solving Equations and Inequalities Use trial and improvement to solve an equation

5	
A3.17 Use trial and improvement to solve an equation	Substitute different values for x into the equation until a value closest to the solution is found to the required degree of accuracy.
e.g. Heo trial and	Solution between 7 and 8. Start with the midpoint of 7.5.
improvement to	$(7.5)^2 + 3(7.5) + 2 = 80.25$ too small
solve the following equation to 1dp.	$(7.6)^2 + 3(7.6) + 2 = 82.56$ too small
$x^2 + 3x + 2 = 86$	$(7.7)^2 + 3(7.7) + 2 = 84.39$ too small
has a solution between 7 and 8.	$(7.8)^2 + 3(7.8) + 2 = 86.24$ too big
	Solution is between 7.7 and 7.8
	(7.75) ² + 3(7.75) + 2 =85.3125 <i>too</i> small
	The solution is between 7.75 and 7.8. Therefore to 1dp the solution is 7.8. X = 7.8 to 1dp

Find the equation of vertical and horizontal lines Find the equation of a line by considering the coordinates

A4.3 Find the equation of vertical and horizontal lines	Vertical lines have the form 'x = n' where n is the value where the line crosses the x axis.	A4.4 Find the equation of a line by considering the coordinates	Select a set of coordinates from the line and compare the x and y values. Use these to determine the equation of the line.
is t	e.g. this line is x = 3.	e.g.	e.g. from this line you can get the coordinates (-2,-2), (-1, -2), (0, -2), (1,-2), (2,-2) In all of these the y coordinate is -2 so the equation of the line
Write the equation of this line	Horizontal lines have the form 'y = n' where n is the value where the line crosses the y axis. e.g. this line is y = 5.	Find the, equation of this line	 y = -2. y = -2. From this line you can get the coordinates (-2,-3), (-1, -1), (0, 1), (1, 3) In all of these the y coordinate is found by multiplying the x coordinate by 2 and adding 1. So the equation of the line is y = 2x + 1.

Identify the intercept of a graph Calculate the gradient of a linear graph

A4: Graphs 1 Calculate the gradient of a line segment between two points Construct the equation of a line

The equation of a straight line is given by $y = mx + c$. m is the gradient. c is the intercept. e.g. Gradient = $\frac{5-2}{1-0} = \frac{3}{1} = 3$. Intercept = 2. y = mx + c. y = mx + 2.	Parallel lines have the same gradient. Give the equation of a line with same gradient. The intercept can be any value. e.g. Any line with a gradient of 3 y = 3x +6
A4.8 Construct the equation of a line e.g.	A4.9 Find the gradient of a line parallel to a given line e.g. Find a line parallel to y = 3x - 1
culated using $\frac{1}{3} = -2$.	
The gradient is calculated using the formula Gradient = $\frac{Change}{Change} \frac{in y coordinates}{in x coordinates}$ e.g. Gradient = $\frac{9-3}{2-0} = \frac{6}{2} = 3$. Gradient = $\frac{7-1}{2-5} = \frac{6}{-3} = -2$.	
A4.7 Calculate the gradient of a line segment between two points e.g. Find the gradient of the line segment between the points (0,3) and (2,9) Find the gradient of the line segment between the points	(2,7) and (5,1)

Plot a quadratic Graph Plot and Use Distance Time Graphs

Plot distance on the vertical axis. Plot time on the horizontal axis. Speed is calculated using Speed = $\frac{Distance Travelled}{Time taken}$.	between A and b, 5 km are travelled in 5 hours. Between B and C, no distance is travelled during the 3 hour period.	Between E and F, 12 km are travelled in 6 hours. The greatest speed occurs where the line is the steepest. This between C and D.	You can also calculate speed: A to B $3 \div 5 = 0.6$ km per hour; C to D $9 \div 4 = 2.25$ km per hour; E to F 12 $\div 6 = 2$ km per hour;
A4.12 Plot and use distance time graphs	Distance of the second	From the graph explain what happens between: A and B; E and F.	Where is the speed the greatest?
Draw a table of values by substituting values of x into the formula. Plot the points in pencil. Join the points with a ruler and pencil. They should be in a smooth curve	e.g. $y = x^2 - 4x + 5$ x -1 0 1 2 3 4 5 y 10 5 2 1 2 5 10	5	
A4.11 Plot a quadratic graph	e.g. Plot the graph of y = x ² -4x + 5		

Find the coordinates of the midpoint of a line segment

Find the equation of a line passing through a given point, parallel to a given line

If the lines are parallel, the gradient is the same for both.	Use y = mx + c.		e.g. Gradient = 3.	When $x = 2$, $y = 7$.	y = mx + c.	7 = 3 × 2 + c		y = 3x + 1.							
A4.14 Find the equation of	a line passing through a given	point, parallel to a	given line	e.g.	Find the equation of	the line parallel to	y = 3x - 1	that passes through the point $(2, 7)$							
gment and dinates of the	/ay position.	the	e ends of the		ne midpoint	age of the x	e ena points,	2.5.	ne midpoint age of the v	e end points,					
Draw the line segment and identify the coordinates of the	point at the halfway position.	Alternatively, use the	coordinates of the ends of the line segment.)	x coordinate of the midpoint	is the mean aver	coordinates of the end points,	i.e. (-3 + 8) ÷ 2 = 2.5.	y coordinate of the midpoint is the mean average of the v	coordinates of the end points,	i.e. (5 + -1) ÷ 2 = 2.				
A4.13 Find the	coordinates of the midpoint of a line	segment	e.g.	Find the midpoint of	this line segment		(-3,5)	Σ		(Γ^+, \diamond)					

Plot and use speed time graphs

Find the gradient of a line perpendicular to another line

When two lines are perpendicular, the product of their gradients is -1.	Find the gradient of the given line.	This the reciprocal and change the sign. This is the gradient of the perpendicular line.	e.g.	Gradient of y = 5x + 4 is 5. Negative reciprocal is -1/5 or - 0.2.	Gradient of perpendicular is - 0.2.	Gradient of y = -2x + 4 is -2. Negative reciprocal is $\frac{1}{2}$ or 0.5.	Gradient of perpendicular is $\%$.	
A4.16 Find the gradient of a line perpendicular to another line			e.g. Find the gradient of	a line perpendicular to the line y = 5x + 4	Find the gradient of a line perpendicular	to the line $y = -2x + 4$		
Plot speed on the vertical axis. Plot time on the horizontal axis. Acceleration is calculated using Acceleration = ^{Change in speed} .	e.g.	Between 0 and 10 seconds, speed increased from 0 to 16 m/s in 10 seconds.	Acceleration = 16 ÷ 10 = 1.6 m/s ² .	Between 10 and 20 seconds, speed remains constant.	Acceleration = 0 m/s⁺. Between 20 and 25 seconds,	speed decreased from 16 to 0 m/s in 10 seconds.	Acceleration = -10 + 3 = -3.2 m/s ² .	
A4.15 Plot and use speed time graphs	e.g.	Read Beend B	From the araph	explain what happens between: 0 and 10 seconds;	10 and 20 seconds; 20 and 25 seconds.			

Find the equation of a line passing through a given point, perpendicular to a given line Find the equation of a perpendicular bisector to a line segment

Plot and use acceleration time graphs

Plot acceleration on the vertical axis. Plot time on the horizontal axis. Plot time on the horizontal axis. e.g. Between 0 and 10 seconds, acceleration = 16 ÷ 10 = 1.6 m/s ² . Between 10 and 20 seconds, acceleration = 0 m/s ² .	acceleration = -16 ÷ 5 = -3.2 m/s ² 08 04 Acceleration m/s ² 04 16 16 16 16 16 16 16 16 16 16
A4.19 Plot and use acceleration time graphs e.g. Plot an acceleration time graph for this speed time graph	The (constant)
If the lines are perpendicular, the product of their gradients is -1. Use $y = mx + c$. Use $y = mx + c$. Gradient of given line = $\frac{1}{2}$. Gradient of perpendicular = -2. When $x = 2$, $y = 7$. y = mx + c. $7 = -2 \times 2 + c$ c = 11 y = -2x + 11.	Find the gradient and midpoint of the line segment. Find the gradient of a line perpendicular to the line segment. Use $y = mx + c$. Use $y = mx + c$. e.g. Gradient of line $= \frac{7-5}{0-4} = -\frac{1}{2} = -\frac{1}{2}$. Gradient of line is (2, 6). y = mx + c. $6 = 2 \times 2 + c$ c = 2 y = 2x + 2.
A4,17 Find the equation of a line passing through a given point, perpendicular to a given line e.g. Find the equation of the line perpendicular to $y = \frac{1}{2} \times + 3$ that passes through the point (2, 7)	A4.18 Find the equation of a perpendicular bisector to a line segment e.g. e.g. Find the equation of the perpendicular bisector of the line segment joining the points (0, 7) and (4,5).

Relate gradient of a line or curve to rate of change Relate the area under a speed time graph to distance

The gradient of a line gives the rate of change of the variables.	The area under a speed time graph gives the distance travelled.	In the example, the distance	Distance travelled = (16 x 10) ÷
On a distance time graph, it shows the rate of change of distance with respect to time, i.e. speed.		travelled in the first 10 seconds	2
On a speed time graph, it shows the rate of change of speed with respect to time, i.e. acceleration.		is the area of the triangle.	= 80m.
A4.20 Relate gradient of a line or curve to rate of change.	A4.21 Relate the area under a speed time graph to distance.		

A5: Sequences

Continue a sequence using a term to term rule Generate a linear sequence using a term to term rule Generate e linear sequence using nth term Find the nth term of a linear sequence

|--|

A5.3 Generate a linear sequence using nth term	
If the nth term of a sequence is 5n+1 what are the 1 st , 2 nd and 3 rd terms of the sequence? Replace n by each of the numbers 1, 2 and 3 in turn.	If the nth term is 5n+1 1 st term (n=1) = 5 × 1 + 1 = 6 2 nd term (n=2) = 5 × 2 + 1 = 11 TB ^{Ed} seque(n=8) be gins 35 + 1 + 16 T B ^{Ed} seque (n=8) be gins 35 + 1 + 16 which matches the 5n in the formula.
A5.4 Find the nth term of a linear sequence	Position 1 2 3 4 Term 4 10 16 22
The position to term rule allows us to write a rule for any term in the sequence from its position.	+6 +6 means that the rule for this sequence contains 6n. $1 \times 6 - 2 = 4$ $2 \times 6 - 2 = 10$
Find the nth term for the sequence 4, 10, 16, 22	3 x 6 - 2 = 16 Term = position x 6 - 2 Term = n x 6 - 2 nth term = 6n - 2

A5: Sequences

Continue sequence of square numbersRelate sequences to patterns Continue sequence of cube numbers Plot a linear graph from a sequence or formula

Find a formula for w in terms of b $\frac{b + 2 - 3}{W - 5 - 6 - 7}$ Using the rule for sequences w = b + 4 Therefore when b = 8 w = 8 + 4 w = 12	Now plot x and y values as co-ordinate points and join with a straight line. y $\frac{y}{2}$
A5.7 Relate sequences to patterns This is a sequence of diagrams showing black tiles <i>b</i> and white tiles <i>w</i> . How many white tiles are there when there are 8 black tiles?	A5.8 Plot a linear graph from a sequence or formula Plot the graph of the formula y = 2x + 1 First make a table of values + y = 2 x 0 + 1 = -1 y = 2 x 0 + 1 = -1 t y = 2 x 0 + 1 = 1 etc $\frac{1}{2}$
$\begin{array}{cccccccccccccccccccccccccccccccccccc$	1 8 27 64 125 +7 +19 +37 +61 +12 +19 +37 +61 +12 +18 +24 +6 +6 +6 +6 If we calculate the first line of differences and continue with the second we find that the third line of differences is a constant 6. Each term is the cube of its term number.
 A5.5 A5.5 Continue sequence of square numbers A square number is obtained by multiplying a number by itself e.g. 1 x 1 = 1 2 x 2 = 4 1, 4, 9, 16, 25 is the start of a sequence of square numbers. How can this sequence be continued? 	 A5.6 Continue sequence of cube numbers A cube number is obtained by multiplying a number by itself three times e.g. 1 x 1 x 1 = 1 2 x 2 x 2 = 8 1, 8, 27, 64, 125 1, 8, 27, 64, 125 is the start of a sequence of cube numbers. How can this sequence be continued?

A5: Sequences

Recognise and continue sequence of triangular numbers

Recognise and continue Fibonacci type sequences	1, 3, 6, 10, 15, is the start of the continue sequence of triangular numbers.	The difference between the terms is +2, +3, +4, +5 and this can be used to continue the sequence.	The 1st row of the triangle is 1, the 1^{st} triangle number. Adding the $1^{st} + 2^{nd}$ rows of the triangle gives $1 + 2^{=} 3$ which is the 2^{nd} triangle number Adding the $1^{st}+2^{nd}+3^{rd}$ rows gives $1 + 2 + 3 = 6$ which is the 3^{rd} triangle number and so on	
Recognise a	A5.9 Recognise and continue			A5.10 Recognise and continue Fibonacci type sequences 0, 1, 1, 2, 3, 5, 8, 13, This is the Fibonacci sequence. How can this sequence be continued?

Identify arithmetic and geometric type sequences Identify a quadratic sequence

A5.11 Identify arithmetic and geometric type sequences In an Arithmetic sequence the same amount (common difference) is added on to each term to continue the sequence. In a Geometric sequence every term is multiplied by the same amount (common ratio) to continue the sequence.	Are the following arithmetic or geometric sequences? (i) 2, 6, 18, 54, (ii) 5, 8, 11, 14, 17 (iii) 256, 128, 64, 32, (iv) 42, 38, 34, 30, 26, (iv) 42, 38, 34, 30, 26, (i) Geometric: common ratio x3 (i) Arithmetic: common ratio x 0.5 (ii) Arithmetic: common ratio x 0.5 (iv) Arithmetic: common difference (v) -4
A5.12 Identify a quadratic sequence 3 6 11 18 27 This sequence does not have a common difference on the first line of Differences so we continue to the second row of differences.	3 6 11 18 27 +3 +5 +7 +9 +2 +2 +2 +2 The 1 st row of differences has a common difference of 2 so this is a quadratic sequence.

A5: Sequences Use the nth term to write a quadratic sequence

IS 4 rule IS $2n^2$ Subtract: 2 5 8 11 is 6 rule is $3n^2$ This sequence has a rule
$2n^2 + 3n - 1$ 3n-1 so the whole rule is $2n^2 + 3n - 1$

The graph of a circle is of the form: form: $x^2 + y^2 = r^2$ where r is the radius and the centre is (0,0). e.g. $x^2 + y^2 = 9$ $x^2 + y^2 = 3^2$ This a circle of radius 3 and centre (0,0).	
A6.8 Know and plot the graph of a circle e.g. plot the graph of the circle $x^2 + y^2 = 9$.	

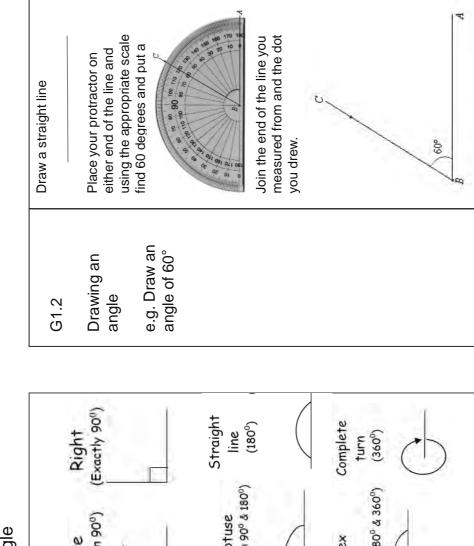

Estimate the gradient of a curve using a tangent Estimate the area under a curve using trapezia

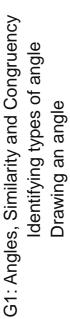

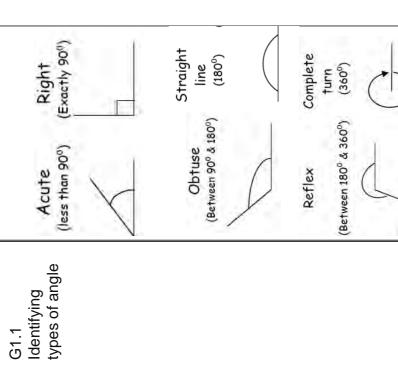

A6: Graphs 2 Relate gradient of a line or curve to rate of change Relate the area under a speed time graph to distance

A6.11 Relate gradient of a line or curve to rate of change. A6.12 Relate the area under a speed time graph to distance.	The gradient of a line gives the rate of change of the variables. On a distance time graph, it shows the rate of change of distance with respect to time, i.e. speed. On a speed time graph, it shows the rate of change of speed with respect to time, i.e. acceleration. The area under a speed time graph gives the distance travelled.
	Distance travelled = (16 x 10) ÷ 2 = 80m.

Know and use the interior angles in a triangle Know and use the sum of interior angles in a quadrilateral

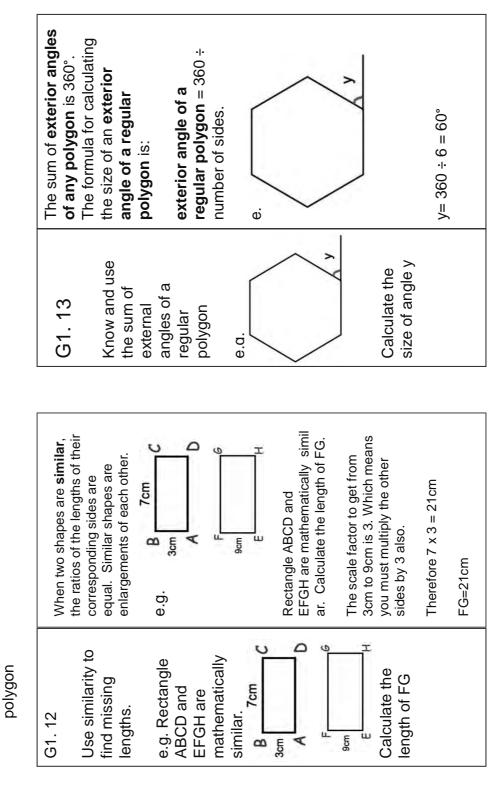

Know and use the sum of internal angles of a polygon Identify congruent shape using the simple definition of congruency

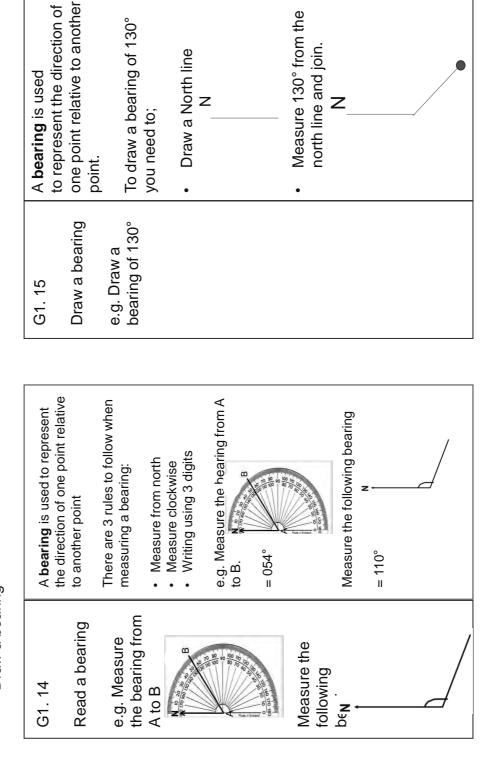

entiry congruent snape using the simple definition of congruency

Congruent shapes have the same size and shape . This means that the sides and segments of two shapes have the same length. And, the angles possess the same measurements	If one shape can be made from another using Rotations, Reflections, or Translations then the shapes are Congruent.	e.g. List the congruent pairs of shapes.	A and G D and I
G1. 11 Identify congruent shapes using the simple definition of congruency.	e.g. List all the congruent pairs of shapes.		ш ш ш
A polygon is a 2d shape formed by straight lines. The formula for finding the sum of the measure of the interior angles is (n - 2) x 180. n represents the number of sides the shape has.	(5 – 2) x 180 = 540° Calculate the sum of	interior angles in a Hexagon A hexagon has 6 sides.	(6 – 2) x 180 = 720°
G1. 10 Know and use the sum of internal angles of a polygon e.g.	Calculate the sum of internal angles of the following shape.		Calculate the sum of interior angles in a Hexagon

Use similarity to find missing lengths Know and use the sum of external angles of a regular

Draw a bearing

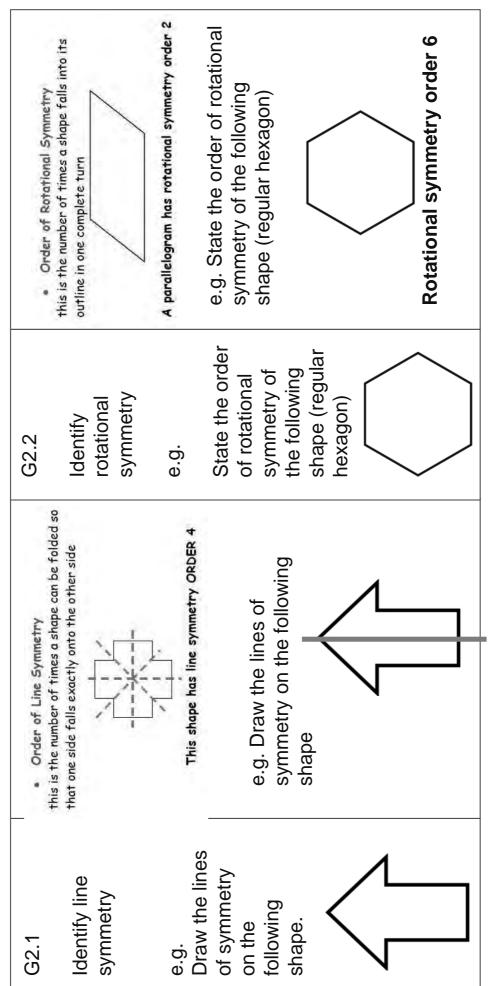

A6: Graphs 2 Prove Congruency using ASA SAS SSS and RHS Use similarity to find missing areas

Similar figures are identical in shape, but not necessarily in size. A missing length, area or volume on a reduction/enlargement figure can be calculated by first finding the scale factor.		When calculating a missing are equal. When calculating a missing area, we need to calculate the Area Scale Factor.	Area Scale Factor (ASF) = (Linear Scale Factor) ²	Area Scale Factor (ASF) = 5^2	Area scale factor = 25	So the area of the new shape is;		= 2000c#f
G1. 17 Use similarity to	find missing areas	e.g. find the missing area				Nati dramo occurately	The even of the amulier logo is Scorre Find the area of the lenger logo	
Congruent shapes have the same size and shape. One will fit exactly over the other.	2 triangles are congruent if any of these 4 conditions are satisfied on each triangle.	The corresponding sides are	equal, 000	2 sides and the included angle	are equal, SAS	2 angles and the included side	are equal, ASA	Both triangles are right angled, the hypotenuses are the same length and another pair of sides are equal, RHS.
G1. 16 Prove congruency	using ASA,SAS,SSS and RHS			>*		A A A	2	

A6: Graphs 2 Use similarity to find missing volumes

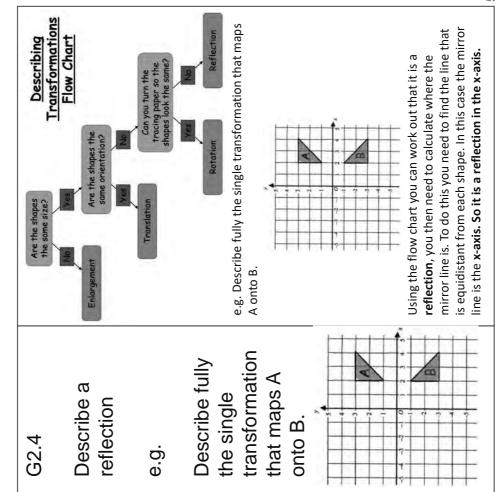

Similar figures are identical in shape, but not necessarily in size. A missing length, area or volume on a reduction/enlargement figure can be calculated by first finding the scale factor.	We already know that if two shapes are similar their corresponding sides are in the same ratio and their corresponding angles are equal.	When calculating a missing volume, we need to calculate the Volume Scale Factor. Volume Scale Factor (VSF) = (Linear Scale Factor) ³	Volume Scale Factor (VSF) = 3 ³ VSF = 27	So the volume of the new shape is;	Volume of old shape x Volume scale factor	$15 \times 27 = 405 cm^3$
G1. 19 Use similarity to find missing	volumes e.g. Calculate	the missing volume Below are two similar pertagonal prisms.	B 3cm 9cm	The volume of prism A is 15cm ⁵ Work out the volume of prism B.

	10mm 1cm	100cm 1m	1000 1km	e.g. convert:	100mm to cm Divide by 10 =10cm	170cm to m Divide by 100 =1.7m	6700m to km Divide by 1000 =6.7km	To work the other way i.e. cm to mm you do the inverse i.e. multiply by 10.
	G2.18 Convert metric units	of length e.a.	Convert:	100mm to cm 170cm to m 6700m to km	~ □			
Convert metric units of length	We can measure how long things are, or how tall, or how far apart they are. Those are all	examples of length measurements. Small units of length are called millimetres .	A millimetre is about the thickness of a plastic id card (or credit card).	When we have 10 millimetres, it can be called a centimetre . 1 centimetre = 10 millimetres A fingernail is about one centimetre wide .	We can use millimetres or centimetres to measure how tall we are, or how wide a table is, but to measure the length of a football pitch it is	better to use metres . A metre is equal to 100 centimetres. 1 metre = 100 centimetres	The length of a guitar is about 1 metre Metres can be used to measure the length of a house, or the size of a playground.	A kilometre is equal to 1000 metres. The distance from one city to another or how far a plane travels can be measured using kilometre s.
Convert metri	G2.17	Use metric measures of length						

G2: 2D Shapes Use Metric measures of length Convert metric units of length

		g 1kg		d 1 tonne			ert:		kg		n tonnes	000 = 9.87 tonnes			To work the other way i.e. kg to g	you do the inverse i.e. multiply by

Find the area of a triangle of unknown height or find a side or angle when given the area of a triangle

G5: Pythagoras and Trigonometry Calculate the length of a vector

Prove that two vectors are parallel

Prove that two vectors are co-linear

G5.18 Calculate the length of a vector	To calculate the length of a vector you use a simplified version of pythagroas' theorem. For a vector $\binom{x}{y}$ you	G5.20 Prove that two vectors are co-linear (lie in a straight line)	To prove that two vectors are co- linear, or make a straight a straight line you need to prove that two
e.g Find the length of the vector $\left(rac{3}{-4} ight)$	calculate $\sqrt{x^2 + y^2}$ to find the length e.g $\sqrt{3^2 + -4^2}$ vector length = 5 units	e.g AOB is a triangle P is a point on \overline{AO} $\overline{\overline{AB}} = 2n \overline{\overline{AO}} = 6h$ and	vectors are parallel as in Co. 13 but also that they both go through a common point e.g To prove that PQC is a straight line
G5.19 Prove that two vectors are parallel	Use the skills built in G5.7/G5.8 and G5.9 to prove that two unknown vectors are parallel. Firstly by using vector notation to combine the vectors you require then showing that they are	\overline{AP} : $\overline{PO} = 2:1$ B is the midpoint of \overline{AC} Q is the midpoint of \overline{OB} Prove that PQC is a	we will show that \overline{PQ} and \overline{PC} are parallel and as they both go through P they will make a straight line $\overline{OB} = \overline{OA} + \overline{AB} = 2a - 6b$ $\overline{PQ} = \overline{PO} + \overline{OQ}$ where $\overline{PO} = \frac{\overline{AO}}{3} = 2b$
e.g OPQ is a triangle $\overline{OQ} = q$ and $\overline{OR} = p$ D is the microsite of	e.g For \overline{RS} to be parallel to \overline{OQ} it will need to be a multiple of q	straight line o	and $\overline{OQ} = \frac{OB}{2} = \frac{2a-6b}{2} = a - 3b$ Therefore $\overline{PQ} = 2b + a - 3b = a - b$
	PQ = PO + UQ so $PQ = q - p\overline{RS} = \overline{RP} + \overline{PS} and as R is the mid pointof \overline{OP} and S is the midpoint of \overline{PQ} then\overline{RP} = \frac{p}{2} and \overline{PS} = \frac{q}{2} - \frac{p}{2}$	a	PC = PA + AC where $\overline{PA} = -\frac{2\overline{AO}}{3} = -4b$ and $\overline{AC} = 2\overline{AB} = 4a$ 4a Therefore $\overline{PC} = -4b + 4a$ or $4a - 4b$
	Therefore $\overrightarrow{OQ} = \frac{7}{2} + \frac{2}{2} - \frac{2}{2} = \frac{2}{2}$ Therefore $\overrightarrow{OQ} = \frac{RS}{2}$ so \overrightarrow{RS} and \overrightarrow{OQ} are parallel	A B	That means that $\overline{PC} = 4\overline{PQ}$ which proves that these two vectors are parallel. As they also both go through the common point P that proves that PQC is a straight line

Multiply by a two digit number Multiply by 10, 100, 1000 etc, Divide by a one digit number

N1.1 Understand the use of place	ТһНТ U. 6 700	
value e.g. What value is the 6 in the number 6700	The '6' is in the thousands column. Therefore the valu of the 6 is six thousand.	The '6' is in the thousands column. Therefore the value of the 6 is six thousand.
N1.2 Multiply by a two- digit number e.g. 152 x 34	Draw a grid. Write the hundreds, tens and units across the top. Write the tens and units down the side. Multiply each number together. Add all the numbers from inside the box. 2	dreds, tens oss the top. s and units e. number number c.
	30 3000 4 400	1500 60 200 8
	152 x 34 = 340	152 x 34 = 3400 +1700+ 68 = <u>5168</u>

N1.3	To multiply by powers of ten.
Multiply by 10,	move all the digits to the left by
100, 1000 etc.	the same number of places as
	the power
e.g. 3.52 x10	
3.52 x 100	3.52 x 10 = 35.2 (move 1 place)
3.52 x 1000	3.52 x 100 = 352 (move 2
	places)
	<u>3.52 x 1000 = 3520 (move 3</u>
N1.4	Draw a bus stop.
Divide by a one-	The number you divide by goes on
digit number	the outside.
	Divide the number into the first
e.g. 756 ÷ 3	number underneath.
	If it does not go, write 0 on top and
	carry the number underneath.
	Divide into the next number
	2 5 2
	3 7 5 6
	•
	1 5 (
	1 5
	0 6
	e.g. 756 ÷ 3 =252

N1: Calculating with Numbers Divide by a two digit number	Use BIDMAS to order operations	Add and subtract decimals	Multiply decimals
--	--------------------------------	---------------------------	-------------------

213	Draw a bus stop. The number you divide by goes on the outside. Divide the number into the first number underneath. If it does not go, write 0 on top and carry the number underneath. Divide into the next number.	$3 2 \begin{bmatrix} 0 & 1 & 5 & 4 \\ 4 & 9 & 2 & 8 \\ -3 & 2 & 4 \\ -1 & 7 & 2 & 4 \\ -1 & 6 & 0 & 8 \\ -1 & 2 & 8 & -1 & 2 \\ -1 & 2 & 8 & -1 & 2 & 8 \end{bmatrix}$ $4928 \div 32 = 154$	Bracket Indices Divide $\left. \right\}$ Do these in the order they appear Multiply $\left. \right\}$ Do these in the order they appear Add $\left. \right\}$ Do these in the order they appear Subtract $\left. \right\}$ Do these in the order they appear e.g. $3 + 4 \times 6 - 5 = 22$ e.g. $3 + 4 \times 6 - 5 = 22$
	N1.5 Divide by a two- digit number e.g. 4928 ÷ 32		N1.6 Use BIDMAS to order operations e.g. 3 + 4 x 6 - 5

4.32 +5.60 9.92	Line up the decimal point. Fill any blank spaces with 0. Add the numbers starting from the right. 4.32 + 5.6 = 9.92	Take out the decimal points. Multiply as with long multiplication. Put the decimal back in. e.g. 2.5 x 1.1 25 x 11 = 275 There are 2 decimal places in the question, so the answer is 2.75 2.5 x 1.1 = 2.75
N1.7 Add and subtract decimals	e.g. 4.32 + 5.6	N1.8 Multiply Decimals e.g. 2.5 x 1.1

Numbers	
g with	-
Calculating	-
21.5	

Divide by decimals

Order negative numbers Add and subtract negative numbers

Multiply and divide by negative numbers

 Remember the rules: When subtracting go down the number line When adding go up the number line 8 + - 2 is the same as 8 - 2 = 6 8 - + 2 is the same as 8 + 2 = 10 8 2 is the same as 8 + 2 = 10 	When multiplying negatives remember: + x + = + + x - = - - x + = - - x + = - - x - = + When dividing negatives remember: + x + = - - x + = - - x + = - - x - = + + x - = - - x - = + - x - = - - x - = + - x - = - - x - = +
N1.11 Add and subtract negative numbers e.g. 8 + -2 8 - +2 82	N1.12 Multiply and divide by negative numbers e.g8 x -2 -8 ÷ -2 -8 ÷ -2
Make the divisor into a whole number. Multiply both numbers. e.g. 2.84 ÷ 0.2 (multiply both by 10) 28.4 ÷ 2 = 14.1 2.84 ÷ 0.2 = 14.1	1 1 1 1 1 1 -3 -2 -1 0 1 2 3 2 > -2 → We say 2 is bigger than -2 -1 < 3
N1.9 Divide by decimals e.g. 2.84 ÷ 0.2	N1.10 Order negative numbers e.g. order the numbers in ascending order: -3, 5, -1, -2, 0

N1: Calculating with Numbers

Use one calculation to work out another Use a calculator efficiently for simple calculations

Use a calculator efficiently for powers, roots and more complex calculations

ſ

Know your keys x ² Square key x ³ Cube key x Power key 7 Square root key (-) Negative key 1 Fraction key	
N1.15 Use a calculator efficiently for powers, roots and more complex calculations	
$24 \times 36 = 864$ $864 \div 24 = 36 = 864$ $864 \div 24 = 36 = 864$ $24 \times 36 = 864$ $24 \times 36 = 864$ (Notice how the sum changes å so does the answer) $24 \times 36 = 8640 \div 36 = 240$ (Notice how the sum changes å so does the answer) $24 \times 36 = 864$	864÷2.4=360 864÷360=2.4 (Norice how the sum changes & the answer does the opposite) Know your keys Addition: + Subtraction: - Multiply: x Divide: + Equals: = Brackets: ()

Percentages	
2: Fractions, Decimals and Percentages	
N2: Fractions, D	

Write equivalent fractions Simplify a fraction

Add and subtract fractions (same denominator) Add fractions (different denominators) Subtract fractions (different denominators)

N2.1 Write equivalent fractions	To write an equivalent fraction you must multiply the numerator and denominator by the same number.
e.g. write equivalent fractions for: $\frac{4}{5}$	$\frac{4}{5} = \frac{16}{20} (multiply by 4)$ $\frac{4}{5} = \frac{40}{50} (multiply by 10)$ $\frac{4}{5} = \frac{8}{10} (multiply by 2)$
N2.2 Simplify a fraction e.g. simplify: <u>15</u> <u>15</u> <u>40</u>	See what number divides exactly into both the numerator and denominator $e.g. \frac{8}{12} \div \frac{2}{3}$ $e.g. \frac{15}{40} \div \frac{3}{8}$ $e.g. \frac{15}{45} \div \frac{3}{8}$

Add & subtract with same denominator e.g. $\frac{2}{3} + \frac{2}{3} = \frac{4}{3} = \frac{1}{3}$	Make denominators the same then add the numerators e.g. $\frac{1}{5} + \frac{7}{10}$ = $\frac{2}{10} + \frac{7}{10}$ = $\frac{9}{10}$	Make denominators the same then subtract the numerators $\frac{4}{5} - \frac{2}{3}$ = $\frac{12}{15} - \frac{10}{15}$ = $\frac{2}{15}$
N2.3	N2.4	N2.5
Add and subtract	Add fractions	Subtract fractions
fractions (same	(different	(different
denominator)	denominators)	denominators)
e.g. $\frac{2}{3} + \frac{2}{3}$	e.g. $\frac{1}{5} + \frac{7}{10}$	$\frac{4}{5} - \frac{2}{3}$

N2: Fractions, Decimals and Percentages

Multiply fractions Find a fraction of a quantity Divide a fraction by a whole number Order fractions Convert common fractions, decimals and percentages

	Convert common tractions, decimals and percentages
N2.6 Multiply fractions	When multiplying fractions, multiply the numerators
	and multiply the
e.g. _ < _ 2	denominators. Cancel
$\frac{7}{3}$	down if possible before or
	after the calculation.
	$\frac{2}{7} \times \frac{2}{3} = \frac{4}{21}$
N2.7	4
Find fraction of a	— means ÷ o x 4. 5
quantity	e.a. To find $-$ of £40
e.g.	5 540 - 5 x 4 - 532
Find $\frac{4}{5}$ of £40	
N2.8	Make the whole number a fraction
Divide a fraction by	e.g. 3 becomes $\frac{3}{1}$
a whole number	Then Keep Change Flip:
e.a.	Keep first fraction the same
2 d. 	Change ÷ to x
7 2	Flip the second fraction and
	calculate _{2 1 2}
	$\frac{-}{7} \times \frac{-}{3} = \frac{-}{21}$

Fractions must have the same denominator	LEARN THESE
They must have the same denominator	= 0.25 = 25% = ¼
They must have the same denominator	= 0.5 = 50% = ½
$\begin{array}{cccccccccccccccccccccccccccccccccccc$	= 0.75 = 75% = ¾
N2.9 Order fractions e.g. order: $\frac{5}{6}, \frac{7}{12}, \frac{2}{3}, \frac{3}{4}$	N2.10 Convert common fractions, decimals and percentages e.g. 0.5, 0.25

N2: Fractions, Decimals and Percentages

Order decimals Find a percentage of a quantity Converting fractions to decimals

N2.11	Decimals need the same
Order decimals	number of digits
e.g. order:	e.g. 0.3, 0.304, 0.32, 0.33
0.3, 0.304, 0.32,	e.30 0.304 0.32, 0.33
0.33	0.300 0.304 0.320 0.330
	Now the decimals can be ordered 0.3, 0.304, 0.32, 0.33
N2.12	e.g. 8% of £240 12 ½ % of 80kg
Find percentage of	= 0.08 × 240 = 0.125 × 80
a quantity	= <u>£19.20</u> = <u>10kg</u>
e.g. 8% of £240	80% of 52 litres
12.5% of 80kg	= 0.8 × 52
80% of 52	= <u>41.6 litres</u>
Wigers3 Converting fraction to decimal e.g. $\frac{1}{5}$ $\frac{12}{8}$	Fractions to decimals - by changing e.g. $\frac{4}{5} = \frac{8}{10} = 0.8$ e.g. $\frac{9}{12} = \frac{3}{4} = 0.75$ Fractions to decimals - by dividing e.g. $\frac{3}{8} = 3\pm 8 = 0.375$

Convert a decimal to a fraction Convert from a percentage to a decimal to a fraction Convert from a decimal to a percentage to a fraction Convert fractions to decimals to percentages

	-
N2.14 Convert decimal to a fraction	To convert see what column the number ends in. In this case the hundredths. Therefore put the
e.g. 0.74	number over 100 and simplify. $0.74 = \frac{74}{100} = \frac{37}{50}$
N2.15 Convert from	$27\% = 0.27 = \frac{27}{100}$
percentage to decimal to fraction	$7\% = 0.07 = \frac{7}{100}$
e.g. 27% 7% 70%	$70\% = 0.7 = \frac{70}{100} = \frac{7}{10}$
N2.16 Convert from decimal	$0.3 = 30\% = \frac{3}{10}$
to percentage to fraction	$0.03 = 3\% = \frac{3}{100}$
e.g. 0.3 0.03	$0.39 = 39\% = \frac{39}{100}$
0.39 N2.17 Convert fractions to decimals to percentages e.g. $\frac{4}{5}$ e.g. $\frac{4}{5}$	$\frac{4}{5} = \frac{80}{100} = 80\% = 0.8$ Change to 100 $\frac{3}{8} = 3 \div 8 = 0.375 = 37.5\%$
)

Multiples and
N4: Factors,

Find the highest common factor of two or more numbers

	List the multiples (times tables) of the numbers. The Lowest Common Multiple (LCM) is the first number common to both (in both lists).	LCM of 9 and 12	Multiples of 9	9. 10, 21, 30, 43, 34, 03, 12, 90	Multiples of 12	12, 24, 36, 48, 60, 72, 84	The LCM of 9 and 12 is 36	(note that 72 is also common to both, but this isn't the lowest)	You would never be asked for	the highest common multiple, as there are an infinite number of common multiples.
	N4.12 Find the Lowest Common Multiple (LCM) of two or more numbers.	e.g. find the LCM of 9 and 12.								
Find the lowest common multiple of two or more numbers	Find the factors of the numbers. The highest common factor (HCF) is the biggest factor that is common to both.	HCF of 36 and 54 Factors of 54	actors of 36 x30	3×12 6×9	4 × 9 6 × 6	18 is the biggest factor of both, and so	the HCF of 36 and 54 is	You would never be asked to find the lowest common factor as 1 is	a factor of all numbers.	This means there will always be an HCF for two or more numbers.
Find the lowest	N4.11 Find the Highest Common Factor (HCF) of two or more numbers.	e.g. find the HCF of 36 and 54.								

Standard Form is a shorthand method for writing large and small numbers.	Large Numbers in Standard Form $5 \times 10^4 = 5000$	A number A number between 1 and 9.9 recurring	$3.2 \times 10^5 = 320\ 000$	$= 4.6 \times 10^{4}$	
N4.14 Write large numbers in standard form.	e.g. Write 50000 in standard form	Write 320000 in standard form			

Write a number as its product of prime factors Write large numbers in standard form	To find the product of prime factors for a number, produce a factor tree. Stop when you get to prime	numbers, which you circle <u> <u> <u> </u> <u> </u></u></u>	36 = 2 × 2 × 3 ×3 (product of prime factors)	36 = 2 ² × 3 ² (index form)	
Write a number Write large num	N4.13 Write a number as its product of prime factors.	e.g. write 36 as the product of its prime factors.			

	Positive Powers	5 x 10 ⁴	= 5 x 10000	=50000	The digit 5 has moved 4	places to the left. Positive power moves to the	left by the number of places equal to the index number		Negative Powers	$5 \times 10^{-3} =$	0.005	The digit moves 3 places to	Negative power moves to the	left by the number of places equal to the number in the	index.
	N4.16 Write a number given in standard	form as a regular number		Write 5 x 10 ⁴ as a		Write 5 x 10 ⁻³ as a									
ו standard form as a regular number	Standard Form is a shorthand method for writing large and	small numbers.	<u>Small Numbers in Standard</u> Form		$5 \times 10^{-3} = 0.005$	3 zeros before the 5	A number A power	-	a.a recurring	$4.1 \times 10^{-5} = 0.000041$	32 X 10 ⁻⁴ not standard form		$= 3.2 \times 10^{-3}$	= 0.0032	

Write small numbers in standard form Write a number in

N4.15 Write small numbers in standard form.

e.g. Write 0.005 in standard form

Write 0.000041 in standard form

Apply the law of indices for multiplying powers Apply the law of indices for powers of powers Apply the law of indices for dividing powers

	Multiply out the brackets $(4^6)^2 = 4^6 \times 4^6$ $= 4^{12}$ $(6^3)^5 = 6^{15}$	$(7^5)^{-4} = 7^{-20}$	Fractional indices are roots. 'Evaluate' means to show your answer as a number value,	and not as an index power. $16\frac{1}{2} = \sqrt{16} =$	$8 \frac{\frac{1}{3}}{\frac{3}{2}} = \frac{3}{2} \frac{3}{8} = 2$	$25 \frac{3}{2}$ Denominator is the numerator the power. = $(\sqrt{25})^3 = 125$
	N4.19 Apply the law of indices for powers of powers e.g. simplify (4 ⁶) ²	$(7^5)^{-4}$	N4.20 Evaluate fractional indices	e.g. evaluate	8 ¹ 3	$25^{\frac{3}{2}}$
nal indices	When multiplying indices add the powers $5^3 \times 5^6 =$ $5^9 \times 4^{-2} =$ 45	When dividing indices subtract the powers	$\frac{8^7}{6^2} = 8^5$	α_ 0	$e_{0}^{2} = 6^{-1}$	When applying the laws of indices the base number (the 8 and the 6 in the above examples) must be the same.
Evaluate fractional indices	N4.17 Apply the law of indices for multiplying powers. e.g. simplify 5 ³ x 5 ⁶ 4 ⁷ x 4 ⁻²	N4.18 Apply the law of	indices for dividing powers. e.a. simplify	87 82	6 ² 6 ⁹	

Evaluate negative indices

	answer is not exact.	$\sqrt{18}$
	is exactly 5. $\sqrt{3}$ is a surd because the	simplify

N4: Factors, Multiples and Primes	Multiply two surd brackets together
-----------------------------------	-------------------------------------

Rationalising the denominator of a surd is removing the surd from the denominator of a fraction by multiplying the numerator and denominator of that fraction by the denominator.	In general: $\frac{a}{\sqrt{b}} \ge \frac{\sqrt{b}}{\sqrt{b}} = \frac{a\sqrt{b}}{b}$	Example: $\frac{3}{\sqrt{2}} \times \frac{\sqrt{2}}{\sqrt{2}} = \frac{3\sqrt{2}}{2}$	These are equivalent fractions
N4.25 Rationalise the denominator of a fraction (simple surd) $\frac{3}{e \cdot 9}$ Rationalise $\sqrt{2}$			

Multiply surd brackets together in the same way you would in algebra with double brackets to form a quadratic expression. Using the grid method is the most straightforward way. Example : Simplify fully	$(5-\sqrt{3})(1+\sqrt{3})$	× 1 V <u>3</u>	$\frac{5}{-\sqrt{3}} = \frac{5}{-\sqrt{3}} = -3$	$= 5 - \sqrt{3} + 5\sqrt{3} - 3$	Collecting terms gives $= 4\sqrt{3} + 2$
N4.26 Multiply two surd brackets together e.g. simplify fully $(5 - \sqrt{3})(1 + \sqrt{3})$					

Rationalise the denominator of a fraction (surd expression) Calculate with numbers in standard form

	When multiplying in standard form. use the laws of indices for the powers, while multiplying the whole numbers as usual. (3×10^4) $\times (2 \times 10^6) = 6 \times 10^{10}$ (4×10^4) $\times (6 \times 10^6) = 24 \times 10^{10}$ $= 24 \times 10^{10}$ $= 2.4 \times 10^{11}$	Make sure numbers are in standard form. When <u>dividing in standard</u> form, use the laws of indices for the powers, while dividing the whole numbers as usual. $(8 \times 10^9) \div (4 \times 10^3) = 2 \times 10^6$
	N4.28 Calculate with numbers in standard form (1) e.g. calculate, giving your answer in standard form, (3 x 10 ⁴) x (2 x 10 ⁶) (4 x 10 ⁴) x (6 x	(10 ⁶) (8 x 10 ⁹) + (4 x 10 ³)
I		
Calculate with numbers in standard form	Rationalising the denominator of a surd is temoving the surd from the denominator of a fraction by multiplying the numerator and denominator of that fraction by the denominator. Example: Rationalise $\frac{5}{3-\sqrt{2}}$ this surd	$\frac{3 - \sqrt{2}}{3 - \sqrt{2}} \times \frac{\sqrt{2}}{(3 + \sqrt{2})}$ $= \frac{5(3 + \sqrt{2})}{(3 - \sqrt{2})(3 + \sqrt{2})}$ $= \frac{15 + 5\sqrt{2}}{9 + 3\sqrt{2} - 3\sqrt{2} - 2}$ $= \frac{15 + 5\sqrt{2}}{7}$
Calculate with nu	N4.27 Rationalise the denominator of a fraction (surd expression) e.g. rationalise this surd $\frac{5}{3-\sqrt{2}}$	

N4: Factors, Multiples and Primes Calculate with numbers in standard form continued

Calculate with numbers in standard form continued	When <u>dividing in standard form</u> , use the laws of indices for the powers, while dividing the numbers as usual. $\frac{1.2 \times 10^{12}}{2.4 \times 10^4} = 0.5 \times 10^8$ $= 5 \times 10^7$	Make sure numbers are in standard form.	When adding and subtracting in standard form, turn the numbers given in standard form back into ordinary numbers first, add or subtract them, then convert your answer to standard form.	(3.5 x 10 ⁴) + (6.2 x 10 ⁵)	= 35 000 + 620 000	= 655 000	= 6.55 x 10 ⁵	
Calculate with	N4.28 Calculate with numbers in standard form (2) e.g. Calculate, giving your answer in	stal <u>1.2 x 10¹²</u> , 2.4 x 10⁴		(3.5 x 10 ⁴) + (6.2 x 10 ⁵)				

e.g. 12 : 15 => <u>4 : 5</u> e.g. 30cm : 1m => 30 : 100 => <u>3 : 1</u>	Divide both sides by a common factor. Convert the amounts to the same units if required,	e.g. 2 : 5 (- both parts by 2) => <u>1 : 2.5</u>		
P1.3 Simplify a ratio e.g. simplify 12:15 Simplify 30cm:1m		P1.4 Write a ratio in the form 1:n	e.g. Write 2:5 in the form 1:n	
5				

Use a ratio and a quantity to find another quantity Simplify a ratio Write a ratio in the form 1:n	One white square out of 4 squares altogether. So as a fraction 1 Part is the numerator 4 Whole is the denominator	Proportion can also be a decimal or percentage. The fraction needs to be converted. As a decimal 0.25 As a percentage 75%	Ratio Squash : Multiply Water by the X 50 on this side this side 50:350 side
Use a ratio and a quantity to Simplify a ratio Write a ratio in the form 1:n	P1.1 Use proportion to describe a part of a whole.	Describe the proportion of the shape that is white	P1.2 Use a ratio and a quantity to find another quantity e.g. The ratio of squash to water is 1:7. How much squash do I need for 50ml of squash

P1: Ratio and Proportion Use proportion to describe a part of a whole

P1: Ratio and Proportion Use a ratio to solve a problem, turning one ratio into another equivalent ratio Changing an amount in proportion. The unitary method

	+6 $(1 + 1)$ $(2 + 2)$ $($	Find the cost or value of one item in each case. Divide the cost by how many. 5 cost £6.10, so 1 costs £6.10 ÷ 5 So 1 pen costs £1.22 8 cost £9.20, so 1 costs £9.20 ÷ 8 So 1 pen costs £1.15 The pack of 8 pens is the best value as the price of 1 pen is lower than in a pack of 5
	P1.6 Changing an amount in proportion. The unitary method. e.g. If 6 books cost £22.50, how much will 11 books cost?	P1.7 Change an amount to compare two values. A best buy problem. e.g A pack of 5 pens cost £6.10 A pack of 8 pens cost £9.20 Which is the best value?
nt to compare two values	e.g. A model ship is made using scale 1:600. What is the real length of the ship? X 40 X 40 X 40	be. So multiply 1 by 40 gives 40. Do the same to the other side of the ratio. Convert answer into sensible units. 24000cm = 240m
Change an amount	P1.5 Use ratio to solve a problem, turning one ratio into another equivalent ratio. e.g. A model ship is made using scale 1:600. The model ship length is 40cm. What is the real length of the ship?	

	e.g A and B share some sweets in ratio 3:2	A gets 12 sweets, how many sweets does B get? so 3 shares = 12	B gets 2 x 4 = 8 sweets		e.g. To increase a quantity by 5% Amount Increased from 100% by	5% so 100 + 5 = 105 105% as a decimal = 1.05 Multiply the quantity by 1.05	
	P1.10 e.g Dividing into a given A al ratio	Using a quantity Ag and a number of Sw shares to find So another quantity. 3 S	- Je	A gets 12 sweets, how many sweets does B get?	a a	percentage. 5% e.g. so 1 What is the 1059 multiplier to Multi increase an	amount by 5%?
Use multiplier to increase by a percentage	e.g. To convert kg and pounds	Pound 13		 0 1 2 3 4 2 % 5 9 10 11 12 Kiloguma Draw lines on to take readings 	 Read the scale carefully e.g. Convert 5kg into pounds. From the line we can see 5kg = 111bs 	e.g. Divide £40 in the ratio of 1 : 3 : 4 Total number of shares = 1+3+4 - 8	- 0 1 share = £40 ÷ 8 = £5 3 shares = 3 × £5 = £15 4 shares = 4 × £5 = £20 1:3:4 = £5:£15:£20
Use multiplier to in	P1.8 Reading a conversion graph	One unit will be on the x-axis, the other unit will be on the y- axis.	Find the unit value on one axis draw a line to the graph's	line and another to the other axis. Read off your value.	e.g. Convert 5kg into pounds.	P1.9 Dividing into a given ratio Finding different	amounts given a total and different ratios e.g. Divide £40 in the ratio 1:3:4

P1: Ratio and Proportion

Reading a conversion graph Dividing into a given ratio Use multiplier to increase by a i

P1: Ratio and Proportion

Calculate the original amount before a percentage change (Reverse percentage) Plotting a conversion graph Use multiplier to decrease by a percentage

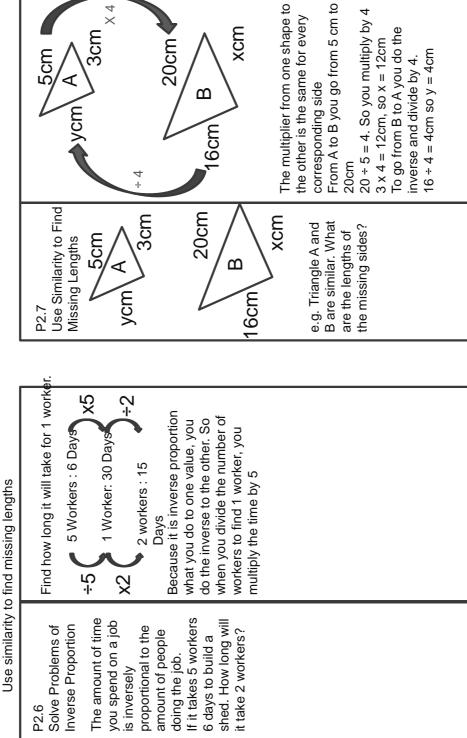

120

Understand how inverse proportion affects two variables Understand how direct proportion affects two variables

Solve problems	Solve problems of direct proportion		
P2.1 Understand how direct proportion affects two variables e.g. If two variables A and B are in direct proportion to one another what happens as A increase?	If A and B are in direct propotion. Then If A increases then B increases If A decreases then B decreases If A is multiplied by 2 then B is multiplied by 2. If 1 worker costs £200 to hire Then 2 workers cost £400 to hire The cost to hire is in direct proportion to how many workers are hired	P2.3 Solve Problems of Direct Proportion e.g. The distance you walk is directly proportional to the time you spend walking. If I can walk 9 miles in 3 hours, how far can I walk in 5 hours?	Use Unitary Method to find how far in one hour. Divide by three then multiply by 5 Or recognise the scale
P2.2 Understand how inverse proportion affects two variables e.g. If two variables A and B are in direct proportion to one another what happens as A increase?	If A and B are in inverse propotion. Then If A increases then B decreases If A decreases then B increases If A is multiplied by 2 then B is divided by 2. If 1 worker takes 2 hours to complete a job Then 2 workers will take 1 hour to complete the same job. The time taken to complete a job is inversely proportional to the amount of workers.		factor from one value to the other. Multiply the number of hours by 3

	Tv P2	e ت ت ح ح ت ت ه	
uo.			
To find a formula for two variables in inverse proportion	The symbol	Direct proportion If $y \Box x$ then $y = kx$ If $y \Box x^2$ then $y = kx^3$ If $y \Box x^3$ then $y = kx^3$ e.g. y is directly proportional to x. When $y = 21, x = 3$. y $\Box x$ therefore $y = kx$ 21 = k x x = 7 so, $y = 7x$	
To find a formul	P2.11 To Find a Formula for Two Variables in Direct Proportion	e.g. y is directly proportional to x. When y = 21, x = 3. Find a formula for y in terms of x	

The symbol \Box means 'varies as' or 'is proportional to'. Inverse proportion If y \Box 1/x then y = k/x ² If y \Box 1/x ² then y = k/x ³ If y \Box 1/x ³ then y = k/x ³	e.g. a is inversely proportional to b. When a = 12, b = 4. Find a formula for a in terms of b a \Box 1/b therefore a = k/b k = 48 so, a = 48/b so, a = 48/b
P2.12 To Find a Formula for Two Variables in Inverse Proportion e.g. a is inversely proportional to b. When a = 12, b = 4. Find a formula for a in terms of	٥

Finding the multiplier or percentage change for a repeated change

	Formula for repeated percentage change is Final amount = (multiplier)number of years x initial amount e.g. A savings account had £2000 in it, after x years of interest of 5% PA, the amount in the account was £2315.25. How long were the savings in the account? Initial Amount = 2000 Percentage interest per year =5% 100+5 = 105 So multiplier = 1.05 So multiplier = 1.05 So multiplier = 1.05 x 2000 Try x=1, then 1.05 x 2000 = 2100 (not the final amount) so try x=2 1.05 ³ x 2000 = 2315.25 9correct amount) So x=3 years
ange	P2.14 Use Trial and Error to find the year term of a repeated percentage change e.g. A savings account had £2000 in it, after x years of interest of 5% PA, the amount in the account was £2315.25. How long were the savings in the account?
ror to find the year term of a repeated change	Formula for repeated percentage change is Final amount = (multiplier)number of years x initial amount e.g. A savings account had £2000 in it, after three years of interest, the amount in the account was £2315.25. What was the percentage interest rate on the savings account? Initial amount = 2000 Final amount = 2315.25 Number of years =3 Substitute into the formula 2315.25=(multiplier) ³ x 2000 Divide by 2000 1.157625 = (multiplier) ³ Take cube root of both sides to undo the power 1.05 = 105% So increase has been 5% each year.
Use trial and error	P2.13 Finding the multiplier or percentage change for a repeated percentage change. e.g. A savings account had £2000 in it, after three years of interest, the amount in the account was £2315.25. What was the percentage interest rate on the savings account?

Find the average or instantaneous rate of change from graph What is the rate of change where x=0

Interpret the rate of change of graph Using similarity to find missing areas Using similarity to find missing volumes

	P2.18 Using similarity to find missing areas. If height of shape A is 4cm, height of shape B is 6cm A and B are similar shapes. If the surface area of A is 20cm ² what is the surface area of B? P2.19 Using similarity to find missing volumes If height of shape A is 4cm, height of shape B is 6cm A and B are similar shapes. If the surface area of A is 10cm ³ what is the volume of B?
Using similarity to find missing volumes	The rate of change of a graph is its gradient. A gradient is how much the y-axis value changes for every one value changes for every one value on the x-axis. e.g. What would the rate of change represent on A) A graph of number of bacteria against time. B) A graph of the number of radioactive atoms In a substance against time. C) A Distance / Time graph D) A Speed / Time graph D) A Speed / Time graph D) A speed / Time graph B) The rate of growth of the bacteria B) The rate of decay of the radioactive substance c) The rate of change of distance over time which is ACCELERATION
Using similarity	P2.17 Interpret the rate of change of graph e.g. What would the rate of change rate of change inumber of number of bacteria against time. B) A graph of the number of radioactive atoms In a substance against time. C) A Distance / Time graph D) A Speed / Time graph

If Length scale factor = k Then Area scale factor = k^2 If height of shape A is 4cm, height of shape B is 6cm A and B are similar shapes. If the surface area of A is 20cm ² what is the surface area of B?	Length scale factor = $6 \div 4 = 1.5$ Area scale factor = $1.52 = 2.25$ Surface area of B = $20 \times 2.25 = 45$ cm ²	If Length scale factor = k Then Volume scale factor = k^3 If the surface area of A is 10cm ³ what is the volume of B? Length scale factor = $6 \div 4 = 1.5$ Volume scale factor = $1.5^3 = 3.375$ Volume of B = $10 \times 3.375 = 33.75$ cm ³
2.18 sing similarity to nd missing areas. t height of shape vis 4cm, height of hape B is 6cm v and B are similar	urface area of A s 20cm² what is ne surface area of 3?	2.19 Ising similarity to and missing volumes. height of shape is 4cm, height of nape B is 6cm and B are similar and B are similar and B are similar and B are similar and C area of A 10cm ³ what is le volume of B?

S3.3	Use a sample space to find the probability of a combined event	e.g. A dice is rolled and a spinner is spun and the scores are added together. Create a	sample space diagram to	from spinning a spinner and	rolling a dice.		4	S3.4 Use the property that the sum of mutually exclusive probabilities is 1	e.g. If outcomes A and B are mutually exclusive and the probability of A occurring is 0.47 what is the probability of B occurring?
S3.3	 Calculate probability P(event) = No. of outcomes which give the event Total number of outcomes 	Probability of rolling a 6 There is only one 6 on the die There are 6 numbers on the die	1	$\Gamma(0) = \frac{1}{6}$			Bookshilter of an arout NOT	happening If P (event) = p P (event NOT happening) = 1 – p	e.g. P (rain) = 0.7 P (not rain) = 1 – 0.7 = 0.3
S3.1	Calculate the theoretical probability of an event	e.g. What is the theoretical probability of rolling a 6 on a single die?				, c çı	Use the exhaustive rule of	an event + the probability of that event not happening = 1	e.g. The probability it will rain today is 0.7. What is the probability it won't rain today?

S3: Probability

Calculate relative frequency

Understand the limitations and use of elative frequency

Draw a tree diagram for independent events	Relative frequency = <u>Number of times outcome occurs</u> Total number of trials = $\frac{7}{10}$ = 0.7	Yes Lily is correct. $\frac{4}{10} = 40\%$ Increase the amount of trials. The more times that an experiment has been carried out, the more reliable the relative frequency is as an estimate of the probability.
	 S3.5 Calculate relative frequency e.g. St Benedict's Football Club has won 7 matches out of the 10 this season. What is the probability they will win their next match? 	 S3.6 Understand the limitations and use of relative frequency e.g. Lily scored 4 out of the 10 shots during netball training. Lily says "The probability of me scoring is 40%". Is Lily correct? How could Lily improve the accuracy of her estimate?

S3: Probability

Draw a tree diagram for dependent events Add two probabilities using the OR rule

	P(A or B) = P(A) + P(B) Use this addition rule to find the probability of	either of two mutually exclusive events occurring. P(S or C) = P(S) + P(C)	P(S or C) = $\frac{1}{4} + \frac{1}{4}$ = $\frac{2}{4} = \frac{1}{2}$			P(A and B) = P(A) x P(B)	Use this multiplication rule to find the probability of	both of two independent events occurring.	P(E and <4) = P(E) x P(<4) = $\frac{1}{2}$ X $\frac{1}{2}$	4 9 1-0 11		
	S3.9 Add two probabilities using the OR rule.	e.g. The probability of picking	is $\frac{1}{4}$. The probability of picking a club from a deck of	cards is $\frac{1}{4}$. What is the probability of picking a spade	or a club?	S3.10 Multinly two probabilities	using the AND rule.	e.g. A fair die is rolled. What	is the probability that the number is even and less than	4?		\$
Multiply two probabilities using the AND rule	After 1 green sweet is taken, we have 20 sweets left of which 11 are green and 9 are blue.	First sweet Second sweet Outcomes Probability	G G G G G G G G G G G G G G G G G G G	$\frac{21}{20}$ $\frac{9}{20}$ B (G, B) $\frac{12}{21} \times \frac{9}{20} = \frac{9}{33}$	9 $\frac{12}{20}$ G (B, G) $\frac{9}{21} \times \frac{12}{20} = \frac{9}{35}$	21 B 8 8 8 8 8 8 8 8 8 9 $\frac{9}{20} \times \frac{8}{20} = \frac{6}{20}$		After 1 blue sweet is taken, we have 20 sweets left of which 12	are green and 8 are blue.	14	P(both sweets are blue) = P(B, B)	$=\frac{9^{\circ}}{21} \times \frac{8}{20} = \frac{6}{35}$
Mi	S3.8 Draw a tree diagram for dependent events	And	S3.11 Calculate probabilities from a tree diagram	0	e.g. A jar consists of 21 sweets. 12 are green and 9	are blue. William picked one sweet and then picked	anouner without replacing the first.	Draw a tree diagram to	represent the experiment and find the probability that	both sweets are blue.		

			U: Union of two sets.	Things that are in either set A <u>or</u> set B		C: Intersection of two sets.	I nings that are in set A \overline{and} also in set b.	A': Complement of a set.	The elements <u>not</u> in Set A.								, A B					2 Å				
		S3.13	Use set notation		e.g. Write the three areas	shaded set notation.				A	2 0 2))		(f	ANIMANINA	(111XIXIIII)	VIIIMIIII		1111111111111	(A) X) B,	W/W (V/X)	VA VIIII	Ummille	
hionaniiiles	Use set notation	1. Draw a rectangle		Draw two or three circles according to how	many categories you have. There are two	categories in the sample question: Make sure	the circles overlap.	Write volur items in the relevant circle. If items	fit both categories, write those whe	circles overlap (the "intersection").			category (pen) write it within the rectangle but	outside the circles.			Animals Things that	/	$\overset{()}{\times}$	/ PIG / Rite /		Lion (Duck) Eich Lieur			Pen	
סטטונ	Jse s	i.		5.				ſ				4.														
-		S3.12	Draw a Venn diagram from	given information or	probabilities.		e.g. Uraw a venn diagram to	show categories of "Inings that flv" and "Animals" for	the following;	ì	• Pig	Hot Air Balloon	• Pen	• Bat	Lion	• Kite	Duck									

S3: Probability Draw a Venn diagram from given information or probabilities

Use intersection, union and complement with sets and Venn diagrams Find probabilities using a Venn diagram

4

S3: Probability Calculate conditional probability Use formula to prove two events are independent

First, represent the information on a tree diagram:	First Set Second Set $\frac{9}{10}$ win P(win first and win second) = $\frac{3}{5} \times \frac{9}{10} = \frac{27}{50}$	$\frac{3}{5}$ win $\frac{1}{10}$ lose P(win first and lose second) = $\frac{3}{5} \times \frac{1}{10} = \frac{3}{50}$	$\frac{2}{5}$ lose $\frac{1}{2}$ win P(lose first and win second) = $\frac{2}{5} \times \frac{1}{2} = \frac{2}{10} = \frac{10}{50}$	$\frac{1}{2}$ lose P(lose first and lose second) = $\frac{2}{5} \times \frac{1}{10} = \frac{2}{50}$	From the tree diagram, the probability of winning the second set $= \frac{27}{50} + \frac{10}{50} = \frac{37}{50}$.	This means that in every 50 matches, she may win the second set 37 times (37 becomes the denominator of the conditional probability). Out of those 37 times, on 27 occasions she won the first set and on 10 occasions she	lost the first set. Therefore, given that she wins the second set, the probability she won the first set is $\frac{27}{r_0}$.	There is also a formula that can be used for conditional probability: $P(A \text{ and } B) = \frac{P(A \text{ and } B)}{P(B)} = \frac{\frac{27}{56}}{\frac{27}{56}} = \frac{27}{37}$
S3.16	Calculate conditional probability.	e.g. The probability that a tennis player wins the first set	of a match is $\frac{3}{5}$. If she wins the	first set, the probability that she wins the	second set is $\frac{7}{10}$. If she loses the first set the	probability that she wins the second set is $\frac{1}{2}$.	Given that the tennis player	wins the second set, find the probability that she won the first set.

An independent event is an event that has no connection to another event's chances of happening. Events A and B are independent if: P (A ∩ B) = P(A) x P(B). P (5 on the dice) = $\frac{1}{6}$ P (Heads) = $\frac{1}{2}$ P (Heads) = $\frac{1}{2}$ (a sample space would show this) Since $\frac{1}{6} x \frac{1}{2} = \frac{1}{12}$ they are independent.	
S3.17 Use formula to prove two events are independent e.g. You toss a coin and roll a dice. Are these events independent?	

S3: Probability Find combinations and permutations

S3.18 Find combinations and permutations.	When you make a selection of items from a group and the order doesn't matter, it is a Combination . Like ingredients in a smoothie - thev're all cetting blended together!
e.g. A pizza restaurant offers a choice of toppings: ham (H), pepperoni (P), mushroom (M) and chicken (C). How many ways can	List the combinations: HP, HM, HC, PM, PC, MC. There are 6 combinations.
two different toppings be chosen?	When you select all the items in a group and the order does matter it is a Permutation . Like the code to a safe - it only works if you put the numbers in in the right order.
e.g. A man owns three cars: 1 red, 1 blue and 1 white. How many ways can they be parked on his drive?	List the permutations: RBW, RWB, BWR, BRW, WRB, WBR. There are 6 permutations.

1

Creation and Dignity

Key Terms

These words will form part of your assessment: It is important you learn them and their meaning.

Key Term	Definition
Dignity	Something given to someone by the divine.
Dignity	Catholics believe God has given life and therefore human life is sacred.
Discrimination	The unjust or prejudicial treatment of different categories of people,
Discrimination	especially on the grounds of ethnicity, age, sex, or disability
Equality	Being equal to others, especially in status, rights, or opportunities.
Equity	The quality of being fair and just.
Prejudice	A preconceived opinion not based on reason or actual experience.
Rights	A moral entitlement or to have to do something.
Objectification	Degrading someone to the status of a mere object
Constitut of life	A principle that believes life that is so valuable, it should be protected.
Sanctity of life	Christians believe God gave life.

The Purpose and Value of Life

The Value of Life

Christians believe human life is sacred and should be respected.

All humans are created in God's image.

Life is a gift from God and should be protected.

The sanctity of life teaches life is God-given.

The Bible teaches human beings are created in the image of God.

Jesus taught God has counted every hair on a person's head.

And even the very hairs of your head are all numbered... Indeed, the very hairs of your head are all numbered.

Luke 12:7

The Purpose of Life

Christians believe the purpose of life is to become closer to God.

Jesus instructed his followers to love God and love their neighbour.

To get close to God means to see him in each other Following Jesus' teaching will ensure a person can achieve eternal life in heaven with God. Heaven is the ultimate purpose of life.

Creation and Dignity

The Purpose and Value of Life

How to Live a Good Life

God gave humans **free will** to choose their actions. God gave humans a **conscience**.

God gave humans the ability to **reason**.

Christians believe humans can **make their own** decisions.

Humans are responsible for their decisions

God gave humans **commandments** to follow. God's commandments tell humans what they **should choose and should avoid**.

God sent his Son, **Jesus**, to the world as an example.

Jesus showed that in difficult situations, humans can still **make the right choice**.

What did Jesus teach

Jesus taught **The Beatitudes.** The Beatitudes are a set of **conditions to aspire** to. They help Christians **know how** to behave. They are contrary to human materialistic aspirations

Jesus taught 'Love your enemies' Matthew 5:44 Love is to seek or desire good for another. Christians should seek and pray that people who do evil understand their actions and change their ways.

Following Jesus' example is the purpose of christian life. This would show value to all life. This is not an easy route, but the right one.

Human Rights

These encompass the **most basic rights** and **freedoms** that a person can have. All humans have rights, **from birth to death.** Rights are **not dependant** on race, gender, religion, or ethnicity.

After World War II, a **universal set of rights** was written to show this belief This was called **The Universal Declaration of**

Human Rights and applied to all people

It covers rights from how to live, where a person can live, protection from harm and others.

"All human beings are born free and equal in dignity and rights"

Universal Declaration of Human Rights,

1947

5

Creation and Dignity

Human Rights

There are 30 **articles** outlining our human rights. These are separated into categories

Articles 1 and 2

Reaffirm human dignity and equality.

Articles 3-11

The **rights of the individual**: to life, outlawing slavery and torture, being equal in law, the right to a fair trial etc.

Articles 12-17

The **individual rights in society**, such as freedom of movement, the right to a nationality, the right to marry and have a family, and the right to own property.

Articles 18-21

The spiritual, religious and political rights of

individuals, such as freedom of thought, the right to your own opinion, the right to gather peacefully and protest, the right to vote.

Articles 22-27

The **social**, **economic and cultural rights of the individual**, including the right to work, rest and leisure, a decent standard of living, and education.

Articles 28-30

Remind us that **rights come with obligations** and we do not have the right to violate anyone else's human rights.

Animal Rights

Many people believe that **all living things** should be treated with respect. Animals have a **right to be protected** from illtreatment, just like humans.

Most people believe that humans are **capable of more** than other animals **Example**, humans have the ability to make moral decisions.

It is widely agreed that they should be **looked** after carefully and protected.

Not all humans agree that animals should be treated equally

Companionship - Pets are usually treated well as part of the family

Help - Used to help people: guide dogs for the blind.

Work - Animals can be used to carry or find items.

Sport - Animals used for sport. Greyhound or horse racing.

Food - Many people eat meat and animal products

Fashion or leisure - Used for clothing or household accessories

Education and conservation - Zoos or wildlife parks help to understand animals

Experiments and scientific developments -Cosmetic testing is illegal in the UK.

Entertainment - Animals form part of circus acts.

Creation and Dignity

Animal Rights

Why	anima	ls should	haverights
-----	-------	-----------	------------

Human animals have rights, **so non-human** animals should also have them.

No **morally relevant difference** between human animals and adult mammals.

Humans and other mammals have similar levels of biological complexity.

Non-human animals are **conscious**, **aware** of their existence and **know what is happening** to them. Non-human animals **prefer somethings and dislike others** and make conscious choices.

The quality and length of their life matters to them.

to treat animals as lesser than humans is **speciesism** in action.

Peter Singer

Why animals should not have rights

Animals **don't think** and are not really conscious. Animals were put on earth **to serve human beings**. Animals **don't have souls.**

Animals **don't behave morally** and are not members of the 'moral community' like humans are. Animals **lack the capacity** for free **moral judgment**.

animals act purely on instinct while human beings engaged in **rational thought**. St. Thomas Aquinas

8

Equality and Equity

Equality means that every individual has an equal opportunity to make the best of their lives and talents.

No one should have poorer life chances because of where a person is from, how they were born, their beliefs, or if they have a disability.

Equality recognises that groups of people with protected characteristics have experienced discrimination.

in the UK it is unlawful to treat anyone differently in society because of factors such as age, disability, gender, race or sexual orientation

The Equality Act (2010)

Equity is about giving people what they need, in order to make things fair.

It is giving more to those who need it, taking into consideration their circumstances, so everyone has the same opportunities.

Social justice is about making society function better – providing the support and tools to help turn lives around.

Social justice includes fairness in healthcare, employment, housing, and more.

Social justice cannot be achieved without the principles of human rights, access, participation, and equity.

Creation and Dignity

Equality and Equity

Should we all be equal?

Social justice isn't possible if only some voices are heard.

The voices of marginalized and vulnerable people are silenced.

"All are equal before the law and are entitled without any discrimination to equal protection of the law."

> Article 7 Universal Declaration of Human Rights

Should criminals be equal?

A balance needs to be met between the **rights of the individual and wider society.**

If there is a clear **legal basis for restrictions**, they are legal as long as there is good reason and **restrictions are proportionate**.

Some would argue criminals have **not lost their dignity** or their **right to equality in the law.**

Should animals be seen as equal to humans?

Animal equality seeks to ensure **all animals are** respected and protected.

Animal rights groups like **PETA** fight against human use of animals

It could be argued animals **do not have the same morality** as humans do and **pose a danger to humans**.

Prejudice and discrimination

Prejudice - an attitude held

Comes from the words 'to judge before'. When someone forms an negative opinion or feeling about a person or people without all of the information. Exists wherever there is difference between people.

Discrimination - an action performed

Forming an opinion based on the group they belong to, instead of personal merit.

Discrimination includes verbal slurs, failure to provide reasonable adjustments, media portrayal, preferential pay, hiring or admissions policies and hate crimes.

Discrimination can be committed by individuals, groups or institutions.

Every form of social or cultural discrimination in fundamental personal rights on the grounds of sex, race, colour, social conditions, language or religion must be curbed and eradicated as incompatible with God's design.

Gaudium et Spes

Examples

Prejudice based on **gender** is called **sexism**. Prejudice based on the national grouping or **race** is known as **racism**. Prejudice towards Jews is called **anti-Semitism**. Prejudice towards Muslims is called **Islamophobia**. Prejudice towards **homosexual** people is called **homophobia**. When people, young or old, suffer from prejudice

11

Creation and Dignity

Stephen Lawrence

Institutional racism is when racial discrimination is established as a normal behaviour within organisations that make up a society.

It suggests people from **Black or other minority backgrounds** have to **work harder** in society in order to get the same results as white people.

A report looking at the death of Stephen Lawrence suggested his case had been handled in an **institutionally racist way**

The police investigation had not been handled with the same care that a case involving a white person would have been.

The case

An 18-year-old Black teenager who lived in South London.

Killed in 1993 in an attack motivated by skin colour

because of their age, it is called ageism.

Had been waiting for a bus with a friend, when a gang of white men attacked them.

The police thought it was drug related, and did not provide first aid.

The friend escaped unhurt, Stephen died from his injuries.

Police started to investigate suspects they believed were responsible for the attack.

Suspects were not arrested swiftly and given time to dispose of evidence

Some suspects were charged with murder, these charges were then dropped before a trial could happen.

The decision makers didn't think that there was enough evidence so it did not go to trial.

Stephen Lawrence

In 2012, two of the original suspects in Stephen's killing, Gary Dobson and David Norris, were found guilty of his murder and sent to prison, after new evidence was found.

The other suspects in Stephen's murder were not brought to trial

August 2020, the Metropolitan police declared the investigation into the murder "inactive".

"All identified lines of inquiry have been completed", which means no one else can be taken to trial and held responsible for Stephen's death unless the case is later reopened.

Stephen Lawrence Day

First celebrated in 2019 Celebrated annually on the 22nd April.

The family set up a foundation to grow awareness of racial inequality.

Aims to inspire a more equal, inclusive society, and to foster opportunities for marginalised young people in the UK.

The foundation works in schools, communities and businesses to inspire, support and provide opportunities for the young and marginalised.

13

Creation and Dignity

Homophobia

People who identify as lesbian, gay, or bisexual may experience harassment or discrimination from people who are uncomfortable with these identities.

Happens in many different ways and includes negative attitudes and beliefs about or prejudice against bisexual, lesbian, and gay people.

Often based on irrational fear and misunderstanding. Sometimes comes from fundamental religious beliefs. Often handed on through generations.

In 2017 Stonewall ran a research survey:

45% of lesbian, gay and bisexual young people experienced homophobic bullying in Britain's schools.

40% of lesbian, gay and bisexual pupils who experience bullying have skipped school because of bullying.

86% of LGBTQIA+ students regularly hear phrases such as 'that's so gay' or 'you're so gay' in school.

Why is it so common?

Many phrases and words may appear as harmless but care homophobic.

The fact the word 'gay' is being used in a negative light means it can be regarded as homophobic.

The Catholic Church and Homophobia

Catholics believe all humans were made in the image of God, therefore have dignity.

A person does not choose to be either homosexual or heterosexual, so being gay **is not inherently sinful.**

Catholics believe that only God can judge us on our actions, we should do our best in life following God's rules.

Only God can judge our actions, our job is love and nurture each other to be the best we can be.

"Homosexual people have a right to be in a family. They are children of God and have a right to a family. Nobody should be thrown out or be made miserable over it."

Pope Francis

Creation and Dignity

Stereotyping

A generalised belief or idea about a group of people.

Often unfair or untrue.

Often associated with a negative expectation of a group or person, such as their ability, preferences, appearances or personalities.

Group stereotyping can sometimes be useful when making a quick decision, but often they are wrong when applied to an individual person.

Can be limiting, and can lead to discrimination which causes harm.

Famine in Ethiopia

A country on the African continent, known for a great famine in the 1980s.

Seen as a poor and underdeveloped country.

Agriculture, the main source of income, was affected by droughts.

The government was replaced by a repressive regime that stopped Ethiopia prospering.

Many people, particularly in the west, have the stereotype that the whole of Africa is in extreme poverty.

Ethiopia has one of the world's fastest growing economies.

Objectification and Othering

Martha Nussbaum said that there are seven ways someone can be treated that would objectify them:

Instrumental - treating as a tool for another's uses

Denial of autonomy - treating as lacking in self-

determination

Inertness – treating as lacking in activity

Fungibility - treating like an object

Violability – treating like something that can be broken

Ownership – treating as though they can be owned,

Denial of subjectivity – treating as though there is no need for concern for them

Rae Langton says objectification can also happen through:

Reduction to body – the view asbeing no more than their body, or body parts

Reduction to appearance – treating in terms of their look or how they appear to the senses Silencing – treatment as if they are unable to speak

Key Terms	Definition	
Objectification	Degrading to the status of an object	
Othering	Labelling as not fitting in within the	
	norms of a social group	
Dehumanisation	Denying fullness of human status	
	causing cruelty and suffering

Component3: Judaism

Key Terms

Key Concept	2 Mark Definition.
Synagogue	A place of worship, study and of meeting in the Jewish faith.
Shekinah	The dwelling or divine presence of God – usually found where the Torah is kept. The place where God's presence rests and can be felt
Shabbat	Day of spiritual renewal and rest. A day to remember God creating the world and resting on the seventh day.
Kosher	Meaning 'clean' or 'fit' – a word used to describe food that Jewish people can eat.
Messiah	The 'anointed' or 'chosen' one who is the promised deliverer of the Jewish nation – Jewish people believe a king will be sent by God to save them.
Covenant	A promise or agreement – Jewish people believe God has chosen them and has made several covenants with them throughout history.
Mitzvot	Actions Jewish people must perform or avoid – there are 613 actions in Judaism including the 10 commandments.
Torah	The Jewish written Law – The first five books of the Hebrew Bible.

Component3: Judaism

What do Jews believe?

There is a **great diversity** within Jewish beliefs and practices.

The Jewish community is a **Diaspora**, being spread over the world, and so differnet cultures influence different beliefs and customs.

In the 12th century a Rabbi called **Maimonides** put together 13 principles beliefs that were in the Torah.

For many Orthodox Jews, these remain central beliefs.

Some principles are accepted by all Jews, such as the belief in one God.

For some principles such as a belief in a Messiah, there are many different views and interpretations.

The 13 principles of faith

- 1. God exists, is perfect and created everything in existence
- 2. Belief in God's unity
- 3. God does not have a physical body and so is not affected by the same needs as humans
- 4. God is eternal
- 5. Only God should be worshipped
- 6. God communicates with people through prophets
- 7. Moses is the most important prophet
- 8. The Torah was given to Moses by God
- 9. The Torah is God's law and cannot be changed
- 10.God is all knowing and knows everything that is going to happen
- 11.God will reward good and punish evil
- 12. The belief that the Messiah will come
- 13.The dead will be resurrected

Component 3: Judaism

The nature and significance of Shekinah

What is it?

Sometimes used to refer to God Himself, but more often to God's presence in the world.

Some believe that the Shekinah refers to the feminine characteristics of God.

The Shekinah is more than just where God is, it is where the presence of God can be felt.

The shekinah rested in the temple, in Jerusalem.

After the destruction of the Temple.

Some believe Shekinah followed the Jews into exile.

Some believe the Shekinah never left the Temple area.

Sources

The actual word Shekinah is not mentioned in the Torah however there are several references to God's presence.

"They heard the sound of Yahweh walking in the Garden"

Genesis 3:8

Impact

The divine presence of God means they can have a personal relationship with God.

God is especially present in prayer when two faithful share the words of the Torah.

23

Component3: Judaism

The Messiah and the Messianic Age.

The Messianic Age is a term used for a future time of peace on earth with no violence, hunger or crime.

There are no direct references to the Messianic Age in the Torah so scriptures are interpreted to understand it.

The first step to this age is the coming of the Messiah and the resurrection of the dead.

Differences in belief

A Jewish philosopher said that a belief in the Messiah was one of the 13 principles of Judaism.

For some, the Messiah remains central to their faith.

Many Reform Jews believe that the good actions of humans will bring a Messianic Age of peace.

Who is the Messiah?

The Torah contains no definite teachings about the Messiah.

Passages that Jews might think are relevant have to be interpreted.

Due to the lack of clear information, there is a strong belief that humans should focus on the here and now.

The world to come is beyond human understanding.

talks of it being a time in which the wolf shall live with the lamb, and in which the lion, like the ox, shall eat straw.

Isaiah 11: 1-9

Component 3: Judaism

The Messiah and the Messianic Age.

When might the Messiah come?

The Torah has no specific references about when the Messiah will come.

The Torah was written to show people that the idea of the Messianic Age is beyond human understanding.

Some Rabbis have tried to calculate the exact arrival of the Messiah leading several false Messiahs.

Many do not focus on a date of arrival, but the actions required to bring him.

Some Orthodox Jews believe that God has a specific date for the coming of the Messiah.

Most believe his coming will depend upon when he is most needed.

The sin of the world may bring the Messiah

A perfect world may bring the Messiah.

Reform Jews

There is little focus about the coming of the Messiah.

The main focus is on how to create a better society and working to that goal.

25

Component 3: Judaism

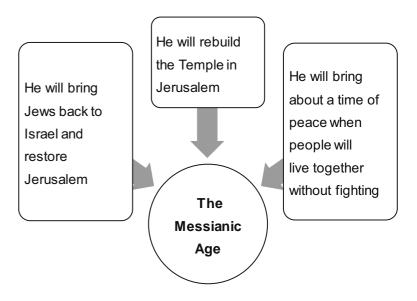

The Messiah and the Messianic Age.

What will the Messiah do?

The traditional belief is that the Messiah will be a great political leader and judge who will bring the world to an end.

Some Jews believe he will not be a supernatural being but a human who is descended from King David and an inspiration to others.

Many Jews believe that in every generation a person is born with the potential to be the Messiah.

Component3: Judaism

The Messiah and the Messianic Age.

What will the Messiah be like?

The expectations of the Messiah come from the prophets.

Their writings in the Nevi'im

The Prophets can be interpreted in multiple ways leading to multiple views

The Messiah will be; kingly,		The Messiah will bi
	righteous and powerful	the nations.
	Isaiah	
	The Messiah will bring the exiles	The Messiah will be
	back from the nations	descendent of King
	Ezekiel	

The Messiah will end idolatry Ezekiel ring peace to

Micah

e a true g David. Micah

The Messiah will come unexpectedly.

Malachi

Component3: Judaism

Abrahamic Covenant.

Who was Abraham

Abraham was 40 years old when he became aware of his Creator.

When he recognised and knew Him, he began to share God with the people of Ur.

He challenged them for not following a proper path.

He broke their idols and began to teach the people that it is fitting to serve only the G-d of the world.

Why Abraham

Abraham is regarded as the founder of the Jewish people and is often called 'father'.

He was called as he was the first person to teach that there was only one God.

The scriptures state that because of Abraham's purity, God called out to him, commanding him to leave his homeland behind for a new life.

Abrahamic Covenant.

Abraham's role:

Abraham was called out of Ur. to a new land.

Abraham had to leave his polytheistic religion, and follow the One God

The Promise of Descendants

God promised Abraham that a great nation would arise out of him.

God changed his name from Abram to Abraham, meaning 'father of many nations'.

This promise is shown in Genesis where God promises that 'nations and kings will descend from Abraham'.

Blessings and Redemption

God promised to bless Abraham and the families of the earth through him

"Those that bless your name will be blessed, and those that curse it will be cursed." Genesis

The Promised Land

God promised to give Abraham a land that he would give him.

Abraham found their new home in Canaan

The land called the Promised Land because of God's repeated promises to give it.

Jews lived here from the time of its original conquest until present day.

29

The sign / seal of the covenant Abraham, all males, and all Jewish boys at 8 days old are circumcised to seal this covenant.

Component 3: Judaism

Mosaic Covenant.

Who was Moses?

Moses was born of a Hebrew slave in Egypt.

During a culling of the Hebrews, Moses was saved by God and raised as an Egyptian within the royal house.

Moses saw injustice and took the life of a slave master

He was banished into the desert.

He found a wife and his true identity.

He encountered God in the burning Bush and responded to His commands.

He returned to free the slaves from Egypt and led them to the promised land.

Moses'Importance

Moses is regarded by Jews as the greatest prophet.

Moses had a special relationship with God like no other.

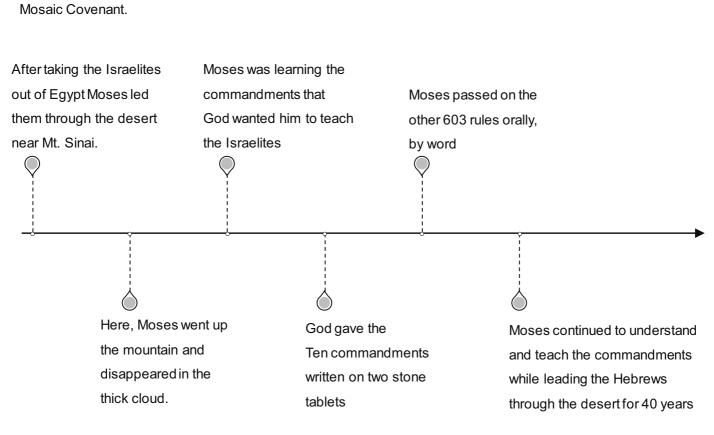

Moses was the only person to see God face to face. Moses was a great leader, teacher and the first Rabbi.

Moses rescued the slaves that were in Egypt through his trust in God.

Moses led the Hebrews through 40 years of wandering the desert.

This events are celebrated each year at Passover and Sukkot

31

Component3: Judaism

Component3: Judaism

Ten Commandments.

Ten Commandments

The Ten Commandments are in the Torah in **Exodus**.

They should be kept by every Jew. It doesn't matter if they are young or old, reform or Orthodox

They are central to Jewish belief and practices.

The Ten Commandments were written on two different tablets because they have different concerns.

The first four are referring to humans and God and the next six are to do with relationships between humans.

Life on Earth

Jewish people emphasise life not death.

Humans should respect their life and live it to the fullest.

It is the way they live their life that they will be judged upon.

The Torah is described as "The tree of life" because it's mitzvot can only be followed in this world.

Like a tree takes root and sprouts, good deeds take root and sprout more good deeds.

After death, the relatives are wished a "long life"

During Jewish celebrations, such as weddings, 'L'Chaim' is said, which means, 'To Life'.

God is the only creator of life and therefore life is sacred. Only he can give and preserve life.

'My God, the soul you placed in me is pure. You created it, you fashioned it, You breathed it into me.

A morning prayer for Jews

'It is the tree of life for those who grasp it, and all who uphold it are blessed.

Proverbs 3

Whoever destroys a single life is considered as if he had destroyed the whole world, and whoever saves a single life as if he had saved the whole world.

Talmud

33

Component3: Judaism

Pikuach Nefesh

Pikuach Nefesh is the setting aside of certain mitzvot in order to save life.

To support life, all but three of the 613 mitzvot can be broken – idolatry, incest and adultery.

Torah is designed to promote life, and the saving of human life is more important than the observance of that law.

In the Talmud God says his people will 'live by' the Torah – as opposed to 'dying by' it.

To preserve a life it is permissible to: remove organs from a dead body. travel on the Shabbat break the fast on Yom Kippur. God is the only creator of life and therefore life is sacred. Only he can give and preserve life.

'Before I formed you in the womb I knew you... a prophet to the nations I made you. ' Jeremiah 1:5

'For You created my veins, You covered me in my mother's womb, I shall thank you, for in an awesome, wonderous way I was fashioned.'

Psalm 139

'God said, "Let us make man in our own image and likeness...He created him, male and female He created them.'

Genesis 1

Mitzvot

Keeping the duties given by	Doing good deeds	Being given an honour such
God		as reading from the Torah.
Mitzvot		

Just as with the Ten commandments, the mitzvot either show how people should relate to God or other people.

Through these types of actions Jews believe they build a relationship with God.

The Torah explains that the purpose of human existence is to build a relationship with God which is attained through mitzvot. Today it is impossible to keep them all as many were related to the Temple which is now destroyed.

For Orthodox Jews, keeping the mitzvot is an important principle of Judaism.

Reform Jews also try to keep the mitzvot many consider that some are no longer compatible to 21st century living.

Decisions about which to follow are based on personal choice and interpretation.

35

Component 3: Judaism

Free Will

Free will is the ability to make choices free from external control.

Jews have always discussed how far God intervenes in human lives and events, and how far humans have free will- that is, the ability to make their own choices

The Torah teaches that God has given Jews a choice whether to keep the mitzvot or not.

As humans they were made in the Image of God

They have the mind and soul to help with that choice

Judaism does not teach that people are born sinful

Each individual is born with the inclination to either do good or evil acts

Yetzer ha tov – The inclination or natural urge to do good actions

Yetzer ha ra – The inclination or natural urge to do evil actions

Jews believe it's human choices that make evil

It is not possible to hide acts of evil from God

Each act is considered separately by God on the 10 days of repentance

Any harm done to humans must be forgiven by them before God can forgive

Component 3: Judaism The Afterlife

"This world is like a lobby before the Olan Ha-Ba. Prepare yourself in the lobby so that you may enter the banquet hall."

Mishnah.

The nature of the afterlife is not frequently considered in Judaism. There are two reasons for this;

- 1. What is important is **living a good life now** in preparation for the world to come.
- 2. The ways of God are **not for humans to understand**, so there's no point trying.

The afterlife in Judaism is called Olam Ha- Ba (The world to come).

This term is used to refer to a person's afterlife and also the Messianic Age.

There are many different views about the nature of the world to come but a view shared by all is the focus should be on this life. Focus on this life includes studying the Torah and observing the mitzvot.

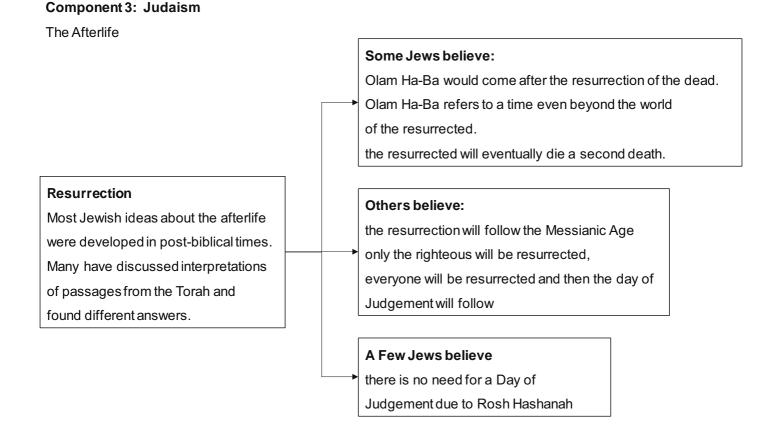

This doesn't earn a better afterlife.

Judaism is not focused on the question of how to get a better afterlife but on how to live now.

There are no specific teachings about the afterlife in the Torah.

There are references to a physical place called Sheol, to which one 'goes down' following this life, but the nature of this place and who goes there is unclear.

This means that many Jewish beliefs on the afterlife are their own interpretations of texts.

38

The Afterlife

Orthodox Jews

Many believe in some form of resurrection. This is stated in daily prayers and at funerals Some prayers refer to the soul being at rest under the wings of Shekinah

Some believe in a resurrection that includes the body as well as the soul

This influences Jewish attitudes to cremation, organ transplant and autopsies

Reform Jews

Most have rejected a belief in resurrection and references have been taken out of prayer books and worship.

Some believe that the memories of people live on through their actions and good deeds Others believe that the soul lives on after death

Some Jews believe in reincarnation In some form the soul of the person will take on a different body to live again on earth

39

Component 3: Judaism

Shabbat in the home

Starts

Shabbat starts a few minutes before sunrise on Friday night.

Ritual

The woman of the family lights two candles to bring the presence of Shabbat into the home. This is a ritual that happens worldwide at the same time.

In many families the father welcomes Shabbat in the Synagogue and when he returns the family share a meal

Family time

A big meal is held on Friday night, prepared the night before.

Meals begin with a blessing over two loaves of bread.

The Kiddush prayer is recited over a cup of wine at the beginning of Shabbat meals. The meal is a time of happiness and relaxation.

Saturday

In the morning the family usually go to the Synagogue. Orthodox Jews will walk as driving would be considered as work. Games, activities, reading, discussion and eating will follow

Ritual ending

At sunset on Saturday the family will say goodbye to Shabbat, this is shown through the lighting of the Havdalla candle.

Havdalla means separation and symbolises the distinction between Shabbat and the rest of the week.

Shabbat in the synagogue

Many attend synagogue services on Shabbat even if they do not do so during the week.

Services are on Shabbat evening, morning and afternoon.

Fixed periods of prayer correspond with the time sacrifices were offered in the Temple.

The Shabbat morning is the longest of the week and can last between 2-3 hours.

It will include such as the Shema, Amidah and Kaddish. The rabbi may deliver a sermon about the Torah to help us to understand.

After the service a Kiddush is usually held. The special blessing recited over a cup of wine.

Reform Synagogues contains more of the home language and less Hebrew. As well as using music.

Exodus 20

Observing Shabbat means remembering the importance of it as a celebration of creation and also of the freedom of Israelites from slavery in Egypt. Keeping Shabbat means showing it is holy through worship both in the home and synagogue.

For many Jews observing Shabbat means recognising the types of activities and work that are not allowed, such as creating or destroying.

Shabbat is considered by many Jews as the most important festival. It is seen as a gift from God when weekday worries can be forgotten.

There are many different opinions among Jews regarding what can and cannot be done on Shabbat. For Orthodox Jews all forms of work must be avoided unless a matter of life and death.

41

Component3: Judaism

Worship in the home.

The importance of the family home is greatly valued by many Jews who consider it a sanctuary It is a place where the values and beliefs of Judaism are learnt and reinforced

In most Jewish homes there will be a **Pushke box** where money is collected to give to the poor. Children add to this to learn to be fulfil Mitzvot as well.

Pushkebox

The siddur is an important part of Judaism that guides Jews through daily prayers both in the synagogue and elsewhere. It begins with the Mode Ani and contains prayers for daily services as well as those for Shabbat. Just as the Torah is considered a gift from God, so the siddur is a gift. The siddur is considered holy and if it falls it must be picked up and kissed.

The Siddur

Worship in the home.

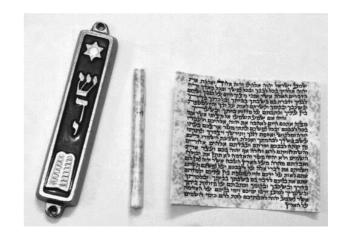

Families will have a **Mezuzah** on the front of their house and each room within the house.

Inside, is a scroll and the Shema is written on it.

On the back of the parchment is the word 'Shaddai' this means 'almighty' and this is one of the many names for God.

The mezuzah case is on the right hand side of the door and placed at a slight angle with the top pointing to the room.

Often Jews will touch the case as they pass through the door and kiss their fingers as a reminder that family should live according to the words of the Shema. For many, the mezuzah symbolises God's protection of the house.

43

Component3: Judaism

Prayer.

Prayer is not simply something that happens in the Synagogue once a week but is part of everyday life.

Rabbis teach it is one of the best ways of communicating with God.

It forms a bridge between God and humans.

It is so important that it has a whole area of the Talmud, Berachot, dedicated to it.

Historically there were no special prayers but many set prayers have been established.

Some Jews will pray before performing mitzvot, seeing something unusual, when good or bad things happen, and when going to bed at night.

There are also prayers that are formal and said at the Synagogue.

Types of Prayer

Praising God and his qualities

Requests of God for what God wants not what people want

Thanksgiving for life and his blessings

The Shema is the most important prayer and speaks of the Oneness of God's nature.

The Amidah is the core of every Jewish worship service.

Literally translates to Standing Prayer.

The Modah Ani is the prayer spoken first thing in the morning.

It thanks God for restoring their Soul and granting them life.

Component 3: Judaism Prayer.

Prayers may be said anywhere in Judaism. For many though, it is important to join together for communal prayers.

For communal prayer to happen 10 men have to be present. (This is known as a Minyan)

In reform communities, 10 people may form a Minyan The minyan creates a more spiritual experience than individual prayer.

It is believed that communal prayer is less selfish than individual prayers.

Although each synagogue usually has daily prayers, the main time communities come together is during Shabbat. Each week the community comes together for Shabbat, this also happens for other key festivals.

The fixed period of prayer times often corresponds with the fixed times of temple sacrifice.

The prayer book, or **siddur**, contains these prayers and the versions for different points of the year.

Some Jews prefer to recite their prayers in Hebrew as they argue this is a holy language that unites all Jews.

Some Jews prefer to pray in their native language as it is more important to know what is being said.

Component 3: Judaism

Prayer.

The Amidah is the core of every Jewish worship service.

It is also referred to as HaTefillah.

Amidah literally means 'standing' and people stand throughout the prayer to show they are in God's presence.

The Amidah consists of 18 blessings and can be divided into three sections, each of which reflects a type of prayer. The Amidah contains the three types of prayer; Praise to God, Requests of God and Thanksgiving.

The Amidah is recited silently by all members of the congregation or by individuals praying alone- and then aloud by the prayer leader.

The Amidah formally concludes with the recitation of the line,

"May God who brings peace to the universe, bring peace to us and all of the people, Israel, Amen."

This is recited while taking three steps backward, bowing to both sides, and taking three steps forward again.

Purpose of the Synagogue

The synagogue is the central focus of Jewish life. In Hebrew it is called **Beth ha Knesset** meaning **house of assembly.** It has three main purposes.

Beit Tefilah,	Beit Midrash,	AS
A house of prayer	A house of study	Th
A place where Jews come together for community prayer services.	Many Jews refer to their synagogue as 'shul' from the Yiddish word for school. For the observant Jew, the study of	soi imi be

	It is also the place where children	

It is also the place where children receive their basic religious education.

A Social Hall,

The synagogue often functions as a sort of town hall where matters of importance to the community can be discussed.

An important role of the synagogue is its function as a social welfare agency, collecting and dispensing money and other items for the aid of the poor.

47

Component 3: Judaism

Features of a Synagogue

There are many different designs of synagogue. Often, they reflect the architecture of the country they are in. Older synagogues are often large whereas modern synagogues are a lot smaller.

Aron Hakodesh (Ark)

The most important place in the synagogue as it is here that the Torah scrolls are kept. During certain prayers the doors and curtain may be opened or closed.

Opening the ark emphasises the importance of the prayer.

The doors are kept open for Yom Kippur, signifying the opening of the gates of heaven.

Component 3: Judaism Features of a Synagogue

Torah Scrolls

The Torah scrolls are the most sacred part of any synagogue. They are made from animal skins and are handwritten. Each scroll is one continuous Torah written in columns. Each end is stitched to the "Tree of life". Each scroll is wrapped in silk or velvet when not being used.

Ner Tamid

In front of and slightly above the Aron Hakodesh, is the Ner Tamid. This is kept continually burning and should not be extinguished. It symbolises the menorah which was kept burning in the Temple. Many consider it a reminder of God's eternal presence.

Component3: Judaism

Features of a Synagogue

Bimah

The Bimah is a central platform in the synagogue on which the Torah scrolls are read.

In an Orthodox Synagogue this will be in the middle, so the rabbi faces the congregation.

In Reform synagogues this will be at the front, combined with the Ark.

Seating

Seating of women is one of the main differences for Orthodox and Reform synagogues.

Orthodox Jews will separate the men and women as The Talmud argues that men and women can concentrate more on worship if they are separated.

In Reform synagogues they have no separation between males and females and they may sit together during worship.

Items worn for worship

Many Jews consider it a duty to wear special clothing for worship. There are many views about which items should be worn by whom.

Kippah

The exact meaning of the Kippah is unknown but for most Jews it is a symbol of identity and a sign of respect to God.

Throughout Jewish history the attitude to head covering has varied.

Drawings from the 3rd century depict Jews without hats but in the Middle Ages many wore it during both prayer and study.

There is a variation in views of whether it should be worn all of the time or just during worship.

The shape and size of it differs between communities.

Component 3: Judaism

Items worn for worship

Tallit

The tallit is a four-cornered garment which has fringes attached known as the Tzizit. The Tzizit relates to the duty in **Numbers** to wear fringes in the corners of clothes. Originally clothes were worn with fringes at each corner but later the practice was introduced of wearing a garment which had fringes to represent the 613 mitzvot.

There are two types of Tallit;

1. The **tallit gadol** is a large garment made of wool or silk. It is worn across the back and draped over the arms.

It is often called a prayer shawl as it is only worn during prayer and worship. After death the tallit is sometimes wrapped around the body.

2. The tallit katan is a smaller garment.

Many observant Jewish males will wear this under their everyday clothes throughout the day.

51

Items worn for worship

Tefillin

Tefillin are worn by Orthodox Jewish males at morning prayer each day.

The Tefillin is made up of two leather boxes.

The tefillah shel rosh is bound to the head with a strap.

In each of its four compartments there is a small handwritten scroll containing the first two paragraphs of the Shema.

The tefillah shel rosh is a reminder that the wearer must serve God with his mind.

The second box is bound to the upper arm and leans towards the heart.

It has one compartment which contains a single scroll of the same passages from the Shema.

It is a reminder that the wearer should serve God with all his heart through acts of compassion. When the Tefillin is in place a special prayer is said.

53

Component 3: Judaism

Brit Milah

Why?

The Relationship with God is shown through circumcision as it is a representation of the covenant made with Abraham.

During the Brit a prayer is said which shows the importance of the ceremony in a child's relationship with God.

Identity is reinforced through the ceremony.

It is a reminder that the child has entered the covenant. Reform Jews do not think converts need to be circumcised.

What

It is traditional for the child to receive his or her name at the first public gathering after their birth.

The Covenant of cutting

Boys are usually named at a ceremony called Brit Milah.

This is a Hebrew term to

Brit Milah:

describe circumcision of boys at eight days old.

The child sits on an empty chair known as the Elijah chair as a reminder that the prophet visits every circumcision.

Today

Brit Malah is a traditional ritual celebrated by most Jewish families.

Liberal and Reform Jews encourage all to be present regardless of gender.

In an Orthodox community only men will attend and a male must perform the circumcision

In the Reform movement women are able to perform the ceremony.

Bar Mitzvah

What?

At the age of 13 a boy becomes bar mitzvah – he enters Jewish adulthood. From this time he is able to be part of the minyan.

According to Jewish law, the boy becomes fully responsible for fulfilling the mitzvot and Torah.

In the years before his bar mitzvah ceremony the boy learns Hebrew so he can read a portion from the Torah in the synagogue.

A rabbi teaches him about religious duties and importance of prayer.

How?

Traditionally the Jewish custom has been to mark the occasion with a ceremony.

This includes the boy being called to the bimah to recite from the Torah in Hebrew.

After this the boy recites a statement to thank God.

A boy is then able to wear the tefillin.

Component 3: Judaism

Bat Mitzvah / Bat Chayil

Traditionally girls did not have such large ceremonies because they don't have the same religious duties to fulfil.

Orthodox Jewish girls have a ceremony called bat chayil when they are 12.

Usually this includes a service and the girl giving a presentation of things she has learnt in her study of Judaism.

Reform Jewish girls become bat mitzvah at the age of 12 and can also form part of a minyan.

There are different customs among Reform synagogues but often there is a ceremony at her synagogue during the Shabbat morning.

She may lead prayers and read from the Torah scroll.

The bat mitzvah demonstrates that she is taking on these additional privileges and responsibilities.

55

Marriage

Marriage

Marriage is seen as an important religious and spiritual ceremony in Judaism. It allows procreation, fulfilling the duty to '*be fruitful and multiply*' (**Genesis**). Marriage is considered as God given.

In twenty-first century Britain there are many different types of marriage services for Jews but most will try to include the main features. Differences might occur depending on whether the Jews are Orthodox or Reform or Ashkenazi or Sephardic. There are also differences if it is a same-sex wedding, as allowed in some synagogues.

Component3: Judaism

Marriage

x -	Ketubah	This is the marriage contract between the bride and groom
	Intentions	Both parties must have the right intentions
•	Down the aisle	The bride will walk down the aisle to meet the rabbi
	Declaration	In front of witnesses a ring is placed on the brides finger
<u> </u>	Under the Chuppah	The Bride and Groom wed under the Chuppah
	Stamping of the glass	At the end of the ceremony a glass is smashed by the groom
	Happiness	In Judaism is considered an important value.
U.S.	Indexfinger	The ring is after placed on the brides index finger on her right hand
7	Nisuin	Seven further blessings are said to finalise the marriage.

Daily Llfe

Daily Life

Tenakh in daily life

For centuries Jews have copied the Torah onto scrolls, studied it and meditated on it. It influences the way they worship, their home and their values.

The Tenakh is made up of the Torah, Neviim and Ketuvim. Although the Neviim and Ketuvim are not seen as having the same authority as The Torah. Jews read and reflect upon the meaning of these stories to their own life. Some of them are used in personal and communal worship. Extracts from the Neviim are read in the synagogue after the Torah readings.

The Talmud is a combination of Mishnah and Gemara;

Mishnah-Oral Torah.

Gemara-This is the commentary on the Mishnah

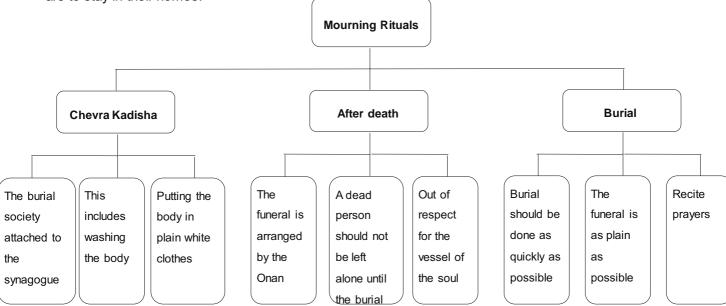

Extracts from the Talmud are used in public and private worship. When extracts of the Torah are unclear then explanations will be found in the Talmud. Today there are many colleges throughout the world where Jews continue to study The Torah and Talmud. These are called yeshiva.

Component3: Judaism

Mourning Rituals

Mourning Rituals

There is a pattern of rituals that take place when someone has died. At death, if possible a person's last moments should be spent reciting the Shema. The first week of mourning is known as Shiva and mourners are to stay in their homes.

Kosher Food Laws are found in the book of Leviticus.

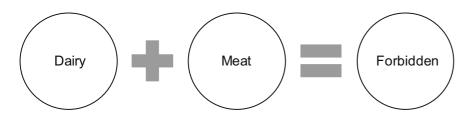

Kosher means something that is fit or proper according to Jewish law.

The opposite of Kosher is trefah, which is used to describe foods Jews cannot eat.

There are many references about not only what you can and cannot eat but also the way in which food is prepared.

According to Genesis the first humans were vegetarians, it was only after the flood God allowed Noah to eat meat.

"....bring the best of the first fruits of your soil to the house of the Lord your God. Do not cook a young goat in its mother's milk".

Component 3: Judaism

Kosher

A true Cloven Hoof – This is the divided hoof of an animal – sheep,

goats, cattle

Chew the Cud– The process of rechewing partly digested foods such as grass to gain the fullness of its nutrients.

Fins and Scales-The parts of a fish that help protect it from predators, and

enable it move easily through the waters

Kosher

Can't eat - Trefah	Can eat
Shellfish	Fish with fins and scales
Fish without Fins and scales	Animals that Chew the Cud and have a true
Animals that don't chew the cud or have	cloven hoof
true cloven hooves	Certain types of insect – according to the
Many type so f birds, especially birds of	law
prey	All fruit and vegetables
Animals killed incorrectly	Meat totally separately to Dairy
Meat and dairy	Animals killed correctly.

Component 3: Judaism

Rosh Hashanah

What

Rosh Hashanah and Yom Kippur are known as the Days of Awe and both known to be connected to judgement and atonement

God judges people on their deeds for the previous year and notes them down

Why

It is the celebration of the day when God created the world and marks the New Year Not only does it mark the end of the year but looking at the next ahead Rosh Hashanah is a happy and serious festival

How

Special fruits such as pomegranates are
bought
Evening prayers will address God as a king
At home Kiddush is made and slices of
apple dipped in honey are eaten
The challah eaten is a different shape than
the one eaten at Shabbat
At the morning service the shofar is blown
100 times to represent the crying of the soul
asking to be reunited with God
Jews will recite a special prayer at a
running stream or river, known as casting
away

Yom Kippur

What / Why

The holiest day of the year when many people will attend the synagogue, a day to atone for your sins The end of the 10 days repentance, a day of forgiveness It is a day of self-denial in 5 areas; food, wearing of perfumes, drink, sex and wearing of leather shoes for 25 hours

How

The day before is a time of preparation Some Jews take chickens to the poor or give money to charity

Begins at home with a meal before a visit to Synagogue The table is covered with Jewish books to remind them that it is celebrated with fasting and prayer Although it is a solemn day, many Jews look forward to it as it gives them a chance to atone for wrongdoings

How

Five prayer services throughout Yom Kippur. At the heart of each is a confessional prayer to God The story of Jonah is told to remind Jews about forgiveness Jews will also remember friends and family who have died as part of a mourning service After nightfall a single blast of the shofar announces the fast is over Then customary for children to get ready for the festival of Sukkot

65

Component 3: Judaism

Sukkot

What

Sukkot begins on the 5th day after Yom Kippur. It is counted as a mitzvot for Jews. It is a harvest festival to thank God. Sukkot lasts for 7 days and no work is permitted on the first and second day

Why

It commemorates the 40 years Israelites were in the desert

All of the parts of us have the potential to sin but should join together to perform the mitzvot.

Sukkot celebrates the journey through the desert on their way to the Promised Land.

How

Jewish families build a Sukkah (a temporary shelter). Jewish families may live or eat within the Sukkah during the 7 days they should spend as much time as possible in it.

Many families decorate their sukkah with their children's drawings, prayers and explanations of the festival land there is usually a table and chairs.

On each morning except Shabbat, people put the lulav in the right hand and say a blessing to God.

The Lulav and Etrog are waved in six directions front, right, back, left, up and down. This indicates that God's power

Pesach

This celebrates the Israelites liberation from slavery in Egypt led by Moses.

Prayers are often said for people who are not free. Many of the Jews remove all grain products from the house during the festival. **Chametz**

Chametz

Some Jews believe that it is a source of pride. Others say it represents the way sin spreads through a person

Others say it is because when the Jews left Egypt there wasn't time for bread to rise.

Pesach is welcomed into the house by lighting a candle. Families will go to the Synagogue and then eat a meal together The Seder meal is a central part of the festival and is eaten on the first two days.

The meal is served with 4 glasses of wine to celebrate; joy, happiness, freedom and one left by an open door to welcome prophet Elijah.

Sedar Meal

It begins with questions by the youngest family members **A lamb bone-** symbol of sacrifice **A roasted egg** – a symbol of new life **A green vegetable** to dip in saltwater – a sign of spring and for tears **Bitter herbs** – reflecting on the bitterness of slavery **A thick paste** – to represent the mortar of Jewish slaves **Matzahh** – to remember the moment when pharaoh

finally freed them, they did not time to have fully baked bread.

Component 3: Judaism

The Goodness of God

Sources of Authority

Omnipotent Omniscient

Genesis1

God said, 'Let us make man with our image and likeness. Let him dominate the fish of the sea, the birds of the sky, the livestock animals, and all the earth - and every land animal that walks the earth' God created man with His image. In the image of God, He created him, male and female He created them. God blessed them.God said to them, 'Be fertile and become many. Fill the land and conquerit. Dominate the fish of the sea, the birds of the sky, and every beast that walks the land.'

Summary of the source

Links to the course

God created all life Life belongs to God Humans are made in the Image of God Humans were given responsibility over creation God blessed humans

Key Terms and Phrases

Image of God "Dominate the fish of the sea" "Be fertile and become many" Omnibenevolent Creation Stewardship Sanctity of Life Marriage

Possible Exam Questions

Describe what Genesis teaches about the responsibility to the planet Describe what Genesis teaches about the role of human beings 7 Sources of Authority

The Shema

Hear, O Israel: the LORD our God, the LORD is one. Love the LORD your God with all your heart and with all your soul and with all your strength. These commandments that I give you today are to be on your hearts.Impress them on your children. Talk about them when you sit at home and when you walk along the road, when you lie down and when you get up. Tie them as symbols on your hands and bind them on your foreheads. Write them on the door-frames of your houses and on your gates.

Component 3: Judaism

Sources of Authority

Numbers 15

The Lord said to Moses, 'Speak to the Israelites and say to them: "Throughout the generations to come you are to make tassels on the corners of your garments, with a blue cord on each tassel. You will have these tassels to look at and so you will remember all the commands of the Lord, that you may obey them and not prostitute yourselves by chasing after the lusts of your own hearts and eyes. Then you will remember to obey all my commands and will be consecrated to your God. I am the LORD your God, who brought you out of Egypt to be your God. I am the Lord your God."

Summary of the source

God gave Moses instructions about prayer Jewish people are instructed to wear a prayer shawl with tassels on (613) to represent the commandments of God The tassels remind Jewish people about God and how he delivered them from slavery

Key Terms and Phrases

Tallit (Prayer shawl) "You will look at the tassels so you will remember the commands"

Links to the course

Items worn for worship Prayer Covenants

Possible Exam Questions

Describe Moses' instructions about prayer Describe the purpose of the Tallit

Sources of Authority

Exodus 20

God spoke all these words, saying, I am God your Lord, who brought you out of Egypt, from the place of slavery. Do not have any other gods before Me.

Do not represent such gods by any carved statue or picture of anything in the heaven above, on the earth below, or in the water below the land. Do not bow down to or worship them. I am God your Lord, a God who demands exclusive worship...

Do not take the name of God your Lord in vain. God will not allow the one who takes His name in vain to go unpunished.

Remember the Sabbath to keep it holy. You can work during the six weekdays and do all your tasks. But Saturday is the Sabbath to God your Lord. Do not do anything that constitutes work... God therefore blessed the Sabbath day and made it holy.

Honour your father and mother. You will then live long on the land that God your Lord is giving you.

Do not commit murder.

Do not commit adultery.

Do not steal.

Do not testify as a false witness against your neighbour.

Do not be envious of your neighbour's house.

Do not be envious of your neighbour's wife.

Component 3: Judaism

Describe how Moses showed faith in God

Sources of Authority

The Talmud

....because the possibility of danger to human life renders inoperative the laws of the Sabbath.

Our Rabbis taught: One must remove debris to save a life on the Sabbath, and the more eager one is, the more praiseworthy is one; and one need not obtain permission from the Beth din.

How so? If one saw a child falling into the sea, he spreads a net and brings it up — the faster the better, and he need not obtain permission from the Beth din though he thereby catches fish.

If he saw a child fall into a pit, he breaks loose one segment of the entrenchment and pulls it up — the faster the better; and he need not obtain permission of the Beth din, even though he is thereby making a step stairs. If he saw a door closing upon an infant, he may break it, so as to get the child out — the faster the better; and

he need not obtain permission from the Beth din, though he thereby consciously makes chips of wood. One may extinguish and isolate the fire in the case of a conflagration — the sooner the better, and he need not obtain permission from the Beth din, even though he subdues the flames

Component 3: Judaism Sources of Authority

Summary of the source

It is okay to break the rules of Shabbat in order to protect life You do not need permission to save a life on Shabbat Those who save a life on Shabbat are praiseworthy

- 21. Communicable disease: viruses
- 22. Communicable disease: bacteria, fungi and protists
- 23. Required Practicals 1: Microscopy & food tests

Description

24. Required practical 2: Enzymes

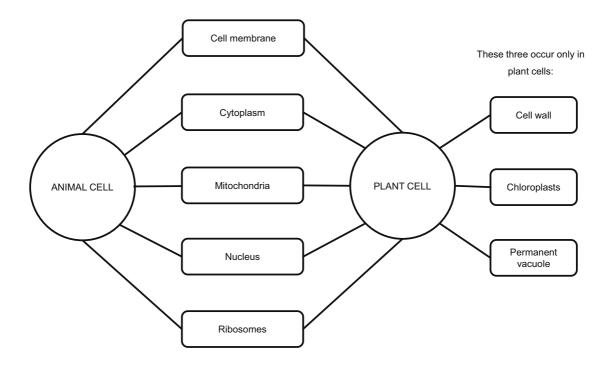

1. Cells

Both animal and plant cells contain a nucleus, cytoplasm, cell membrane, mitochondria and ribosomes. Plant cells also contain a cell wall, chloroplasts, and a permanent vacuole.

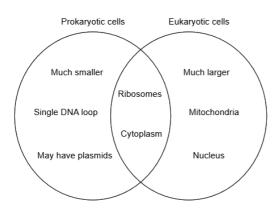

Cell membrane	Controls what enters and leaves the cell.
Cell wall	Made of cellulose, to strengthen the cell.
Chloroplast	The site of photosynthesis.
Cytoplasm	The site of chemical reactions.
Mitochondria	To release energy during respiration.
Nucleus	Contains chromosomes made of DNA molecules. Each chromosome carries a large number of genes.
Permanent vacuole	Filled with cell sap (a weak solution of sugars and salts).
Ribosomes	The site of protein synthesis (where proteins are made).

2. Organisation of Cells

3. Eukaryotic and prokaryotic cells

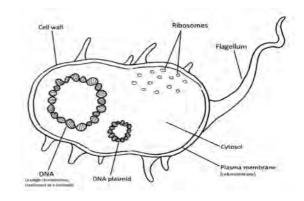

Eukaryotic cells contain a nucleus. Plant cells and animal cells are eukaryotic.

Prokaryotic cells (bacteria) are much smaller than eukaryotic cells. They do not have a nucleus.

They do not have mitochondria but do have ribosomes.

They have a single DNA loop and may also have small rings of DNA called plasmids.

1000nm (nanometres) = 1μm 1000μm (micrometres) = 1mm 1000mm (millimetre) = 1m 10mm = 1cm (centimetre)

2

3

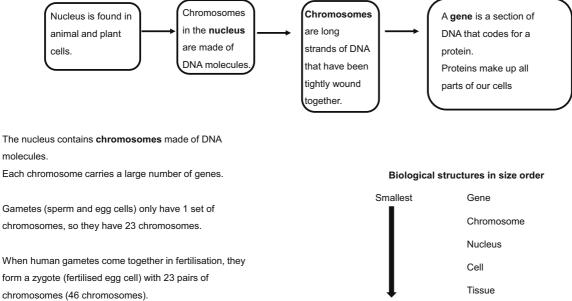

4. Animal Specialised Cells

Type of specialised cell	Function	Adaptations
Nerve cell	Carry electrical impulses around	Lots of dendrites to make connections to other cells
	the body	A very long axon that carries the electrical impulse from one place to another
de to		Contain lots of mitochondria to provide the energy needed to make special
$\overline{()}$		transmitter molecules, to carry impulses across gaps (synapses) between one
		nerve cell and the next
Muscle cells	Contract and relax to allow	Contain special fibres that can slide over one another to allow the muscle to
	movement	contract and relax
		Contain lots of mitochondria to provide energy for contraction
		Store glycogen which can be converted into glucose for respiration
Sperm cells	Fertilise an egg cell	A tail for movement
		Middle section full of mitochondria to provide energy for tail to move
Ine Nudeus		Digestive enzymes in acrosome to digest a pathway into the egg
Million		A large nucleus containing half the genetic information needed to make an
		organism

5. Plant Specialised Cells

Specialised cell	Function	Adaptations
Root hair cell	Absorb water and mineral ions	Large surface area available for water to move into cell by osmosis Large permanent vacuole that speeds up osmosis Lots of mitochondria that carry out respiration to provide the energy needed for active transport of mineral ions
Xylem cells	Transport water and mineral ions from the roots to the highest leaves and shoots - always upwards.	When first formed xylem cells are alive but due to build-up of lignin the cells die and form long hollow tubes (vessels). The lignin makes the xylem vessels very strong and helps them withstand the pressure of water moving up the plant.
Phloem cells	Transport sugars up and down the plant	End walls between cells break down to form sieve plates that allow water carrying dissolved sugars to move up and down the phloem. Neighbouring companion cells are packed with mitochondria to provide their energy needs.

6. Nucleus

Human body cells contain 23 pairs of chromosomes.

Smallest	Gene
	Chromosome
	Nucleus
	Cell
Ļ	Tissue
Largest	Organ

7. Stem Cells and Microscopes

Use the EVERY model to complete	Туре	Description	
calculations:			
E = equation	Adult stem cells	Adult cells which can form many types of cells, including blood cells.	
V = values / A IVI			
E = enter results	Embryonic stem cells	Stem cells from embryos which divide and differentiate into specialised cells.	
R = result Magnification = <u>size of image</u>	Cella	unerentiate into specialised cells.	
Y = units size of real object	Differentiation	Specialisation of cells	
Magnification increases the size of the image. Resolution increases the detail of the image.	Stem cells	Undifferentiated cells, capable of dividing to make lots of cells, and of differentiating to form specialised cells.	
	Meristem tissue	Tissue made up of stem cells in plants. It can differentiate into any type of plant cell,	
Electron microscopes have higher magnification		throughout the plant's life. Can be used to produce plant clones quickly and economically. Can be used to clone rare species.	
and higher resolution than light microscopes.			
They have allowed scientists to study cells in much		Can be used to clone plants with useful features, e.g. disease resistance.	
finer detail.	Therapeutic cloning	Scientists can use embryo stem cells to make different types of human cells. The cells are not rejected by the patient's body, but some people have ethical or religious concerns.	
They have increased our understanding of sub-			
cellular structures such as mitochondria.			

8. Transport in and out of cells - diffusion

Diffusion: The overall movement of particles from high concentration to low concentration – they spread out.

Examples

Oxygen and carbon dioxide diffuse in and out of cells in gas exchange.

Urea moves out of cells into the blood plasma. It is a waste product. It goes to the kidney to be excreted.

Factors that affect the rate of diffusion

- The bigger the difference in concentrations, the faster diffusion is.
- The higher the temperature, the faster diffusion is.
- The bigger the surface area of the membrane, the faster diffusion is.

Diffusion and single celled organisms

Single celled organisms have a large surface area compared with their volume.

Diffusion is enough to get them all the molecules that they need.

Diffusion and larger organisms

Larger organisms have a small surface area compared to their volume.

They need exchange surfaces and transport

systems to allow them to absorb enough oxygen and move it around the body.

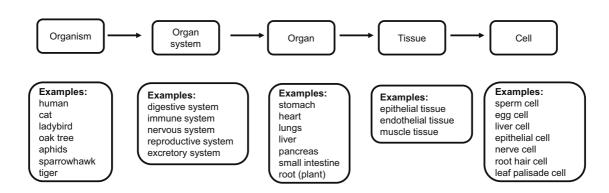

Exchange surfaces in plants have:

- 1. a large surface area.
- 2. thin membranes, to provide a short diffusion path.

Exchange surfaces in animals have:

- 1. a large surface area
- 2. thin membranes, to provide a short diffusion path.
- 3. a good blood supply
- 4. good ventilation (they breathe)

9. Levels of organisation

Basics of organisation

Cells are the building blocks of all organisms.

A tissue is a group of cells with a similar structure and function.

An organ is a group of tissues performing similar functions.

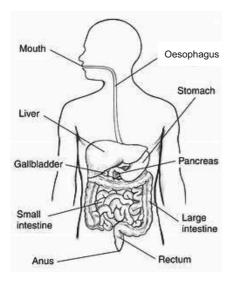

An organ system is a group of organs, which work together to

perform a particular function.

8

10. Organisation of cells in the digestive system

The **human digestive system** is an example of an organ system in which several organs work together to digest and absorb food.

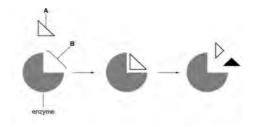

Organ	Function	
Mouth	First stage of digestion, teeth break up food with mechanical digestion and salivary amylase breaks down food in chemical digestion.	
Oesophagus	Transports food from the mouth to the stomach.	
Stomach	Churns food and adds acid.	
Small intestine	Adds digestive enzymes (amylase, lipase, and protease) and absorbs nutrients from the food.	
Large intestine	Absorbs water, producing waste.	
Rectum	Stores waste.	
Anus	Waste passes out of the anus.	
Liver	Produces bile. Bile neutralises stomach acid and emulsifies fats. Food does not pass through here.	
Gall bladder	Stores bile which has been produced in the liver. Food does not pass through here.	
Pancreas	Produces digestive enzymes: amylase, lipase, and protease. Food does not pass through here.	

11. Enzymes in the digestive system

Digestive enzymes break down food into small soluble molecules that can be absorbed into the blood stream.

Digestive	Produced by	Converts	Into
Enzyme			
Amylase	Mouth, small	Starch	Sugar
(carbohydrase)	intestine,	(carbohydrates)	
	pancreas		
Lipase	Small intestine,	Lipid (fat)	Glycerol + fatty
	pancreas		acid
Protease	Stomach, small	Protein	Amino acids
	intestine,		
	pancreas		

Enzymes are specific.

They have a specific shape (**the active site**) which works on a specific substrate – like a lock and key.

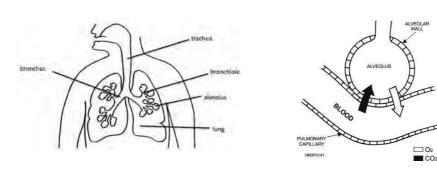

If the active site changes shape, it no longer works. Changes in pH and temperature can **denature** – change the shape of the active site - so that it no longer works.

The products of digestion are used to build new carbohydrates, lipids and proteins.

Glucose can also be respired.

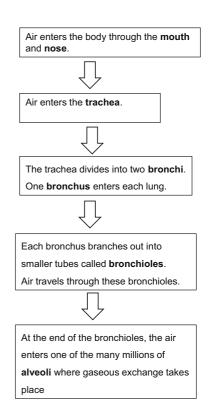

Bile is made in the liver and is stored in the gall bladder. It is alkaline and neutralises the hydrochloric acid from the stomach. It emulsifies fat to form small droplets, increasing the surface area. This makes fat digestion quicker.

12. The breathing system

The lungs provide a good exchange surface for oxygen:

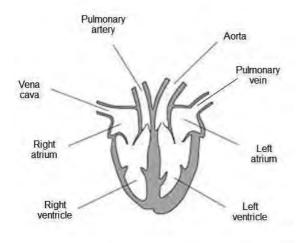

- 1. Large surface area provided by alveoli.
- 2. Thin walls of alveoli (one cell thick) and blood supply (capillary), providing a short diffusion distance.
- 3. Good blood supply to transport the oxygen away from the lungs.
- 4. Well ventilated to supply more oxygen.

13. Organisation of cells in the circulatory system 1

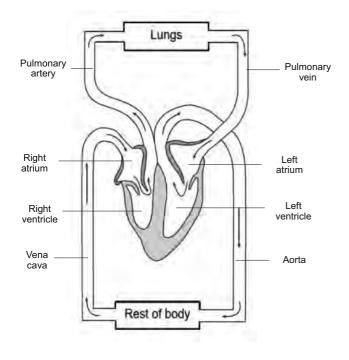

The heart is an organ.

The function of the heart is to pump blood around the body. Humans have a **double circulatory system**, which means that blood must pass through the heart **twice** to complete a full circuit of the body.

Organ	Function
Heart	Organ that pumps blood around the body in a double circulatory system.
Vena cava	Vein which brings blood from the body to the right atrium of the heart.
Right ventricle	Chamber which pumps blood to the lungs where gas exchange takes place.
Pulmonary artery	Artery takes blood from the right ventricle to the lungs.
Left ventricle	Chamber which pumps blood around the rest of the body
Pulmonary vein	Vein which brings blood from the lungs to the left atrium of the heart.
Aorta	The aorta takes blood from the left ventricle to the body.
Pacemaker	In the wall of the right atrium, controls heart rate.

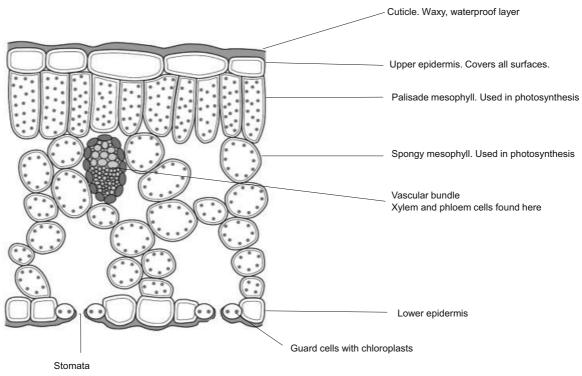

14. Organisation of cells in the circulatory system 2

The blood is a	tissue.
----------------	---------

Blood component		Role		
Plasma		Solution in which cells are suspended; carries dissolved food and hormones around the body		
	Carry oxygen			
d	Involved in immune response to fight pathogens			
Platelets		Involved in blood clotting		
Role	e	Description

15. Cross section of a leaf

16. Organisation of cells in plants

Water is absorbed (by osmosis) by **root hair cells** that have a large surface area. The root hair cells also absorb mineral ions (by active transport).

Transports water and mineral ions from the roots to the stems and leaves. Made of hollow tubes, strengthened by lignin.

Transpiration is the transport of water and minerals up the xylem of a plant, and the evaporation of water through the stomata. Transpiration is increased by •Increased temperature •Increased air movement •Increased light intensity •Decreased humidity

Phloem Cells

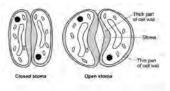

Translocation is the transport of sugars in the phloem, to all parts of the plant. The leaves make sugars through photosynthesis. The **phloem** transports dissolved sugars from the leaves to the rest of the plant for respiration or for storage of starch.

Phloem is made of tubes of elongated cells.

Cell sap (dissolved sugars) moves from one phloem cell to the next through pores in the end walls.

Stomata and Guard Cells

The **stomata** (small holes in the underside of the leaf) are needed for gas exchange in the leaf. Water is also lost to the surroundings through the stomata. To reduce water loss, **guard cells** can change the size of the stomata.

17. Coronary Heart Disease

Term	Definition
Disease	dis-ease (not at ease; something in our body or mind is not working correctly)
Coronary Heart Disease	a non-communicable disease (you can't catch it)
Coronary arteries	supply the heart muscle with oxygen and glucose
Coronary heart disease	The coronary arteries have layers of fatty material building up in them. They get narrower. Less blood can flow through the coronary arteries, so the heart muscle lacks oxygen.

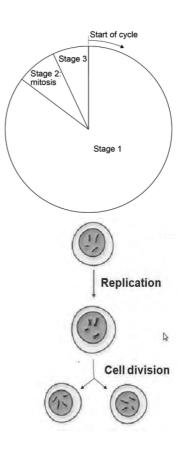

Treatment	Description		
Statins	Tablets used to reduce blood cholesterol. They slow down the rate of fatty material build up.		
Stents	Used to keep the coronary arteries open.		
Heart valve replacement	Valves keep blood flowing through the heart in the right direction. Sometimes the valves don't open fully or become leaky. This prevents blood flowing through the heart properly. The patient becomes out of breath and lacks energy. Faulty heart valves can be replaced with new biological valves (from a donor) or mechanical valves.		
Heart failure	Can be treated with a new heart and lungs. The heart would come from a donor. Mechanical hearts can be used to keep the patient alive whilst waiting for a heart transplant.		

18. Cell Cycle: Mitosis

Stage of the cell cycle	Events
1	The cell grows. The DNA replicates to form two copies of each chromosome. New mitochondria and ribosomes are made.
2	Mitosis: one set of chromosomes is pulled to each end of the cell. The nucleus divides.
3	The cytoplasm and cell membranes divide. There are now two identical cells.

Uses of cell division by mitosis

- 1. Growth
- 2. Repair of tissues
- 3. Asexual reproduction

19. Cell Cycle: Mitosis and Cancer

Stage of the cell cycle	Events
1	The cell grows. The DNA replicates to form two copies of each chromosome. New mitochondria and ribosomes are made.
2	Mitosis: one set of chromosomes is pulled to each end of the cell. The nucleus divides.
3	The cytoplasm and cell membranes divide. There are now two identical cells.

Cancer is the result of uncontrolled growth and division of cells. This is caused by a change in the genetic material of the cell.

Benign tumours are growths of abnormal cells.

They are contained in one area, usually within a membrane. They do not invade other parts of the body.

Malignant tumour cells are cancers.

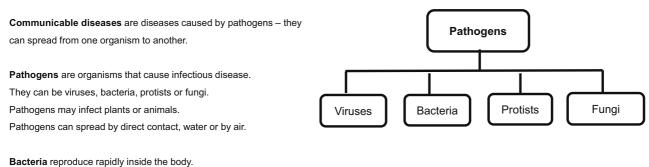

They invade neighbouring tissues and spread around the body in the blood, where they form secondary tumours.

Lifestyle factors and genetic factors can be risk factors for cancers.

Uses of cell division by mitosis

- 1. Growth
- 2. Repair of tissues
- 3. Asexual reproduction

20. Communicable diseases: pathogens

Bacteria produce poisons/toxins that damage tissues and make us feel ill.

Viruses reproduce rapidly inside the body. Viruses live and reproduce inside cells, causing cell damage.

21. Communicable diseases: viruses

Pathogen	Disease	Transmission	Symptoms	Treatment or prevention
Virus	Measles	Sneezing and coughing produces droplets containing the virus; these droplets can be inhaled by others.	Fever and red skin rash. It can be fatal if there are complications.	Most young children are vaccinated against measles
Virus	HIV/AIDs	Sexual contact or exchange of body fluids such as blood.	Flu-like illness, which then attacks the body's immune cells. Late stage HIV, known as AIDS, happens when the immune system is so damaged that it cannot deal with infections or cancers	treated with antiretroviral drugs.
Virus	Tobacco mosaic virus (TMV)	By direct contact	A distinctive mosaic pattern of discoloration on the leaves. The leaves can't photosynthesise as well, which affects the growth of the plant.	Remove infected plants; wash hands when handling plants to prevent transfer from one to another

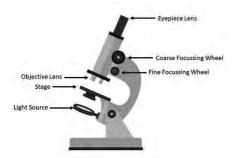

22. Communicable diseases: bacteria, fungi and protists

Pathogen	Disease	Transmission	Symptoms	Treatment or prevention
Bacterium	Salmonella (food poisoning)	Undercooked chicken, or contamination of surfaces from raw chicken	Fever, abdominal cramps, vomiting and diarrhoea, caused by the bacteria and the toxins from the bacteria.	Poultry (chicken, turkey and ducks) are vaccinated against salmonella to control the spread
Bacterium	Gonorrhoea	sexually transmitted disease	Thick yellow or green discharge from the vagina or penis; as well as pain when urinating.	Antibiotics, although there are many resistant strains. Barrier methods of contraception can reduce the spread.
Fungus	Rose black spot	by wind or water	Purple or black spots develop on leaves. The leaves turn yellow and drop off. The leaves don't photosynthesise well, which affects the growth of the plant.	Fungicides and removing and destroying the affected leaves.
Protist	Malaria	Spread by mosquito bites.	Recurrent (repeating) episodes of fever. It can be fatal.	Prevented by stopping mosquitos from breeding, and by avoiding being bitten e.g. with a mosquito net.

23. Required Practicals 1 – Microscopy and Food Tests

Using a Microscope

- 1. Light on
- 2. Platform (stage) high
- 3. Lowest magnification objective lens first
- 4. Coarse focus first, then fine focus

Food tests

Food	Test	Positive result
Starch	add iodine solution	turns black
Sugars	add Benedict's solution → heat	makes (orange) precipitate
Protein	add Biuret solution	turns purple
Fats (lipids)	add ethanol → shake → add water → shake	cloudy white emulsion

Rules for Biological Drawings

- Sharp pencil
- Smooth lines
- Ruler for label lines
- No arrowheads
- Add magnification (multiply eyepiece lens by objective lens)

24. Required Practical 2 - Enzymes

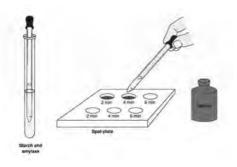

Investigate the effect of pH on the reaction of amylase enzyme

IV: pH (change using at least 5 different buffer solutions) DV: time taken to digest starch (measured as the time it takes for a sample of the mixture **not** to turn black when mixed with iodine solution)

CV: volume and concentration of amylase solution; volume and concentration of starch solution; temperature; time for samples

Method:

- 1. Place known volume of starch solution into a boiling tube.
- 2. Place known volume of amylase solution into the boiling tube.
- 3. Stir using a glass rod.
- 4. Take a sample of mixture and place onto a spot tile.
- Add a drop of iodine solution to the spot tile; repeat every 30s; record the time taken for the mixture not to turn black.
- 6. Repeat steps 1 5 for at least 5 different pHs.

25. Atoms, Elements, Compounds and Mixtures

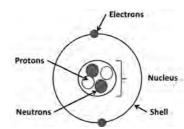

Keyword	Definition
Atom	smallest part of an element
Element	made up of only one type of atom
Compound	made from at least two elements, chemically combined
Mixture	made of two or more elements or compounds not chemically combined together

Radius of an atom = 0.1nm (1 x 10^{-10} m).

Radius of a nucleus is less than 1/10 000 of that of an atom. This is 1 x 10⁻¹⁴m.

Atoms are neutral (no electrical charge) because: -The number of protons and electrons are the same. -The charges cancel out
Atomic number = Proton number
Mass number = Number of protons and neutrons
Number of electrons = Number of protons

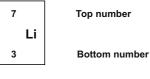

Structure of the atom (Nuclear model)

Subatomic particle	Relative charge	Relative mass		
Proton	+1	1		
Neutron	0	1		
Electron	-1	1/1840		

25

26. Structure of the Atom

Proton

= bottom number

- Electron = bottom number
- **N**eutron = top number bottom number

Electronic Configuration

Electrons are arranged in shells.

- 1st shell maximum of 2 electrons
- 2nd shell maximum of 8 electrons
- 3rd shell maximum of 8 electrons

Isotopes:

Atoms of the same element that have different numbers of neutrons but the same number of protons and electrons.

They have the same chemical properties but different physical properties.

Ar 18 18 protons 18 electrons 21 neutrons 20 neutrons

38

Calculating Relative Isotopic Abundance

Mass number	Abundance (%)		
39	93.1		
41	6.9		

= 39.1

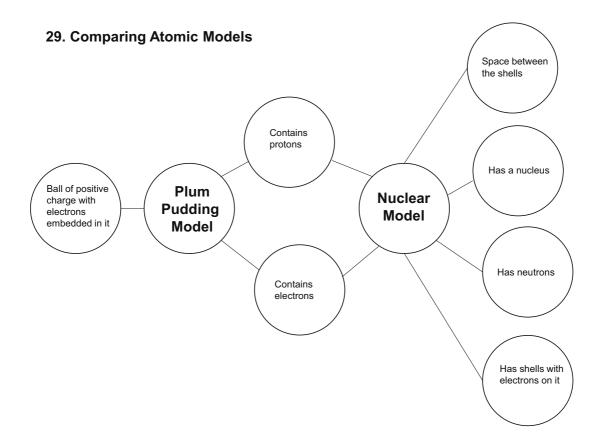

27. Separating Mixtures

Process	Filtration	Distillation	Fractional distillation	Chromatography
Diagram	X		Gases Gases → Petrol Crude oil → Bitumen	
Physical property	Difference in solubility	Difference in boiling points	Difference in boiling points	Difference in solubility
Example	Sand and salt	Ink and water	Ink, water and oil	Different colours in dyes

27

28. History of the Atom

Atomic model	Plum pudding model		Nuclear model			
Diagram		C C Dedato dag	Electron Proton Neutron			
Discovery	Electron	Positive nucleus in the centre of the atom	Electrons occupy shells Electrons are at specific distances from the nucleus	Neutrons	 Atomic radius: 1 × 10⁻¹⁰ m Radius of a nucleus is 	
Description	The atom is a ball of positive charge with negative electrons embedded in it.	Positively charged alpha particles were fired at thin gold foil. Most alpha particles went straight through the foil. A few were scattered in different directions by the atoms in the foil. It showed that the mass of an atom was in the centre (the nucleus) and the nucleus was positively charged.		Proved the existence of isotopes	 less than 1/10 000 of the radius of an atom. Most of the mass of an atom is concentrated in the nucleus. The electrons are arranged at different distances from the nucleus 	
Discovere d by	Thompson	Rutherford	Bohr	Chadwick	- nucleus.	

30. Ionic and Covalent Bonding

Ionic Bonding (metal & non-metal)

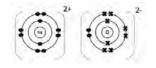

Structure: Giant ionic lattice

Electrons are lost or gained to achieve a full outer shell.

lonic bond: Electrostatic attraction between oppositely charged ions.

lons held in a fixed lattice.

Charge of ion: +2 (loses 2 electrons) and -2 (gains 2 electrons)

Describing the formation of an ionic compound Example 1: NaF

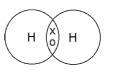

Na atom loses 1 electron to form Na^{1+} ion. F atom gains 1 electron to form F^{1-} ion

Example 2: Na₂O

Two Na atoms each lose 1 electron to form two Na¹⁺ ions. One O atom gains 2 electrons to form O^{2-} ion.

Covalent Bonding (2 x non-metals)

Covalent bond: Pairs of electrons are shared between the atoms. Sharing one pair of electrons = single bond Sharing two pairs of electrons = double bond

Simple Molecules (2 x non-metals, covalent bonding) Simple molecules (small molecules) e.g. H₂, Cl₂, O₂, N₂, HC*I*, H₂O

31. Giant Covalent Bonding

	Diamond	Graphite	Silicon dioxide
Bonding	Giant covalent	Giant covalent	Giant covalent
Made of	Carbon	Carbon	Silicon and oxygen
Structure	Each carbon atom forms four C-C covalent bonds.	Each carbon atom forms three covalent bonds with three other carbon atoms, forming layers of hexagonal rings . The 4 th electron is delocalised	Each silicon atom forms four covalent bonds with oxygen atoms
Diagram			

31

32. Metallic Bonding and Alloys

Metallic Bonding

Metallic bond: Attraction

between the positive metal ion and delocalised electrons. **Structure**: Layers of metal positive ions surrounded by delocalised electrons

Alloy

Mixtures of metals with metals or a non-metal e.g. stainless steel is a mixture of iron and carbon **Structure**: Irregular layers

33. Quantitative Chemistry

Relative formula mass (RFM or M_r)

This is the mass in grams of 1 mole of the substance.

To calculate M_r (top number) you need to add up the atomic mass

(Ar) of all of the atoms in the molecule.

Example 1. NaCl = Na + Cl = 23 + 35.5 = 58.5Example 2. MgF₂ = Mg + (2 x F) = 24 + (2 x 19) = 62

% Mass of an Element in a compound

% mass of = Atomic mass of element x number of atoms Relative formula mass of compound X 100

Remember: <u>part</u> x 100 whole

Conservation of Mass

During a chemical reaction, no atoms are made, no atoms are destroyed.

Decrease in mass:

 $CaCO_3 (s) \longrightarrow CaO (s) + CO_2 (g)$ Carbon dioxide is a gas which is a product Carbon dioxide escapes into the air.

Increase in mass:

 $2Mg(s) + O_2(g) \longrightarrow 2MgO(s)$ Mg reacts with oxygen in the air Oxygen has added to the magnesium

Concentration of a solution

Concentration (g/dm³) = mass (g) ÷ volume (dm³)

33

34. Acids and Alkalis

Acid	Chemical formula
Sulfuric acid	H ₂ SO ₄
Nitric acid	HNO ₃
Hydrochloric acid	HC/
Alkali	Chemical
Aikaii	formula
Sodium hydroxide	NaOH
Potassium hydroxide	КОН

Acid	Salt name ending		
Hydrochloric	-chloride		
Nitric acid	-nitrate		
Sulfuric	-sulfate		

The pH Scale

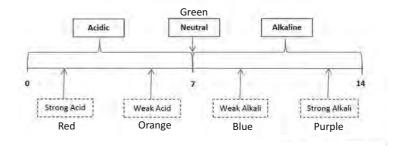

It can be measured with a pH probe, or universal indicator.

Acid: pH 0-6

Neutral: pH 7

Alkali: pH 8-14

The pH Scale

Neutralisation

Acids contain hydrogen ions (H⁺) Alkalis contain hydroxide ions (OH⁻) acid + alkali \rightarrow water

Ionic equation: H^+ (aq) + OH^- (aq) $\rightarrow H_2O$ (I)

Reaction 1	Departieurs of Asido with Matela (Newtonlightign)
Reaction	Reactions of Acids with Metals (Neutralisation)
Rule	acid + metal → salt + hydrogen
Example	hydrochloric acid + magnesium → magnesium chloride + hydrogen
Reaction 2	Reactions of Acids with Metal Oxide (Neutralisation)
Rule	acid + metal oxide → salt + water
Example	sulfuric acid + magnesium oxide \rightarrow magnesium sulfate + water
Reaction 3	Reactions of Acids with Metal Hydroxide (Neutralisation)
Rule	acid + metal hydroxide \rightarrow salt + water
Example	nitric acid + magnesium hydroxide \rightarrow magnesium nitrate + water
Example Reaction 4	nitric acid + magnesium hydroxide → magnesium nitrate + water Reactions of Acids with Metal Carbonate (Neutralisation)

35. Reactions of Acids to Make a Salt (Neutralisation)

36. Strong and Weak Acids

Strong acid

Completely ionised (breaks down) in aqueous solution.

 $\mathrm{HC} I \ \rightarrow \qquad H^+ \ + \ C I$

 $\textit{Examples:} Hydrochloric acid (HCI), nitric acid (HNO_3)$

and sulfuric acid (H_2SO_4) .

Lower pH numbers (pH 1-3) The stronger the acid, the more it ionises in solution,

and the more hydrogen ions there are in the solution.

Concentrated acid

More hydrogen ions (H⁺) per volume

Weak acid

Higher pH numbers (pH 4-6)

рΗ

If the hydrogen ion concentration in a solution increases by a factor of 10, the pH of the solution decreases by 1.

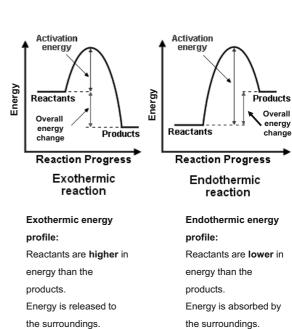

Volume of acid (cm ³)	рН
10	3
1000	5

37. Energy Changes

Exothermic Reaction. Energy is transferred from particles to the surroundings. Temperature increases. Examples: Combustion, many oxidation reactions, neutralisation. Every day uses: self-heating cans and hand warmers.

Endothermic reaction. Energy is transferred from the surroundings to the particles. Temperature decreases Example: Thermal decomposition and the reaction between citric acid and sodium hydrogencarbonate. Every day uses: sports injury packs.

Activation energy: minimum amount of energy required for the reaction to start.

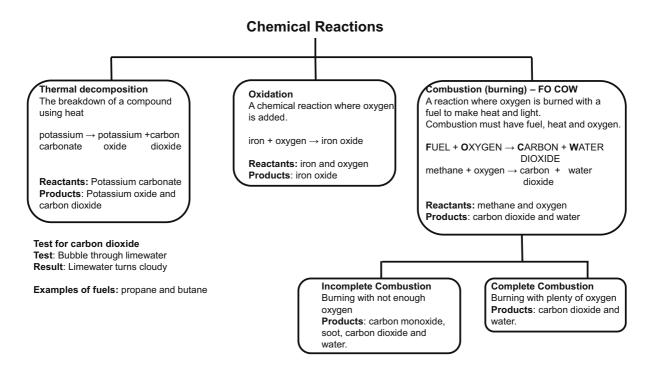

37

Overall

energy

change

38. Types of Chemical Reactions

39. Conservation of mass

In a reaction, the atoms you start with are the same as those that you make.

mass of the reactants = mass of the products.

 $H_2 + CI_2 \rightarrow 2HCI$

Reactant side has 2 H and 2 Cl atoms. The product side has 2 H and 2 Cl atoms. If one side has a mass of 25g, the other side will have a mass of 25g

Loss in mass

calcium carbonate \rightarrow calcium oxide + carbon dioxide

Explanation:

- Carbon dioxide is a gas

- It escapes into the atmosphere

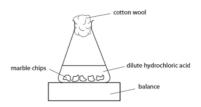

Gain in mass

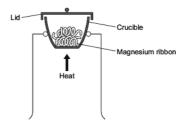

magnesium + oxygen \rightarrow magnesium oxide

Explanation:

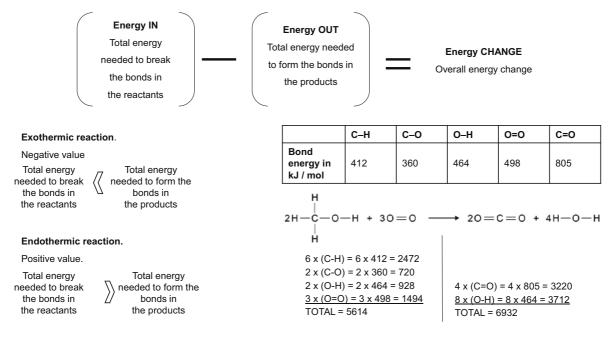

- Oxygen gas is added

- Oxygen comes from the air

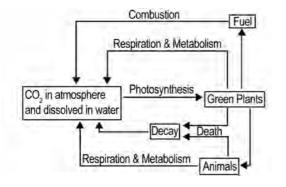

40. Calculating Bond Enthalpy

5614 - 6932= -1318

41. The Carbon Cycle

The carbon cycle shows how carbon moves through organisms and as carbon dioxide (CO₂) in the atmosphere.

Earth's atmosphere: 78 % nitrogen, 21 % oxygen, <1 % carbon dioxide, plus small amounts of other gases.

How carbon is recycled: By photosynthesis (COW GO) and respiration (GO COW).

Reasons why CO_2 levels have increased:

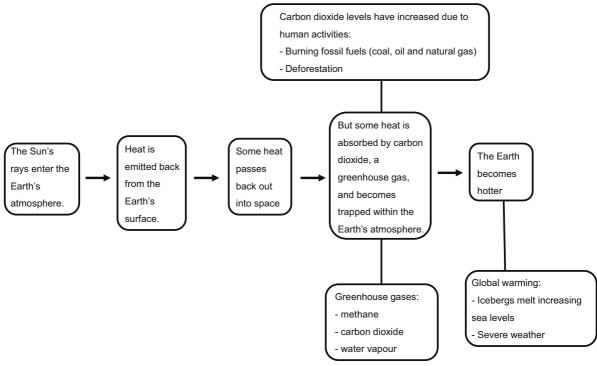

Human activities such burning fossil fuels (FO COW) and deforestation.

Greenhouse effect:

Greenhouse gases are carbon dioxide, methane, water vapour and ozone.

Scientists have evidence that global warming caused by human activity is causing changes in the climate.

42. The Greenhouse Effect

43. Required Practical 1: Making a salt

Making a soluble salt

- 1. Add excess copper oxide to sulfuric acid in a beaker
- 2. Stir using a stirring rod
- 3. Filter using a funnel and filter paper into a conical flask.
- 4. Evaporate the water from the copper sulfate solution in an
- evaporating dish using gentle heat until half the volume is left.
- 5. Leave on windowsill to form crystals.
- 6. Pat dry crystals.

Reasoning for the steps

Step 1: Excess metal oxide used so that all the acid reacts. Step 2: Reaction stirred so all the chemicals react. Step 3: Removal of excess copper oxide. Excess copper oxide used as it is easier to remove than excess acid Step 4: Slow this step down by using a water bath

Observations:

Black solid (copper oxide) is left in the filter paper Colour change

44. Required Practical 2 – Energy Changes

Reacting two solutions, e.g. acid and alkali

- 1.Place the polystyrene cup inside the glass beaker
- 2.Using a measuring cylinder, measure 25 cm³ of acid
- 3. Add to polystyrene cup.
- 4.Record the temperature of the acid using a thermometer.

5.Add 5cm3 of alkali to the polystyrene cup and record

the temperature obtained.

6.Repeat with 5cm³ of alkali until 40 cm3 of alkali has been added

IV: Volume of alkali

DV: Temperature of reaction mixture

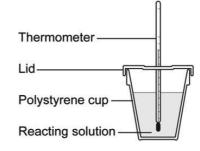

CV: Type of acid and alkali, volume of acid

To improve the accuracy

Use polystyrene cup Add a lid Repeat the experiment and calculate the mean ignoring anomalous results **Valid results:** Repeat 3 times, identify the anomalous results, calculate the mean

Reacting a solid with a solution, e.g. metal and solution

- 1.Place the polystyrene cup inside the glass beaker to make it more stable.
- 2. Using a measuring cylinder, measure 25 cm³ of copper sulfate solution
- 3.Place the solution in a polystyrene cup.
- 4.Record the temperature of the solution using a thermometer.
- 5. Using a balance, weigh out 1g zinc powder
- 6.Add the zinc powder and record the temperature.
- 7.Repeat steps 1-6 with different masses of zinc powder
- IV: Mass of metal
- DV: Temperature of reaction mixture
- CV: Concentration and volume of copper sulfate solution

45. Energy stores and systems

Energy System

System:

An object or group of objects. When a system changes there are changes in the way energy is stored within it.

Closed system:

Where neither matter nor energy enters or leaves.

Conservation of energy:

Energy is not created or destroyed but may be transferred between different energy stores.

The energy in a system can be transferred between different stores when work is done by:

- Heating
- Forces
- Current flowing

Energy Store	Example			
Thermal	Cup of hot tea			
Kinetic	Moving car			
Gravitational Potential	Water in a reservoir at the top of a mountain			
Elastic Potential	Stretched bungee cord			
Chemical	Battery, food			
Magnetic	Two opposing north poles on bar magnet			
Electrostatic	Two electrons repelling each other			
Nuclear	The energy available to be released by fission when splitting an atom			

46. Kinetic Energy and Elastic Potential Energy

Kinetic Energy

Kinetic energy of an object depends on the: - mass

- speed

Kinetic energy (J) = 0.5 x mass (kg) x velocity² (m/s)

E_k = 0.5mv²

Unit conversions: kJ to J: x 1000 g to kg: ÷ 1000

Elastic Potential Energy

A force acting on an object may cause the shape of an object to change.

Elastic objects can store elastic potential energy if they are stretched or squashed. For example, this happens when a catapult is used or a spring is stretched.

Objects can also store elastic potential energy when they are squashed.

Elastic potential energy (J) = 0.5 x spring constant (N/m) x extension² (m)

Unit conversions: kJ to J: x 1000 cm to m: ÷ 100

47. Work Done

A car braking to slow down

The friction force from the brakes does work. Energy is transferred from the car's kinetic store to the thermal store of its brakes, the brakes then transfer heat to the surroundings.

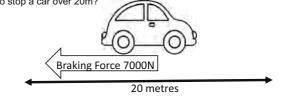

Energy transferred = work done

work done (J) = force (N) x distance (m)

W = Fs

Unit conversions: kJ to J: x 1000

cm to m: ÷ 100 km to m: x 1000 Example: How much work is done by the brakes if a 7000N braking force is used to stop a car over 20m?

Use the EVERY model to complete calculations:

- E = equation V = values
- E = enter results
- R = result
- Y = units

Е

V

Ē

R

Υ

- W = F x s F = 7000 N and s = 20 m W = 7000 x 20 W = 140 000
- J

W = 140000J or 140 kJ

48. Gravitational Potential Store (E_p)

Raising an object off the ground increases its gravitational potential energy store.

The amount of energy depends on the mass and height of the object and strength of the gravitational field it is in.

Gravitatic potential energy store (J)	onal = mass x (kg)	gravitational field x change in height (m) strength (N/kg)	E = enter R = result Y = units E	
31016 (0)			V	E _p m :
E _p = mgh			Ě	
			R	E _p E _p
Unit conv	versions:		Υ	J້
	x 1000			
cm to m:	÷ 100		E _p = 9810	10 J
km to m:	x 1000			
	. 1000			

÷ 1000 q to kg:

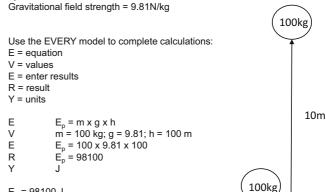

Note: weight = mass x gravitational field strength

W = m x g

Therefore, we have a second formula for E_n

 E_{D} = Weight x change in height

E_p = W x ⊿h

Example: What is the gravitational energy required to lift a 100 kg mass up

49. Specific Heat Capacity (c) and Power

The amount of energy needed to raise the temperature of 1 kg of a substance by 1 °C.

Change in	=	mass (kg) x	specific	х	change
thermal			heat		in
energy (J)			capacity		temperature
			(J/kg°C)		(°C)

 $\Delta E = mc\Delta T$

Unit conversions:

x 1000 kJ to J: g to kg: ÷ 1000

Example: How much energy is released into the surroundings when a cup of tea holding 250g of fluid cools from 90°C to 20°C? c = 4200 J/kg°C

Use the EVERY model to complete calculations:

E = equation

V = values

- E = enter results
- R = result

Y = units

- $\varDelta \mathsf{E} = \mathsf{m} \: \mathsf{x} \: \mathsf{c} \: \mathsf{x} \: \varDelta \theta$ Е V
- m = 250 g = 0.25 kg; c = 4200; $\Delta \theta$ = 90-20 = 70
- Е ⊿E = 0.25 x 4200 x 70 73 500
- R
- Υ J

⊿E = 73500J or 73.5 kJ

Power

by 100 m?

Power is the rate at which energy is transferred and is measured in watts

1 watt = 1 joule of energy transferred per second.

Power (W) = energy transferred (J) ÷ time (s)

Power (W) = work done (J) ÷ time (s)

P = E ÷ t

Unit conversions:

x 1000 kJ to J: minutes to seconds: x 60 x 3600 hours to seconds: W to kW: ÷1000

Example. Calculate the power of a motor that uses 60,000 J of energy to lift an object in 20 seconds. Give your answer in kW.

Е P = E ÷ t E = 60 000J; t = 20 s V Е P = 60 000 ÷ 20 3000 R Υ W

P = 3000W or 3kW

A more powerful device can transfer more energy in a given time or will transfer the same amount of energy in a faster time.

50. Conservation of Energy

Dissipation of energy	Wasting energy. More energy needs to be put into appliance to account for dissipated energy. Useful dissipation of energy example: back of a fridge Example of dissipation of energy is bad: light bulbs, engines and TV's as heat	
Conservation of energy	Energy can be transferred usefully, stored or dissipated, but it cannot be created or destroyed	
Heat	When an object is heated, thermal energy is being transferred to it	
Temperature	A measure of hot or cold something is	

Reducing Wasted Energy (dissipated energy)		
Friction	Between two moving objects causes thermal energy to be dissipated. It can be reduced by lubrication.	
Lubrication	 Friction between two moving objects causes energy to be dissipated as sound and to the thermal store. 	
Insulation	Reduces energy transfer by heating	
Cavity wall insulation	Fills the air gap between the inner and outer wall reducing heat loss by convection.	
Loft insulation	Reduces heat loss by convection.	
Double glazing	 Creates an air gap between the two panes of glass to reduce energy loss by conduction. Gases are good insulators 	
Draught excluders	Reduce energy loss by convection when placed around windows and doors.	

51. Efficiency

		Dissipated
Appliance	Useful Energy	(wasted) Energy
Light bulb	Light	 Heating the bulb and surroundings
Hair Dryer	Kinetic energy of the fan to push airHeating of the air	Sound of the motor.Heating of the dryer and surroundings
Electric Motor	 Kinetic energy of objects driven by motor. Gravitational potential energy of objects lifted by motor 	

Efficiency

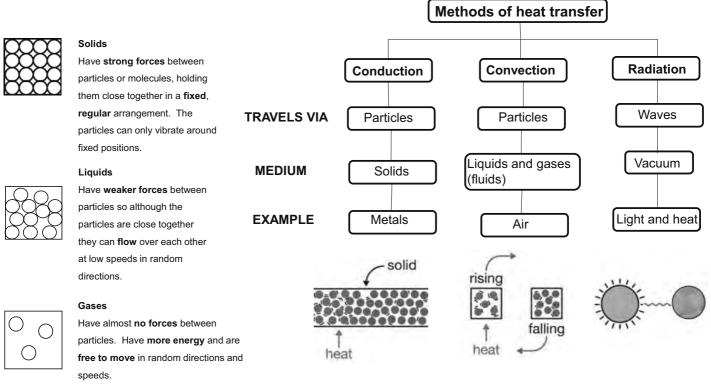

An efficient device wastes less energy than a less efficient device. It can be calculated as a decimal or multiplied by 100 to give a percentage.

Efficiency = <u>useful energy output</u> total energy output Efficiency = <u>useful power output</u> total power input

Example:. Calculate the wasted power and efficiency of a motor that has a rated power of 500W and transfers 300W usefully.

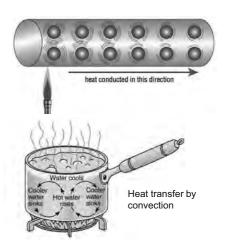

Wasted power = input power - output power = 500 - 300 = 200W

52. Methods of Heat Transfer Overview

53. Methods of Heat Transfer

Heat Transfer Method	Description
ConductionWhen heated particles vibrate more with an their kinetic energy.	
	They collide more with surrounding particles transferring the heat
Convection (Occurs in liquids and gases)	Particles are free to move (in a liquid and gas). Increase in their kinetic store. Particles move faster.
	The space between the particles increases, so the density decreases.
	The warmer less dense region rises and the cooler, denser regions sink.
Infrared Radiation (Occurs in all objects)	The hotter an object the more infrared radiation it emits in a given time.
	An object at constant temperature emits and absorbs infrared radiation at the same rate
	A perfect black body absorbs all the infrared radiation that falls upon it and then emits it back at the same rate as it absorbs it.

54. Non-Renewable Energy Resources

Renewable energy resources will never run out. It is an energy resource that can be replenished quickly.

Non-renewable resources will one day run out (fossil fuels). Fossil fuels are coal, oil and natural gas.

Energy Resource	Uses	Advantages	Disadvantages
Coal	Electricity generation, heating, steam trains in some countries	 Reliable energy resource Low extraction costs High energy per kg 	All fossil fuels are running out. Burning fossil fuels releases carbon dioxide a greenhouse gas which causes global warming. SO_2 found in coal leads to acid rain when burned.
Oil	Electricity generation, heating, basis for petrol and diesel	 Reliable energy resource Low extraction costs High energy per kg	Burning fossil fuels releases carbon dioxide a greenhouse gas which causes global warming.
Gas	Electricity generation, heating, cooking	 Reliable energy resource Gas fired power stations can be started quickly to meet changing energy demands 	Burning fossil fuels releases carbon dioxide a greenhouse gas which causes global warming.
Nuclear	Electricity generation Fuel: Uranium or plutonium	 Reliable energy resource It has the highest energy density per kg of any fuel. Does not require combustion and therefore does not release carbon dioxide into the atmosphere 	The waste products from nuclear plants is dangerous radioactive waste which needs to be stored safely for hundreds of years.

55. Renewable Energy Resources 1

Energy Resource	Uses	Advantages	Disadvantages
Solar Energy	 Heating domestic hot water. Photovoltaic cells can create electricity to charge batteries. Electricity generation in large scale solar power plants 	 No atmospheric pollution due to burning of fossil fuels In sunny countries it is more reliable (during the day) Useful for remote places not supplied by the national grid. No fuel costs and minimal running costs 	 Cannot increase supply to match demand High initial costs Unreliable
Wind Power	Electricity generation	 No atmospheric pollution due to burning of fossil fuels No fuel costs and minimal running costs No permanent damage to the landscape when removed. Fast start-up 	 Visual and noise pollution Cannot increase supply to match demand High initial costs Cannot generate electricity if there is too little wind Unreliable
Geothermal	Electricity generationHeating	 Reliable No atmospheric pollution due to burning of fossil fuels 	 Few suitable locations (only possible in volcanic areas) High cost to build power station
Bio-fuels	Electricity generationHeatingFuel for transport	 Carbon neutral (if plants are grown at the same rate as being burned). Reliable as crops grow quickly 	 High costs to refine the fuel Space for growing food taken up Forests cleared to make space – decay and burned vegetation release CO₂ and methane.

56. Renewable Energy Resources 2

Energy Resource	Uses	Advantages	Disadvantages
Hydro-Electric	Electricity generation	 Can respond immediately to increased demand, fast start-up. Reliable (except if there is a drought) No fuel costs and minimal running costs Potential to be used as part of pumped storage scheme 	 Requires land to be flooded to create a dammed reservoir Loss of animal habitats Relies on rainfall to keep reservoir full unless part of pumped storage system
Tidal barrage	Electricity generation	 No atmospheric pollution due to burning of fossil fuels No fuel costs and minimal running costs 	 Visual pollution Difficulty providing access for boats / wildlife Initial costs are high Environmental impact during building phase due to multiple vehicles and large amounts of concrete being used
Wave power	Electricity generation	 No atmospheric pollution due to burning of fossil fuels Smaller solution for limited populations 	UnreliableFew suitable locations

57. Wave properties

Mechanical Waves travel through a medium (substance). The particles oscillate (vibrate) and transfer energy. The particles do not travel along in the wave.

Frequency (f) - the number of complete waves that pass a point every second.

1 wave per second has a frequency of 1Hz (hertz).

Time period (T) - the time for a complete cycle of a single wave.

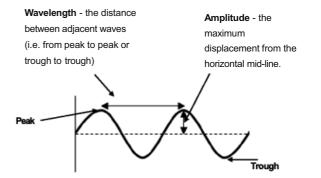

Frequency (Hz) = 1 ÷ time period (s)

F = 1 ÷ T

Example: What is the frequency for a wave with a time period of 0.2s

Е	f = 1 ÷ T
V	T = 0.2 s
E	f = 1 ÷ 0.2
R	5
Y	Hz

f = 5Hz

Wave speed (m/s) = frequency (Hz) x wavelength (m)

V=fλ

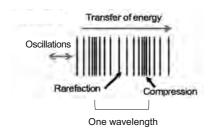

Example: How fast is a wave travelling which has a 3m wavelength and a frequency of 20Hz?

- E $V = f x \lambda$
- V f = 20 Hz; λ = 3 m
- E V = 20 x 3
- R V = 60
- Y m/s

58. Transverse and Longitudinal waves

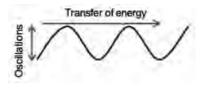

Longitudinal Waves

The **oscillations** (vibrations causing the wave are **parallel** to the direction of **energy transfer**.

Transverse Waves

The **oscillations** (vibrations causing the wave) are **perpendicular** (90°) to the direction of **energy transfer**.

Example: Light waves, X-rays and water waves (ripples) All electromagnetic waves

Compression: particles bunch up Rarefaction: particles spread out Example: Sound waves

59. Sound Waves and Speed of Sound experiment

Sound waves are mechanical longitudinal waves.

They need a medium to travel through.

The speed of sound can be calculated using:

Speed (m/s) = distance (m) ÷ time (s)

Unit conversions:

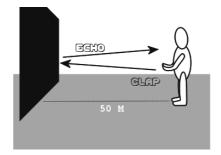

km to m:	x 1000
cm to m:	÷ 100
minutes to seconds:	x 60
hours to seconds:	x 3600

Speed of sound experiment

- 1. Measure the distance between the person and the wall using a metre ruler.
- 2. Double this distance.
- 3. Using a stop clock, measure the time taken from the clap being made to hearings it's echo.
- 4. Use the equation,
 - speed = distance ÷ time.

Bigger the amplitude – taller the wave – louder the sound Higher the frequency – more waves per second – higher pitch

60. Sound and Seismic waves

Human hearing can detect sound in the frequency range of 20Hz to 20,000Hz.

Ultrasound > 20kHz Infrasound < 20Hz

Ultrasound is used to detect the depth of the sea bed, where inclusions or other defects are found in solid metal and to image soft tissue in humans.

When ultrasound is used to measure the depth of an object, or the distance below a surface to a defect, the signal travels from the transducer to the object and is bounced back to the transducer. The total distance travelled by the sound is twice the depth of the object.

Depth of object (m) = 0.5 x speed of ultrasound (m/s) x time (s)

Seismic Wave type	Description	
Primary	 Causes the initial Earth tremor Longitudinal waves which push or pull on	
(P-waves)	material. Bend as they travel through the earth's mantle Refract at boundary between mantle and core Travels through solids and liquids	
Secondary (S-waves)	 Transverse waves that travel more slowly than P-waves Shake material from side-to-side. Bend as they travel through the Earth's mantle Cannot travel through liquid outer core Travels through solids only 	
Long	Arrive last and and cause violent movements on	
(L-waves)	the surface Only happen in the Earth's crust.	

60

61. Reflection, transmission and absorption of waves

Reflection

Angles are measured between the wave direction (ray) and a line at 90° to the mirror (boundary)

Normal = an imaginary line drawn at 90° to the surface

The angle of the wave approaching the boundary is called the angle of incidence (i)

The angle of the wave leaving the boundary is called the angle of reflection $\left(r\right)$

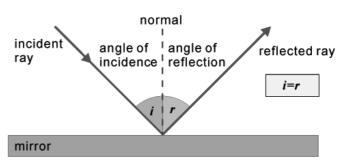

Angle of incidence (i) = Angle of reflection (r)

Absorption

Occurs when energy is transferred from the wave into the particles of a substance Sound waves are absorbed by brick or concrete in houses

Light will be absorbed if the frequency of light matches the energy levels of the electrons

If an object appears red, only red light has been reflected. All the other frequencies of visible light have been absorbed

Transmission

Transmission occurs when a wave passes through a substance The more transparent the material, the more light will pass through For the process to count as transmission, the wave must pass through the material and emerge from the other side

When passing through a material, waves are usually partially absorbed The transmitted wave may have a lower amplitude because of some absorption

For example, sound waves are quieter after they pass through a wall

62. Refraction of waves

Refraction

Waves change speed when they cross a **boundary** between two materials of different density or a boundary of different depths.

Refraction of Light ray

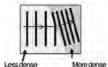

If the wave enters a medium of higher **density** at an **angle** the ray bends towards the normal (see diagram).

If it enters a medium **along the normal** then the wave does not change direction but the **wavelength** and **speed decrease**.

(waves closer together on diagram below but have not changed direction)

Wave Front Diagrams

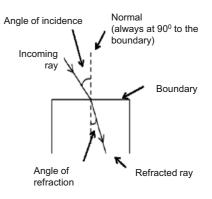

The part of the wave front that enters the more dense medium first, slows down as the rest of the wave front continues at the same speed but has to travel further. The difference in distance and speed causes the wave to refract. A wave travelling from deep to shallow water also refracts.

Change in speed but no change in direction as wave entered **along the normal**

vater Shallow water

62

63. Space

Keyword	Description	
Asteroid	A lump of rock (may or may not be orbiting anything)	
Comet	A ball of ice, dust and gas orbiting a star in an elliptical orbit	
Galaxy	A group of billions of stars. Earth is in the Milky Way galaxy	
Meteor	A small piece of rocky matter entering Earth's atmosphere from space	
Moon	A sphere of rock orbiting a planet	
Planet	A sphere of rock or gas orbiting a star	
Red Shift	Objects which are moving away from us are said to be red shifted because the wavelengths of light from these objects is shifted towards the red end of the spectrum. Hubble determined that the most distant galaxies are those most red shifted, meaning they are accelerating away	
	from us. This supports the big bang theory.	
Satellite	An object which orbits another. Natural (moon) or man-made (space station). They travel at a constant speed. Their orbit is determined by their speed.	
Star	A sphere of (mainly) hydrogen carrying out nuclear fusion, producing heat and light	
Universe	Everything that exists. Contains billions of galaxies	

64. Star formation

Process of star formation: nuclear fusion

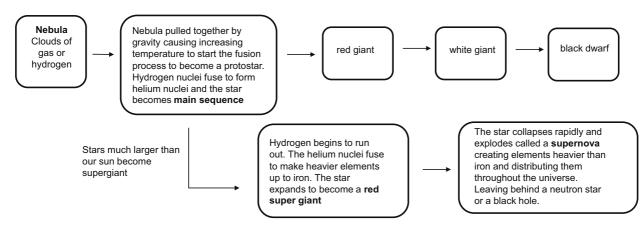

Main fuel source: Hydrogen

The Sun is a stable star. This is because the forces pulling inwards caused by gravity are in equilibrium with the forces pushing outwards caused by the energy released by nuclear fusion.

Range of wavelengths of a star depend on the temperature of the star.

A light year is the distance that light travels in a year

The life cycle of a star

65. Creation of the Universe

Much is still unknown about the universe and galaxies spin faster than they should based on the amount of mass in them. Scientist think that the missing mass is made up of something they have named **dark matter**.

The universe is not only expanding but accelerating in its expansion. Scientists think that **dark energy** is responsible for this acceleration but like **dark matter** they have no idea what **dark energy** is.

The universe could either end in a **big crunch** where the rapid expansion stops and a rapid contraction occurs or it could expand for ever in what is called the **big yawn**.

Mid 20 th Century theories for the creation of the universe	Key points
Stay State Theory	Universe expands with a constant density, white holes leak matter into the universe to maintain the density as volume increases. Dropped after the discovery of cosmic microwave background radiation (CMBR)
Big Bang Theory	Universe expanded from an extremely small, hot, dense region creating space, time and matter

66. Required practical 1: Specific Heat Capacity

Method

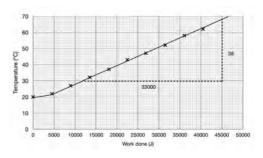

- 1. Take a 1 kg block of copper.
- 2. Place an immersion heater in the larger hole in the block.
- 3. Connect the power supply to the joule meter (reset to read 0 Joules).
- 4. Connect the joule meter to the 12V immersion heater.
- 5. Place the thermometer into the other hole in the block.
- 6. Switch the power pack to 12 V. Turn it on.
- 7. After 1-minute record the temperature of the block and the reading from the joule meter.
- 8. Continue taking readings every minute until 10 minutes have passed.
- IV Work done (energy transferred to block measured by joulemeter)
- DV temperature
- $\ensuremath{\text{CV}}\xspace$ Copper block of 1kg mass

Sources of Error

Heat is lost to the surroundings due to lack of insulation The immersion heater is not fully immersed into the block The graph may be curved at the start because it takes time for the heater and block to transfer the energy

Processing data

Plot graph work done against temperature Specific heat capacity = 1 ÷ gradient

67. Required Practical 2: Thermal Insulation

Method

- 1. Pour 200 cm^3 of hot water into a 250 ml beaker with a
- single layer of insulating material around it.
- 2. Use a piece of cardboard as a lid for the beaker.

3. Insert the thermometer through the hole in the cardboard lid

4. Record the temperature of the water and start the stopwatch.

5. Record the temperature of the water every 30 seconds for 5 minutes.

6. Repeat steps **1–5** increasing the number of layers of insulating material wrapped around the beaker until you

reach 4 layers.

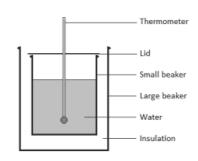

7. Repeat the experiment with no insulation around the beaker.

7. Plot a graph of temperature versus time.

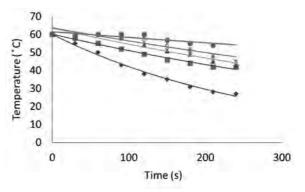

$\text{IV}-\text{Time}\ (\text{s})$

DV – Temperature change

CV - Volume of water, material of insulation, starting temperature.

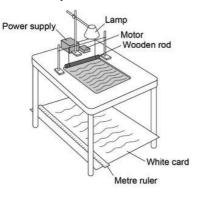

The more layers of insulation the longer it takes for the temperature to drop, indicating a better insulator.

68. Required practical 3: Speed of water waves

- 1. Set up the ripple tank as shown in the diagram.
- Make sure that there is a large sheet of white card or paper on the floor under the tank.
- 3. Pour water to a depth of about 5 mm into the tank.
- 4. Adjust the height of the wooden rod so that it just touches the surface of the water.
- 5. Switch on the overhead lamp and the electric motor.
- Adjust the speed of the motor to produce low frequency water waves.
- Adjust the height of the lamp so that the pattern of the waves can be clearly seen on the white card.

How to find the <u>frequency</u> of a wave using a ripple tank: count the number of ripples that pass a point in 10 seconds. Divide the number of waves by 10.

How to measure the <u>wavelength</u>: measure the distance across 10 gaps between the shadow lines. Divide this distance by 10.

How to calculate the speed of the wave

Wave speed (m/s) = frequency (Hz) x wavelength (m)

How to improve the method of calculating the wavelength: Take a photo of the shadows and the ruler. Benefit is that the waves are not being disturbed.

Reasons for using a:

Lamp: create shadows of the ripples

Metre ruler: measure the distance between 10 waves.

Signal generator: The vibration generator can have a built in signal generator so that you can directly set the frequency of paddle oscillation i.e. frequency of the ripple waves.

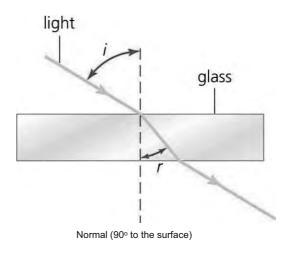

Deeper water means longer wavelength because velocity increases and frequency is constant 68

69. Required practical 4: Refraction of light

- 1. Place a glass block on a piece of paper
- 2. Draw around the glass block and then remove from the paper
- 3. Draw a line at 90° to one side of the block (the normal)
- 4. Use a protractor to measure and then draw a line at an angle of 20° to the normal
- 5. Replace the glass block
- 6. Using a ray box and slit point the ray of light down the drawn line
- 7. Mark the ray of light emerging from the block
- 8. Remove the block and draw in the refracted ray
- 9. Measure the angle of refraction with a protractor
- 10. Repeat the procedure for a range of values of the angle of incidence

Source of inaccuracy: The width of the light ray

Reason for inaccuracy: Makes it difficult to judge where the centre of the ray causes a large uncertainty

70. Maths in Science 1

Anomalous result	A number that does not fit the pattern
Mean	Adding up a list of numbers and dividing by how many numbers are in the list. Exclude the anomalous result.
Median	The middle value when a list of numbers is put in order from smallest to largest
Mode	The most common value in a list of numbers. If two values are tied then there are two modes. If more than two values are tied then there is no mode.
Range	The largest number take away the smallest value in a set of data or written as X-Y.
Uncertainty	range ÷ 2
Surface area of a cube	(area of 1 side) x 6 sides
Volume of a cube	Width x height x depth
Area of a circle	∏ x (radius)²

CONTENTS

Page 3	Tone, Shape & Form
Page 3	Pattern, Line & Texture

Page 4 Colour

THE FORMAL ELEMENTS

TONE

Tone describes the lightness or darkness of a surface.

A gradient is a series of tonal values from light to dark.

Tone can help to provide a form with value to give a sense of volume to a flat surface.

ADJECTIVESTO DESCRIBE TONE			
Dark	Highlights		
Light	Shadows		
Mid tone	Shading		
Grey	Blending		
Blend	Graduated		

SHAPE

Shape is an area enclosed by a line. It can be 2-dimensional and can be geometric or organic.

ADJECTIVES TO DESCRIBE SHAPE

CircularIrregularSquareStylizedRectangularOrganicTriangularGeometricMisshapedContour

FORM

Forms are 3-dimensional shapes. They occupy space (like sculptures) or give the illusion that they occupy space (drawing).

WORDS TO DESCRIBE FORM			
Angular	Curvaceous		
Twisted	Solid		
Bulbous	Malformed		
Tapered	Rounded		
Contours	Negative space		

THE FORMAL ELEMENTS

PATTERN

Pattern is a design that is created by repeating a formal element. It can be natural, like the stripes of a zebra, or man made, like a design on fabric. The image repeated is called a **motif**. These can be simple shapes or more complicated arrangements.

ADJECTIVES TO DESCRIBE PATTERN

Regular	Motif
Irregular	Repetition
Symmetrical	Radial
Tessellating	Tiered
Organic	Even

LINE

Line is a mark left by a moving point e.g. a pencil, or paint on a paintbrush. It can take many forms e.g. horizontal, diagonal, or

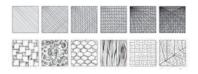

Marks can be repeated and used to create patterns in order to give tone and texture to your drawing.

ADJECTIVESTO DESCRIBE LINE					
Broken	Graphical	Hesitant			
Flowing	Angular	Scribbled			
Moving	Geometric	Wavy			
Woolly	Confident	Organic			
Tight	Faint	Heavy			
Woolly		0			

TEXTURE

Texture is the surface quality of an object. Texture can be real or implied. **Real texture** can be felt e.g. tree bark, whereas **implied texture** creates the look of texture on a flat surface e.g. a drawing or a painting.

WORDS TO DESCRIBE TEXTURE

Texture	Impasto	Hatching
Smooth	Fine	Rough
Tactile	Uneven	Shiny
Jagged	Frosted	Soft
Coarse	Silky	Stippled

THE FORMAL ELEMENTS

COLOUR

To see colour, you have to have light. When light shines on an object some colours bounce off the object and others are absorbed by it. Our eyes only see the colours that are bounced off or reflected.

Primary Colours

All colours can be obtained by mixing primary colours together. Primary colours cannot be created by mixing other colours.

A colour mixed from a primary colour and a secondary colour

Harmonious Colours are 3 colours next to each other on the colour wheel

Complimentary Colours are colours opposite each other on the colour wheel

The colour wheel can be split up into **warm** and **cool** colours, and each individual colour has it's own warm and cool variant

ADJECTIVES TO DESCRIBE COLOUR			
Opaque	Luminous	Pale	
Translucent	Bright	Pastel	
Transparent	Saturated	Soft	
Contrasting	Vibrant	Muted	
Harmonious	Vivid	Deep	
Complementary	Brilliance	Dull	
Cool	Harsh	Hue	
Warm	Neutral	Tint	

DESIGN PRINCIPLES

CONTENTS

Page 7	Unity/Variety, Balance & Contras		
Page 8	Scale/Proportion, Repetition & Emphasis		

THE DESIGN PRINCIPLES

UNITY & VARIETY

Unity is how well the elements of a design work together. Each element should have a clear visual relationship with each other element to help communicate a clear, concise message.

Unity = Same colour Unity = Same size Variety = Different sizes Variety = Different colours

BALANCE

Balance can be symmetrical (with items of equal weight on either side of the centre line) or asymmetrical (with items of different weights laid out in relation to a line that may or may not be centred)

Balance = Symmetrical Balance = Asymmetrical

	in shap	е
3.7	E S	

*

CONTRAST

stad out from each other.

in colour in scale

Contrast

Contrast is the difference between various

elements within a design, that makes them

Contrast in layout

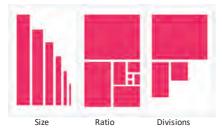

Contrast

THE DESIGN PRINCIPLES

SCALE/PROPORTION

Proportion is the size of the elements in relation to one another. Larger elements tend to be seen as more important while smaller ones are seen as less so.

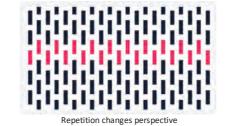

REPETITION

Repetition reinforces an idea or perception. It can be achieved by repeating the same colours, shapes, images, objects, mark making techniques, and so forth.

EMPHASIS

Emphasis causes a certain part of a design to stand out compared to other elements. Conversely, it can also be used to minimise how much an element stands out.

Creating a focal point

WRITING ABOUT ART

CONTENTS

Page 10	Writing About Art - Knowledge		
Page 11	Writing About Art - Understanding		
Page 12	Writing About Art – Beyond & Bigger Picture		
Page 13	Writing About Art – Sentence Starters		
Page 14	Writing About Art - Vocabulary		

ART & DESIGN – WRITING ABOUT ART – KNOWLEDGE

KNOWLEDGE

What is the artist's name? Where/when were they born? (this is important to put the work in context) What do you know about the artist's background? (Life events/education/career) When was the work created? What is their style of work? What does the artwork show? Is the artwork part of a series? Is there a theme? What is the theme about? (this could be researched or your own opinion)

EXAMPLE

Dutch Impressionist painter, Vincent Van Gogh was born on March 30th, 1893, in Zundert, a predominantly Catholic province of North Brabant in the Netherlands. Van Gogh created about 2,100 artworks, most of which date from the last two years of his life. They include landscapes, stilllifes, portraits and self-portraits, and are characterised by bold colours and dramatic, impulsive and expressive brushwork that contributed to the foundations of modern art. He was not commercially successful, and his suicide at 37 came after years of mental illness, depression and poverty.

The painting 'Starry Night' is one of the most recognized pieces of art in the world. Vincent van Gogh painted Starry Night in 1889 during his stay at the asylum of Saint-Paul-de-Mausole near Saint-Rémy-de-Provence. When in a state of depression Van Gogh incorporated darker colours and Starry Night is a wonderful example of this. Blue dominates the painting, blending hills into the sky. The small village lays at the base in the painting in browns, greys, and blues. Even though each building is clearly outlined in black, the yellow and white of the stars and the moon stand out against the sky, drawing the eyes to the sky.

ART & DESIGN – WRITING ABOUT ART – UNDERSTANDING

UNDERSTANDING

What is the main focus/where is your eye drawn to? What formal elements have they used and how? Line, Colour, Shape, Form, Texture, Pattern, Tone... How would you describe the composition? If they have used people in their artwork, can you read any body or facial language? How has the artist achieved the meaning, concept or message in the image? What techniques has the artist used to create the meaning/concept or message? What are your opinions of the work and why? How does the piece of work make you feel?

EXAMPLE

The stars in the sky are the big attention grabber of the painting; the brightness of them, the swirling brushstrokes and the contrast between them and the blue-sky help make them stand out. It could be that Van Gogh simply wanted to breathe in the higher power into his art, as he grew up in areligious household, they could also represent hope. The village is painted with dark colours, but the brightly lit windows create a sense of comfort. The village is peaceful in comparison to the dramatic night sky and the silence of the night can almost be felt in Starry Night. Vince Van Gogh's unique, thick brush strokes are very much obvious and it's possible that his severe attacks further dramatized his brush work, this technique that adds even more depth as well as a rich texture to this work of art. The steeple dominates the village and symbolizes unity in the town. In terms of composition, the church steeple gives an impression of size and isolation. You cannot ignore the huge, curvy Cyprus tree positioned to the left in the foreground of the painting, Cyprus tress are typically associated with mourning. Personally, I believe that Van Gogh was showing that even with a dark night such as this it is still possible to see light in the windows of the houses. Furthermore, with shining stars filling the sky, there is always light to guide you. This is one of my favourite paintings by Van Gogh, I find the blues calming and the sky transfixes me.

ART & DESIGN - WRITING ABOUT ART - BEYOND & THE BIG QUESTION

BEYOND

What viewpoint has the artist used? Are there any back stories as to how the work was made? Does the artwork have depth or is it shallow? What materials do you think they have used? Can you think of any other materials they could have used? What skills will you develop looking at this artist? Could you approach the work using different techniques? How could you experiment with the artists ideas further?

THE BIG QUESTION

How will you be influenced by this artists work when planning your own artwork?

EXAMPLE

Van Gogh painted The Starry Night during his stay at the Saint-Paul-de-Mausole asylum near Saint-Rémy-de-Provence in France, several months after suffering a breakdown. This painting is based on the view from his window, it appears that his room could have been high up or that the æylum was on a hill. Van Gogh was not allowed to paint in his room, so he created sketches of the view and used these alongside his memory. There is a great deal d depth to this painting, Van Gogh has achieved this by including the foreground, middle ground and the background. There is also depth and texture within the paint that Van Gogh has used, to achieve this he loaded his brush with oil paints to build up a thick, impasto texture. This impasto texture is a key feature in many of van Gogh's works. By creating work in response to Van Gogh I will develop my understanding of mark making, and colour, I will also develop my painting and drawing skills, and I think it will also provide me with the opportunity to be more expressive within my work. When planning my own work I will consider exaggerating certain elements like colour and perspective, if I paint light within my work I could use a strong colour contrast, like yellow and orange against blue. I could also use directional brushwork to create a sense of movement and turbulence in my painting and finally, I will consider repeating similar techniques and processes within my work, so that I can achieve a strong style.

ART & DESIGN – WRITING ABOUT ART – SENTENCE STARTERS

KNOWLEDGE

The artist... was born in... Their parents were... They studied at... Events that may have influenced... They are/were influenced by... They are/were influenced by... The painting is called... It was completed in the year... The work portrays... This style of... is called... Looking at this piece of work... This painting is/isn't part of a series called... When first looking at the painting I thought... In the painting I can see the following: ... The subject of the painting is... To me the artwork looks like...

UNDERSTANDING

My eye is initially drawn to..... Because... In the piece the artist has created a... texture... by... The colours used can be described as... I can see the following shapes and forms... There is limited use of... this suggests... The artist uses space to create a feeling of... The composition of the image suggests... The composition style conveys... The objects/people/scene looks... because the artist has... The artist's use of... suggests... I think he/she has done this to convey... In my opinion... It is in my view that... This piece of artwork makes me feel...

These sentence starters can be used to help you form your artist research and analysis. You might not always be able to find the answer to all of the questions through research, some of the question require your thoughts and opinions. Always write in full sentences and evidence your thoughts and opinions.

BEYOND

YEAR 9 - IDENTITY

BRIEF OVERVIEW OF TOPIC

In this project you will explore the theme identity.

You will begin by learning how to create portraits using various drawing techniques using pencil, pen, and colouring pencils.

You will focus on developing skills in representing tone, facial features and proportion.

You will also develop skills using paint, collage, photography and mixed media.

You will explore and analyse the work of a range of artists who use identity as inspiration for their art work, and then you will compose and create your own response showing an influence of their styles and techniques.

We will explore our own identities in order to produce our own individual pieces of work

ARTISTS WHO EXPLORE THE THEME IDENTITY

YEAR 9 - INDENTITY

KEYWORDS	DEFINITIONS	
Portrait	A portrait is a representation of a particular person. A self- portrait is a portrait of the artist by the artist.	
Identity	Who you are, the way you think about yourself, the way you are viewed by the world and the characteristics that define you.	
Personality	The combination of characteristics or qualities that form an individual's distinctive character.	
Citizenship	The position or status of being a citizen of a particular country.	
Ethnicity	The fact or state of belonging to a social group that has a common national or cultural tradition.	
Nationality	The status of belonging to a particular nation. The nationality of a person is the place of birth; basically, it's an ethnic and racial concept.	
Culture	The ideas, customs, and social behaviour of a particular people or society.	

KEYWORDS	DEFINITIONS		
Heritage	Heritage is a person's unique, inherited sense of family identity: the values, traditions, culture, and artifacts handed down by previous generations		
Ancestor	a person, typically one more remote than a grandparent, from whom one is descended.		
Individuality	The quality or character of a particular person or thing that distinguishes them from others of the same kind, especially when strongly marked.		
Characteristic	A feature or quality belonging typically to a person, and serves to identify them, this could be a physical or non physical attribute.		
Features	A distinctive attribute or aspect of something.		
Expression	A look on someone's face that conveys a particular emotion		
Proportion	Proportion refers to the dimensions of a composition and relationships between height, width and depth.		

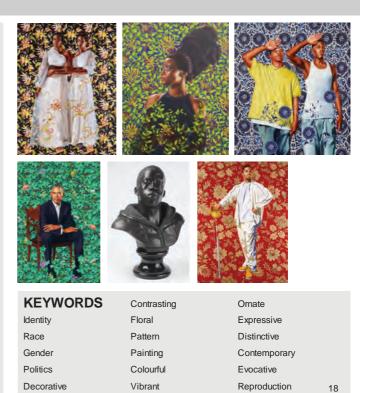

YEAR 9 - IDENTITY - KEHINDE WILEY

KEHINDE WILEY

Kehinde Wiley is a painter best known for his naturalistic portraits of African American men in heroic poses. Born in Los Angeles, CA, he earned his BFA from the San Francisco Art Institute and his MFA from the Yale University School of Art. Wiley was the first black artist to paint an official portrait of the president.

Kehinde Wiley's series 'A New Republic', raises questions about race, gender, and the politics of representation by portraying contemporary African American men and women using the conventions of traditional European portraiture.

Wiley's portraits of everyday men and women are based on specific paintings by Old Masters, replacing the European aristocrats depicted in those paintings with contemporary black subjects, drawing attention to the absence of African Americans from historical and cultural narratives. The subjects in Wiley's paintings often wear sneakers, hoodies, and baseball caps, gear associated with hip-hop culture, and are set against contrasting ornate decorative backgrounds that evoke earlier eras and a range of cultures. Through the process of "street casting," Wiley invites individuals, often strangers he encounters on the street, to sit for portraits. In this collaborative process, the model chooses a reproduction of a painting from a book and re-enacts the pose of the painting's figure. By inviting the subjects to select a work of art, Wiley gives them a measure of control over the way they're portrayed.

YEAR 9 - IDENTITY - ED FAIRBURN

ED FAIRBURN

Born November 15th 1989 in Southampton, England, Ed Fairburn graduated from Cardiff School of Art and Design in 2012. Ed Fairburn creates commissioned work, for both private and commercial clients.

In an age of smartphones, the art of reading a map is slowly being forgotten, but the Dorset-based artist reimagines maps, blueprints and star charts as canvases for his detailed portraits.

Ed Fairburn manipulates paper maps to construct other forms, usually portraiture. He calls this process topopointillism; a direct combination of topography and pointillism. Using traditional materials such as ink, paint and pencil, he makes gradual changes to the contours, roads and other patterns found in cartography. These changes allow him to tease out the human form, resulting in a comfortable coexistence of figure and landscape. He aims to preserve the functionality of each map by feeding the composition instead of fighting it – He often spend hours studying the terrain before he begins any physical processes.

Ed Fairburn is interested in the degree of subtlety behind each synchronisation, and the way in which a completed map behaves more like a portrait when viewed from further away – it's almost paradoxical that a portrait should lose detail when examined closely.

YEAR 9 - CONFLICT

BRIEF OVERVIEW OF TOPIC

In this project you will begin by exploring the theme conflict. We will look at various types of conflict, past and present, and look at how artists have responded.

You will conduct research and create a mind map, before beginning to study a variety of documentary photographers images. We will explore a current conflict and consider ways in which we can respond to it as artists, we will look at how we can convey messages within our work by applying various artists techniques.

You will work in a range of media to present your own ideas and responses that conveys a meaningful message.

You will learn a variety of drawing techniques, as well as collage, stencilling and painting techniques. You will also explore the art of contrast and juxtaposition of objects, imagery and materials.

YEAR 9 - CONFLICT - GUY CATLING

GUY CATLING

Guy Catling is a graphic designer from the UK. He works with a variety of different mediums, including collage, photography, fashion and illustration. He has always had an interest in creating from a very young age and through many years of trial and error, he feels that he has established a style that is organic and from the heart. His clients vary from Urban Outfitters to Liberty of London.

Studying at University enabled him to gain a BA Hons in Graphic Design, which helped him to refine his skills and develop new interests in a variety of styles. This experience provided the foundations from which he built upon as a creative designer.

Guy Catlings workflow is heavily influenced by what he draws from his surroundings, which is how his style has evolved into what it is today. Whether he's immersed in architecture, the natural environment, pop culture, music or fashion, he is always observing, reflecting and growing as a designer. In particular, he finds nature and pattern a fascinating source of inspiration. Commenting on issues like war, terrorism and male dominance, Catling gives these photos a brighter, more cheerful take on their content and their history. With their floral appearance, these botches freshen up the images and their characters and add a lot of fun in them. The hippie notion of replacing guns with flowers is the main theme of these photos, in which the added details make even the shadiest character look like a lovely person.

YEAR 9 - CONFLICT - SHEPARD FAIREY

SHEPARD FAIREY

Shepard Fairey is an American graphic artist and social activist who is part of the Street Art movement along with other artists including **Banksy** and **Mr.Brainwash**.

Fairey blurs the boundary between traditional and commercial art through type and image, communicating his brand of social critique via prints, murals, stickers, and posters in public spaces. "Art is not always meant to be decorative or soothing, in fact, it can create uncomfortable conversations and stimulate uncomfortable emotions," he stated. Born on February 15, 1970 in Charleston, South Carolina, Fairey graduated from the Rhode Island School of Design in 1992 where he earned his Bachelor of Arts in illustration. In 1989 Fairey created the André the Giant Has a Posse sticker campaign, featuring a stylized image of the wrestler André the Giant. This project was the foundation for his seminal Obey series, which helped to push Fairey into the public spotlight. The artist is perhaps best known for his Hope (2008) campaign, which portrays a portrait of then-presidential candidate Barack Obama, in red, white, and blue. In 2017, the artist created a series of three posters- featuring portraits of culturally diverse women, again using a red, white, and blue colour scheme-in response to the xenophobic rhetoric of President-elect Donald Trump. Fairey currently lives and works in Los Angeles, CA. His works are included in the collections of the Smithsonian in Washington, D.C., the Los Angeles County Museum of Art, and the Victoria and Albert Museum in London.

and Black 1944

SURREALISM IN DETAIL

Unlike other creative movements, which can be characterized by themes of imagery, colour choices, or techniques, defining Surrealist art is slightly harder to do.

Surrealist artists seek to explore the unconscious mind as a way of creating art, resulting in dreamlike, sometimes bizarre imagery across endless mediums. The core of Surrealism is a focus on illustrating the mind's deepest thoughts automatically when they surface. This thought process for creating art known as "automatism." Many surrealist artists used automatic drawing or writing to unlock ideas and images from their unconscious minds, and others sought to depict dream worlds or hidden psychological tensions.

Over the years, Surrealism has resulted in a fascinating collection of artwork ranging from mythical landscapes, to obscure sculpture arrangements, to intriguing depictions of people and animals.

While 'surreal' is often used loosely to mean simply 'strange' or 'dreamlike', it is not to be confused with 'surrealist' which describes a substantial connection with the philosophy and manifestations of the surrealist movement.

27

ART HISTORY – SURREALISM

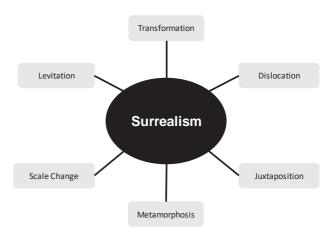

WHAT INSPIRED THE SURREALIST STYLE?

The poet Guilliame Apollinaire first devised the term "Surreal" in reference to the idea of an independent reality, existing "beneath" our conscious reality.

But the Surrealist movement initially surfaced in 1924 when French poet André Breton published his "Manifesto of Surrealism," influenced by the theories and writings on the unconscious mind by psychologist Sigmund Freud, the groundbreaking studies of Carl Jung, and the early 20th-century Dada movement.

While Surrealism started as a literary movement in the prose and poetry of Breton and others, visual artists such as Giorgio de Chirico, Pablo Picasso, Francis Picabia, and Marcel Duchamp embraced Surrealism and were recognized in Breton's 1925 publication, "La Révolution Surréaliste." Early Surrealists challenged the constraints of consciousness and rationality in order to liberate the unconscious mind-a "superior reality."

Throughout the 1920s, visual artists continued exploring Surrealist concepts in art, seeking complete creative freedom. The first-ever Surrealism exhibition, titled "La Peinture Surrealiste," took place in 1925 at the Galerie Pierre in Paris, firmly establishing the visual component of the movement.

ART HISTORY – SURREALISM

KEYWORDS	DEFINITIONS	KEYWORDS	DEFINITIONS
Surrealism	a 20th-century avant-garde movement in art and literature which sought to release the creative potential of the unconscious mind	Transformation	When someone or something changes in form or shape or appearance. Turning something familiar to unusual or strange.
In visual arts, juxtaposition involves making the ordinary look extraordinary and represents one of the essential Juxtaposition techniques in the Surrealism art movement. It is the	Dislocation	Placing a familiar object into an unfamiliar setting. You would not expect to find a lobster sitting on a phone. Dislocation is often used with scale change.	
	placement of objects side by side that wouldn't ordinarily be together. The conscious mind involves all of the things that you	Exquisite Corpse	a collaborative drawing approach first used by surrealist artists to create bizarre and intuitive drawings

Your awareness of yourself and the world around you are part of your consciousness. The unconscious mind (or the unconscious) consists of the processes in the mind which occur automatically and are not available to introspection and include thought processes, memories, interests and motivations.	Collaboration	A position or perspective from which something is seen.
		Metamorphosis	When someone or something changes completely in form or state.
		Levitation	An object appears to float or fly that could not in real life
		Scale Change	Drastically altering an objects scale to intrigue or mystify us rather than to clarify the focal point.

SALVADOR DALI 11 May 1904 - 23 January 23 1989

Salvador Dali was born in Figueres, Spain on May 11, 1904. Growing up he enjoyed drawing and he often got into trouble for daydreaming in school. Salvador began drawing and painting while he was still young. He painted outdoor scenes such as sailboats and houses. He also painted portraits. Even as a teenager he experimented with modern painting styles such as Impressionism. When he turned seventeen he moved to Madrid, Spain to study at the Academy of Fine Arts. Dali lived a wild life while at the academy. He hung out with a radical group of artists and got into trouble often. When he was close to graduation he was expelled for causing problems with the teachers. Not long after that, he was imprisoned for a short time for supposedly opposing the dictatorship of Spain.

Salvador continued to experiment and study different kinds of art. He explored classic art, Cubism, Dadaism, and other avant-garde painters. Eventually he became interested in Surrealism through artists such as Rene Magritte and Joan Miro. From this point he would concentrate much of his work on Surrealism and become one of the preeminent artists of the Surrealist movement. In 1931 Salvador Dali painted what would become his most famous painting and perhaps the most famous painting of the Surrealist movement. It is titled The Persistence of Memory. The scene is a normal looking desert landscape, but it is covered with melting watches.

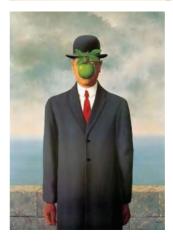

ART HISTORY – SURREALISM – RENÉ MAGRITTE

RENÉ MAGRITTE 21 November 1898 – 15 August 1967

A Belgian surrealist painter, born in Lessines, Rene Magritte's witty and thoughtprovoking paintings sought to have viewers question their perceptions of reality, and become hypersensitive to the world around them. When Magritte was young his mother was suicidal, this led to Magritte's father locking her up in her room. One day, she escaped, and she was sadly found dead, having drowned herself. According to legend, 13 year old Magritte was there when they retrieved the body, and as she was pulled from the water, her dress covered her face. This later became a theme in many of Magritte's paintings in the 1920's, portraying people with cloth covering their faces. He went to study a the Royal Academy of Fine Arts in Brussels. He did not begin his actual painting career until after serving in the Belgian infantry. Magritte made a living producing advertisement posters, as well as creating forgeries of Picasso, Braque and Chirico paintings. His experience with forgeries also allowed him to create false bank notes during the German occupation of Belgium in World War II, helping him to survive the lean economic times. Through creating common images and placing them in extreme contexts, Magritte sough to have his viewers question the ability of art to truly represent an object. In his paintings, he often played with the perception of an image and the fact that the painting of the image could never actually be the object. His artistic interpretations influenced many modern artists, including Andy Warhol, Jan Verdoodt and Jasper Johns. His art, which was especially popular during the 1960's, has also influenced numerous songs, movies, and books.

Ceci n'est pas une pipe.

ART HISTORY – SURREALISM – GIORGIO DE CHIRICO

GIORGIO DE CHIRICO 10 July 1888 - 20 November 1978

Giorgio de Chirico was born in Volos, Greece to Italian parents. His father was an engineer working on the construction of the Greek railway system and his mother was a noblewoman of Genoese origin. His parents encouraged his artistic development, and from a young age he took a strong interest in Greek mythology. Giorgio de Chirico was a pioneer in the revival of Classicism that flourished into a Europe-wide phenomenon in the 1920s. His own interest was likely encouraged by his childhood experiences of being raised in Greece by Italian parents. And, while living in Paris in the 1910s, his homesickness may have led to the mysterious, classically-inspired pictures of empty town squares for which he is best known. It was work in this style that encouraged him to form the short-lived Metaphysical Painting movement, along with the painter Carlo Carrà. His work in this mode attracted considerable notice, particularly in France, where the Surrealists championed him as a precursor. But de Chirico was instinctively more conservative than the Paris avant-garde, and in the 1920s his style began to embrace qualities of Renaissance and Baroque art, a move that soon drew criticism from his old supporters. For many years afterwards, the Surrealists' disapproval of his late work shaped the attitude of critics. The artist's reputation was also not helped by his later habits of creating new versions of his Metaphysical paintings and of backdating his work, as if those pictures had been created back in the 1910s. In recent years, however, his work of that period has attracted more interest, and it was certainly influential on a new generation of Italian painters in the 1980s.

ART HISTORY – POP ART

Pop art is an art movement that emerged in the 1950s and flourished in the 1960s in America and Britain, drawing inspiration from sources in popular and commercial culture. Different cultures and countries contributed to the movement during the 1960s and 70s

POP ART IN DETAIL

Emerging in the mid 1950s in Britain and late 1950s in America, pop art reached its peak in the 1960s. It began as a revolt against the dominant approaches to art and culture and traditional views on what art should be. Young artists felt that what they were taught at art school and what they saw in museums did not have anything to do with their lives or the things they saw around them every day. Instead they turned to sources such as Hollywood movies, advertising, product packaging, pop music and comic books for their imagery. Modernist critics were horrified by the pop artists' use of such 'low' subject matter and by their apparently uncritical treatment of it. In fact pop both took art into new areas of subject matter and developed new ways of presenting it in art and can be seen as one of the first manifestations of postmodernism.

AMERICAN POP VS. BRITISH POP

Although they were inspired by similar subject matter, British pop is often seen as distinctive from American pop. Early Pop Art in Britain was fuelled by American popular culture viewed from a distance, while the American artists were inspired by what they saw and experienced living within that culture. In Britain, the movement was more academic in its approach. While employing irony and parody, it focused more on what American popular imagery represented, and its power in manipulating people's lifestyles. The 1950s art group The Independent Group, is regarded as the precursor to the British Pop art movement.

ART HISTORY – POP ART

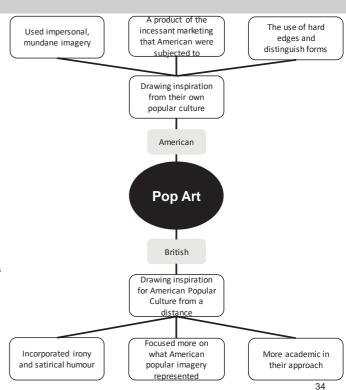

WHAT INSPIRED THE POP ART STYLE?

LONDON

In 1952, a gathering of artists in London called the Independent Group regularly met and discussed topics such as mass culture's place in fine art, the found object, and science and technology. Members included Eduardo Paolozzi, Richard Hamilton, architects Alison and Peter Smithson, and critics Lawrence Alloway and Reyner Banham. Britain in the early 1950s was still emerging from the austerity of the post-war years, and its citizens were unsure about American popular culture. While the group was wary of its commercial character, they were excited about the rich world pop culture seemed to promise for the future. The imagery they discussed at length included that found in Western movies, science fiction, comic books, billboards, automobile design, and rock and roll music.

NEW YORK

By the mid 1950s, the artists working in New York City faced a critical moment in modern art: follow the Abstract Expressionists or rebel against the strict formalism backed by many schools of modernism. By this time, Jasper Johns was already troubling conventions with abstract paintings that included references to: "things the mind already knows" - targets, flags, handprints, letters, and numbers. Meanwhile, Robert Rauschenberg's "combines" incorporated found objects and images, with more traditional materials like oil paint. These artists, along with others, later became grouped in the movement known as Neo-Dada. The now classic New York Pop art of Roy Lichtenstein, Claes Oldenburg, James Rosenquist, and Andy Warhol emerged in the 1960 in the footsteps of the Neo-Dadaists.

ART HISTORY – POP ART

35

ART HISTORY – POP ART – ANDY WARHOL

ANDY WARHOL 6 August 1928 – 22 February 1987

Born Andrew Warhola, in the neighbourhood of Oakland in Pittsburgh, Pennsylvania, Warhol's parents were Slovakian immigrants. His father, Andrej Warhola, was a construction worker, while his mother, Julia Warhola, was an embroiderer. They were devout Byzantine Catholics who attended mass regularly and maintained much of their Slovakian culture and heritage.

When he graduated from college with his Bachelor of Fine Arts degree in 1949, Warhol moved to New York City to pursue a career as a commercial artist. It was also at this time that he dropped the "a" at the end of his last name to become Andy Warhol. He landed a job with Glamour magazine in September, and went on to become one of the most successful commercial artists of the 1950s. He won frequent awards for his uniquely whimsical style, using his own blotted line technique and rubber stamps to create his drawings.

In the late 1950s, Warhol began devoting more attention to painting, and in 1961, he debuted the concept of "pop art" — paintings that focused on mass-produced commercial goods. In 1962, he exhibited the now-iconic paintings of Campbell's soup cans. These small canvas works of everyday consumer products created a major stir in the art world, bringing both Warhol and pop art into the national spotlight for the first time.

ART HISTORY – POP ART – ROY LICHTENSTEIN

ROY LICHTENSTEIN 27 October 1923 – 29 September 1997

Roy Lichtenstein was born in New York in 1923. He became famous for his bright and bold paintings of comic strip cartoons as well as his paintings of everyday objects. He was one of a group of artists making art about 'popular' things such as TV, celebrities, fast food, pop music and cartoons.

Although best known as a painter, he made different types of art including sculpture, murals, prints and ceramics.

Lichtenstein chose colours carefully, to imitate the four colours of printers' inks. He also used Ben Day dots, a system invented to increase the range of colours available to newspaper printing.

Lichtenstein is famous for his use of cartoon strips from American comic books, which were very popular the 1950s. He admired the skill of the comic book artist, who could create complex stories of love and war in cartoon form.

He was sometimes accused of copying comics exactly, but he said that he made changes to the pictures – right down to the tiniest placement of individual dots. He was also criticized for using very basic painting techniques.

37

ART HISTORY - POP ART - CLAES OLDENBURG

CLAES OLDENBURG 28 January 1929 - Present

Claes Oldenburg is a Swedish-born American Pop-art sculptor, who is best known for his giant soft sculptures of everyday objects.

He studied literature and art history at Yale University from 1946 to 1950, then returned to Chicago where he took classes at The School of the Art Institute of Chicago.

He saw himself as a realist, not as an abstract artist. He felt art must relate to the realities of everyday life. Yet he took objects from the real world and placed them out of context, making them soft when they should be hard, large when they should be small.

Strongly influenced by the writings of Sigmund Freud, Oldenburg underwent an intense period of self-analysis between 1959 and 1961. He carefully recorded his discoveries in notebooks, often including illustrative sketches. This endeavour helped him to shape his approach to art.

Oldenburg's style changed and developed over the years. He worked in a variety of modes, including drawing, painting, film, soft sculpture, and large scale sculpture in steel. After 1959 he was influenced by the theatre. His involvement in "happenings" in the early 1960s resulted from his interest in both participatory art and Freudian free association.

ART HISTORY – POP ART – PETER BLAKE

PETER BLAKE 25 June 1932 - Present

British artist Sir Peter Thomas Blake is often called the "Godfather of British Pop art." Born in Dartford, Kent, he is best known for co-creating the sleeve design for the Beatles' album Sgt. Pepper's Lonely Hearts Club Band. Like many artists of his time, he came of age in a country recovering from the war, so much of his interests were drawn toward the bright and happy lifestyle that was being touted in America via a booming advertising industry utilizing ground-breaking new methods such as screen-printing to create optimistic and bold renditions of life in magazines, on posters, and on billboards.

His early training as a graphic designer coupled with a rich education in more historical modes of art allowed him to blend his obsessions with the new youthful popular culture and pop music scene in swinging London with foundational art references from the past into a form of urban realism that was fresh. This challenged the status quo's idea about what constituted art and broke down barriers between traditional fine art and the new cutting edge field of Pop.

As he progressed in his career, he continued to make work that gave respectful nods to the past cultural lexicon yet which remained equally engrossed in what lay on the horizon, reflecting man's ongoing experience of being prone to the external influences of past, present, and future.

Page 8, 9 & 10 - Unit 2: Thriller

Page 11 & 12- Unit 3: Emancipation of Expressionism

Year 9 Drama – Unit 1: Exploring a Script : DNA

Keywords for the unit

Naturalism

A style of Drama from Victorian times onward, where the actor and the action has to be totally believable and realistic, convincing the audience what they are watching is real.

Stanislavski

Konstantin Stanislavski – a Russian actor, direct, theorist who developed the idea of naturalism and came up with a list of rehearsal techniques to create more realistic performances on stage

Proxemics

The performance space and how we use it. How the actors arrange themselves in relation to space. How close the actors stand to each other and what that tells the audience about their character relationships.

Semiotics

Symbolism on the stage as a way to communicate meaning. E.g Red light to show danger, a heartbeat to create tension, a top hat to show a wealthy person.

Empathy

is the ability to emotionally understand what other people feel, see things from their point of view, and imagine yourself in their place. Essentially, it is putting yourself in someone else's position and feeling what they must be feeling.

Moral Dilemma

a situation in which a person is torn between right and wrong. A **moral dilemma** involves a conflict with the very core of a person's principles and values. The choice the person makes may leave them feeling burdened, guilty, relieved, or questioning their values.

Keywords	VOICE
Tone	The emotion in your voice
Pitch	How high/low your voice is
Pace	How fast/ slow your voice is
Pause	When you stop moving/ speaking
Volume	How loud/ quiet your voice is
Projection	When you speak clearly and can be heard by an audience

Keywords	MOVEMENT
Gestures	How you move any part of your body to show a mood, feeling or idea
Facial expression s	Using your face to show emotions, mood, feelings and responses
Eye contact	When you establish eye contact with another actor or the audience
Posture	How you hold your body/your stance

Year 9 Drama – Unit 2 : Devising Drama: Exploring Practitioners – Bertolt Brecht

Key words for this unit

Bertolt Brecht

A German director and playwright who had strong political views and was anti –Nazi in the 1930's. He developed a new style of drama that was more political and used 'abstract' techniques

Multi-rolling

When an actor plays more than one part in a play.

Placards

A technique developed by Brecht when a character holds signs or banners explaining where or when the play is set, giving facts about a character or how they are feeling

Alienation

Distancing the audience emotionally from the scene and making them think about the moral of the scene instead.

Breaking the Fourth Wall

When an actor talks directly to the audience-acknowledges their presence in the theatre.

Social Change

To raise awareness about the **impact** of **social** issues such as injustice, war or prejudice through protest or confrontation in the hope that you can change things for the better.

Keywords	VOICE
Tone	The emotion in your voice
Pitch	How high/low your voice is
Pace	How fast/ slow your voice is
Pause	When you stop moving/ speaking
Volume	How loud/ quiet your voice is
Projection	When you speak clearly and can be heard by an audience

Keywords	MOVEMENT
Gestures	How you move any part of your body to show a mood, feeling or idea
Facial expressions	Using your face to show emotions, mood, feelings and responses
Eye contact	When you establish eye contact with another actor or the audience
Posture	How you hold your body/your stance

Year 9 Drama – Unit 3 : Individuality Exploring a theme through Drama

Key words for this unit

Conflict

Argument or tension resulting from different social or political opinions

Individuality

Not conforming to expected norms. Celebrating being or feeling different.

Solidarity

A group of likeminded people supporting each other in a time of conflict

Discrimination

Showing prejudice and treating people differently because of their race, colour, religion, sexuality, politics

Evaluation

Forming a clear set of opinions on a piece of work and being able to say why you have those opinions,.

Keywords	VOICE
Tone	The emotion in your voice
Pitch	How high/low your voice is
Pace	How fast/ slow your voice is
Pause	When you stop moving/ speaking
Volume	How loud/ quiet your voice is
Projection	When you speak clearly and can be heard by an audience

Keywords	MOVEMENT
Gestures	How you move any part of your body to show a mood, feeling or idea
Facial expression s	Using your face to show emotions, mood, feelings and responses
Eye contact	When you establish eye contact with another actor or the audience
Posture	How you hold your body/your stance

Year 9 Dance – Dance Skills

Constructive Feedback

Positivity

State something that you enjoyed.

Improvement

Identify something that needs making better.

Target

State specifically what can be done to make the work better.

Technical Skills-Required to perform a dance movement.

Keywords	
Accuracy	A being correct and precise.
Timing	The use of counts when moving to sound or music.
Dynamics	How a movement is performed.

Physical Skills-Required to perform physical activity.

K

Keywords	
Strength	The power exerted by a muscle.
Stamina	Being able to maintain physical energy for a period of time.
Posture	The way the body is held.
Balance	A steady or held position through even distribution of weight.
Coordination	Efficient combination of body parts.
Extension	Lengthening a muscle or limb.
Flexibility	The range of movement at a joint.

5

Year 9 Dance – Dance Skills

Expressive Skills-Required to connect with an audience.

Key Words

Focus	The use of eyes to enhance performance.
Facial Expression	The use of face to communicate mood, theme and atmosphere.
Projection	The energy a dancer uses to connect with an audience.

Choreography Skills-Required to create a dance.

Key Words

Unison	2 or more dancers performing movement at exactly the same time
Canon	When the same movements overlap in time.
Formation	Shapes or patterns created in space by dancers
Pathway	Designs traced on the floor or in the air
Level	Distance from the ground – low, medium or high
Direction	The way a movement faces
Solo	One performer
Duet	Two Performers
Trio	Three Performers
Group	Three or more Performers.
Still Image	A held position or image.
Climax	The most significant moment of a dance.

Year 9 Dance - Unit 1: Swan Song

Key Information

Christopher Bruce

British choreographer and performer, well known for creating performances with a political message.

Swan Song

Created in 1987. 32 minutes long. 3 dancers (trio).

Variety of dance styles including ballet, contemporary, jazz, tap, gymnastics and ballroom.

The theme is open to interpretation, however there is clearly a victim and 2 interrogators.

It is suggested it is set in a prison, as the interrogators wear khaki green shirts and trousers and the victim wears blue jeans and a red t shirt, signifying blood. There is also use of a chair and canes.

Key themes include victimisation, manipulation, torture, anger and frustration.

The music used are a combination of every day sounds such as gun shots and use of silence.

Key Words	
Contact Work	Contact work is using resistance, weight, counterbalance and support to create movements with at least two or more dancers.
Prop	A prop is an object which is used within a performance.
Characterisation	Creation of a character through use of gesture, facial expression, posture, body language and emotion.
Canon	Performing a movement at different times, after another dancer has previously performed it. For example, like a Mexican wave.
Unison	Performing the same movement at exactly the same time as other dancers.
Call and Response	An individual dancer or group of dancers performing a movement, then another individual or group of dancers, responding with a movement in response to the original movement performed by the original individual or group.

7

Year 9 Dance - Unit 2: Thriller

Key Information

Thriller (1983)

The song 'Thriller' was written, directed and performed by Michael Jackson.

The video is approximately 15 minutes long, still one of the longest music videos ever to be created.

The video references numerous horror films and tells the story of the dead coming to life.

Michael Jackson wanted to create a film experience to go alongside his song and was one of the first artists to do this. He changed the music industry with this idea.

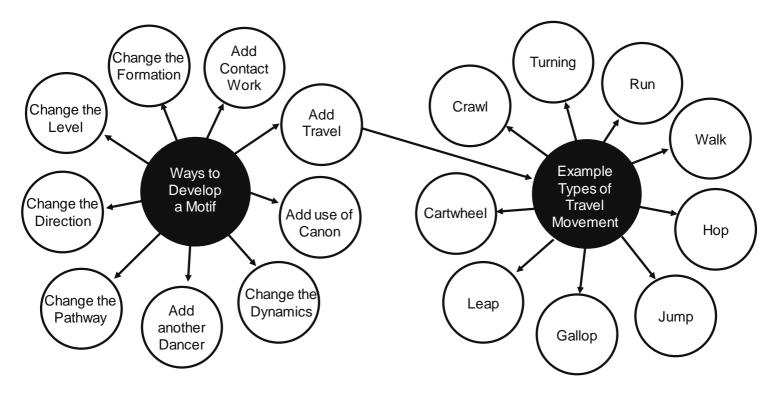

Michael Jackson created his own unique dance style which is widely recognised.

Key Words		
Motif	A movement which represents a theme or idea which is seen and repeated throughout a choreography.	
Motif Development	Ways to develop a motif to create a larger sequence of choreography.	
Travel	A movement which gets a dancer from one place to another.	
Characterisation	Creation of a character through use of gesture, facial expression, posture, body language and emotion.	
Canon	Performing a movement at different times, after another dancer has previously performed it. For example, like a Mexican wave.	
Unison	Performing the same movement at exactly the same time as other dancers.	
Call and Response	An individual dancer or group of dancers performing a movement, then another individual or group of dancers, responding with a movement in response to the original movement performed by the original individual or group.	

Year 9 Dance - Unit 2: Thriller

Glides and SlidesClaw HandsUse of the hands in a claw position which often swing from side to side on a medium to high level.Moon WalkIsolation of Head and ShouldersIndividually moving individual parts of the body such as turning the head to the side, lifting and dropping the shoulders and moving the chin from side to side. Year 9 Dance - Unit 2: Thriller

Year 9 Dance - Unit 3: Emancipation of Expressionism

Key Information-

Choreography

Emancipation of Expressionism (EOE)

Choreographer

Kenrick H2O Sandy

Created 2013

Dance Style

Hip-Hop, Krumping, Popping, Locking, Animation, Breaking & Waacking Techniques. Taking influence from other styles such as contemporary.

Themes

Sharing an emotional journey of finding individuality and expression. Appreciating Hip-Hop as an art form.

Dancers

17: 8 female & 9 male.

Length

11 minutes.

Costume

Blue jeans, pastel blue t shirt, accessories such as jewellery to represent individuality, hair tied back to show facial expressions.

Structure of EOE	
1. Genesis	Represents the start of life and the idea of being in the womb and finding the initial energy and movements.
2. Growth & Struggle	Represents the struggle for recognition which we can have as individuals. Shows a competition for individuality & expression. Takes the use of a rugby scrum showing support for an individual who is unsure of who they are.
3. Connect and Flow Between People	Sharing of energy and flow between two dancers. Representing the connections, which we have between individuals. Sometimes the energy is shown as an individual, but sometimes it is shared as a group.
4. Empowerment	The energy is captured and showcased as a group. Represents the idea of empowerment and the dancers coming together as a whole.

11

Year 9 Dance – Unit 3: Emancipation of Expressionism

B Point Choreography

A key method used in creating movement for Emancipation of Expressionism.

The idea of the body (hence the name B) being broken down into individual parts and numbered.

The dancers then use the hands to hit specific numbers (areas) on the body, to create a sequence of movement, in a quick and fast rhythm.

Uses isolation and sharp, strong and fast dynamics.

Effective and simple choreography for a group of people.

Uses canon to add further choreographic development.

Key Motifs used in EOE Ninja Walk Running on the spot in 1 count. Arms slicing backwards & forwards in a 90degree angle, in a running motion, in counts of 2. Sharp, fast dynamics. Medium to high level. Ninja Glide Stepping and sliding from one side to the other using the slicing arms from the Ninja Walk. Performed in various counts. Sharp, sustained, strong dynamics. Medium to high level. Ninja Static Upper body moving with the slicing arms from Ninja Walk, lower body static. Performed usually in 2 or more counts. Sustained, strong, fluent dynamics. Medium to high level. Chariots of Fire Crossing arm action low to the left, open to the right, cross high to the left and high to the right. Performed in 4 counts. Sharp, strong, fast dynamics. Medium to high level.

1

Year 9 Technology – Metal Fabrication Project (1)

Material Categories

Ferrous Metals

Metals that contain iron, are usually magnetic and rust

Non-Ferrous metals

Metals without iron, are usually non magnetic and don't rust

Alloys

Metals made up from mixing 2 or more metals together to combine properties

Thermoplastics

Plastics that can be reheated and shaped many times

Thermosetting Plastics

Plastics that can only be heated and shaped once

The Brazing Process

Heating metals parts up using a blow torch until hot enough for brazing rod to be melted over the join, connecting them together

Keywords	
Hardness	Ability to resist surface scratches
Ductility	Ability to be stretched out into a wire
Plasticity	Ability to be shaped or moulded
Malleability	Ability to be shaped without breaking
Toughness	Ability to withstand impact
Brittleness	Ability to be easily damaged

Year 9 Technology – Metal Fabrication Project (2)

Keywords	
Brazing	Method of joining metal parts together using heat
Injection Moulding	Heating up plastic and forcing into a mould to make parts
Pickling	Method used to clean the surface of metal
Electroplating	Process of coating a metal with a layer of another metal using electricity
Galvanising	To cover a metal with zinc
Hardening	Heating metals to make them get harder
Tempering	Heating and cooling metals to make them less brittle
Annealing	Heating and cooling metal to make it tougher
Normalising	Heating and cooling metal to make it more ductile
Fabricating	To construct something from prepared parts
Powder Coating	To heat a part then cover in a fine layer of plastic particles to produce a coating
Press Forming	To use moulds to press a sheet of material into a required shape

3

Year 9 Technology – Metal Fabrication Project (3)

Tin snips Used to cut sheet metal

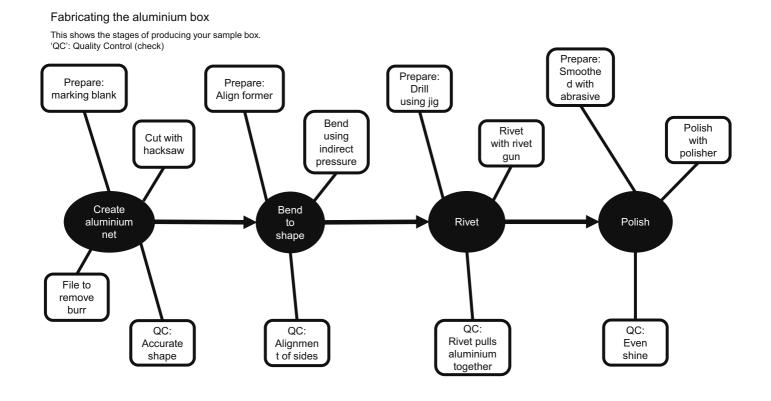

Safety Goggles Must be work when brazing to protect your eyes

Hand files Used to abrade the edges of the sheet metal until smooth

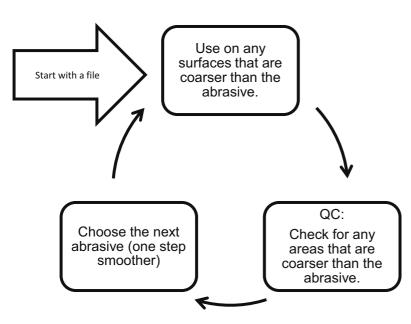

Powder coating Used to coat metal objects with a thin plastic coating to prevent them from rusting

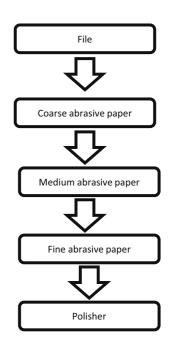

Year 9 Technology – Metal Fabrication Project (5)

Achieving a polished finish

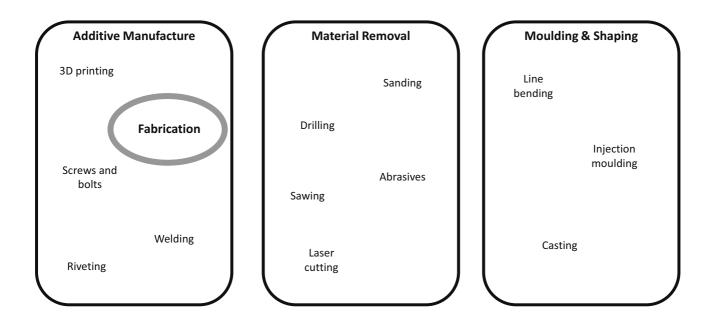

Polishing is a process of gradually removing scratches until none remain and the surface shines. Polishing metal is something you do not a finish you apply like paint.

Ways of Manufacturing

Manufacturing processes fall into 3 main categories

7

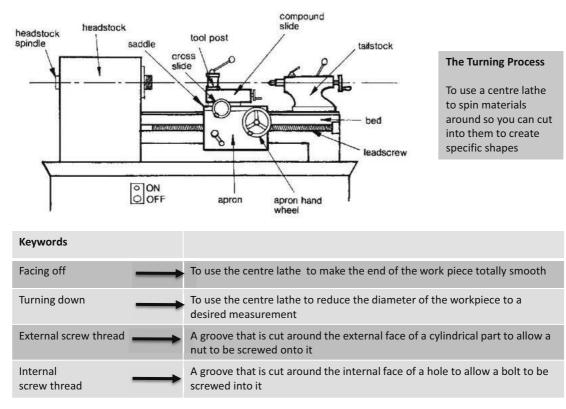

Year 9 Technology – Metal Fabrication Project (7)

Methods of Fixing

Some are temporary (removable) and others are permeant Some fix at a single point, some on a seam (line).

	Temporary	Permanent
	Screw	Spot weld
Point	Bolt	Rivet
	Dowel	Dowel glued
		Welding
Seam	[None]	Brazing
		Soldering
Area	[None]	Bonding (glue)

Year 9 Technology - Engineering Project - Phone Stand (1)

Year 9 Technology – Engineering Project – Phone Stand (2)

The Milling Process

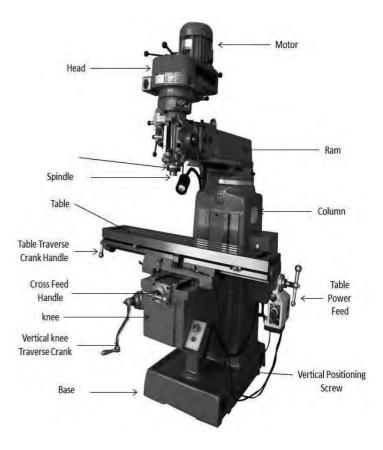

To cut or shape metal using a rotating tool in a milling machine

Horizontal Milling Machine

In horizontal mills, the cutters are mounted on a horizontal spindle across the table. Many horizontal mills also feature a built-in rotary table that allows milling at various angles

Vertical Milling Machine

In vertical mills, the spindle axis is vertically oriented. Milling cutters are held in the spindle and rotate on its axis. The spindle can be extended, or the table raised or lowered to produce the same effect, allowing for plunge cuts and drilling. Vertical milling machine have a stationary spindle, and the table is moved both perpendicular and parallel to the spindle axis to cut.

Year 9 Technology – Engineering Project – Phone Stand (3)

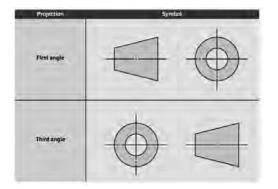

Orthographic Projection

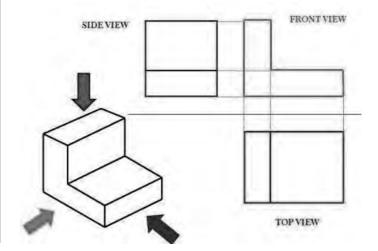

A technical drawing that shows apart from the top, side and end and contains information about the dimensions and how parts should be made. Dimensions are always in mm.

Orthographic projections are working drawings in either a first or third angle projection and show each side of a design without perspective, a 2D drawing of a 3D object.

Construction lines show where areas join and are used to draw a side and plan (top) view, ensuring that the drawing is accurate from all angles.

First and third angle projections use these symbols on a diagram to indicate which projection they are.

Outlines	
Construction lines	
Hidden details	
Dimension arrow	← 3 cm
Centre line	

Year 9 Technology – Engineering Project – Phone Stand (4)

CNC Machining

CNC stands for – Computer Numerical Control and the machine that you will use is called a CNC Lathe

A CNC lathe is used to make cylindrical components and can also do threads and chamfers

It works by using a program that contains information called G-Codes. These are a set of instructions that the computer can read

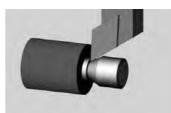

Year 9 Technology - Engineering Project - Phone Stand (5)

G-Codes and Simulation

G Codes is a language in which people tell CNC machines how to make something. The "how" is defined by G Code instructions provided to a machine controller that tells the motors where to move, how fast to move and what paths to follow.

Simulation is used to check the programming before the CNC starts to manufacture the component. This is used to ensure that there is no errors within the programming.

13

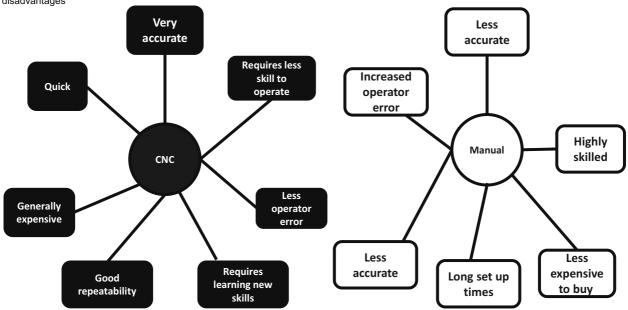

Year 9 Technology – Engineering Project – Phone Stand (6)

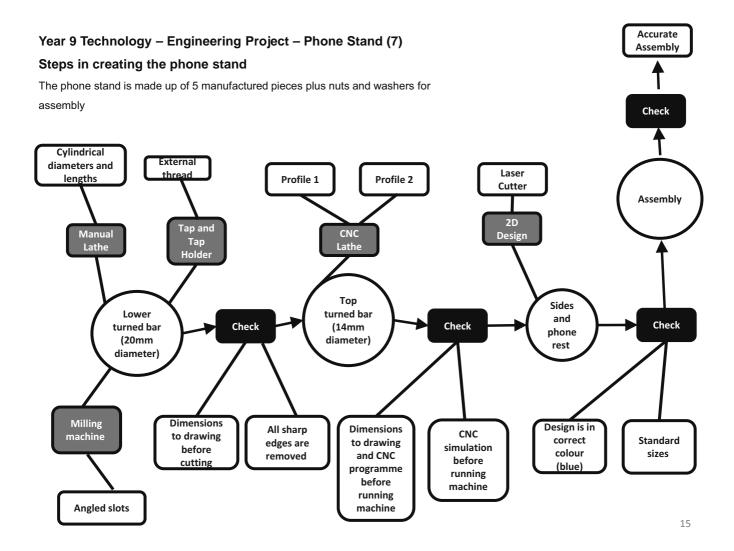

Comparing CNC machining to Manual machining

Traditionally manual machines were always used to make certain products, now we very often use CNC or automatic machines

Here are some comparisons between CNC and Manual machining. Some are advantages and some are

disadvantages

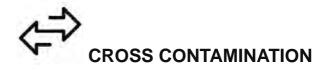

Year 9 Technology - Engineering Project - Phone Stand - Key Words (8)

Keywords	
Milling	To cut or shape metal using a cutting tool/ cutter
Centre Lathe	A machine that allows you to spin a piece of material round whilst cutting into it to make a required part
Working Drawing	A drawing that contains information needed to manufacture a specific part, such as measurements
Stage Drawing	A set of drawings that show the stages of production of a part
Measurement	The distance or angle of a part.
Digital Caliper	Hand held device used to measure parts
Die and Die Holder	Hand held tool that allows you to cut an external screw thread into a piece of material.
Metal Removal	Processes that remove metal such as turning, milling, drilling.
Chamfer	An angled slope cut round the corner or a part
Precision	The quality of being exact and accurate
Tolerance	The amount that the measurement can deviate before it becomes unacceptable

The 4C's for Food Safety

Personal Hygiene Wash hands Cover cuts with a blue plaster Nails clean and short Tie hair back No jewellery Wear a clean apron Do not handle food if you have an upset stomach Do not cough or sneeze near food Kitchen Hygiene Clean and sanitise surfaces Equipment must be cleaned thoroughly Cupboards, fridges and freezers must to cleaned regularly Always use a clean spoon each time you taste food Lids on Ensure pest infestations are delt with immediately

Equipment used on raw foods MUST be cleaned thoroughly before being used on other food.

Clean and sanitise surface between uses.

Wash fruit and vegetables to remove dirt or soil.

Wash hands after touching raw meat and fish.

Use colour coded chopping boards: Green - Salad and veg Red - Raw Meat Yellow - Cooked Meat Blue - Fish White - Dairy and bakery

17

The 4C's for Food Safety

Temperature of the fridge should be between below 5 °C.

Never put hot food in the fridge, as it will raise the temperature of the fridge.

Do not overload the fridge, air needs to circulate Throw away food that is past its use by date. Always store **raw** meat and fish on the **bottom** shelf **Cooked** meat should be on the **top** shelf.

Keep food covered or wrapped to prevent cross- contamination.

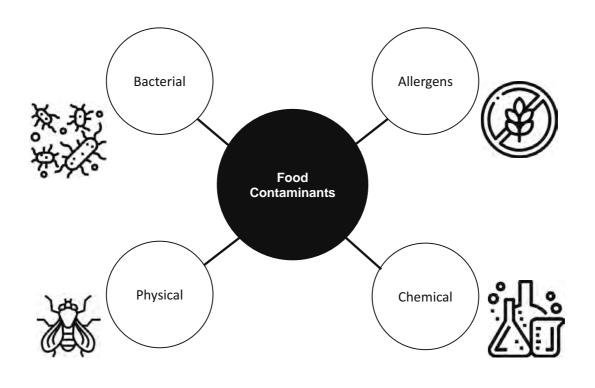

Temperature of a freezer should be **-18 °C.**

Use a temperature probe to ensure food is cooked.

To kill bacteria food must reach at least 75°C.

Food related causes of ill health

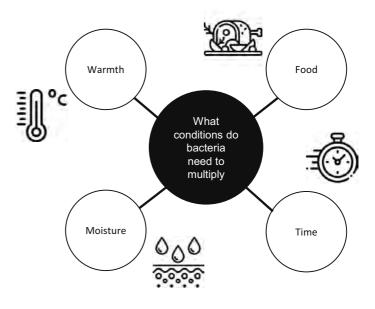

Food related causes of ill health

Bacteria

Some bacteria have to be **INSIDE** your body to make you ill. These are consumed in the food.

Once inside you, the bacteria attack your body causing illness, some such as Salmonella cling to the gut wall preventing absorption of water and nutrients- this type take hours even days to colonise the gut so symptoms may not show for a few days.

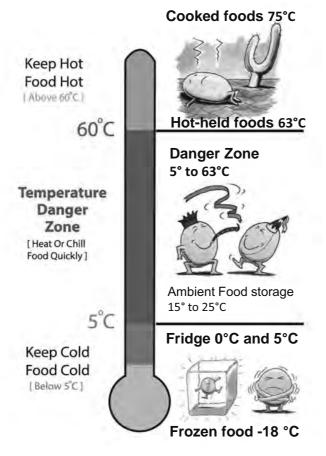

Some produce a **TOXIN** (poison) on the food which makes you ill when you eat it. Toxins act on the body rapidly so this type make you ill within minutes to hours of eating them.

Sources of food poisoning bacteria

- People/sewage
- Raw food
 - Insects
- Rodents
- Soil/dust
- Refuse/waste
- Animals/birds
- Contaminated packaging

Pathogenic Bacteria

Food poisoning symptoms

Visible: Diarrhoea pale in colour vomiting signs of dehydration confusion chills/shivering bloating/swelling Sweating fatigue Non-visible: stomach pains

muscle contractions headaches feeling sick/nausea flu like symptoms (dizziness/light-headed) loss of appetite fatigue joint/muscle pains Chills weakness

Common types of food poisoning

Type of food poisoning	Foods it is found in
Campylobacter	Poultry, raw meat, unpasteurised milk products, water
Salmonella	Raw meat, unwashed vegetables, eggs undercooked chicken
E. coli	beef, chicken, lamb, unpasteurised milk cheese, spinach, salads, raw veg
Clostridium perfringens	Undercooked meats, large volumes of food, casseroles, gravies

Type of food poisoning	Foods it is found in
Listeria	Raw foods, fridge temperatures, unpasteurised milk, cheese, smoked salmon, pate, raw sprouts
Bacillus cereus	Rice, leftover food, foods at room temperature, sauces and soups
Staphylococcus aureus	Foods made by hand and no additional cooking. Salads, ham, tuna, chicken, cream pastries, sandwiches, dairy products, meat, eggs

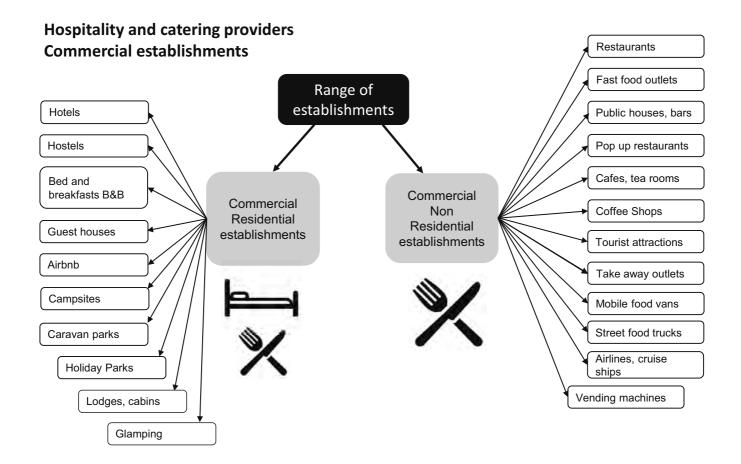

Hospitality and catering providers Keywords

Commercial: business that operates to earn money

Non-commercial: non-profit organisations or government run provisions

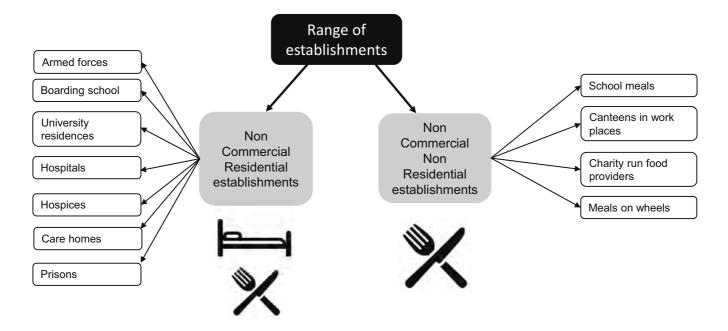

Residential: where accommodation is offered

Non-residential: where only food and drink is offered

Hospitality and catering providers

Non Commercial establishments

25

Catering Options

Provision	Advantages	Disadvantages	
Restaurants and bistros	Waiter service. Can ask questions about the menu. Comfortable seating at a table	Often more expensive than other options Waiting time can be longer than other options	
Pop-up restaurants	Often set up in convenient locations. Prices can be cheaper. Gives customers a chance to try new foods	The menu may be limited Only in location for a limited time	
Cafe	Faster service than a restaurant. Lower prices than a restaurant. Wide menu choices – something for everyone	Can be crowded. Seating may not be very comfortable, for example fixed seats	
Street food	Usually fast service. Cheap prices. Food is wrapped and ready to go. Can ask questions about ingredients etc.	Hygiene may not be as good as indoor venues, for example lack of pest control and temperature control. There may be no seating available. Usually need cash to pay	
Mobile vans	Serve fresh, hot food. Very convenient if in your location	Only available at set days/times. Limited menu choice. Engine fumes can be a problem if engine left running	
Fast food Fast service	Fast cooking, as food is often prepared/cooked beforehand. Cheaper prices. Easy to eat.	Often unhealthy choices. Not all packaging can be recycled so may be damaging for the environment.	

Catering Options (continued)

Provision	Advantages	Disadvantages
Takeaways and drive-throughs	Fast and convenient. Cheaper prices. No need to get out of the car at drive-throughs, so convenient for families with children and disabled customers.	Menu choice is limited Often unhealthy choices
Tearooms and coffee shops	Service is usually fast. Food is often freshly prepared. Good for snacks and lighter meals. Branded coffee shops offer a familiar setting and menu.	Limited menu choice. Can be crowded. Seating may not be comfortable, for example raised stools. Can be expensive.
Delicatessens and salad bars	Offer a wide range of salads and sandwiches. Often sell hot food such as soups and jacket potatoes.	Waiting times can be long at peak times as food is often made to order Seating may be limited or in a small space
Pubs and bars	Food often available all day. Generous portion sizes. Wide menu choices. Prices often cheaper than restaurants. Comfortable atmosphere	Seating may not be comfortable, for example raised stools. Waiting time can be longer than some other options, for example fast food and cafes
Visitor attractions (for example theme parks)	Catering sited in convenient locations. Fast service. Choice of catering options to suit different guests. May offer meal deals or unlimited drinks	The food is often expensive. Can be long queues Small portions. Some visitor attractions don't allow you to take your own food in, so they have a captive market

27

Kitchen dress code

Where an item of clothing is for personal protection while doing the job then the employer must provide it free of charge.

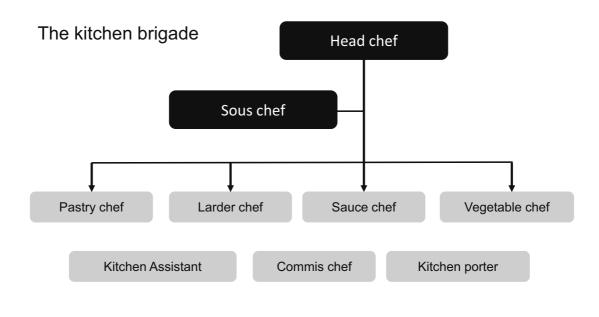

A chef should wear:

• a jacket with long sleeves, usually double-breasted, made from cotton to stay cool while still protecting the chef from heat, burns and scalds

trousers, which should be loose fitting for comfort and made from cotton to keep cool; loose fitting trousers can be removed easily if hot liquids are spilled on them • apron – this is worn around the waist, over the trousers, as added protection • hat – called a toque, which is worn to prevent hair from falling into food
neckties – these used to be worn to prevent sweat from dripping into food; they are not worn as often now due to improved ventilation in kitchens

• safety shoes – should have steel toe caps in case a knife or hot food is dropped on the feet

• **kitchen cloth** – tucked in the apron, kept dry for handing hot pans and equipment.

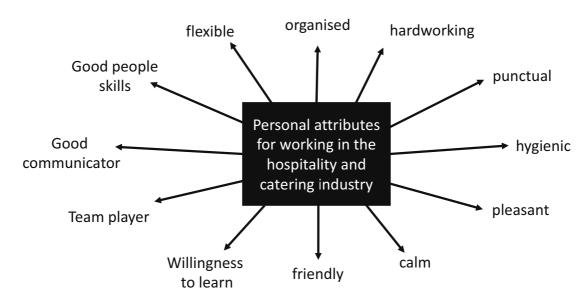

29

Working in the hospitality and catering industry

Personal attributes

A personal attribute is a quality or personality trait that someone has in their character. Different job roles require different sets of skills and personal attributes.

Working in the hospitality and catering industry

Job roles – Kitchen Staff

Executive (Head) Chef

Creating menus cooking and preparing food Ordering and dealing with suppliers Monitoring the quality of food going out of the kitchen and giving the finisher dishes their final touches Managing staff: hiring, training, and sorting rota and pay Managing and implementing legal legislation Liaising with the general manager and meeting with other managers . Dealing with problems or complaints.

Sous Chef

The next chef in command who will take over from the executive chef when they are away from the kitchen Managing food preparation and directing tasks Supervising staff and kitchen stations Implementing legal legislation Ensuring that food standards are maintained, as well as the high quality of the food Assisting the executive chef with managing staff, creating a menu, and completing any admin

Working in the hospitality and catering industry

Job roles – Kitchen Staff

Chef de Partie

A chef de partie oversees a particular area within the kitchen In larger kitchens a chef de partie may oversee other chefs within their station

Butcher chef (Boucher)

in charge of preparing meats before they are used in other stations.

Specialist chef in preparing fish dishes and sauces.

Fry chef (Friturier)

Grill chef (Grillardin)

as a swing chef).

Specialist of foods that require grilling.

Pantry chef (Garde manger) Responsible for preparing cold dishes (also known

Roundsman (De tournant)

A relief chef. This person will fill in on stations.

Pastry chef (Pâtissier chef)

in charge of the pastry station where baked goods, desserts, and pastries are made

Working in the hospitality and catering industry

Job roles – Kitchen Staff

Apprentice / Commis Chef

Learning about food preparation techniques and assisting station chefs

Assisting with cleaning, deliveries and stock taking

Kitchen Assistant

Washing and cleaning equipment and utensils.

managing waste disposal

Organising and managing equipment ready for the working day

Cleaning and maintaining hygiene and safety within the kitchen

Helping all station chefs (wash, peel, chop ingredients)

Kitchen Plongeur

Aiping down walls, tiles, fridges, and freezers. Maintaining and cleaning stations washing floors, taking out the rubbish

Cleaning all large equipment

Cleaning all the pots, dishes, and utensils

Kitchen Porter

Keeping the fridge/freezer and storeroom organised. collecting equipment and utensils and washing them Checking that all equipment is washed and placed away correctly

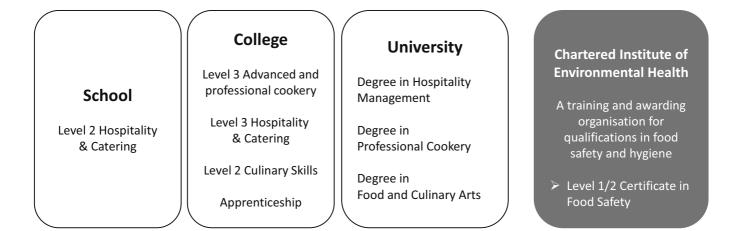

Unloading and taking deliveries

Emptying bins, sweeping and washing the floor

Working in the hospitality and catering industry

What training and qualifications do you need to work in the hospitality and catering industry?

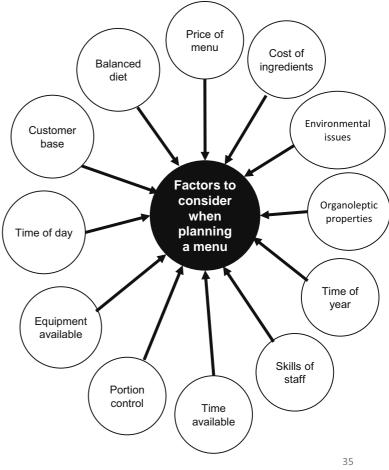

Once you leave school there are lots of courses available at different further education colleges and universities to provide additional training and qualifications. Below are four examples of organisations which provide advice, courses and other training opportunities:

Factors affecting menu planning

You need to be aware of the following factors when planning menus:

- cost (ingredients as well as business costs)
- portion control (value for money without waste)
- balanced diets/current national advice
- time of day (breakfast, lunch, and dinner menus as well as small plates and snacks)
- **clients/customers** (a menu with prices that will suit the people who visit your establishment).

Factors affecting menu planning

Customer

Who is the customer? What age are they? What nutritional requirements to they have? Special dietary requirements Budget Time of day that the customer is eating ie. breakfast, lunch or dinner

Type of provision

Planning a menu depends on the size and type of provision. For example a small coffee shop would not require large industrial equipment. The customers visiting a coffee shop would also not want to wait very long for their food. They would also expect to be able to buy light lunch time dishes, not fancy fine dining dishes that take a long time to produce.

Cost

Cost of ingredients A profit needs to be made Customers budget Type of provision Competitive prices Portion control

Factors affecting menu planning

Skills of the chef

The skills of the chef must be suited to the type of provision and the menu offered.

A Michelin starred restaurant will require a chef who has complex skills in preparation, cooking and presentation of dishes.

A café will require a chef who has a range of medium and complex skills to produce a suitable menu.

A large restaurant will normally have a full kitchen brigade while a smaller establishment may only have a single chef with one or two assistants.

Time available

The type of provision will influence the amount of time a customer may be willing to wait for their dish to be prepared.

Can the chef prepare, cook, and present more than one dish at the same time?

Can some items be made in advance?

Average waiting time for a meal 5-6 mins fast food outlet 23 mins Restaurant 40 mins Fine dining

Equipment available

You need to know and understand the type of equipment needed to produce a menu. The choice of dishes will be influenced by the equipment available to the chef.

This includes kitchen equipment such as:

- hobs, ovens, and microwaves
- fridge, freezer and/or blast chiller
- specialist equipment, for example a sous vide or pizza oven
- hand-held equipment, for example electric whisks or handblenders
- other electric equipment, for example food processors.

37

Factors affecting menu planning

Time of year

The time of year can affect menu choices.

- Light and cold dishes such as salads are better suited to the summer months.
- Hearty dishes such as stews are more suited to the winter.
- Special dishes linked to holidays such as Christmas and Valentine's Day may also be included.
- The availability of seasonal produce can also affect menu choices as certain commodities, for example strawberries, are less expensive when in season.

Environmental issues

The chef will need to think about environmental issues when planning a menu.

- Can the chef reduce the amount of ingredients bought as well as reducing food waste?
- Can the chef reuse ingredients to create new dishes for example stale bread made into bread-and-butter pudding?
- Can the kitchen recycle waste wherever possible?
 Running the kitchen sustainably will save money.

Organoleptic properties

Organoleptic properties are the sensory features of a dish (appearance, aroma, flavour, and texture).

The chef will need to think about how the dish will look and taste. Is there a range of colours? Do the flavours go well together? Are there a variety of textures?

The organoleptic properties will need to suit the customer and the type of provision.

The difference between intolerances and allergies

- Food intolerances are more common than food allergies. The symptoms of food intolerance tend to come on more slowly, often many hours after eating the problem food. Typical symptoms include bloating and stomach cramps.
- A food allergy is a rapid and potentially serious response to a food by your immune system. It can trigger classic allergy symptoms such as a rash, wheezing and itching.
- Genuine food allergy is rare. About 2% of the population and 8% of children under the age of three are affected. (www.nhs.uk)

Reasons for food intolerance

- Some people react to certain foods and eating them may cause uncomfortable symptoms or, in rare cases, a severe illness.
- Food intolerance is more common in children than in adults. Children often grow out of the intolerance before they go to school.

Allergies

39

Symptoms of food allergies

A food allergy usually occurs between a few minutes and a few hours after eating a particular food.

The symptoms of food allergies vary:

- coughing
- dry, itchy throat and tongue
- nausea and feeling bloated
- wheezing and shortness of breath
- · swelling of the lips and throat
- runny or blocked nose
- · sore, red and itchy eyes

Anaphylaxis

Anaphylaxis is most commonly caused by food allergies, but can also be caused by other things, such as insect bites and drug allergies.

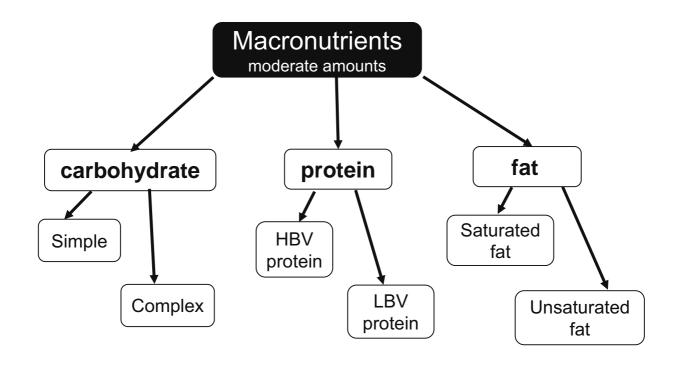

Peanuts, milk, eggs and fish are the most common foods to cause anaphylaxis in the UK.

- Feeling lightheaded or faint.
- Fast, shallow breathing, wheezing
- A fast heartbeat
- · Clammy skin
- Confusion and anxiety
- Collapsing or losing consciousness

Allergens in hospitality and catering

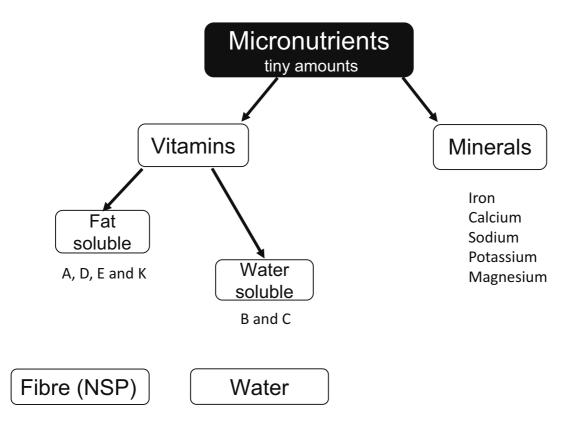

- · All menu items must be marked with any of the 14 major allergens they contain
- Wait staff should have a good knowledge of which allergens are present
- When using pre-prepared ingredients, kitchen staff should check the labels carefully to identify any allergens, e.g. Peanut flour used to thicken the sauce in a takeaway curry or milk present in a minor ingredient in a pre-packed or catered food

Understanding the importance of nutrition

41

Understanding the importance of nutrition

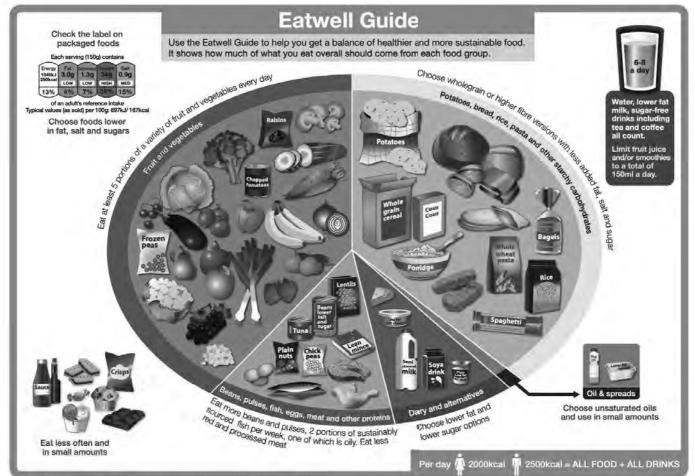

A Healthy Balanced Diet

A healthy balance diet provides all the nutrients needed for healthy body functions and normal physical activity.

To help achieve a balanced diet the Government have put together some dietary guidelines. The Eatwell Guide and 8 Tips for Healthy Eating.

8 Tips for Healthy Eating

- 1. Base meals on starchy foods
- 2. Eat 5 portions of fruit & vegetables a day
- 3. Eat 2 portions of fish a week
- 4. Small amounts of saturated fat and sugar
- 5. Eat less salt
- 6. Drink plenty of water
- 7. Do not skip breakfast
- 8. Get active

Source: Public Health England in association with the Weish Government, Food Standards Scotland and the Food Standards Agency in Northern Veland

43

Carbohydrates

Carbohydrate provides an important source of **energy** for the body.

Carbohydrate provide energy to move and be active as well as energy for body processes such as breathing, heart beating.

Vitamin B (thiamine and riboflavin) is needed to help release the energy to the body.

All carbohydrates are converted to **glucose** when digested and this is converted to energy.

If the energy is not used up then it is stored as body fat.

Excess carbohydrates :

Obesity, Tooth decay, Type 2 diabetes

Simple Carbohydrates (sugars)

Sugar gives a fast release of energy that means your blood sugar levels go up.

Some foods contain natural sugars such as milk, fruit & honey.

glucose – Fruit,	sucrose –	starch – Potatoes, wheat, oats,
vegetables, honey, sugar	Sugar	pulses, corn, rice, pasta, bread,
beet/cane, corn	beet/cane	cous cous, cereals, beans, lentils,
		kidney beans, porridge, muesli,
galactose – found in the	maltose –	non-starchy vegetables
milk of mammals	Soya beans,	
	barley, wheat	
fructose – found in fruit	lactose – Milk	Dietary Fibre (NSP) – found in
Fruit, vegetables	and milk	wholegrain cereals, Fruit,
	products	vegetables, seeds and nuts

Complex Carbohydrates

Starchy foods provide a slow release of energy and help our

blood sugar levels stay the same so

(starch)

we don't feel tired.

Carbohydrates deficiency:

Lack of energy, weight loss, severe weakness

45

Protein

Protein is a macronutrient formed from chains of amino acids which are the building blocks of protein. There are 20 amino acids that come from animals and plants.

What is protein needed for?

Growth of skin, hair, cells, organs, bones and connective tissue. Growth especially in children and pregnancy.

Repair body tissues after illness, injury or surgery.

A secondary source of energy for the body.

Maintaining the body (bones and muscles)

Higher biological value (HBV) protein	Lower biological value (LBV) protein	
Contain all essential amino acids	Contain some essential amino acids	
From animal sources	From plant sources	
Meat, fish, eggs, milk, cheese Exception – soya beans	Cereals, nuts, beans, seeds	

Protein Complementation – two or more LBV proteins can be eaten together to provide all the essential amino acids, e.g. beans on toast or mixed bean and lentil curry. This is protein complementation, and is important for vegetarians and vegans.

Excess protein in the diet is used as energy. If it is not required for energy then it will be stored as fat.

Protein deficiencies are rare but in developing countries but can lead to stunted growth in children.

Some groups of people have a higher need for protein:

- babies and children for growth;
- adolescents for growth spurts;
- pregnant women for the growing baby;
- People healing from surgery
- An athlete for growth and repair of muscle and tissue

Fat

Our bodies need fats for many essential functions, however in the modern world many people consume over the recommended daily amounts of fat which can cause problems with obesity, heart disease and stroke.

What is fat needed for?

Protect vital organs

Stores fat-soluble vitamins (A, D, E and K)

To maintain body temperate

Ensure a healthy immune system

Maintain healthy skin and hair

Provide energy (fat is very high in energy)

Fat is a source of fatty acids, these are essential mechanisms for cell membranes in the nervous system and the brain

Saturated fat	Unsaturated fat	
Solid at room temperature	Liquid at room temperature	
More harmful to health, as they raise LDL cholesterol	Considered to be the 'healthier' fats. They can help maintain healthy HDL cholesterol levels	
Mainly from animal sources	From plant sources and fish	
Butter, lard, ghee Coconut and palm oil Fatty and processed meats, sausages, bacon and cured meats Full fat milk and diary products (cream, ice cream, cheese) Chocolate	Vegetable oils and olive oil Nuts, flax seeds and sesame seeds Avocados and olives Fatty fish (salmon, sardines, mackerel)	

 $\label{eq:cholesterol-choles$

blood by proteins. When these proteins and fat combine, they are called

lipoproteins. These two main lipoproteins can be good or bad for our health:

Low-density lipoprotein LDL is the bad type of cholesterol that can build up and clog the arteries, causing stroke and heart disease.

High-density lipoprotein HDL the good cholesterol can positively affect the body by helping clear cholesterol out of the arteries or removing excess cholesterol to the liver, where it is broken down and disposed by the body.

Fat-soluble Vitamins

Vitamin	Function	Sources
Vitamin A	Helps with vision in dim light Helps the body grow and develop Strengthens the immune system Skin health	Animal sources (retinol) - liver, milk, oily fish (retinol) Plant sources (beta carotine) - green leafy vegetables, carrots and orange and red coloured fruits (carotenoids) Added to margarine
Vitamin D	Absorption and use of calcium and phosphorus Maintenance and strength of bones and teeth Important in brain function Supports immune and nervous system Supports lung function	Oily fish, eggs and dairy products Fortified breakfast cereals and margarines (vitamin D added by law) Sunlight on the skin
Vitamin E	Healthy skin and eyes Boosts immune system Helps clots from forming in the arteries	Sunflower seeds Almonds, peanuts Avocados, butternut squash, asparagus, pumpkin, mango, dark green vegetables Vegetable oils Oily fish
Vitamin K	Blood clotting and help healing wounds Keeps bones healthy	Leafy green vegetables, kale, spinach, broccoli, asparagus Cheese Liver, bacon

Water-soluble Vitamins

Vitamin	Function	Sources
Vitamin B1 Thiamine	Release of energy from carbohydrates Healthy nervous system Normal growth of children	Wholegrain products, wheat, rice Meat, fish, milk and dairy Marmite Seeds, nuts, beans and lentils. Peas Fresh fruit – bananas and oranges
Vitamin B2 Riboflavin	Energy release from foods / break down protein from food Healthy nervous system Maintain healthy growth and skin	Same as vitamin B1 Mushrooms
Vitamin B3 Niacin	Energy release from foods Helps the body use of protein and fat Helps with lowering fat levels in the blood Healthy nervous system, skin and hair	Same as vitamin B1
Vitamin B9 Folate/Folic acid	Helps body form healthy red blood cells Helps body use protein Important for the development of unborn babies (essential for pregnant women)	Liver and kidney Wholegrain products Pulses and seeds Leafy green vegetables, asparagus Potatoes

Water-soluble Vitamins

Vitamin	Function	Sources	
Vitamin B12	Supports production of energy	Meat, fish and shellfish	
Cobalamin	Protective coating around nerve cells	Dairy products, cheese, milk, yogurt	
	Brain function	Eggs	
	Production of red blood cells		
	Not enough B12 can cause anaemia		
Vitamin C	Helps absorb iron from foods	Citrus fruits, lemon, oranges, limes	
Ascorbic acid	Helps the immune system fight and prevent infection	kiwi, blackcurrants, strawberries, papaya, pineapple,	
	Production of collagen that binds connective tissue	mango	
	Antioxidant – protects from pollutants in	Potatoes	
	the environment	Salad and green vegetables, e.g. broccoli, kale, spinach	
	Helps heal wounds	Peppers, chillies, cauliflower	
	Helps skin health		

Minerals

Vitamin	Function	Sources	
Calcium	Strengthens bones and teeth	Dairy foods, milk, cheese, cream, yogurt	
	Bones are able to reach peak bone mass – maximum	Green vegetables, kale, spinach, cabbage	
	strength	White bread – calcium is added by law,	
	Growth of children	Soya products, tofu	
	Promotes nerves and muscles to work properly	Nuts and seeds	
	Vitamin D is needed to help absorb calcium		
Iron	Supports the production of haemoglobin in red blood	Red meats – liver and kidney	
	cells; this transports oxygen around the body	Lentils, dried apricots, cocoa, chocolate,	
	Low iron levels cause anaemia	Curry spices,	
	Vitamin C is required to absorb iron	Green leafy vegetables, e.g. spinach,	
		Breakfast cereals fortified with iron	
Sodium	Regulate the amount of water in the body	Processed foods – for flavour and as a preservative,	
	To assist the body in the use of energy	Salt added to food in cooking process for flavour,	
	To help control muscles and nerves	Smoked meats	
	Too much salt/sodium can increase blood pressure and	Bacon	
	heart disease		

Dietary Fibre (NSP)

Insoluble fibre is not easily broken down by the digestive system. It passes through the body unchanged, keeping the bowels healthy and preventing digestive problems such as constipation and haemorrhoids.

Sources: Oats barley rye most beans and peas fruit root vegetables

Functions

Helps prevent constipation.

Helps prevent type 2 diabetes.

Helps reduce the risk of colon cancer.

Lowers the risk of coronary heart disease.

Reduces the temptation to snack between meals.

Helps support a healthy weight.

Slows down absorption of carbohydrates in the blood to help keep blood sugar levels constant.

Soluble fibre is broken down by bacteria in the bowel to be digested. It can help reduce cholesterol in the blood and guard against coronary heart disease.

Sources: wholegrain cereals, wholemeal bread Bran, nuts, corn, oats, fruit, vegetables (especially the skin)

Deficiency

A deficiency is often caused by eating too many refined foods, e.g. white bread instead of whole meal, or white rice instead of brown rice. It may also be caused by a general lack of fruit and vegetables in the diet. A deficiency can lead to constipation, haemorrhoids, colon cancer and/or diverticulitis.

Water in the diet

Water is the major component of body fluid and has many functions in the body:

- it acts as a lubricant for joints and eyes;
- it is the main component of saliva;
- it helps get rid of waste;
- it helps regulate body temperature.

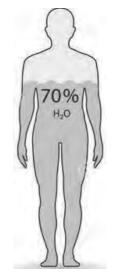

The body loses water all the time, when we go to the toilet, from sweat and also evaporation from skin. If we do not consume enough water, we become dehydrated.

- Water is provided by food and drinks.
- 20% of water consumed is from food.
- 80% is from drinks.
- Some fluids are less beneficial, coffee and tea can increase water loss, sweetened drinks contain a lot of sugar and fizzy drinks are acidic on the teeth.

Water, lower fat milk, sugar-free drinks including tea and coffee all count.

Limit fruit juice and/or smoothies to a total of 150ml a day.

53

Nutrition at different life-stages

Early childhood (3-8 years)

- Growth and weight are steady during the preschool age.
- All children will grow at a similar and steady rate until they reach adolescence.
- The brain is growing and developing during this stage.
- Muscles increase and body fat decreases.
- Stomachs are smaller; children require smaller meals which are full of the nutrients.
- Children's food should be high in nutrients to promote growth and development.
- Children should consume healthy meals to encourage healthy eating habits.
- Young children are often active; therefore, they should be getting enough calories to provide the nutrients required.
- Children should consume a varied diet which is full of calcium and vitamin D to promote bone health and growth.
- Bone density increases and bone tissue gradually replaces cartilage.
- Processed foods should be avoided as they contain hidden saturated fats, salt, and sugar.
- · A lot of energy is used for physical activity.

Adolescence (9-18 years)

- During puberty, young people will go through a big growth spurt; therefore, they will need extra food as they require more energy for growth.
- Protein is an essential macronutrient for bone and organ growth.
- The reproductive system will reach sexual maturity.
- Puberty starts females usually start this before males. Females will need to increase their iron intake due to loss of iron during their menstrual cycle.
- Females need to make sure they eat enough food containing vitamin C and iron to prevent anaemia.
- High vitamin C intake is needed to help with the absorption of iron from foods.
- Teenagers can grow rapidly at this stage.
- Vitamins and minerals are vital for the correct development of bones and organs
- Males will start to develop muscle mass and will therefore require the right amount of protein each day.
- Processed foods should be avoided as they contain hidden saturated fats, salt, and sugar.
- A lot of energy is used for physical activity.

Nutrition at different life-stages

Early adulthood (19-45 years)

- The skeleton continues to take up minerals until peak bone mass is reached about 30 years of age.
- Adults should eat the recommended amount of nutrients to keep their immune system strong and prevent infection.
- Protein is required for repair and growth during this stage.
- The Eatwell Guide should be followed for a balanced diet.
- Pregnant and breastfeeding individuals need to increase folate, vitamins, and calories to help with foetus development and growth.
- Individuals who are breastfeeding will require more nutrients for the development of the baby.
- Women continue to menstruate until the menopause (approx late 40s to early 50s)
- Weight gain can occur if the energy intake of the diet is unbalanced and insufficient physical activity is taken.

Middle adulthood (46-64 years)

- Some females will go through perimenopause before transitioning into menopause.
- Perimenopause is when the ovaries produce less oestrogen.
- A female will go through the menopause later in this life stage - this is where the ovaries stop producing eggs.
- Both perimenopause and menopause can last up to 10 years; therefore, a female should increase calcium, magnesium and vitamins K and D to maintain bone health.
- Females going through the menopause should not consume too much phosphorous as it can accelerate the loss of some minerals needed for bone health.
- Dietary fibre should be eaten frequently during middle adulthood to aid the digestive system.
- Fats should be unsaturated and saturated fats should be consumed as little as possible as this could lead to obesity, heart disease or stroke.
- Weight gain can occur if the energy intake of the diet is unbalanced and insufficient physical activity is taken.
- · Metabolic rate gradually slows down.
- The body needs to be maintained to keep it free from disease, strong and active.

55

Nutrition at different life-stages

Later adulthood (65+ years)

- Absorption of nutrients may decline during this stage as the digestive system becomes less efficient.
- Calorie intake decreases for those over 75 years old; this is because many older adults are less active at this age. The metabolic rate also slows down.
- The amount of fat needed decreases during this stage.
- Protein is needed to repair wounds and cells.
- Vitamin D should be consumed in the diet, and older people should get plenty of sunlight.
- · Plenty of fruit and vegetables should be in the diet.
- Fatty foods and foods which are high in sugar should be limited as this can cause weight gain, and increase the risk of heart disease and type 2 diabetes.
- Chewing foods may become more difficult due to dentures or other health problems, which means softer foods are more desirable for some older adults.
- · Dietary fibre is important as the digestive system may slow down
- Blood pressure may increase, only small amounts of salt/sodium should be consumed
- Eyesight may weaken Vitamin A, C and E can help to prevent eye conditions
- The skeleton gradually starts to lose minerals and become weakened. This can develop osteoporosis. Calcium and vitamin D can help to maintain bone strength.

How to plan production

- Before you start make sure you have each of your recipes written out in clear simple step by step instructions
- Identify your mise en place for each dish and accompaniments and complete this section first.
- Write a rough plan on another sheet of paper of the order that you need to make your dishes in
- Writing up the time plan start with the process; this needs to include every stage of the making process for both of you dishes and accompaniments. It needs to be detailed enough for someone else to make your dishes and include the quantities of ingredients needed.
- Include details about the serving of your dishes.

- Once the process section is complete, add the timings. Who long will it take you to complete each stage? This needs to start at 9.00 and end at 12.00 (3 hours)
- > Finally the **special points**. This needs to include:
 - The 4 C's
 - Chill Temperatures of storage
 - Cook Core cooking temperature
 - Clean Personal hygiene, kitchen hygiene
 - Ways to prevent cross-contamination
 - Types of risk, food safety or personal safety
 - Washing up regularly
 - Contingencies / Quality control what could go wrong and how could you fix it?

How to plan production - Glossary

Commodity list with quantities

A production plan needs to include list of all the ingredients needed and their quantiles.

An ingredients list can be a stand-alone list or included in the production plan.

Equipment list

you need to note all the equipment you will need to prepare and cook the dish. The equipment list could be included as an additional column on the production plan or as a stand-alone list.

Health, safety, hygiene, and storage

An additional column on the product plan adds all the health, safety and hygiene points you need to consider. Such personal hygiene points would include wearing an apron, washing your hands and removing your jewellery. Food should be stored in the fridge between 2°C and 5°C and in the freezer below -18°C. Different chopping boards should be used for different foods, and raw meat should be prepared separately in the kitchen.

Mise en place preparation before cooking

Equipment should be prepared before weighing and measuring ingredients. Ingredients should be stored correctly, ready to be used. If preparing a fish to be cooked, it should be washed, cut, deboned, and filleted. The production plan should be read very carefully, and the stages should be understood. The oven must also be turned on to the correct temperature.

Quality points

Quality points should be checked before preparing, cooking and serving. All equipment should be checked for damage and cleanliness, and fruit and vegetables should be fresh, bright, and not bruised. When using fish, the 'use by' date should always be checked, and the fish should smell fresh, have bright eyes, and should be firm and shiny (not slimy). Meat should also be checked to make sure it is not past its 'use by' date; it should smell fresh and feel firm. Meat needs to be the right colour and shouldn't be too fatty.

Hot holding and serving

Food should be kept at 63°C for a maximum of two hours only. The correct equipment needs to be used to hot hold foods, the food should be served simultaneously, and the temperature of food needs to be checked using a food probe.

How to plan production - Glossary

Cooling

You should ensure that cooked foods are cooled rapidly at room temperature and placed in the fridge within one to two hours. Alternatively, a blast chiller can be used to decrease the temperature quickly.

Cooking

When cooking food, follow the recommended time, use a food probe to check the correct temperatures, follow all food hygiene standards, clear up as you go along and check the flavouring of dishes before serving.

Timing

The timing of each step is critical to make sure dishes are served to the customer simultaneously, and at the correct temperature. Planning for each stage of preparing and cooking will help with the organisation and overall success of the dishes.

Contingencies

A contingency plan is in place in case something goes wrong and should be considered in each stage of the production plan. For example, over-whipping the cream. In this case, you should have spare ingredients to replace the cream. If you cut yourself, you should know who the first aider is and where the first aid box is situated. If there is a fire, you should know what to do in a small kitchen fire, and you should be able to locate a fire blanket and the closest fire alarm.

Sequencing/dove-tailing

This is an essential process of planning; it is the order of the production. Sequencing or dove-tailing needs to be considered to ensure all dish parts are ready simultaneously. When designing the menu for your brief, you will need to consider the correct order of preparing and cooking the dishes.

For example, making ice cream after other dishes will mean it won't be ready in time, as it takes longer to set and freeze.

Safety	Hygiene	Temperature & Dates	Cooking	Contingencies
Use oven gloves	Check all equipment is clean before using	Fridge 1-4° C	Pre-heat oven	If dish is not cooked return to oven & cook furthermins.
Hold knife point downwards	Use correct coloured knives/boards	Freezer -18 °C	Cooking time – in minutes	If pastry is too dry add more water
Do not put knives in sink	Meat - Red board Raw Fish - Blue board	Hot Holding above 63°C	Oven Temperature e.g. Gas 6 /200°C	If meat does not reach 75°C return to cook furthermins.
Avoid cluttered work surfaces	Salad and fruit - Green board	Avoid Danger zone 5° – 63°C	Grease & line tin to prevent sticking	If sponge does not spring back return to cook furthermins.
Open lids away from you to prevent scalding	Bakery & Dairy - White Cooked	Boiling Point 100°C	Cakes should be golden brown	If there is yolk in egg whites save for another dish and use fresh eggs
Don't overheat oil -know your temperatures	Store raw and cooked food separately	Core Temperature above 75°C	Bread & cakes should be well risen	Use lemon to avoid enzymic browning
Pan handles facing inwards	Wash hands using anti-bacterial soap.	Don't put hot foods in the fridge	Bread should sound hollow when cooked	Check quality of all ingredients/visual check Have extra ingredients in case something goes wrong
Put a damp cloth under boards	Cover food before placing in fridge	Pre-heat oven	Consistency of food - check recipe	If the sauce is too thick add more liquid If the sauce is too thin continue to simmer
Sharpen knives before use	Sanitise worktops to kill bacteria.	Cover and Chill in fridge 1° – 4°C	Use bones for stocks	Look through the glass panel in oven before opening door.
Store knives safely.	Wash up in hot, clean soapy water to kill bacteria	Use a temperature probe correctly	Use a cooling rack to cool effectively	Always check seasoning and adjust accordingly

How to plan production - examples of special points

How to plan production - examples of special points

Safety	Hygiene	Temperature & Dates	Cooking	Contingencies
Ensure frozen food is completely defrosted	Rinse in clear water and air dry	Wrap in cling film before chilling.	Use lids to conserve energy	Test oil temperature before deep frying- use bread or thermometer
Clean cooker to remove all food scraps.	Remove all jewellery	Check use by & best before dates.	Baking bind to prevent centre rising	Ensure food e.g. vegetables are the same size to ensure even cooking
Use electrical equipment safely. No wet hands	Always use a blue plaster for cuts	Store high risk food in the fridge	Turn off oven, rings when not in use	If you burn something you need to start again with fresh ingredients
Bridge & claw techniques when using knives	Remove nail varnish Hair correctly tied back	Always apply FIFO rule	Using a timer for accurate cooking	Ensure water is boiling before adding food or cooking time will be incorrect
Mop up any spills immediately	Put only cold food in the fridge or freezer	Never refreeze food	Use correct size ring to conserve energy	Sauce – stir to avoid lumps using a wooden spoon

61

How to evaluate a food product

What have you made?

What skills/techniques have you used?

What went well?

How did you decorate/garnish it?

What did you like/dislike about it?

How could you improve?

What sensory words would you use to describe it? (appearance, taste, texture, smell)

Is there anything you would change? Why?

How would you improve your product if you were to make it again?

Sensory Words

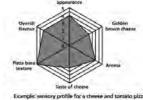

Appearance	e (Looks)	
Appetising	Dry	Hot
Attractive Clear Cold Colour Colourful Crumbly	Fattening Firm Fresh Greasy Hard Healthy	Moist Runny Smooth Soft Tasty Tough
Taste (Flav	our)	
Acid Bitter Bland Burnt Cheesy	Herby Meaty Old Salty Sharp	Stale Sweet Tangy Tasteless Tasty
Creamy	Sickly	Undercooked
Dry Fruity	Sour Spicy	Watery

Rating Tests

People are asked to say how much they like or dislike a sensory characteristic of a product.

Smell (Ar	oma)		
Burnt	Yeasty	Garlicky	
Fragrant	Sickly	Spicy	
Fruity	Spicy	Stale	
Texture (N	louthfeel)		
Airy	Firm	Mushy	
Brittle	Fizzy	Powdery	
Chewy	Flaky	Slimy	
Creamy	Foamy	Smooth	
Crisp	Gooey	Soggy	
Crumbly	Greasy	Sticky	
Crunchy	Gritty	Stringy	
Dry	Hard	Tender	
Fatty	Lumpy	Watery	
Sensory Pro	ofiles		

The results of sensory tests are often displayed visually using charts and sensory profiles, such as the star profile/radar diagram below.

- U Underline any other key words
- **G** glance at the mark

What? How? Why?	What people have done – agriculture, burning fossil fuels etc
Explain the huma	an causes of climate (4)marks)
P	(Gilarks)
Long-term change in climatic patterns	

Developing your points using the PEEL structure

What is the point you are making ?

Evidence

Which examples / facts / data link to your point ?

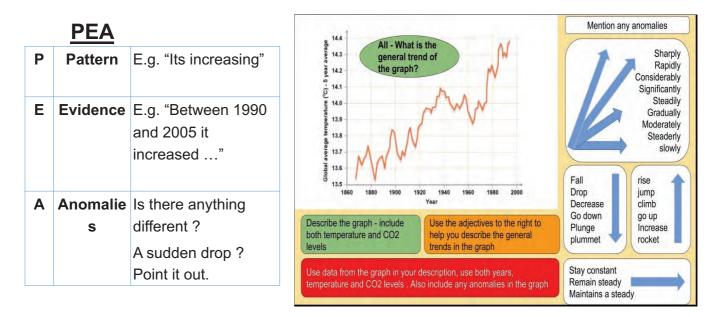

Explain Develop your point using connectives such as

'This means that' or ' therefore' or 'this shows that'

How does your point link back to the question ?

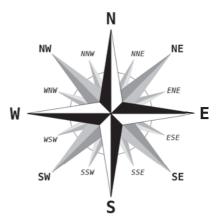

Reading a graph in Geography

7

<u>Reading maps in Geography –</u> <u>'CLOCK'</u>

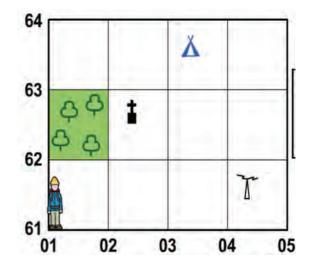

- **C** = Country
- L = Latitude / longitude
- O = Oceans and Seas
- **C** = Compass points
- **K** = Kilometres (distance and scale

Using OS maps in geography

Follow the 3 Grid reference rules

- 1. Always go across the landing and then up the stairs .
- 2. If you are 'in' a square, then go down and left.
- 3. If you are given a grid reference and need to find it ,go up and right.

9

Decision making exercises checklist.

Did you ...

- 1. Plan your answer?
- 2. Rank your option choices ?
- 3. Develop your points using TAT ?
- 4. Link to SEE ? (Social , Economic, Environmental)
- 5. Mention stakeholders ?
- 6. Use the resource booklet ?
- 7. Link to scale *local, regional and national* ?
- 8. Link to time short term vs long term ?
- 9. Think about the bigger picture national or global issues ?

How to Protect our crumbling cliffs

Coasts: Waves

Key Term	Definition
Constructive Wave	A low energy wave characterised as having a strong swash and a weak back wash. Leads to the build up of a beach.
Destructive Wave	A high energy wave characterised as having a strong backwash and a weak swash. Leads to the removal of beach material.
Swash	The forward motion of waves up a beach.
Backwash	The backwards motion of waves down a beach.
Fetch	The distance travelled by wind or waves across open water.
Frequency	How often the waves occur. Low frequency = 6-8 waves per minute High frequency = 10-14 waves per minute
Wave Peak	The highest point of the wave.
Wave Trough	The lowest point of the wave, occurs between two peaks.

Constructive Waves:

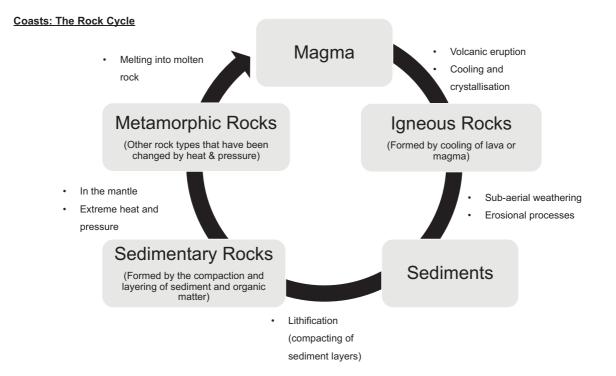

- Strong swash AND weak backwash
- · Contribute to the build up of beach material
- · Elliptical wave orbit
- · Low frequency and long wave length
- · Shallow wave height

Destructive Waves:

- Weak swash AND strong backwash
- · Leads to the removal of beach material
- Circular wave orbit
- · High frequency and short wave length
- Steep wave height

Coasts: Sub-Ariel Weathering and Mass Movement

Sub-Ariel Weathering

The breakdown of rocks at Earth's surface, without the influence of marine erosion.

Biological Weathering

- Breakdown of rock due to plants or animals
 Animals burrowing into the cliff face, displacing rocks
- · Plant roots growing into rock cracks and breaking them apart

- Chemical Weathering Breakdown of rock through changing its chemical composition.
- · Carbonation (acidic rain dissolving rocks)

Physical Weathering

- The breakdown of rock without changing its chemical composition. · Freeze-Thaw (water getting into cracks, freezing- pushing rocks
- apart, thawing then repeating process until rock breaks apart)
- Wetting and Drying (shrinking and expanding of material)

Mass Movement

Large movements of soil and rock debris down slopes in response to the pull of gravity.

Types of Mass Movement	Description	Diagram
Rockfall	Rock fragments break away from cliff face due to weathering	
Landslide	Blocks of rock slide downhill along a slide plane	Sono C
Mudslide	Saturated soil flows down a slope	S
Slumping	Saturated soil slumps along a curved surface	

13

Coasts: Marine Erosion Key Terms

Hydraulic action

Abrasion

Air becomes trapped in joints and cracks on a cliff face. When a wave breaks, the trapped air is compressed which weakens the cliff and causes erosion.

Bits of rock and sand in waves grind

down cliff surfaces like sandpaper.

Attrition

Waves smash rocks and pebbles on the shore into each other, and they break and become smoother.

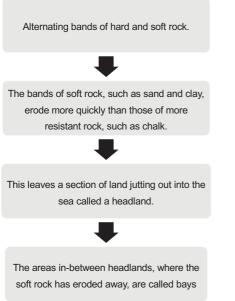

Solution

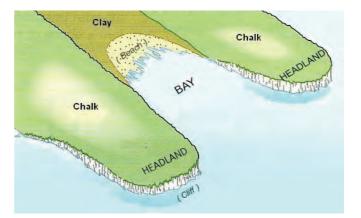

Acids contained in sea water will dissolve some types of rock such as chalk or limestone.

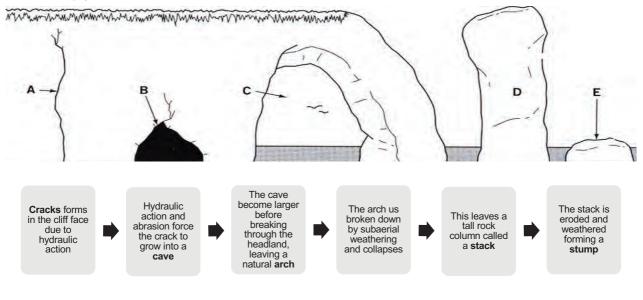

15

Coasts: Erosional Landforms (Headlands & Bays)

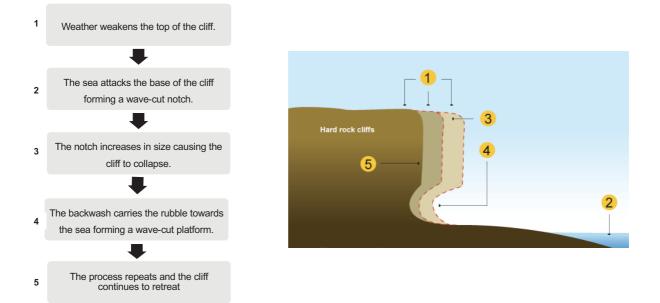

Coasts: Erosional Landforms (Caves, Arches, Stacks, Stumps)

17

Coasts: Erosional Landforms (Wave-Cut Platforms)

Coasts: Transportation Key Terms

Transportation

Suspension

carried by the waves

The movement of material in the sea and along the coast by waves.

Traction

Large pebbles and boulders are rolled along the seafloor.

Saltation

Beach material is bounced along the seafloor

Solution

Material is dissolved and carried by the water

Beach material is suspended and

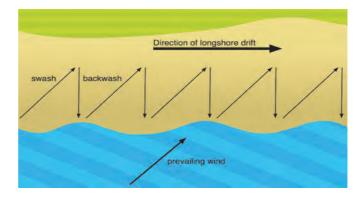

0.00

19

Coasts: Longshore Drift

The movement of material along the coast is called longshore drift.

- The prevailing wind blows waves carrying sediment into the beach at an angle
- The waves break on the shore and due to gravity the water runs back, perpendicular to the angle of the shoreline
- The sea carries the sediment back down the beach
 in its backwash
- This results in a zigzag motion as sediment is transported laterally along the coastline

Coasts: Depositional Landforms (Beaches)

Beaches are found between the high water mark and low water mark

Formed by constructive waves depositing material

Sand beaches are flat and wide, particles are small and the beach profile is gently sloping

Shingle beaches are steep and narrow, particles are large and the beach profile is steeply sloping

Key Terms

Sediment

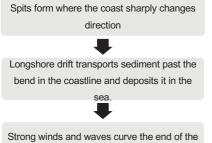

Sediment is a naturally occurring material that is broken down by processes of weathering and erosion

Shingle

Small rounded pebbles

21

Coasts: Depositional Landforms (Spits)

Strong winds and waves curve the end of the spit (recurved tip)

Sheltered areas behind spits are protected from waves- which means plants can grow there

Overtime this sheltered area can become a mudflat or salt marsh

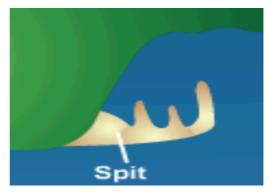

Key Terms

Mudflat

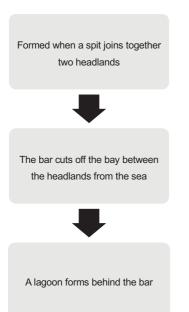

Also known as 'tidal flats' – it is a stretch of muddy land left uncovered at low tide

Saltmarsh

An area of coastal grassland that is regularly flooded by seawater

Coasts: Depositional Landforms (Bars)

Key Terms

Lagoon

A pool of shallow salt water separated from the sea by a low sand bar or coral reef

23

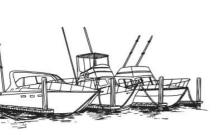

Coasts: Human Activity and The Coast

1. Water Sports

The uses of the coast:

2. Offshore Wind Farm (Energy)

4. Ports and Harbours

3. Tourism

5. Fishing

6. Security and Rescue

Coasts: Human Activity and The Coast

1. Coastal Flooding

4. Over Fishing

Threats to the coast:

2. Beach Litter/ Garbage Dumping

5. Coral Bleaching

3. Oil Spillages

6. Increased Erosion

25

Coasts: Coastal Management

Shore Line Management Plans:

- · Local councils prepare shoreline management plans to prepare and protect against coastal flooding
- · Councils will weigh up the benefits of building the defences against the cost of building them

Option	Description	Explanation
Do Nothing	Do nothing and allow gradual erosion	Option if the land has a lower value than the cost of building expensive sea defences
Hold the Line	Use hard-engineering techniques to defend the coastline	 Hard-engineering techniques are only used when the land being protected is particularly valuable Sea defences need continuous maintenance and upgrading which is expensive
Retreat the Line	Allow a break in existing coastal defences to allow land to flood naturally between low and high tide	 Option if the area is at high risk of erosion. It usually occurs where the land is of low value (e.g. farm land) People will need to be evacuated from flood risk areas.
Advance the Line	Build new coastal defences further out to sea	 Most expensive option as it requires a huge engineering project.

Key Terms

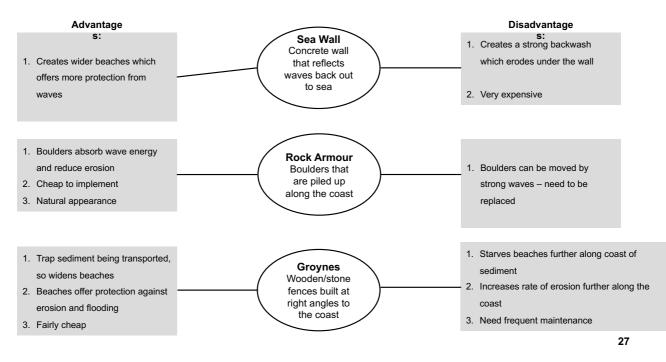

Hard Engineering Man-made structures built to control the flow of the sea and reduce flooding and erosion

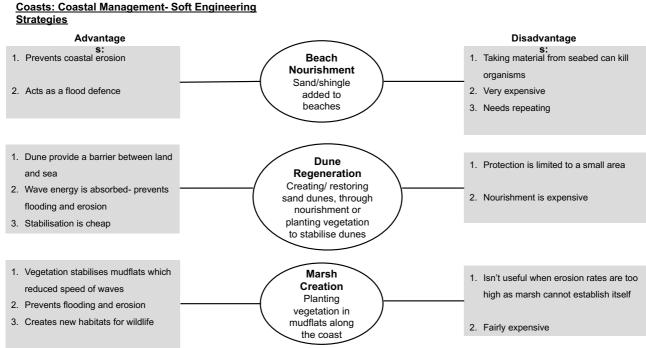

Soft Engineering Schemes set up using knowledge of the sea and its processes to reduce the effects of flooding and erosion

Shoreline Management Plan

A non-statutory document that provides an overview of the long-term risks associated with coastal processes.

Coasts: Coastal Management- Hard Engineering Strategies

Coasts: Holderness Case-Study (1)

Location: Holderness, East Yorkshire, UK

Distance: 61km from Flamborough Head (headland) - Spurn Head (a spit)

Erosion: 1.8m of land lost/ year (fastest eroding coastline in Europe)

Reasons for rapid erosion:

- Easily eroded rock type (boulder clay cliffs are likely to slump when wet)
- 2. Narrow beaches don't slow the speed of oncoming waves
- Sea defences worsening the erosion rates further along the coastline (groynes trap sediment, so beaches further along coast are malnourished)
- 4. Powerful waves- deep water, storm surges and long fetch

The Effects of Rapid Erosion-

Social Impacts:

- Homes near the cliffs are at risk of collapsing into the sea (e.g. in Skipsea)
- Accessibility to some settlements affected as cliffside roads have been lost due to erosion
- Gas terminal at Easington is at risk (only 25m from cliff edge) This terminal accounts for 25% of Britain's gas supply

Environmental Impacts:

1. Some Sites of Special Scientific Interest (SSSI) are threatened (e.g. the lagoons near Easington)

Economic Impacts:

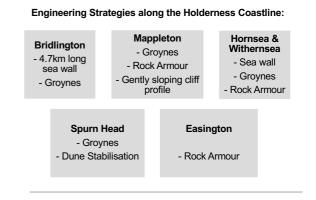

- 1. Property prices along the coast have fallen sharply
- 2. Businesses and jobs are lost (e.g. Seaside Caravan Park at Ulrome is losing approx. 10 pitches/ year to erosion)

29

Coasts: Holderness Case-Study (2)

Coastal management: The Issues

- Terminal groyne syndrome (where the rate of erosion following the last groyne is increased) e.g. Cowden Farm, South of Mappleton is now at risk
- Groynes prevent eroded material being transported to the Humber Estuary = increased risk of flooding there
- Coastal erosion has increased at the Lincolnshire Coast (south of Holderness)
- Spurn Head is at risk of being eroded away as less sediment is being added to it
- 5. Sea defences need continuous maintenance = expensive

Skipsea and Great Cowden do NOT have coastal defences and so are experiencing enhanced erosion due to 'Terminal Groyne Syndrome'

Terminal Groyne Syndrome – Accelerated erosion of the beach down drift of the last groyne. There is a lack of sediment because longshore drift has been interrupted by the groynes.

Coasts: Climate Change and the Coast

Sea levels are rising due to Global Warming

- Global sea levels are rising at a rate of approx. 2mm per year
- Predictions estimate that by the year 2100, sea levels could have risen between 30cm-1m

Key Terms:

Global Warming

The gradual increase in the overall temperature of the Earth's atmosphere

Global Warming has two effects that causes Sea Levels to rise:

Melting Ice

- · Increased temperatures melt glacial ice caps
- · This melted ice water returns to the oceans
- This increases the volume of water in the oceans and causes the sea levels to rise

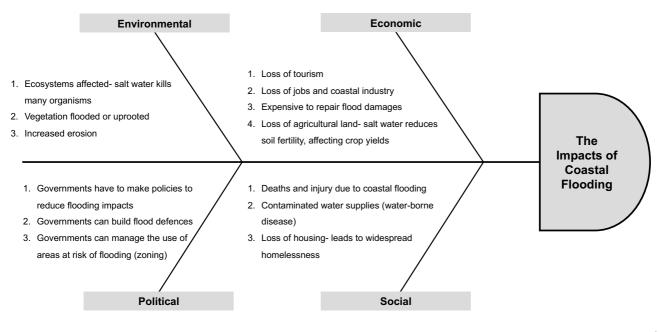

Thermal Expansion

- · Increased global temperature causes oceans to get warmer
- · Heated water particles expand
- This expansion increases the volume of water, causing sea levels to rise
 - Rising sea levels mean that low-lying parts of the world are at increased risk of coastal flooding.

E.g. Bangladesh and the Maldives

31

Coasts: The Impacts of Coastal Flooding

Coasts: The Maldives Case-Study

Location: The Maldives, Group of Islands in the Indian Ocean Number of Islands: Approx. 1200- of which 200 are inhabited Average Island Height: 80% of land is below 1m Population: Approx. 440,000 people

The Problem: Due to rising sea levels, scientist predict The Maldives will be completely submerged within 50- 100 years

Key Terms:

Submerged

To be completely covered by the sea/ocean

Desalination

The expensive process of removing salt from sea water, making it drinkable

Carbon Neutral

Action to remove as much carbon dioxide from the atmosphere as each put into it.

The Impacts of Coastal Flooding on the Maldives

Social

- 1. Severe flooding causes housing damage, leaving whole communities homeless
- 2. Less fresh water available- saltwater contaminates freshwater supplies so locals have to rely on rainwater or build expensive desalination plants

Environmental

- Loss of beaches- flooding erodes beaches which destroys animal habitats
 Loss of soil- soil on the island is shallow and easily washed away, leaving the
- Loss of soil- soil on the island is shallow and easily washed away, leaving the land infertile so crops cannot grow

Economic

- 1. Loss of tourism- largest industry in the Maldives. If main airport cannot operate then international tourism will be lost
- 2. Disrupt fishing industry- fish are the Maldives largest export. Coastal flooding may damage fish processing plants

Political

- Maldivian government has asked the Japanese government to give them \$60 million to build the 3m high sea wall that protects the capital city, Malé
- The Maldives has pledged to become carbon neutral so as not to contribute to global warming
 Government is considering buying land in countries like Indian and Australia
- Government is considering buying land in countries like Indian and Australia and moving Maldivians there (environmental refugees)

33

Development and Globalisation

Development keywords

Key term	Definition
Development	The change that a place goes through to improve the standard of living and quality of life, including income, equality and education.
Sustainable development	Development that occurs which meets the needs of the present without ruining it for future generations.
Development indicator	Ways to measure the level of development of a place.
Social development indicator	Measurements of how people live in an area, e.g. Health (life expectancy, numbers of doctors per 1,000), Education (% in primary education) and Equality (fair distribution of wealth, equal gender pay).
Economic development indicator	Measurements of the wealth of an area, e.g. Gross Domestic Product per capita (GDPpc), Gross National Product or types of jobs (primary, secondary, tertiary, quaternary).
Composite (combined) development indicator	Where the measurement of development takes more than one development indicator, e.g. The HDI.
Gross National Product per capita (GDP pc)	Gross Domestic Product (the total value of all goods and services in that country) plus earnings from foreign investment divided by total population (an average).
Purchasing Power Parity (PPP)	Compares what the same amount of money can buy in different countries taking into account the different cost of living.
Human Development Indicator (HDI)	A measure from 0-1, where 1 is the most developed. It uses GNP pc, number of years in school, and life expectancy to get a good measure of how people are invested in by the government.
Globalisation	The process of a place becoming more interconnected to the world trade, communication, culture and technology.
Infrastructure	The basic structures and services needed by any society such as water supplies, sewage systems, roads or bridges

Key term	Definition
Low Income Countries (LICs)	Poorer countries with a Gross National Income of less than \$1,045/year, per person, e.g. DR Congo and Mali.
Medium Income Countries (MICs)	Countries with a Gross National Income of between \$1,045 and \$12,735/year, per person. Split again between Lower Middle Income (\$1,045-\$4,126 and Upper Middle income). Lower MIC e.g. s India and Turkey. Upper MIC egs Brazil, China and South Africa.
High income Countries (HICs)	Richer countries with a Gross National Income of more than \$12.375/year, per person, e.g. UK, USA, Germany.
Newly Industrialised Countries (NICs)	Countries that are developing fast because of rapid growth in recent years, e.g. Brazil, Russia, India and China (the BRICs).
Multinational Companies (MNCs)	A company that manufactures and trades across the world. They usually have their headquarters in MICs, where the profit goes to shareholders, e.g. Nike, Apple, Google and Amazon.
Brandt Line	An imaginary line that has split the world into the 'Rich North' and the 'Poor South', based on GDP pc in the 1980s.
Poverty Line	The estimated minimum level of income needed to secure the necessities of life (food, water, shelter).
Formal jobs	Jobs that the government are aware of and that pay tax so can help reinvest into the country. They have contracts and come with workers protection.
Informal jobs	Jobs that don't pay taxes, that don't have formal contracts, benefits or protection. HICs have very few informal jobs with LICs having a lot.
Primary economic sector	All jobs involving extracting raw materials, rearing animals and growing crops.
Secondary economic sector	A type of industry where raw materials are made into something, often called manufacturing.
Tertiary economic sector	Providing services including retail (shops), tourism, education, health and banking.
Quaternary economic sector	Section of employment that is knowledge-based, e.g. ICT and research.

What is development and how can we measure it ?

E	111

I	-(0)-
I	17
I	-11-
I	-0-
1	- 0

Development is the changes that a place goes through to improve the standard of living and quality of life, including income, equality and education.

Development involves reducing levels of poverty, increasing wealth, bringing benefits to all.

It should also reduce the gap between rich and poor, create equality between men, women and people of all race and religion, making everyone safe, make sure everyone has a right to education and that everyone has their needs met of food, water and shelter.

Many indicators can be used to measure development .

These can be social indicators such as Birth rate, Life expectancy or literacy rate

Or they can be economic indicators such as GDP (gross domestic product), GNI (Gross national income) or employment rate.

GDP and GNI give the total money in a country , and if it is then divided by the amount of people e in the country it is called GDP or GNI *per capita*. It is always in \$ so countries can be compared.

Using just an economic indicator isn't accurate, as it is an average (and there can be lots of inequality in a country) and it depends on what the government spends their money on as to whether is raises standard of living / quality of life.

Therefore the best measure is a **composite** (combined / more that one) indictor such as *HDI* (Human development index) which measures GNI, life expectancy and education.

Countries can be categorised into High Income Countries (HIC's), Low Income Countries (LIC's) or Newly Industrialising Countries (NIC's)

HIC's are richer countries with a Gross National Income of more than \$12.375/year, per person, e.g. UK, USA, Germany.

LIC's are poorer countries with a Gross National Income of less than \$1,045/year, per person, e.g. DR Congo and Mali.

MIC's are countries with a Gross National Income of between \$1,045 and \$12,735/year, per person. Split again between Lower Middle Income (\$1,045-\$4,126 and Upper Middle income). Lower MIC e.g. s India and Turkey. Upper MIC egs Brazil, China and South Africa.

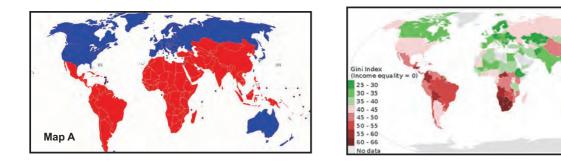

NIC's Countries that are developing fast because of rapid industrial growth in recent years, e.g. Brazil, Russia, India and China (the BRICs).

Countries develop in a variety of ways. Some have resources such as gold or oil. Some sell crops. Some use industry. Some are lucky enough to have features or climates that attract tourists e.g. Egypt. Many countries develop through trading with other countries and some have benefitted from the growth of Globalisation.

However, other countries find it harder to develop. This may be due to its physical geography such as poor climate (too hot or cold), natural hazards e.g. drought, few natural resources to use or sell or because its landlocked

Or it may find it hard to develop due to human causes such as suffering from conflict and political instability, poor infrastructure (roads / rail) or because there is little investment by business.

The Brandt Line

The Brandt Line In the 1980s, the Germany Chancellor, Willy Brandt defined the world as the 'Rich North' and the 'Poor South'. This is shown in Map A.

This is a useful starting point but is now very out-of-date and too simplistic. Many 'poor' countries have now developed and are LIC's or HIC's.

The modern way of classifying countries is by their income levels - measured in US\$ and adjusted **for Purchasing Power Parity (PPP)** so high costs of living in countries such as Sweden do not distort the figures. This is shown in Map B

Map B

Scatter graphs

A scatter graph is a type of graph shat shows the relationship between 2 indicators

The X-axis will show 1 indicator and the Y-axis the other.

Crosses are then placed to show the points where the 2 indicators meet

A **line of best fit** is then drawn. This line needs to have the same number of points on each side of the line

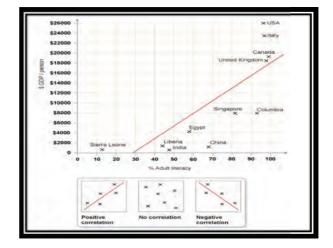

A **positive relationship** is where 1 indicator increases as the other indicator increases e.g. GNI and Life expectancy

A **negative relationship** is where 1 indicator increases as

the other indicator decrease e.g. GNI and Infant mortality **No correlation** is when there is no link between the 2

indicators.

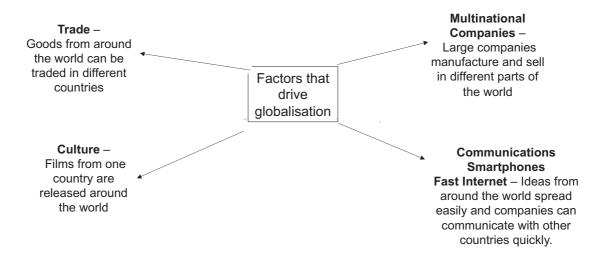

An **Anomaly** is where there is a relationship (+ or -) but some data does not fit the pattern

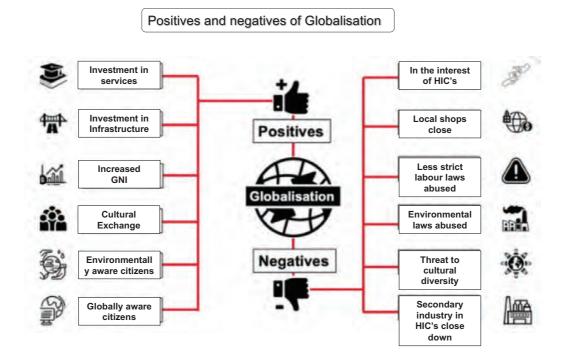

40

The growth of Globalisation

Globalisation: "When available goods and services, or social and cultural influences gradually become similar in all parts of the world"

Multinational Companies (MNC's)

TNC's and MNC's

TNC's = Trans-National Companies and MNC's = Multi-National Companies are

companies which operate in multiple countries. They usually have their headquarters' in HICs with production in LICs, selling worldwide. Walmart is the worlds richest company. It earned \$485.9 billion in 2017. This

means it has a revenue higher than 182 countries in the world!

MNCs have been successful in reducing costs (especially labour) to such minimal levels it leaves two main winners: The MNC and the Retailer.

 $\ensuremath{\textbf{Outsourcing}}$ is the process by which a company employs other companies to

make its products for it and not directly owning production facilities Many companies like Nike **outsource** production. This means they can drive costs down further by squeezing small factory owners who are desperate for contracts and avoid taking responsibility for poor working practices if they are exposed by the media.

Case-study 1 : Nike In Vietnam

Positives of Nike operating in Vietnam	Negatives of Nike operating in Vietnam
400,000 jobs have been	Factories gained reputation of
created and the skills of local	sweatshops
people have been improved	
Nike pay higher wages than	There were no trade unions or
most companies	strikes for pay in Vietnam
They help to create the	Nike has a large demand for
multiplier effect	water and energy
Helps to attract more MNC's	The company and advertising
	can undermine local culture
Nike pay tax which the	It often subcontracts its good
government can spend	to other companies which
	makes it hard to monitor
They can sometimes build	Nike can leave at any time –
infrastructure which can also	they moved from China when
benefit the country	the costs there increased

Case-study 2 : Apple

Apple in China

The location of Apples Headquarters are in Silicon Valley in San Francisco USA

Steve Jobs founded Apple in 1976

Apple built up \$100 billion in cash reserves (which is more than the US government

Cheap labour to manufacture one mobile phone in

China would be \$7.10 (roughly 8 hours work) but if the same phone was manufactured in America it would cost \$337

Apple outsource the making of their phones in China to a company called Foxconn.

Nets have had to be put up around the factory

buildings so it stops factory workers jumping to their deaths

Impacts on the environment

Environmental regulations are lower in China

Apple products are designed to use less material, smaller packaging and be free of toxic substances

Apple recycled used material, for example glass and metal can be reprocessed for a new product

Impacts on people in China

Many workers work long hours (more than 76 hours a week and 11 days in a row, with no breaks in a cramped and hot factory. They do not receive paid holiday or sickness benefits. Many workers have tried to protest against these conditions.

There have at least 12 suicide attempts in the spring of 2012

At least 62 workers fell sick after inhaling n-hexane (a chemical used to clean touch screens)

62% of factory workers thought the factory provided sufficient protective equipment to prevent work injuries

66% of the factory workers were partly proud to work for their factory

Impacts on people in America

Benefits for working for Apple such as paid holidays, health and life insurance

How ecosystems function

How ecosystems function keywords

Keyword	Definition
Ecosystem	A community of plants and animals and the environment in which they live. Ecosystems include both living (biotic) and non-living (abiotic) parts.
Biome	Very large ecosystems
Climate	Long term weather pattern in a particular region.
Semi-arid climate	A climate of hot temperatures and rainfall for only half of the year
Adapt / adaptation	Adjust or change
Transpiration	Evaporation from leaves, trees and vegetation
Photosynthesis	The process of converting light energy from the sun into chemical energy
Producer	Plants that create chemical energy from the suns light. Producers are at the bottom of the food chain.
Primary	Animals that eat vegetation (producers) in the food chain. These are
consumers	herbivores. These animals may be eaten by secondary consumers.
Secondary	Animals that are higher up the food chain and that eat primary
consumers	consumers

Keyword	
Tertiary	Tertiary consumers eat primary and secondary
consumer	consumers as their main source of food.
Decomposers	An organism such as fungus, worms, slugs that
	breaks down (decomposes) dead animals.
Xeraphytic	A type of plant that has adapted to survive in an
	environment with little water.
Biomass	The measure of all the plant or animal material in an
	area
Leaf litter	Leaves that have fallen to the ground and are
	decomposing
Stakeholder	A group of people who have an interest or concern in
	something

Global Biomes

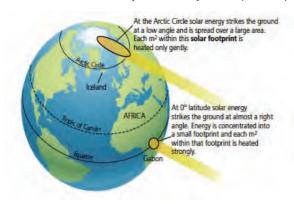

A Biome is a very large ecosystem

A **Ecosystem** is A community of plants and animals and the environment in which they live. Ecosystems include both living (biotic) and non-living (abiotic) parts.

The intensity of the sun's rays at the equator compared to the Poles creates differences in climate

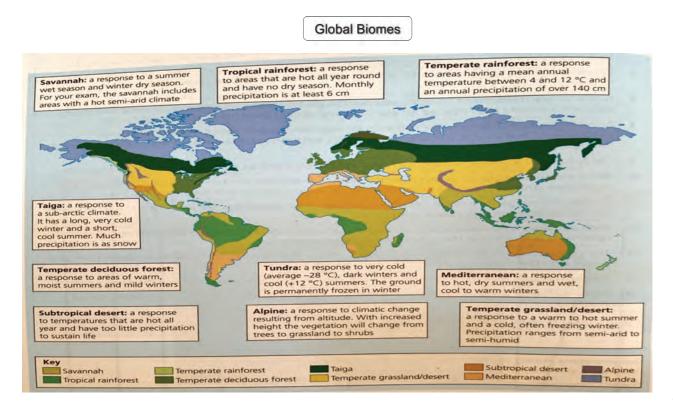

Climate is such an important factor in influencing the natural vegetation and wildlife of a region that **biomes** broadly match the world's climate zones.

Tropical rainforests grow in a band around the Equator where the equatorial climate is hot and wet

The **Semi arid grassland** is found in places that have hot summers and mild or warm winters,

47

Biome 1 : The Tropical Rainforest

Equatorial climate

Tropical rainforests are located in a band around the equator (Zero degrees latitude), mostly in the area between the Tropic of Cancer and the Tropic of Capricorn.

They are generally found in the West of continents, notably the Congo Basin in Africa, the Amazon in South America and also in Malaysia.

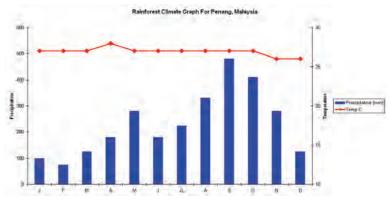

The equatorial climate is hot and wet all year,.

Temperatures are constant at 28°C, with very little variation.

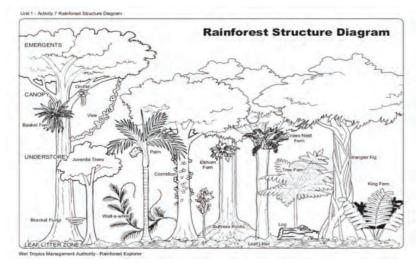

Rainfall is also constant , with between 1500 mm and 2000 mm of rainfall a year. The rainfall is created by the heat creating massive zones of **low pressure**

Any vegetation living in this Biome will have to **adapt** (*adapt means to adjust or change*) to this lack of rainfall for half of the year.

Vegetation in the Tropical Rainforest

Tropical Rainforest Structure

Plants are constantly competing for sunlight. They aim to grow as tall as possible to get as much light as possible

This has led to distinct layers in the Rainforest

The canopy layer blocks out up to 90% of the light to the layers below

The soil is very poor in the rainforest

Because the trees grow so tall, Buttress roots are needed to help the trees stand up

51

Vegetation in the Tropical Rainforest

Plant adaptations in the Rainforest

Because the trees grow so tall, Buttress roots are needed to help the trees stand up

Drip dip leaves make sure that the rainfall runs off

Shallow roots because although the soil is poor, due to the constant heat and humidity, biomass decomposes quickly and nutrients recycled.

Some leaves are waxy to repel rainwater, or have holes in them to let the rain go through

Climbing plants such as lianas, use the tree trunks to climb up to the sunlight

<section-header>

Energy flows

The main source of energy for all living things is sunlight. This is absorbed by producers such as plants. They convert the light energy from the sun into chemical energy by the process of **photosynthesis**.

This energy is passed on to animals when they eat the plants.

These animals are called herbivores or **primary consumers.**

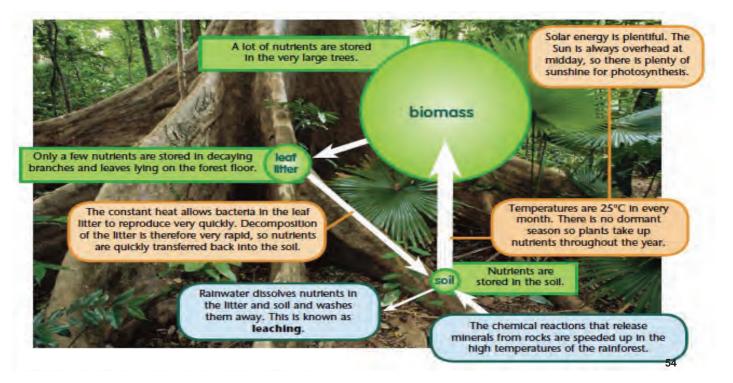

In turn, these are eaten by other animals called carnivores or **secondary consumers**.

An omnivore eats both vegetation and animals

This is called a food chain. Energy flows up the food chain .

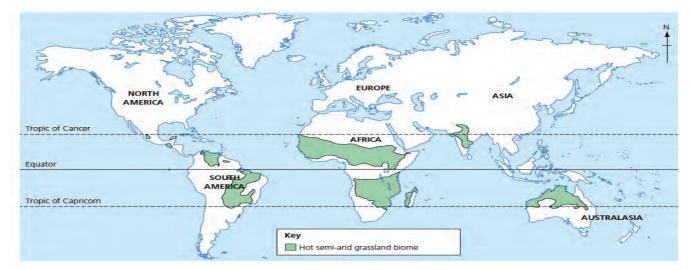

53

The Nutrient cycle in the Tropical Rainforest

Biome 2 : The Semi-Arid Grasslands

Semi-Arid Grassland Location

The Semi-Arid grassland climate is found between the tropics of Cancer and Capricorn in South America, Africa and Oceania.

There is none in Europe or North America.

They are found in zones between hot deserts and areas having a tropical climate

Semi-Arid Grassland Climate

The climate is hot all year due to the sun remaining high in the sky throughout the year. Mean temperature is 18° C.

Precipitation totals are lower than 600mm per year.

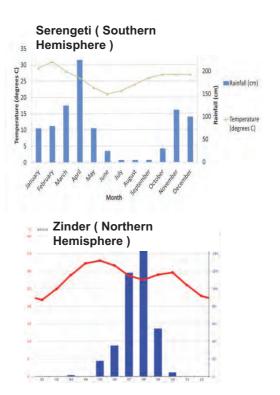

However, It is called a semi-Arid climate ('Semi' means half)

This is because it only has rainfall for half of the year (in heavy storms and high humidity) and then little or no rain for the other half of the year.

This means that it has 2 seasons – a wet season and a dry season.

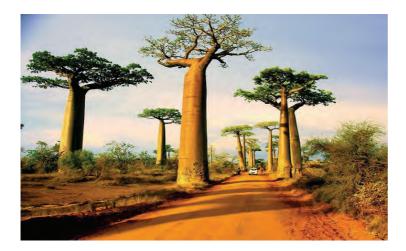

When the rain falls will depend on whether it is in the northern or southern hemisphere, but the key point is that it will only fall for half of the year.

Any vegetation living in this Biome will have to **adapt** (*adapt means to adjust or change*) to this lack of rainfall for half of the year.

57

Vegetation in the Semi-Arid Grassland Climate

Baobab Tree

Grows over 30m in height and 7m in diameter. It can live for thousands of years

Lots of shallow roots spread out from the tree. They collect water as soon as It rains

The thick bark is fire resistant

Few leaves reduce water lost by transpiration

Its large barrel-like trunk stores up to 500 litres of water

Vegetation in the Semi-Arid Grassland Climate

Acacia Tree

Broad flat canopy reduces water loss. It provides shade for animals

Thorns on branches deter animals from eating them

Long roots reach ground water deep underground

Small leaves with waxy skin reduce the amount of water lost through transpiration

Grows up to 20m in height and 2m in diameter

The baobab and acacia are examples of xerophytic (drought-resistant) trees found in this biome .

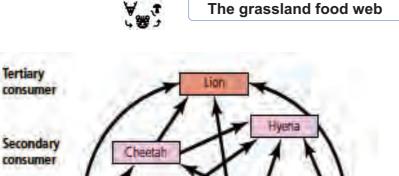

This means they can survive long periods with very little rainfall during the dry season of the year.

It is difficult for trees to grow so thick forests are not present.

Between the widely spaced trees and bushes there are also grasses that grow rapidly to 3-4m in height in the wet season.

Zebra

In the dry season they turn yellow and die back.

Giraffe

Acacia Tree

Rhinoceros

Grasses

Primary

consumer

Producers

Baboon

Energy flows

The main source of energy for all living things is sunlight. This is absorbed by producers such as plants. They convert the light energy from the sun into chemical energy by the process of **photosynthesis**.

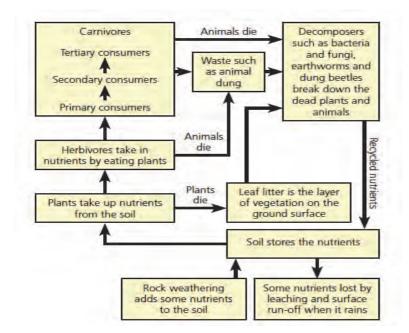

This energy is passed on to animals when they eat the plants.

These animals are called herbivores or **primary** consumers.

In turn, these are eaten by other animals called carnivores or **secondary consumers**.

This is called a food chain. Energy flows up the food chain .

The Nutrient cycle in the semi-arid grassland

As well as energy , plants need essential chemicals such as iron and nitrogen

These nutrients are recycled though the ecosystem between the soil, biomass and leaf litter

When pants and animals di, they decompose and the nutrients are released and returned to the soil

This process is called the nutrient cycle

61

Tourism

Tourism keywords

Keyword	Definition
Tourism	Is the industry where people travel for fun or business. It
	includes activities such as sightseeing and camping. It is the
	business of attracting, accommodating and entertaining
	tourists.
Tourist	People who travel for fun
Over-tourism	Where there are too many visitors to a particular destination
Multiplier effect	Where a change can cause a bigger change. There can be a
	'positive' multiplier effect or a 'negative' multiplier effect.
All-inclusive	This is where a holiday includes accommodation, meals, snacks
holiday	and all drinks. It can sometimes include other services such as
	sports.

Keyword Definition Sustainable This is sometimes known as 'Responsible tourism'. Tourism This is tourism that does not cause damage or change to the place that is visited and where you try to make a positive impact on the environment, culture and economy. Glacier Glaciers are masses of ice that fill valleys and hollow and slowly move downhill This is a form of tourism that involves tens of thousands of Mass Tourism people going to the same resort at the same time of the year. It is the most popular form of tourism. This is where money 'leaks' back out from a country it is Leakage spent in, back to another country. For example if you stay at a hotel in Spain, some of the money will not stay in Spain, but will leak back to the country that house the headquarters of the hotel Package A holiday organised by the travel agent, with arrangements for transport, transfer and accommodation Holiday

62

TOURISM

How important is Tourism ?

Tourism Is the industry where people travel for fun or business. It includes activities such as sightseeing and camping. It is the business of attracting, accommodating and entertaining tourists.

Tourism employs 330 million jobs – this is 1 in 10 global jobs

Tourism contributed approximately \$2.9 trillion to GDP – this accounts for 10.3 % of the worlds economy Tourism is worth more than £120 billion a year to the

UK

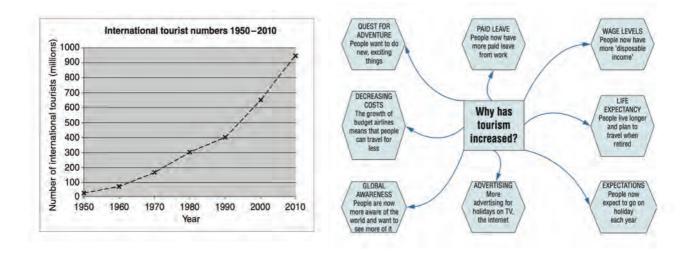

There were 1.5 billion tourist arrivals in 2019

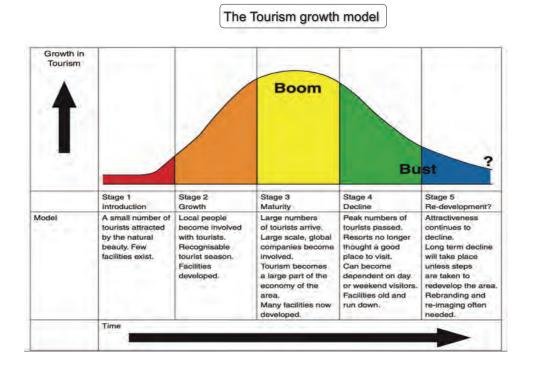

Tourism was responsible for 58% of global air travel

Projected travel and tourism decline due to COVID-19 is \$264.53 billion

64

Why has Tourism grown ?

What happens to a tourist area if the tourists find somewhere else to go and spend their money?

New tourist places develop; old resorts become run down, people want something new.

To keep bringing the tourists in, places have to make sure that they change and adapt and keep up to date, or they lose out

66

Sustainable / responsible Tourism

Sustainable Tourism is tourism that does not cause damage or change to the place that is visited and where you try to make a positive impact on the environment, culture and economy.

Responsible Tourism minimises the effects of Tourism Responsible Environmental Tourism can help the environment by looking after biodiversity, wilderness and natural and human heritage Responsible Social Tourism respects local culture and traditions. This leads to a greater understanding between tourists and local people Responsible Economic Tourism leads to financial benefits for the local people and is based on fair trade

Costa Rica

COSTA RICA LOCATION MAP

Facts about Costa Rica

Its GDP per capita is \$16,900. This makes it 63rd out of 189 countries

Its life expectancy is 79

Its death rate is 4.9

3.1 million tourists visited Costa Rica in 2019

Costa Rica is known for its 27 incredible national parks which are home to 5% of the worlds Biodiversity..

There are over 500,000 species of animals, including scarlet macaws, howler monkeys, colourful butterflies, humpback whales, iguanas, sea turtles, and

sloths.

There are currently 6 active and 60 dormant or extinct volcanoes

There are dozens of tour companies that specialize in river rafting, driving, scuba

diving, tubing, horseback riding, and even zip lining through the rainforest. One of the best-known Costa Rican mottos is "*pura vida*," which means "pure life."

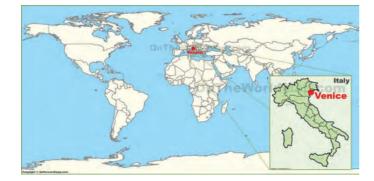

The cultures and the people are quite diverse, but many like to live by this simple sensibility to live life to the fullest, and this is probably why the country is

considered the happiest, according to the Happy Planet Index.

The phrase is also used as a greeting or as an answer when someone asks, "How are you?"

68

Location of Venice

Venice

Venice is a city in northern Italy.

It is built on more than 100 small islands in a lagoon in

the Adriatic Sea. It has no roads – just canals. Venice is known as 'The floating city', 'The city of Bridges' and 'The city of Canals' and is Its population is only 55,000

Between 26-30 million tourists visit each year.

Tourists visit to go on a Gondola on the canals, to visit the palaces and because it is known as one of the most romantic cities in the world

Many tourists who visit Venice come by Cruise ships and only stay for 1 day. About 30,000 cruise ship

passengers arrive in Venice each day.

70

Advantages of Tourism to Venice

600 cruise ships visit Venice each year

Tourism is the main economic activity in Venice bringing in \$450 million a year to Italy. The tourists need food, tours and souvenirs

The average tourist to Venice from a cruise ship spends about 180 euros (\$204) .

The cruise ship industry has more than 4000 permanent employees and many tens of thousands of indirect jobs from the pubs, cafes and shops.

The cruise ship only generate 8% of total emissions

for the areas in summer and 2% in winter

Venice

Disadvantages of Tourism to Venice

In June 2019 2 cruise ships collided. Luckily only 4 passengers were injured

The huge cruise ships do not fit in with the historic city

centre Most tourists on a cruise ship only visit for a day and therefore only buy food and souvenirs. They return to their cruise ship at night and do not stay in Venetian

hotels .

The huge number of tourists means that there is conflict with the local people.

There is a huge amount of overcrowding, litter waste and pollution from the cruise ships

The huge ships are damaging the cities ancient

foundations

Venice

Possible solutions to the cruise ship problem

Do nothing, and allow the cruise ships to continue as normal

Ban cruise ships entirely

Limit the number of cruise ships that are allowed to visit Venice

Increase the cost to cruise ships to visit Venice . The money raised would go towards protecting the buildings in the city.

Larger cruise ships would be diverted elsewhere and only ships of 55,000 tonnes or less would be allowed to continue into the city centre

Re-route ships away from Venice's city centre. Instead ships will dock at ports such as Fusina and Lombardia on the Italian mainland, three miles across the lagoon

Make day trippers pay an entrance fee to the city of £10. Tourist overnighting in the city would not have to pay as the tax is already included in their hotel rate

Tourism in Iceland

keywords

Keyword	Definition
Geothermal	This is thermal energy generated and stored in the earth.
energy	Water can be pumped into the ground where is will heat up.
	This can create cheap hot water or heated until it turns to
	steam and then turn a turbine to create cheap electricity.
	Geothermal energy is cost-effective, reliable, sustainable
	and environmentally friendly.
Hydroelectric	Hydroelectricity captures the energy of falling water to create
power	electricity. It is a clean and renewable source of energy
Geology	The study of rocks
Fertile soil	Soil rich in nutrients.
Lahar	A mudflow formed when volcanic material mixes with water from
	rainfall or snow melt
Pyroclastic flow	
Plate	A piece of the Earths crust

Keyword	Definition
Destructive	The plates move together and the oceanic plate moves
boundary	under (subducts) below the continental plate
Constructive	The plates move apart creating a gap. Magma rises up into the
boundary	gap
Glacier	Glaciers are masses of ice that fill valleys and hollows and
	slowly move downhill
Till	The unsorted mixture of material moved by a glacier
Moraine	Landforms made out of till dropped by the glacier as it
	moves
Freeze thaw	Freeze-thaw weathering is where water gets into cracks in rocks.
weathering	The water freezes and expands, putting pressure on the rock.
	The ice then thaws, releasing the pressure. If this process is
	repeated it can make bits of the rock fall off.
Plucking	When meltwater freezes onto the rock. AS the glacier moves
	forward it pulls pieces of rock out.

73

Iceland

Iceland is 1,300 miles north west of the UK

Iceland is about 2.5x smaller than the UK and has a population of only

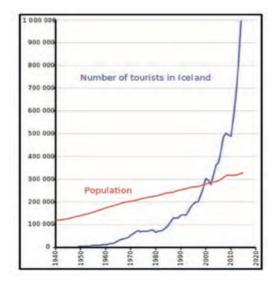

364,134 people (Derby has a population of 260,000 people) Its GNI per capita is \$37,065 compared to the UK's GNI of \$37,931

Its average life expectancy is 82 years compared to the UK's life expectancy of 80 years

The UK's %employment is 59% versus Iceland's % employment of 70%

Why do Tourists go to Iceland

2.7 million tourists visited Iceland in 2018

11% of its land area is covered by glaciers, and tourists come to visit its 269 named glaciers

Iceland is one of the most volcanic regions in the world with a huge number of active volcanoes. Tourists come to visit the volcanoes and see the tectonic plates

The Blue lagoon is probably the most famous attraction in Iceland, and is a geothermal spa made of heated seawater that is an amazing turquoise colour.

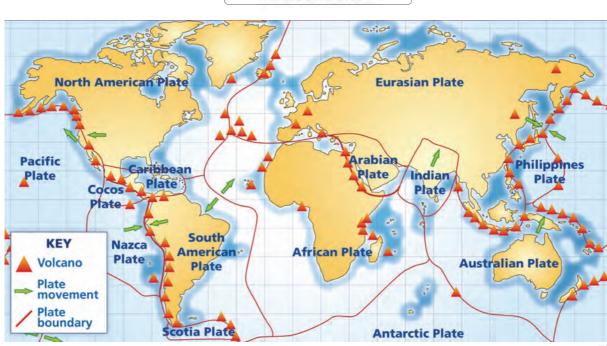

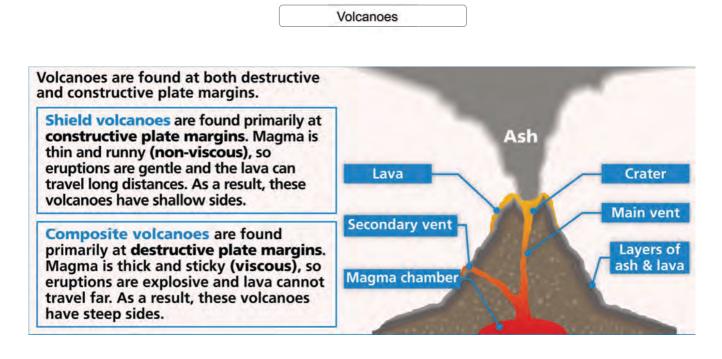

Plate boundaries

Effects of Volcanoes

Primary effects

Buildings, structures and homes are destroyed by Lava and pyroclastic flows

Communication and transport links are disrupted

People and animals are injured or killed by falling debris, lava, poisonous or

suffocating gases or pyroclastic flows People are left homeless

Crops and water supplied are contaminated by falling ash

Secondary effects

Pyroclastic flows can burn and destroy forests

Emergency aid may not reach those in need for extended periods

If volcanic material combines with water, destructive mudslides (Lahars) and landslides can occur.

Disease can spread because of contaminated water and poor sanitation

Reconstruction can be costly.

Lost tourism and trade can damage the local economy

Responses to Volcanoes

Advantages of living near to volcanoes

Immediate response

Evacuate anybody at risk, rescue and survivors and treat injuries

Extinguish any fires

Send aid workers, supplies, equipment and financial help to people affected

Recover any dead bodies

Set up temporary shelters (e.g. tents) for the homeless

Provide temporary supplies of food, water and energy for those in need

Long-term response

Rehouse those who have lost their homes

Reconstruct or repair damaged buildings

Improve monitoring and evacuation plans for any future disasters

Restore water, energy and gas supplies, and reconnect communication

links

Restore transport links

Boost the economy by promoting investment in the area.

Geothermal energy: This is thermal energy generated and stored in the earth. Water can be pumped into the ground where is will heat up. This can create cheap hot water or heated until it turns to steam and then turn a turbine to create cheap electricity. Geothermal energy is cost-effective, reliable, sustainable and environmentally friendly.

Tourism : people wish to visit volcanoes and so jobs are created in the tourism industry as guides or working in hotels and shops.

Fertile soil : The soil in volcanic areas is fertile because it is full of minerals from volcanic ash and lava. This makes it good for growing crops. Minerals ands stones : volcanic minerals are mined and so jobs are created and money earned

79

Case-study : Eyjafallojokull. March-May 2010

Primary effects

Volcanic ash contaminated local streams and water supplies killing plants and animals

Over 3,000 tonnes of CO2 per day were released into the atmosphere

Poor visibility and ash forced roads to close.

Schools and businesses were closed

People had to wear face masks and goggles

Secondary effects

Jokulhlaups (glacial floods) were caused by glacial melting

The loss of crops and livestock meant farmers lost valuable sources of income

Winds carried the ash over Europe, grounding over 100,000 flights. This

cost airlines around £130 million per day for 8 days

Tourism numbers decreased temporarily

Immediate responses

Rescue workers evacuated around 700 people

Farmers received financial support to cover the loss of profits

Temporary shelter, fresh water and food were provided for evacuees

Long-term responses

Homes and infrastructure were repaired

Government agencies promoted the volcano as an attraction to restore the tourism industry

Technology) e.g. drones) were used to further improve Iceland's volcanic monitoring systems

Benefits and negatives of tourism in Iceland

Benefits of Tourism visiting Iceland ?

In 2018, Iceland received over 2.7 million visitors, which is a 500% increase since 2010.

From 2010 to 2014, total tourism-related jobs in the

Icelandic economy increased 38 percent.

The average wage has increased by 6% and by 2028 93,000 Icelanders will have jobs directly linked to the tourist industry".

The wealth generated by tourism, "will allow Iceland to fully recover from the 2008 banking collapse, where many Icelanders lost jobs

Negatives of tourists visiting Iceland ?

Job opportunities created for the locals by the tourist industry are usually low-paid jobs, such as tour guides, waiters, life guards, jobs in travel agencies and so on.

The income tourist workers earn is low compared to the high price of goods in Iceland.

Food and gas prices have also been increasing for native Icelanders

There is a housing problem as people are renting out their properties to tourists because you make so much money. This is pushing up property prices and many lcelanders

are being forced out of the cities that they work in.

As more tourists from around the world come to visit, other countries' ideas and cultures are inserted into Iceland's society, which causes lose of culture and identity,

Iceland's energy is mainly supplied by geothermal and hydro power because of its

special geological location. But due to mass tourism, there's a rapidly increasing demand for energy supply, which causes more development on wildness areas as

geothermal plants are built near volcanoes and dams are built across rivers.

Iceland's soil is erodes easily due to its high content of volcanic ash. Off-trail hiking of tourists worsens soil erosion

How can Tourism in Iceland be made sustainable ?

Possible sustainable strategies

Restrict the number of tourists who can visit Iceland at any one time of year

Increase the cost of tourist attractions in Iceland

Introduce an additional 'tourist tax' which could be used to conserve wildlife and develop infrastructure

Introduce new regulations so that all new hotels and tourist infrastructure must be built in a sustainable manner

Ensure that all international visitors to Iceland are given a welcome talk on the importance of sustainable tourism when they first arrive

Issue fines to tourists for environmental damage, e.g. litter

Place signposts at all major tourist attractions with guidance on how to care for the environment

Encourage tourists to visit attractions in the north and the east to take pressure away from the south west of the country

Introduce a tourist visa, which tourists would have to apply for in advance of their trip.

In order to be successful in a visa application, they would have to pass a test on sustainable tourist practice in Iceland Employ rangers at major tourist hot-spots to monitor tourist behaviour and advise tourists on how to act responsibly and sustainably

Neuilly Bulgaria	£100 million	Lost land to Yugoslavia, Greece and Romania	20,000 men No conscription or air force 4 battleships	
Trianon Hungary	They were told to pay, but the amount was never fixed. Hungarian economy collapsed.	Land lost to Romania, Czechoslovakia, Yugoslavia and Austria	30,000 men No conscription 3 patrol boats	
Sevres Turkey 1920	They were told to pay, but the amount was never fixed.	Land lost to Greece. In Europe it lost all land apart from Constantinople (Istanbul) Empire was split up	50,000 men 7 sail boats, 6 torpedo boats Allies were allowed to keep troops in Turkey	
Lausanne Turkey 1923	Reparations cancelled	Regained land back from Greece Retained control of Dardanelles and Bosphorus Straits.	Dardanelles straits had to be open to all. Right to decide own army size	8

Treaty of Versailles – Key Terms

Term	Definition	
Isolationism	A policy in which a country does not get	
	involved in foreign affairs.	
Ratify	Agree with or make official	
Abdicate	To give up the throne of a country – such as	
	Kaiser Wilhelm in 1918	
Weimar Republic	The democratic government that ran Germany	
	from 1919-1932	
Weimar	The rules setting out how to govern Germany	
Constitution	during the Weimar era.	
Democratic	System of government where people vote for	
	their leader.	
Hyperinflation	When money becomes worthless	

Term	Definition
Diktat	A forced treaty or 'dictated peace. The Germans called the TOV a
	'Diktat'.
Clause	A term in an agreement or treaty
Demilitarise	To remove all military/weapons from an area
Anschluss	The union between Germany and Austria
League of	Formed under the TOV – a group of countries that were formed to
Nations	keep the peace
Conscription	Forced military service
Mandates	A former colony that was given to the LON to run it was ready to
	run itself
Propaganda	Using the media to persuade people to think or behave in a certain
	way.

Was the Treaty of Versailles fair?

YES	NO
It seemed right that the losing	6 million Germans lived outside Germany – they feared persecution.
countries should pay for the	
damage.	
Germany had inflicted a similarly	Many felt a harsh TOV would cause another war.
harsh treaty on Russia in 1917.	
Europe was falling apart - the	Germany felt vulnerable as their military had been reduced.
peace makers had to act quickly.	Germany had to accept total blame for the war even though all had
	been involved in causing the war.
	It was a Diktat. Germany though the peace would be based on
	Wilson's 14 Points – if they knew how few would make it through
	they might not have signed the armistice to begin with.
	The reparations crippled Germany
	Many new countries united people who didn't want to be together
	leading to many bloody Civil Wars.
	The Treaty of Sevres was so bad that it had to be replaced by the
	Treaty of Lausanne.

Many new countries were made after WWI - countries like Czechoslovakia did well.

It had resources and was well respected in Europe. Poland was created as a barrier against Russia, but was weak.

Poland was given the Polish Corridor from Germany and the Germans hated being Polish.

Poland was surrounded by enemies.

Reactions to Versailles

	Leader	Public
	Lloyd-George felt the TOV had been too harsh.	The public believed the propaganda and had no sympathy for
c	He worried about those who had been separated from Germany and	the Germans.
Britain	that the reparations had crippled its economy so it couldn't trade.	People had suffered and wanted to see Germany 'pay'.
ш		People felt the TOV could have (and should have) been much
		harsher.
	Clemenceau wanted no army for Germany & that the Rhineland	Furious that the treaty wasn't harsher!
Ð	should have been taken away completely.	The French voted Clemenceau out of office for doing a poor job.
France	The reparations weren't high enough either.	
LL.	Invaded the Ruhr with Belgium in 1923 when Germany missed its	
	reparations payment.	
	Wilson was devastated at the harshness of the treaty.	Wanted to follow a policy of isolationism to avoid future
∢	He was pleased the LON had been created but upset his 14 points	conflicts.
USA	had been ignored.	The Senate (government) refused to sign the Treaty so the USA
The	In 1924 he died of a stroke letting the Republicans into office who	couldn't join the LON.
	followed Isolationism.	

Reactions to Versailles

	Impact	Significance
	Shock at the harshness.	They became known as the 'November Criminals' and the 'Stab in
	The Diktat was neither expected nor justified.	the back' theory was born.
	The government had no choice but to sign on 28th June 1919	The Weimar government faced uprisings from both the left and right
È	Germany lost 16% of its coal, 48% of its steel.	wing extremists.
Germany	6 million Germans now lived in another country.	Germany claimed 763,000 had died of starvation by 1921.
Ge	Ruhr invaded by France in 1923. German government ordered	Germany was angry and humiliated.
	factories to shut down in passive resistance.	Hyperinflation destroyed the German economy and allowed Hitler
	Money was printed to pay the striking workers leading to	and the Nazi party to attempt to seize power in November 1923 in the

	The people of Turkey overthrew their government and threatened	By signing a new treaty the allies undermined all the others and
Ye	war unless a new Treaty was signed.	people like Hitler and Mussolini knew it.
Turkey	In 1923 the allies signed the Treaty of Lausanne.	
D	Much of Austria's industry was given to Czechoslovakia.	Austria's economy collapsed in 1921
Austria	Its empire was completely broken up.	

Big 3: Satisfaction

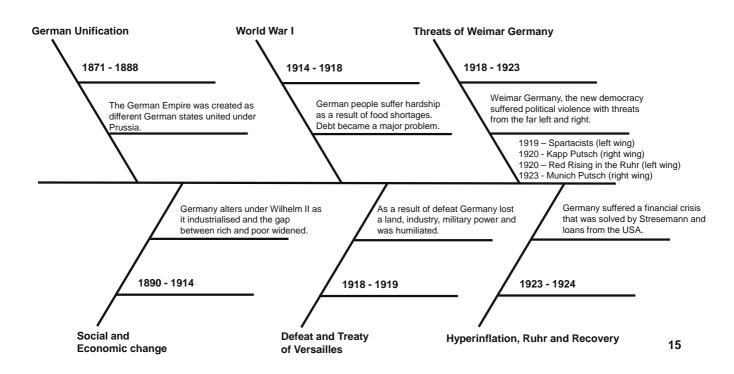

Name	Country	Aim achieved?	Aim not achieved?
Georges		Germany had to accept the War Guilt Clause – Clause 231.	Guilt was not enough - they wanted Germany destroyed.
Clemenceau		This damaged Germany PRIDE	Clemenceau was voted out.
	France	Armed forced were all reduced	Clemenceau wanted NO ARMY
a fee	France	Rhineland demilitarised	People wanted it to be INDEPENDENT
120		Reparations figure was set at 6.6 billion in 1921	The war cost France 200 billion Francs – not enough money!
2.00		France gained coal from the Saar for 15 years.	They wanted the Saar forever
David Lloyd-		War Guilt Clause pleased the British.	Lloyd-George worried the Treaty was too harsh and that
George		British received Reparations even though little damage had been	Germany would seek revenge in another 25 years.
0	Britain	done at home.	Germany economy was crippled by the reparations - they
-		Navy reduced meant Britain maintained its dominance.	could not trade with anyone
SE -		Britain gained control of many German colonies	
Woodrow Wilson		Many smaller countries were given their independence - such as	Parts of Germany were given away to other countries -
		Czechoslovakia.	Germany didn't think this was fair
		The LON was created, 42 countries joined in 1920	The USA senate refused to join the LON.
	USA	Those countries agreed to work together to avoid future wars	The USA began a policy of Isolationism.
			Wilson felt the TOV was too harsh and they would seek
			revenge

13

GERMANY: Was democracy a success in Germany between 1890-1928?

14

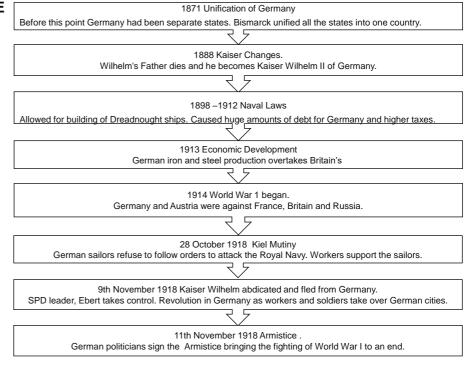

Germany 1890 – 1919

Germany before World War ONE

Problems faced by the Kaiser		
Debt	Germany was in debt as the Kaiser was spending lots of money on building up his navy.	
Socialists	The Socialists (who did not like the Kaiser) got 1/3 of votes in elections to the Reichstag.	
Competition	Germany was competing with Britain and other nations over the size of the militaries and empires.	
Key Individual	Details	

Rey maividual	Details
Kaiser Wilhelm II	Leader of Germany. Not elected.
	Wanted to rival Britain's empire (a
	place in the sun) and Navy.
	Related to the British Royal family
	 his grandmother was Queen
	Victoria
	Jealous of his cousins' empires

16

Germany before World War ONE

Keyword	Definition		
Kaiser	Emperor and leader of Germany		
Reichstag	German Parliament.		
	Only men over 25 could vote. The Kaiser controlled it.		
Socialism	Ideology that wants people to be equal.		
	Opposed to the Kaiser and his power.		
Communism	Left wing ideology that believe in equality.		
	Wanted the workers to run Germany.		
SPD	Socialist Party of Germany.		
	Supported by the workers.		
	Did not like the Kaiser.		
Dreadnought	Powerful battleship.		
Trade Unions	Represented workers and tried to improve conditions		
	for them.		
	Did not like the Kaiser.		
Weltpolitik	World Policy. Germany trying to gain an empire like		
	Britain's.		
	They took over countries such as Kaiser Wilhelm land		
	and Togoland.		
Navy Laws	Granted money for the building of Dreadnoughts.		
	Left Germany in debt.		

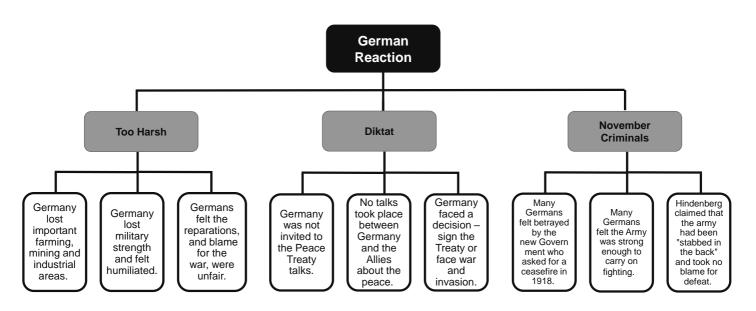

Problems c	aused by World War One
Bankrupt	Germany had borrowed money from USA. Factories were exhausted and had only produced material for the war. War pensions would cost the government a lot of money.
Society Divided	Some factory owners had made a lot of money Workers thought this was unfair as they had to put up with rationing and food shortages. Women had worked in the factories whilst most men thought their place was in the kitchen.
Politically unstable	People felt betrayed by the government and thought it was their fault Germany lost. They were called the November Criminals.
Leadership	9 th November 1918 the Kaiser abdicated (resigned) as leader of Germany

The impact of the Treaty of Versailles

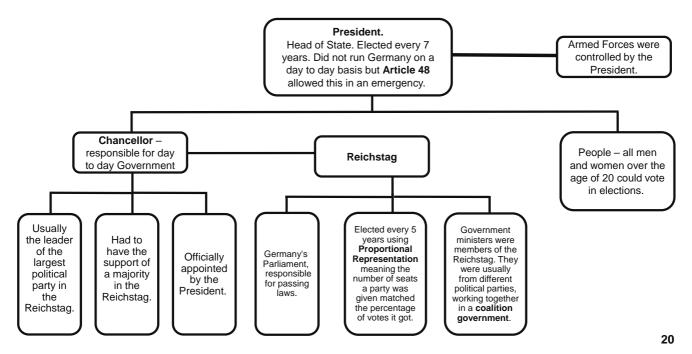

Terms	Detail
	Clause 231
War Guilt	The war was Germanys fault
	It must pay the full cost of the war
Reparations	Set at £6.6 billion
	Germany had to hand over its colonies
	Areas of land taken and given to
Lond	France – Alsace Lorraine
Land	Czechoslovakia - Hultschin
	Poland - Silesia
	Danzig placed under LON control
A	Limited to 100,000
Army	Never join with Austria again – no Anschluss
Dhinaland	No troops allowed to be placed in the de-militarised zone between
Rhineland	Germany and France
Saar	Given to the LON for 15 years but France could take coal for that time.

18

What did Germans think of the Treaty of Versailles?

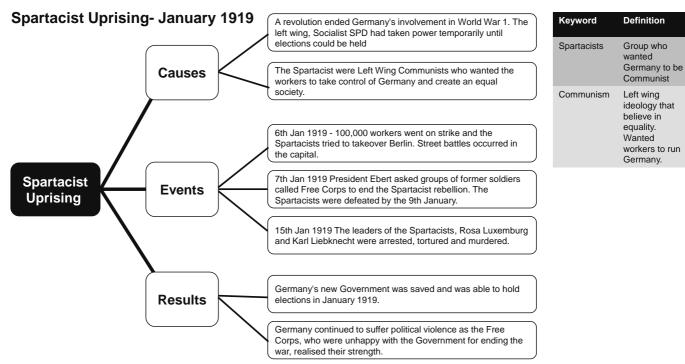

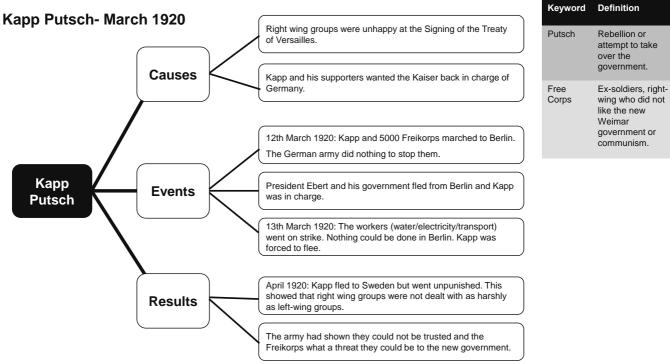

The Structure of Government in Weimar Germany

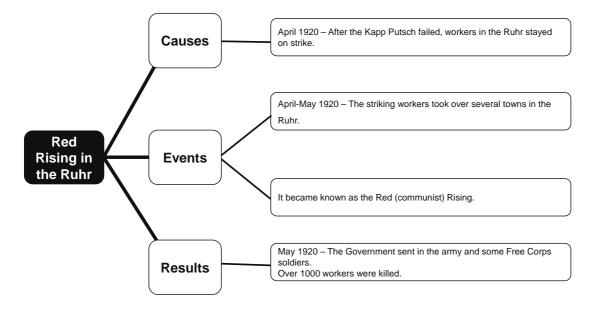

Weimar Republic - Structure

Vould the Wei	mar Republic work?		Keyword	Definition
	Proportional representation	Smaller parties got more of a say.	Article 48	Part of the Weimar Constitution that gave the Presi the right to rule in crisis without the Reichstag.
	meant the system was fairer.		Coalition Government	Government with more than one party in it. Often le disagreements.
Disadvantages	Article 48 meant the President could do whatever he wanted	Proportional representation led to coalition governments These often collapsed.	Proportional Representation	% votes in an election = % seats in the Reichstag.
	in an emergency. Not very democratic.	This made it hard to achieve anything.	Reichstag	German Parliament

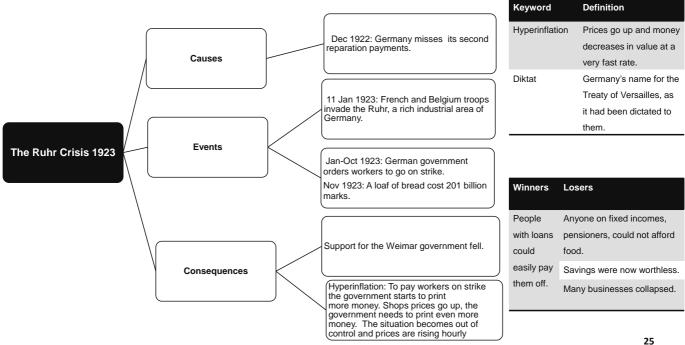

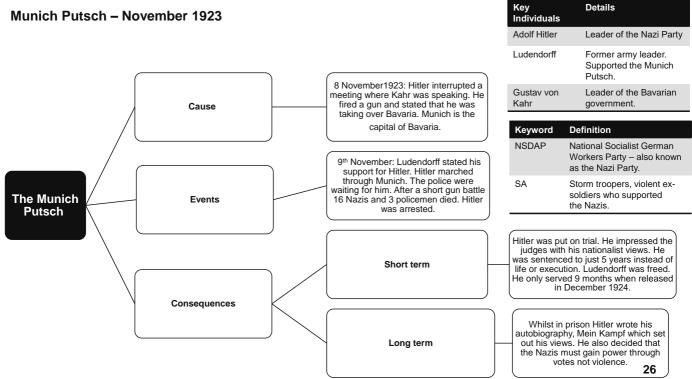

Red Rising in the Ruhr- March 1920 (following the Kapp Putsch)

24

Ruhr Crisis- 1923-1924

Munich Putsch – November 1923

Weimar Recovery – Stresemann Recovery

Problem	Solution
Hyperinflation	Stresemann introduced a new currency, the Rentenmark.
	Prices were brought back under control.
French troops	Started to pay reparations.
in the Ruhr	The French left the Ruhr
Germany is	Stresemann signed the Locarno Treaty in 1925.
not trusted by	Locarno meant Germany accepted the TOV.
other countries	In 1926 to Germany being allowed to join the League of
	Nations.
The economy	Stresemann signed the Dawes Plan in 1924 with the
is not doing	USA.
well	This lent Germany 800 million gold marks to help pay
	reparations and re-build the economy.
	A further deal in 1929, Young Plan, gave Germany longer
	to pay the reparations.

Consequences		
The economy began to grow and hyperinflation was brought under control.		
People with savings did not get their money back and were unhappy with the government.		
Germany was now too reliant on US loans.		
Support for the Nazi party fell.		
Key Details Individuals		
Stresemann	Foreign Minister of Germany 1923-29	

US politician who negotiated the

Dawes Plan.

Charles

Details

Weimar Culture

Торіс	Detail
Literature	All Quiet on the Western Front, an anti-war book became
	a best seller.
Nightlife	Jazz music was popular in clubs.
	Increased freedom allowed for transvestite evenings at
	clubs.
Art	Artists like Grosz began to paint ordinary people and their
	lives for the first time.
Cinema	Marlene Dietrich was a worldwide movie star.
	Metropolis was the most advanced film of the decade.
Design	Bauhaus, with its focus on simplicity, became the most
	popular school of design.

Consequences

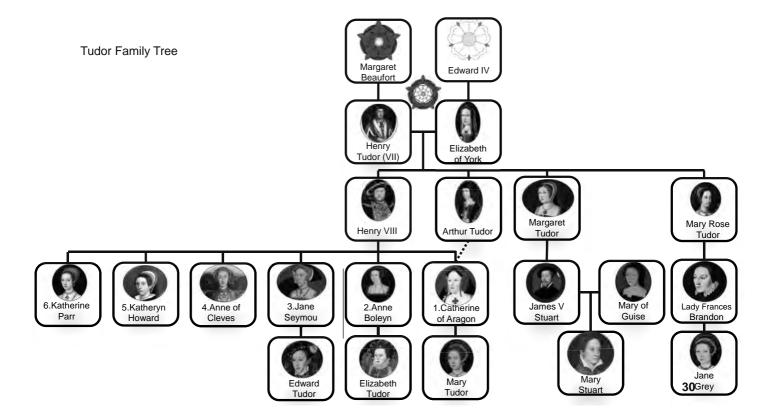

Lack of censorship meant artists had more freedom. However, right wing groups thought it was decadent. The extremists (Nazis) felt new culture reflected a decline in Germany.

Berlin became a culture capital and even rivalled Paris.

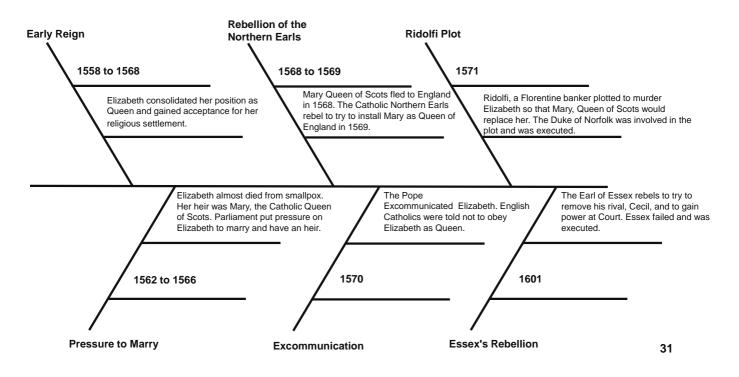

Key Individu als	Details
George Grosz	Famous artist from the Weimar period
Marlene Dietrich	Famous German movie star

BRITAIN: How successful was Elizabeth in her early reign?

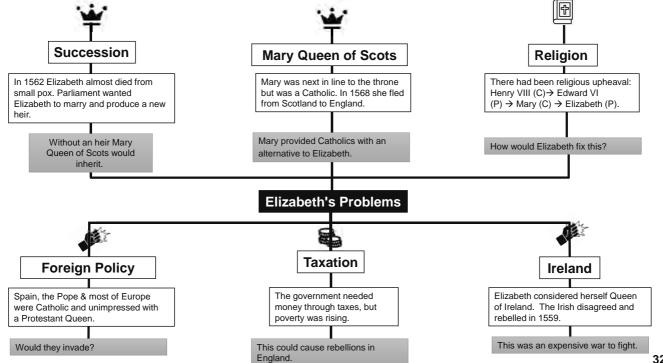

29

Elizabethan England Unit

Elizabeth: Problems

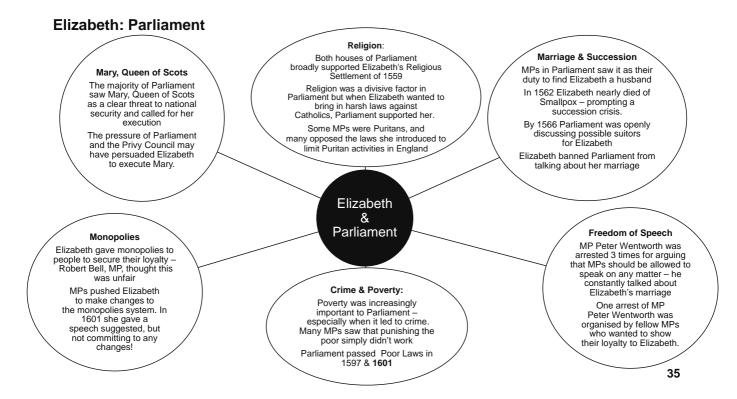

Elizabeth: Court key terms

TERM	DEFINITION
Inherit	To gain possessions after someone dies
Treason	Attempt to kill a King/Queen. Punishable by death
Royal court	Nobles, advisers & others who surrounded the Queen
Nobility	Earls, dukes, lords & ladies.
	Special rights/privileges
Secretary of	The leader of the Privy Council – a very powerful
State	position.
	For most of Elizabeth's reign it was William Cecil.

TERM	DEFINITION
Militia	A non-professional army raised for a rebellion/war
Privy councillor	A King/Queens private councillor. Usually a great noble landowner. Exclusion from the PC could lead to rebellion.
gentry	High social class, below nobility, could be a JP.
patronage	Land/title's/power given to ensure an individual's support.

Elizabeth: Court

	ELIZABETHS COURT			KEY INDIVIDUALS

Before the Anglo-Saxons

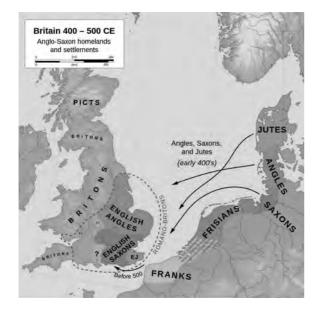

Date	Event	Detail
Before	First	The first people to live in Britain were immigrants.
4000BC	Britons	They arrived from Europe and were hunter-gatherers.
4000BC	Farmers arrive	Farmers from Europe arrived in Britain bringing seeds to grow crops and animals. They created farms and built homes.
500- 43BC	New settlers	New waves of settlers from Europe arrive: -Beaker people: named after the beaker-shaped pottery cups they made -Celts: farmers who also were fierce fighters and fought between themselves as well as people already in Britain.
43- 401AD	Romans arrive	Romans from Italy conquer most of the British tribes. They rule for over 400 years; Britain becomes a part of the Roman Empire.
401AD onwards	Roman Empire falls	The Romans in Britain leave to defend their homeland. New tribes arrive and invade from Denmark and northern Germany looking for a better climate and good farmland. They were known as the Angles, Saxons and Jutes. They soon became known as the Anglo-Saxons and after fighting with the British tribes, they capture most of Britain (except for Cornwall, Wales and the far north)

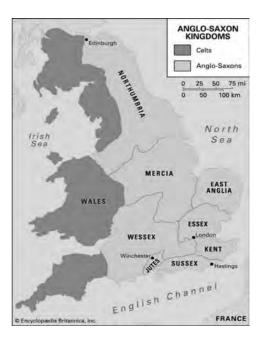

Medieval

Keyword	Definition

Medieval

Viking invasion of Britain

Date	Event	Detail
Mid-	Vikings	The people of Scandinavia (Norway, Denmark and
700s AD	start to explore	Sweden) began to explore, raid and invade countries around them.
		They sailed to: Britain, Ireland, France, Spain and Italy.
		Others travelled to places as far as Israel, Greenland and America.
		They were known as the Vikings or Northmen.
790s AD	Viking raids on Britain	The Vikings attacked Britain because they had traded goods with the Anglo-Saxons for many years and knew of their wealth.
793 AD	Raid of Lindisfarne	The first recorded Viking raid was on a monastery at Lindisfarne in Northumbria.
795 AD	Attack on Iona	The Vikings attacked the Isle of Iona in Scotland.
850 AD	Settlers	Vikings decided to settle in Britain. They landed along the eastern coast and built large, well-protected camps. Soon they captured British towns and villages.

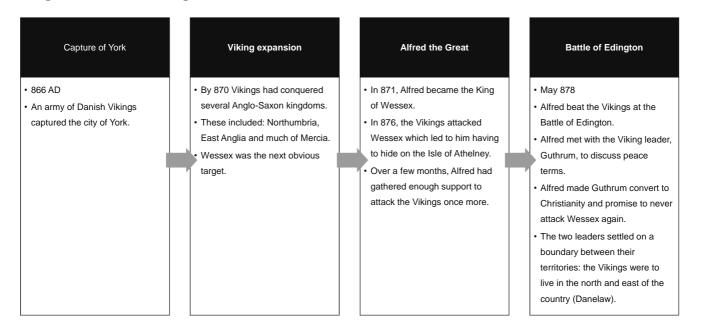

Medieval

Viking clashes with the Anglo-Saxons

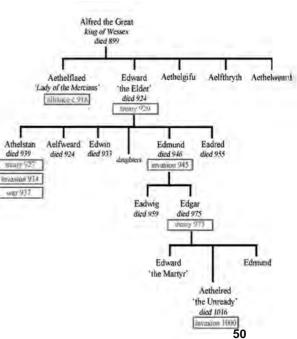

49

Medieval

Alfred the Great

Short term Significance	Long term Significance	
Alfred united the Anglo-Saxons to fight for him by promoting himself as the defender of Christianity against the heathen Vikings.	Alfred's grandson, Athelstan, became the first King to control the whole of England, around 927 and he defeated the Vikings in the final large battel at Brunanburh in 937.	
Alfred defeated the Vikings at the Battle of Edington and made Guthrum agree to peace terms.	By the time Alfred's great-grandson (Edgar the peaceful) became King in 959, the country was settled more than it had been for generations.	
After the peace with Guthrum, Alfred built burhs (fortresses or castles) across the country from 880s to strengthen England's defences.	Alfred encouraged all young noble men to learn English and translated many books from Latin to English. This created a common language which influences our language today.	
Other Anglo-Saxon kingdoms in England saw Alfred as their 'overlord' or the dominant ruler over them.	Under Alfred's rule, the Anglo-Saxons began to all themselves Angelcynn- the English for the first time; this started the creation of an English identity.	
Alfred created an English law-code which focused on defending the weak.	This was the start of a shared system throughout England and unified the legal system which had influenced our system today.	

Aethelred 'The Unready'

Date	Event	Detail
975	Death of Edgar	After years of peace, Edgar the Peaceful died. He had 2 sons by 2 different mothers, Edward (oldest) and Aethelred (youngest). Edward became the King when Edgar died.
978	Edward murdered	Supporters of Aethelred murdered his half-brother Edward. Aethelred became King but was considered a poor judge of character and was taken advantage of by his advisors.
991	Vikings arrive	A huge Viking army, led by the Dane Sven Forkbeard and the Norweigan Olaf Tryggvason, arrived at Folkestone in a fleet of over 90 ships.
991	Battle of Maldon	The Vikings defeat the English. Aethelred paid them to leave and the taxes raised to pay for this became known as Danegeld. This cost a fortune- £1.8 million in today's money. The increase in taxes angered the English.

Date	Event	Detail
1002	Normandy	The Vikings had been sheltering in Normandy (northern France) as the Normans were descendants of Vikings who had settled in Normandy a 100 year before. Aethelred made a deal with the Duke of Normandy who did not want the Vikings in his land. The agreed to support each other against the Vikings- common enemy. This agreement would stop the Vikings using Normandy as a base to attack England. Aethelred sealed the agreement by marry the Duke of Normandy's sister, Emma of Normandy.
Nov 1002 1013	St Brice's Day Massacre Forkbeard's	Aethelred carried out a mass killing of all Viking men, women and children that he found south of the Danelaw. Forkbeard wanted revenge as his sister, Gunhilda was
1013	revenge	murdered in the massacre; so he summons and army and conquers England. Aethelred flees.

51

King Canute's North Sea Empire

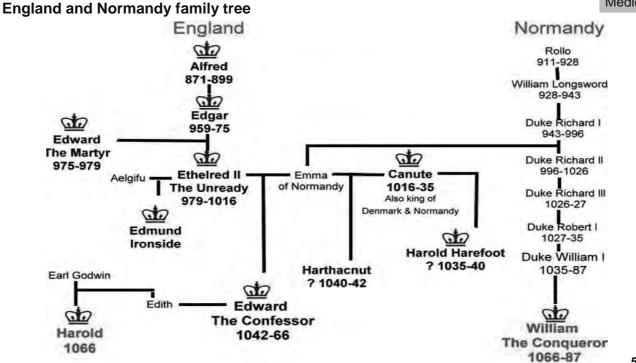

Date	Event	Detail
1014	Forkbeard dies	When Forkbeard dies, his young son, Canute, succeeds him. Aethelred returns to England and forces Canute back to Denmark. Aethelred reclaims the throne and his position as King.
1014- 16	Rebellion	Canute's supporters in England rebel against Aethelred; even Aethelred's son joins the rebels.
April 1016	Aethelred's death	Aethelred dies and his son, Edmund, becomes King.
Dec 1016	Battle of Assandun	Canute beats Edmund at the Battle of Assandun. Canute and Edmund reach an agreement: -Wessex will belong to Edmund -the rest of the country will be run by Canute -when one of them dies, the other will inherit the land About a month later, Edmund died and Canute became King of all of England.

Britain became Canute's main domain as it was his richest kingdom. He also inherited the kingdoms of Denmark, Norway and parts of Sweden too.

Medieval

Medieval

Canute's Britain		Medieval
Positives Trustworthy English nobles were left to rule their own areas.	Negatives Hostile takeover at the start of his reign with a lot of violence.	Two of her sons, Edward (her son with Aethelred) and Harthacnut (her son with Canute) became Kings of England
Peaceful time and free from Viking raids.	He was tough with those Anglo- Saxons he thought might rebel against him.	Emma of Normandy Emma brought lands
Brought back the popular and peaceful laws of Edgar the Peaceful.	Ordered the execution of many powerful Anglo-Saxons.	Emma was renowned for being good with money.
Saw Britain as his main domain rather than a Danish colony.	Transferred riches back to Denmark and gave Danish nobles the best land.	She helped to improve relations with the Church and bring peace to England.

Henry II

Medieval

The Angevin Empire- Henry II

IRELAND

When 'King' Dermot of Leinster asked Henry II for help to fight another Irish King, Henry sent an army led by the Earl of Pembroke. When Dermot died, the English took over so much land they controlled more than the Irish. When Henry II visited Ireland in 1171, he was recognised as the overlord.

ENGLAND

Inherited when King Stephen died in 1154. Henry II's grandfather had been King of England.

NORMANDY Inherited from his mother, Matilda,

ANJOU, MAINE & TOURAINE Inherited from his father,

Inherited from his father, Geoffrey of Anjou.

BRITTANY

Acquired when Henry II invaded and then married one of his sons off to the Duchess of Brittany.

63

Medieval

The Hundred Years War 1337-1453	Economic	The French threatened to take over Gascony where much of English wine was produced and then brought over to England and taxed.
	Political	France also threatened Flanders where the English sold wool to be turned into cloth. Edward III thought he had a better claim to the throne than the actual King of France at the time.
Causes	Social	The French had offered to help the Scots who Edward was in conflict with. The people in Britain would lose their businesses and jobs in France took over Flanders as the wool trade was the main one in Britain.
	Stage 1: 1337-60	Edward III won the Battles of Crecy and Poitiers; gaining control of Gascony and Calais.
The Hundred Years War	Stage 2: 1370 Stage 3: 1413-53	The French won back some land they had lost. Henry V becomes King of England and after winning the Battle of Agincourt he tightens his grip on France by taking back Normandy. When Henry V's son becomes King he loses most of the land his father had gained in France.
	Short term	Some areas of France were devasted with buildings, crops and animals destroyed.
Consequences		France became united under one King.
	Medium term	England lost money due to losing important territory like Normandy.
		Gunpower, canons and handguns were used more in battle.
		Increased nationalist feeling in both France and England.
	Long term	The English identity developed- the country saw itself 'apart' from Europe. England looked to conquer lands outside of Europe instead which developed into an overseas Empire.

Musical Elements

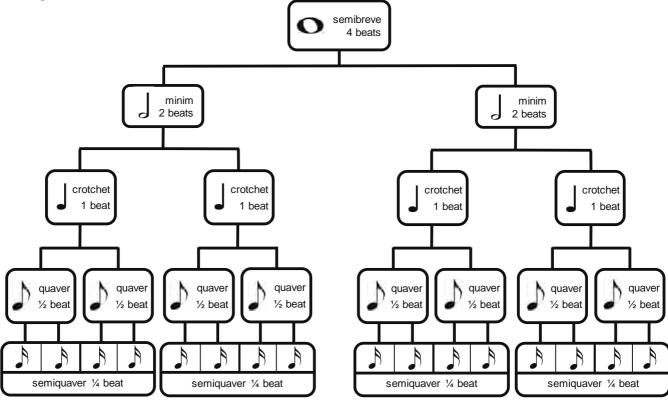

Keyword	Definition	Example
Pulse	The beat of the music. Every piece of music has a heartbeat. It doesn't need to be played by drums - you can 'feel' the beat.	"the pulse of the music is steady"
Tempo	The speed of the music. Music can change tempo within a piece. We often describe it using Italian words	"the tempo is fast"
Pitch	How high or how low a sound is.	"the music is high"
Dynamics	The Volume of the Music. Music can change dynamics within a piece. We often describe it using Italian words	"the music is quiet and then gets louder"
Structure	Music is divided into sections. The order of these sections create structure. For example verse and chorus/ Binary/Ternary	"the music starts with an 'A' section"
Texture	How the different musical layers combine. A single melody creates a thin sound. Adding more parts/layers creates a thicker sound.	"there are lots of instruments playing lots of different melodies"
Timbre	Each instrument has a unique sound – this individual sound is its timbre. When describing sound first try to describe the instrument and then how it is played	" the flute has a warm timbre when played low down"
Rhythm	Each note can have a long or short duration. Putting different notes together creates a rhythm	"there are lots of crotchet rhythms in this piece"
Melody	The 'tune' of the music – the part we sing along to	" the melody of this song is made up of lots of repeated sections"

Rhythm - note durations

Rhythm

4 Beats in a bar

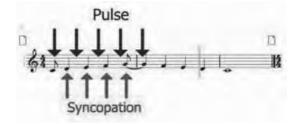

3 Beats in a bar

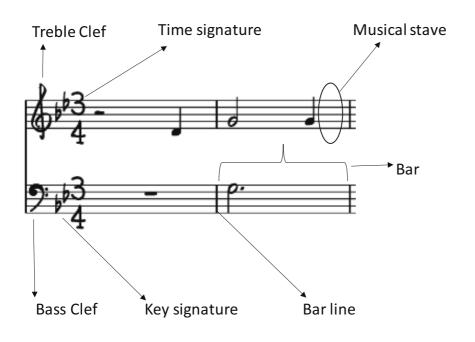

Bar line - this divides up the music: You are allowed so many beats in each bar.

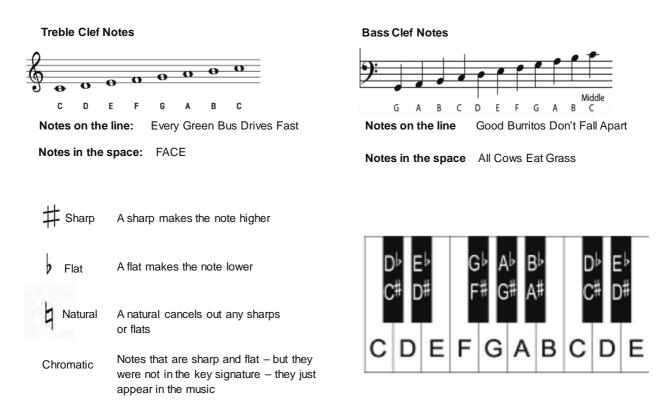

Syncopated Rhythm: playing on the weak beats of the bar (like the offbeat)

Musical Notation

Pitch – how high or low a note is

Melody

Keyword	Definition	Example
Conjunct	The notes of the melody move in a step-wise motion. They are next door to each other.	
Disjunct	The notes of the melody have large gaps between them. They move in jumps and leaps.	

Articulation

Keyword	Definition	Example
Staccato	The notes are played in a detached way (very short) Shown by a dot over or under the note head	ŕ
Legato	The notes are played in a very smooth way. Shown by a curved line over or under the note head	IJ

Tonality

Keyword	Definition
Major	The music has a 'happy' feel to it.
Minor	The music as a 'sad' feel to it
Atonal	The music is not in any key

Harmony

Keyword	Definition
Diatonic	The music has no extra sharps and flats in it – the music sounds 'normal'
Chromatic	There are lots of extra sharps and flats in the music

Key Signature	Major Key	Minor Key
No Sharps or flats	C Major	A Minor
1 Sharp	G Major	E Minor
2 Sharps	D Major	B Minor
1 Flat	F Major	D Minor
2 Flats	Bb Major	G Minor

Composing

Try to choose chords from the same key: Below are chords in C major and A minor

Chords in A Major	Chords in Aminor
C: CEG	Am: ACE
Dm: DFA	Bm: BDF
F: FAC	Dm: DFA
G: GBD	Em: EGB or E: EG#B
Am: ACE	F: FAC

Whatever notes you use in the chord then try to use these for the melody

E.g. C Chord uses C, E, G - so when creating a melody make C, E or G your most important notes

Include Passing Notes to make it more interesting (these are notes that do not belong to the chord but that help you pass from one to the next e.g. C $D \in F G$

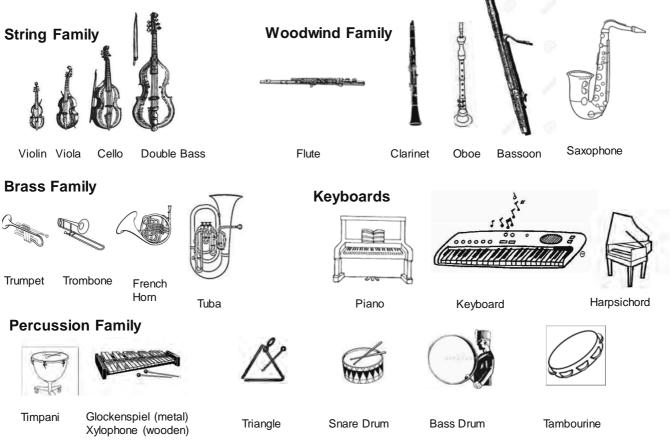

11

Musical Structures

Keyword	Definition
Structure	The way different sections of music are put together
Binary	Two contrasting sections of music which are not repeated later on in the piece: AB
Ternary	Two contrasting sections of music, where the first section is repeated later on: ABA#
32 Bar song form	Type of structure used in musicals AABA – each section is 8 bars long
Verse Chorus form	Type of structure in a pop song: Introduction, Verse, Chorus, Middle 8, Pre Chorus, Outro
12 Bar Blues	Type of structure found in Blues Music: 12 bars long, Using chords 1,4 and 5. Lyrics are structured as 3 lines: A A B

Instruments of the Orchestra

Keyword	Definition
Instrument	An object that makes a musical sound
String Family	Violin, Viola, Cello, Double Bass, Harp
Woodwind Family	Flute, Clarinet, Oboe, Saxophone, Bassoon
Percussion Family	Anything you hit or shake: Drum, Glockenspiel, Triangle, Tambourine
Brass Family	Trumpet, Trombone, French Horn, Tuba
Conductor	The person in charge of the Orchestra – leading them from the front
Orchestra	A group of musicians playing together – containing woodwind, strings, brass and percussion

Blues 1: Keywords

Keyword	Definition
Scat	Using your voice as an instrument in order to
	sing without lyrics
Syncopation	Off-beat rhythm
Improvisation	Making music up on the spot
Blues Scale	A particular scale (pattern) of notes used in
	Blues music
Blue Note	A flattened note on the $3^{\rm rd}$ or $7^{\rm th}$ of the scale
12 Bar Blues	The chord structure used in Blues music
Chord	Two or more notes played at the same time
	in one part
Walking Bass	A Bassline that moves at a moderate pace
	usually stepwise up or down the scale
Call and	A song style in which the leader sings a call
Response	and the rest of the group responds

Keyword	Definition
Work Song	A song that was sung by slaves in order to
	promote faster work
Spirituals	Songs sung by slaves with themes of
	yearning for freedom, to be lifted out of
	suffering and the belief that a higher power
	will help a person persevere in tough
	times.
Ostinato	A repeated pattern – usually a rhythm or
	bassline
Slave	Someone 'owned' by someone else: often
	forced to work against their will for little/no
	money
Swing Rhythm	The first bit of the beat is longer as it steals
	time from the second bit to give the music a
	swinging feel.

The Classical Era: 1750-1810

Keyword	Definition
Concerto	Solo instrument plus an orchestra
Symphony	Played by a full orchestra
Sonata	Piece for solo instrument (either solo piano
	or solo instrument with piano
	accompaniment)
Cadence	Mark the end of a phrase
Perfect	The music sounds 'finished': Chord V –
Cadence	Chord I
Imperfect	The music doesn't sound quite 'finished':
Cadence	The phrase ends on chord V
Interrupted	The music sounds definitely not finished -
Cadence	like its been stopped midway – Ends on
	chord VI
Diatonic	Harmony (chords) that belong to the key
Harmony	
Chromatic	Notes that do not belong to the Key
Notes	

Keyword	Definition
Major	A more 'happy' sounding key
Minor	A more 'sad' sounding key
Phrase	Short section of music where the melody
	seems naturally to fall. Sometimes this is 4
	bars, but shorter and longer phrases occur.
	Sometimes a phrase may be contained within
	one breath
Homophonic	A type of texture: Where all the parts move
Texture	in block chords
Homophonic	A type of texture: Where there is one melody
Texture: Melody	with a simple accompaniment
plus	
accompaniment	
Polyphonic	A type of texture where there are lots of
Texture	interweaving melodies

Year 8 Music

The Classical Era: 1750-1810

Family	Instruments
String Family	Violin, Viola, Cello, Double Bass, Harp
Woodwind Family	Flute, Oboe, Bassoon,
Percussion Family	Timpani, Triangle, Bass Drum, Snare Drum
Brass Family	Trumpet, Trombone, French Horn, Tuba
Conductor	The person in charge of the Orchestra – leading them from the front

Facts
Important Composers: Beethoven, Mozart, Haydn
Classical melodies have a clear and simple structure – often
with balanced phrases
Balanced Phrases are where the music sounds like there is a
question and then an answer
Classical texture is often homophonic – melody plus
accompaniment
Tempo in classical music will rarely change – one speed
throughout
Harmony in classical music is normally diatonic (this means
there are not too many surprising notes and chords)

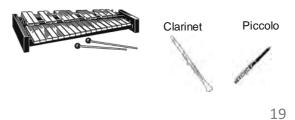

Programme Music: From the Romantic era 1810 - 1900

Keyword	Definition	
Programme Music	Music that that is intended to evoke images or	
	convey the impression of events	
Motif	A recurring theme or idea	
Pedal Note	A note that is held down or repeated over and over	
	again	
Cluster Chord	Several notes played together as a chord	
	deliberately designed to make a "clashing"	
	dissonant sound	
Ascending Melody	Notes get higher in pitch	
Descending Melody	Notes get lower in pitch	
Conjunct Melody	Melody moves in step	
Disjunct Melody	Melody jumps around – does not move in step	
Major Tonality	The music sounds 'happy'	

Keyword	Definition
Minor Tonality	The Music sounds 'sad'
Chromatic	Notes that are sharpened or flattened and do not
	belong to the key- often used for expressive
	purposes
Thick Texture	The music sounds 'big' and 'busy' – lots of
	instruments playing different things
Thin Texture	There is only one thing happening in the music -
	even if there are lots of instruments playing
Important	Chopin, Saens Sans, Rachmaninov, Tchaikovsky
Composers	

New instruments were added in this era

Glockenspiel (metal) Xylophone (wooden)

Year 8 Music

Popular Song

Keyword	Definition
Verse	A part of the song that tells the story and has
	different words but the same melody each time it
	is heard
Chorus	A part of the song that is repeated with the same
	words and melody each time it is heard
Middle 8	A section in the middle of the song that is usually 8
	or 16 bars long and introduces a different melody.
	It can also be instrumental.
Introduction	A short section of music which opens the song and
	sets the tone and speed which are to follow
Outro	The section of the song that allows it to fade or
	end in style
Pre-	A short section which connects the verse and the
Chorus/Bridge	chorus
Hook	A short riff or passage near the beginning of the
	song designed to capture the ear of the listener

Keyword	Definition
Lyricist	The person responsible for writing the lyrics
	(words) to the song
Chord	The repeated chords that you find in a song –
Sequence	lots of songs use the same 4 chords over and
	over again
Loops	A pre recorded sample that can be repeated
	over and over again
Sample	A piece of pre-recorded sound used in a song
Cover	Taking an existing song and making it your own –
	doing it your way
Acapella	Singing with no accompaniment

Year 8 Music

Film Music

Keyword	Definition
Ostinato	A repeated pattern
Pedal note	A repeated note – normally in the bass – either repeated or held down
Leitmotif	Musical theme which is used to represent a specific character
Dissonant	Harmony that is not pleasing to the ear – notes clash " the harmony is dissonant"
Underscore	The music in a film that you do not always notice – it builds up the atmosphere.
Diegetic sound	Sound or Music that belongs in the scene: e.g. someone turns on a radio and you hear music.
Non-Diegetic sound	The music is in a scene and the characters can't hear it – it doesn't belong – you can't see it being played
Through Composed	A song structure that is composed from beginning to end without any particular repetition of sections
Cluster Chord	Several notes played together as a chord deliberately designed to make a "clashing" dissonant sound
Thick Texture	Lots of instruments playing lots of different things – very busy
Thin Texture	It doesn't matter how many instruments are playing – they are all playing the same thing
Monophonic Texture	Only one thing is being played – one sound
Polyphonic Texture	Lots of interweaving melodies
Ascending melody	The melody gets higher in pitch
Descending Melody	The melody gets lower in pitch

Musical Theatre

Keyword	Definition
Solo	One person singing a song by themselves (accompanied by the band/orchestra)
Duet	Two people singing a song (accompanied by the band or orchestra)
Chorus	A large group of the cast singing together
Recitative	Rhythmically free piece of singing that mirrors speech – normally not very melodic (on one or two notes) you wouldn't class it as a 'song' – it moved the musical on – normally in sung through musicals
32 Bar Song	A type of structure – AABA – each section is 8 bars long
Verse chorus structure	A type of structure a bit like a pop song with verses and choruses
Sung through	A type of musical where there is no spoken dialogue
Word Painting	When the music matches what the words are singing about
Syllabic	One Syllable per musical note
Key Composers	Rodgers and Hammerstein, Bernstein, Lin Manuel Miranda, Kander and Ebb, Andrew Lloyd Webber
Overture	Piece of music at the start of the musical – normally plays through the key melodies you will hear in the musical

20th Century Music and Minimalism

Keyword	Definition
Ostinato	A repeated pattern
Sample	A recording of music/sounds which is used in another piece of music
Loops	Music is made up of loops – repeated sections of music
Additive Melody	Notes are gradually added to the loop each time it is repeated.
Metamorphosis	Tiny changes are made to a note or one bit of the rhythm each time it is repeated
Phase Shifting	Two or more performers start with the same pattern. On each repeat of the loop one of the performers adds or takes away a rest or a note – this changes the length of their loop so they go out of sync with each other.
Polyrhythm	More than one rhythm at a time
Aleatoric Music	Music that happens by chance
Graphic Score	Shapes and images tell the performer what to play
Experimental Music	Composers explored how music could be made in different ways – e.g. new ways of playing instruments
Diatonic Harmony	Harmony that belongs to the key it doesn't sound strange!
Steve Reich	Composer – born in 1936 – influenced by Gamelan and African Music. Wrote 'Different Trains' – reaction to the Holocaust using samples of people talking about train journeys Wrote Clapping Music

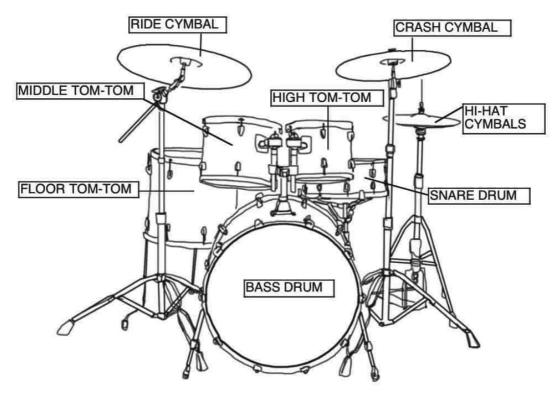

Musical Fusion: Reggae

Keyword	Definition
Mento	Jamaican folk music that emerged in the 1940s and 1950s. Characterised by the fusion of European and African traits, with origins in enslaved work songs – created with guitar, rumba box, bongo and banjo, Mento mixed this with satirical lyrics of everyday life and verse repetition, creating a foundation from which reggae would blossom.
Ska	Fast dance music that emerged in the 1950's fusing American R&B with Mento rhythms and featuring Electric Guitars, Jazzy Horn Sections and characteristic Offbeat Rhythms.
Rocksteady	A more vocal style of dance music which used riffs, simple harmonies, offbeat rhythms and a strong bass line.
Offbeat	Emphasising beats 2 and 4 rather than beats 1 and 3
Pentatonic scale	5 Note scale
Rastafarian	Type of religion that influenced Reggae. Lyrics of reggae songs are strongly influenced by Rastafarianism and are often political including themes such as love, brotherhood, peace, poverty, antiracism, optimism and freedom.
Slow Tempo	Slow speed – characteristic of reggae
Syncopated bass riff	Bass guitar plays a short section of music – which repeats throughout
Call and response	Similar to a "Question and Answer" often the call sung by the lead singer and answered by the backing singers or instruments (the response) – musical dialogue.
Key instruments	Lead singer, Backing singers, Electric Guitars, Drum kit, Bass guitar, Brass section (trumpets and trombones) Saxophones
Key performers	Bob Marley,

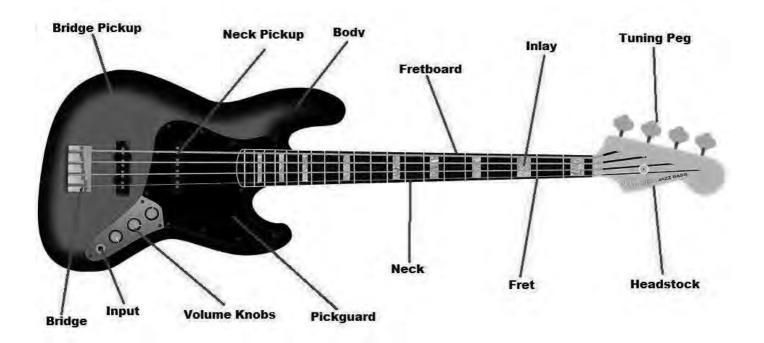

Popular Music

Keyword	Definition
Genre	The term we give to a particular style of music e.g., Rock 'n' Roll or Motown
Power Trio	A combination of three musicians – drums, electric bass and electric guitar. The guitarist will often be the singer too.
Sample	A piece of pre-recorded sound used in a song
Rock 'n' Roll	Up-tempo music that started in the 1950s (Elvis Presley, Buddy Holly, Chuck Berry) and spread mainly by radio and vinyl recordings
Motown	Upbeat, often pop-influenced style of rhythm and blues associated with black vocalist since 1959, characterised by compact danceable arrangements.
Rock	Electric guitar based music stemming from Rock 'n' Roll and The Blues. There are many sub genres.
Disco	A style of pop music intended for dancing to. Typically soul influenced and melodic, with a 4 to the floor drum beat and often a driving and intricate bass line
EDM	Popular music intended for dancing to in clubs typically having a 4 to the floor beat. All electronic.
Hip Hop and Rap	Hip-hop, cultural movement that attained widespread popularity in the 1980s and '90s; also, the backing music for rap, the musical style incorporating rhythmic and/or rhyming speech that became the movement's most lasting and influential art form.
Grunge	Grunge is an alternative rock genre and subculture that emerged during the mid-1980s. Grunge fuses elements of punk rock and heavy metal, but without punk's structure and speed. The genre featured the distorted electric guitar
Brit Pop	Britpop, movement of British rock bands in the 1990s that drew consciously on the tradition of melodic, guitar-based British pop music established by the Beatles.

Contents

1. 4 stages of a warm up and benefits 10. Dodgeball Stages of the warm up examples 11. Hockey 2. 3. Components of fitness 12. Football Aerobic and anaerobic respiration 13. Gaelic football 4. Training methods 14. Fitness 5. Muscle location 15. Volleyball 6. Netball 16. Handball 7. 17. Athletics Basketball 8. 9. Trampolining 18. Rounders

Year 7

Warm up – 4 Stages

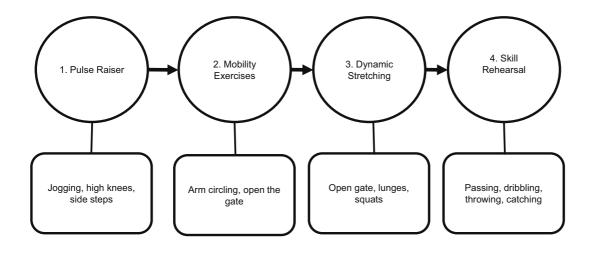

1. Pulse Raiser	Raising the heart rate through running, jogging or swimming
2. Mobility	Moving your joint through a full range of movement (circling arms)
3. Dynamic stretching	Stretching whilst moving e.g. lunges, open the gate or close gate at hip joint
4. Skill Rehearsal	Practise a skill to be used in the activity e.g. passing a ball

Benefits of a warm up

Warm up muscles – makes them ready for exercise Increase body temperature – helps with oxygen transfer Increase heart rate – increases blood flow to deliver oxygen Increase flexibility of muscles and joints – increases range of movement Increase pliability of ligaments and tendons – increases movement Increase blood flow and oxygen – to help supply working muscles with oxygen Increase muscle speed contractions – help to improve performance

Stages of the warm up with examples

The 4 stages of the warm up showing examples of what you might do at each stage.

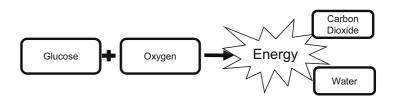

Year 9

Components of fitness

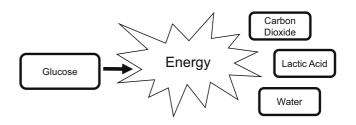

Components of fitness	Definition/Explanation	Sporting examples
1. Strength	Muscles working against a resistance	A Rugby player holding position in a scrum, pushing back against the resistance.
2. Power	Performing any skill which requires strength at speed Speed x strength	A Sprinter exploding out of the blocks with speed and strength to get the best possible start to the race.
3. Agility	Ability to move and change direction quickly under control	The Rugby player changing direction by side stepping to avoid being tackled.
4. Balance	Ability to maintain an upright or stable position	The Gymnast holding the handstand in a stable position on the beam.
5. Flexibility	Ability to move joints through a range of movement	The Goalkeeper diving to stretch and save the ball in the corner of the goal.
6. Muscular Endurance	Ability to keep the muscles working repeatedly	The long distance runner who can keep their muscles working at a high intensity at the end of a race.
7. Cardiovascular Endurance	Ability of the heart, lungs and the blood vessels to get oxygen to the muscles	The Cyclist who can supply the oxygen needed to work at a high intensity for a long period of time.

Year 9 Aerobic and Anaerobic

Aerobic	Using oxygen to perform exercise at a low steady rate
	For example working at low intensity jogging, cycling, swimming, rowing
Anaerobic	Performing physical activity without oxygen at a high intensity and usually for less than 60 seconds
	For example sprinting, lifting heavy weights
Maximum heart rate	Calculated by 220 - age
	For example a 14 year old would be
	220-14 = 206bpm

Aerobic Training zone = 60%-80% of Maximum heart rate

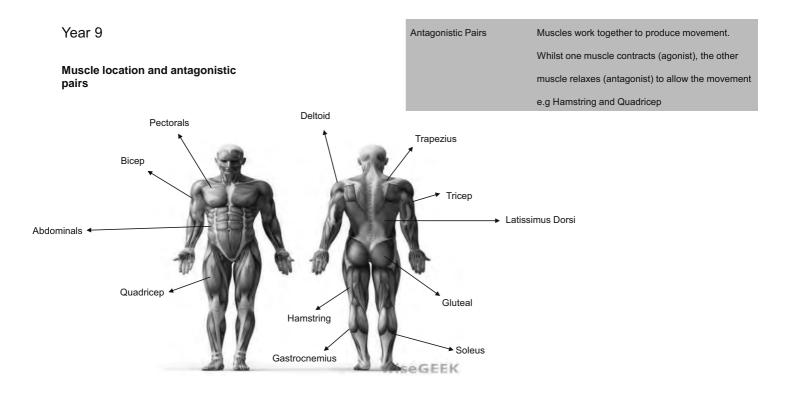

Anaerobic Training zone = 80%-95% of Maximum heart rate

Year 9

Training methods

Training Method	Explanation	How is used by the athlete.
1. Continuous training	Exercising the entire body for at least 20 mins could be jogging, swimming or cycling without taking a break.	Used by endurance based athletes wanting to improve their ability to work for longer.
2. Fartlek training	Running at different speeds over a set route e.g. run, sprint, jog , walk	Used by games players as this replicated the game conditions.
3. Interval training (Long or short)	Working for periods and resting for periods	Can be aerobic or anaerobic depending on long or short. Used by athletes wanting to improve their speed over short or long distances.
4. Plyometric training	Doing activities that involve repeated exercise that include bounding, jumping and hoping	Used by athletes wanting to improve Power – for example it is good for Basketball players to improve their jumping.
5. Circuit training	Doing set exercising at stations with periods of work and periods of rest. E.g. press ups, step ups, skipping	Can be set up to work on many different aspects of fitness so a very versatile method used by anyone.

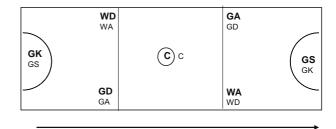

Netball

Rules

- 1. The centre pass must be caught in the centre third
- You cannot make physical contact with another player if you do a penalty pass is awarded
- You have to be a metre away from the player when defending the ball
- No part of your foot should be on or over the line when taking back line and side-line passes

Playing Positions

8

Key Terms

Basketball

Rules

- 1. You can only dribble using one hand
- You cannot dribble the ball pick it up and then dribble the ball again (double dribble)
- You have 24 seconds to shoot before the ball is handed over to the opposition.
- 4. You have 8 seconds to get the ball over half-way
- 5. Cannot stand in the key for more 3 seconds

Three point line	Any shot scored from behind the three point line is awarded 3 points
Full court press	Marking the ball and all players high up court
Half court defence	Dropping off and marking in your own half
Screen	An offensive player stands still in front of a defender to create space for a team mate.

Year 9

Trampolining

Key Terms

Seat landing	Landing on your bum on the bed
Back landing	Landing on your back on the bed
Front landing	Landing on your front on the bed
Swivel Hips	Landing on your bum twisting your hips and landing on your bum again facing the opposite way

Front somersault	Rotating forwards performing a forward roll in the air and landing on your feet
Back somersault	Rotating backwards performing a backward roll in the air and landing on your feet
Cradle	A back landing rotate 180° and back land
Turn table	A front landing rotating 180° and front landing

Dodgeball

Rules

- 1. You can hit someone below the neck
- 2. The ball must hit them without bouncing of the floor or wall
- You can catch the ball to get the person who threw the ball out and bring in a team mate who was out
- 4. You can use a ball to block other balls being thrown at you
- 5. Winning team is the team who gets everyone out on the opposition

Key Terms	
Dodge	Moving out the way of the ball to avoid being hit
Face shot	Being hit in the face so it does not count as an elimination (being out)
Block	Using a ball to block another ball being thrown at you to avoid being hit
Buddy up	Pairing up with a team mate to target a player on the other team

10

Year 9

Hockey

Rules

- 1. You cannot use the back of your stick (the rounded part)
- 2. A free pass can be taken to yourself or passed
- 3. A short corner is awarded for a foul inside the D
- 4. You must back away 5 yards from the ball when a free pass is taken
- The ball cannot be played straight into the D from a free pass in the attacking 25 it must move 5 yards first

Key terms

Free Pass	Awarded when a foul has been committed in open play
Stick Tackle	A tackle made where the stick is hit before the ball
16 yard hit	A free hit taken level with top of the D and in line where it went off the back line – defending team ball
Long corner	When the ball is hit out by defender off the back line a long corner is awarded
Short corner	Awarded to attacking team if the defending team commit a foul in the D

Football

Rules

- If the ball hits the referee and goes to the opposition team, a drop ball will take place.
- 2. If you accidently handball the ball and score, the goal will not count.
- When an attacking team have a free kick, no attacking players are allowed within one yard of the wall
- 4. You cannot score a goal directly from a throw in
- 5. When taking a penalty you can pass the ball forward to a teammate to kick as long as your teammate was outside the penalty area when the penalty kicker first kicked the ball.

Key Terms	
Foul	When the rules are broken and the other team gain possession
Indirect freekick	You cannot shoot at goal, the ball must be touched by another player before it enters the goal
Drive pass/shot	The action of kicking the ball low so it travels along the ground towards a teammate or goal.
Cover and balance	When defending and a player moves forward on one side, the players shuffle across to that side to provide cover for the defender and balance to the defensive line

12

Year 9

Gaelic Football

Rules

1. You cannot bounce the ball twice in a row unless you have not

caught the ball.

2. You must lift the ball from the ground using a crouch lift using your

foot to move the ball into your hands.

3. You cannot charge someone in the front or back when they are

attempting to catch the ball

 If you have one foot on the ground you can shoulder-to-shoulder charge someone unless they are kicking the ball.

5. The goal posts are H shaped, you get one point for scoring above

the cross bar and three points for scoring in the goal below.

Key Terms

Kov Torme

Hook kicking	The act of kicking the ball across your body out of your hands.
Crouch lift	The skill used to regain possession of the ball from the ground by kicking it into your hands.
A free	A free is a free kick awarded for the opposition team breaking one of the rules
Man-to-man marking	The most common way to mark an opponent in Gaelic football, similar to netball where you stick with one player and mark them throughout the game.

Fitness

Key Terms

Heart rate	How many times your heart beats per minute (BPM)
Working heart rate	Your heart rate when you are exercising or immediately fast exercise
Recovery heart rate	Your heart rate after you have stopped exercising usually taken every minute after exercise for 5 minutes
Speed	How fast you move a body part of yourself

Burpee	An exercise done by being in your hands and
	feet jumping in and out then jumping upward on
	your feet
Squat	Feet shoulders width apart and using you gluteal
	to lower you body down through bending your
	knees approx. chair height
Press up	Body weight on your hands and feet lying
	horizontal. Lifting your body weight up and down
	through bending you arms and keeping body
	flat

14

Year 9

Volleyball

Rules

- 1. Maximum of 3 hits per side
- 2. The same player cannot hit it twice in a row
- 3. You cannot hold, catch or throw the ball
- 4. Balls may be played off the net, apart from the serve
- 5. Serve must be played from behind the back line

\$~_____

Key Terms

Volley / Set	A shot played above the head using two hands
Dig	A shot played underarm to give the ball height
Serve	A shot played to start the game either underarm or overarm
Smash / spike	A shot played after a set to put the ball hard and fast over the net in a downwards motion

Rules

- 1. You are only allowed to take 3 steps with the ball
- 2. You can only dribble the ball with one hand at a time
- 3. You can only block the ball not take it off an opponent.
- 4. When defending you must be square in front of the attacker
- You can land in the area when you shoot as long as you release the ball outside of the shooting D

2	R	2	
6	L	\mathcal{M}	١
	Ю	Y	ł
2	3	D	ì

Key Terms

Court player	A player who plays on the court – does not include the goalkeeper
Free throw	A free pass where the defender must be 3 metres away from where the foul occurred
Penalty throw	A direct shot at goal 7 metres from the goal
Corner throw	When attackers throw the ball in from the corner of the pitch if the defending team have knocked the ball off the back line.

Year 9

Athletics

Key Terms

Sprint	You start sprint events e.g. 100m , 200m, 400m, and
Start	4x100m relay in a crouched position
Foul	When your foot is over the line when you take off in
Jump	long jump, so the jump is not measured
Foul	If any part of your body touches or goes over the
throw in	line when you are throwing
Javelin	If the javelin does not land tip first
	The throw is not measured

Foul throw	If you walk out of the front of the circle after throwing or if
in shot putt	any part of your body comes out of the throwing circle
	during your throw
Foul in	If you take off two footed or knock the bar off whilst you
High Jump	are on the matt
ngn sump	
Track	100m, 200m, 400m 1500m, 800m, hurdles, steeple
events	chase any event ran around the track
Field	Shot putt, javelin, discus, high jump, long jump, pole
events	vault, hammer throw. Any event that is not running
	around the track

Rounders

Rules

1.The ball must be bowled above the knee and below the head

and must not be wide or at the body

 $2.1\!\!\!/_2$ a rounder is scored if you hit the ball and make it to the

second post

3.1 rounder is scored if you hit the ball and make it around all

bases ensuring you touch fourth post as you pass it

4.If you hit the ball behind the battling line you have to wait at

first post until the ball travels back over the line
